The 2020-2021 CU Denver catalog is considered the source for academic and programmatic requirements for students entering programs during the Fall 2020, Spring 2021, and Summer

2021 semesters. Although this catalog was prepared using the best information available at the time, all information is subject to change without notice or obligation. The university claims no responsibility for errors that may have occurred during the production of this catalog.

The courses listed in this catalog are intended as a general indication of the University of Colorado Denver curricula on the Denver campus. Courses and programs are subject to modification at any time. Not all courses are offered every semester, and faculty teaching particular courses or programs may vary from time to time. The content of a course or program may be altered to meet particular class needs.

Previous editions of this catalog are available [online](#).

The University of Colorado Denver is an affirmative action/equal opportunity employer and educator committed to excellence through inclusiveness.

## ABOUT CU DENVER

### **Welcome to Colorado's public urban research university,**

where a diverse student body through quality academics, ambitious research and creative work, and community engagement in the city we call home. We are CU in the city.

Your success is our #1 priority. At CU Denver, you will benefit from:

**Academic choices:** More than 100 high-quality, in-demand degree programs in seven schools and colleges, leading to bachelor's, master's and doctoral degrees; hands-on learning opportunities, including work in research labs, service learning, study abroad and work-study;

**Powerful connections:** To partnerships, projects, internships and career opportunities in downtown Denver; to the vibrant arts and culture scene at our front door; and to a network of influential alumni who are leaders in Denver's civic, nonprofit and business communities;

**Outstanding location:** Access to a vibrant, safe urban lifestyle; resources and support to develop innovative solutions to complex local and global issues; and opportunities to build your skills in the city ranked by Forbes as the #1 Best Place for Business and Careers.

CU Denver is a place of academic excellence, where you will gain the powerful combination of immersive classroom and project-based experiences that are in demand today. Here you will meet gifted faculty, experts in their field, dedicated to student success, academic excellence and the real-world applications of their research and creative work. You'll interact with fellow students who are diverse, goal-oriented and energetic. Whether you engage in undergraduate or graduate studies, the University of Colorado Denver degree earns global respect and you can be confident that you will have been well-prepared for the next stage of your work or academic life.

We're delighted you've chosen CU Denver!

Dorothy A. Horrell, PhD  
Chancellor

## **Executive Team**

### **Dorothy A. Horrell, PhD**

Chancellor, University of Colorado Denver

*BS, Colorado State University*

*M.Ed, Colorado State University*

*PhD, Colorado State University*

### **Roderick Nairn, PhD**

Provost and Executive Vice Chancellor for Academic and Student Affairs

*BSc, University of Strathclyde (Scotland)*

*PhD, University of London (England)*

### **Jennifer Sobanet**

Vice Chancellor for Administration and Finance, CU Denver

*BS, Marshall University*

*MA and MBA, University of Pennsylvania, The Wharton School*

### **Alana C. Jones**

Interim Vice Provost and Senior Vice Chancellor for Student Access and Achievement

### **Melisa Baldwin**

Vice Chancellor for Advancement, CU Denver

*BA, University of West Florida*

*M.Ed., University of West Florida*

**Karen Klimczak**

Interim Vice Chancellor for University Communications

*BS, Georgia Institute of Technology*

*MBA, Arizona State University*

**Thomas Flaig, MD**

Vice Chancellor for Research

*BA, Saint John's University (MN)*

*MD, University of Minnesota Medical School*

**Nelia Viveiros, EdD**

Interim Vice Chancellor for Diversity and Inclusion

*BA, Temple University*

*MSc, London School of Economics (England)*

*JD, University of London (England)*

*EdD, University of Colorado Denver*

## University of Colorado Denver

The University of Colorado Denver was formed on January 11, 1973, lawmakers, upon proclamation of the governor, amend that state constitution to establish additional CU campuses, transforming the University of Colorado - Denver Center into the University of Colorado Denver (CU Denver). In 1977, CU Denver students began taking classes on the Auraria campus. Today, CU Denver educates more than 15,000 students and is the only public urban research institution in the state of Colorado.

The University of Colorado Denver offers a unique academic experience for students. Conveniently located in the heart of Denver, our students have unparalleled access to the business, cultural and political capital of the West. CU Denver is where academic rigor meets city vigor.

More and more undergraduates are discovering the value of classes in the city taught by professors who are connected to local companies and organizations. New housing adjacent to campus, easy commuting by RTD Light Rail and discounts to cultural and sporting events give students many options for immersion in vibrant city life. In addition, affiliations with research labs and hospitals at CU Anschutz make CU Denver an excellent place to start a health care career.

The University of Colorado Denver enrolls students from 46 different states and countries, and awards over 3,800 undergraduate and graduate degrees every year. It is known for its programs in urban sustainability, criminal justice, business, education, applied science and engineering, film and music industry as well as a full array of professional health programs. The graduate student population is a diverse mix of ages and ethnicities, creating a rich environment for learning and networking.

Other reasons why students choose the University of Colorado Denver:

**Small class sizes:** average undergraduate student-to-teacher ratio is 18:1.

**The Denver vibe:** Colorado has always attracted the adventurous. Denver ranks as #1 Best Place to Live (U.S. News & World Report), with an extensive network of bike trails and quick access to mountain sports. CU Denver is adjacent to a thriving arts district.

**Collaborative culture:** Cross-disciplinary learning and research is a core value: programs blend technology with health care, business with public policy, and behavioral health with architecture.

**Choices:** With seven schools and colleges offering more than 100 degree programs, the University of Colorado Denver | Anschutz Medical Campus is a major university for the coming century.

## CU Denver

Colorado's only public urban research university, CU Denver offers bachelor's, master's and doctoral programs in the heart of the city through seven distinct academic units:

- College of Architecture and Planning
- College of Arts & Media
- Business School
- School of Education & Human Development
- College of Engineering, Design and Computing Course
- College of Liberal Arts and Sciences
- School of Public Affairs

## Strategic Priorities

Chancellor Dorothy Horrell has established five strategic priorities to guide CU Denver's ongoing success. Through these priorities, CU Denver aims to be widely recognized as a distinctive asset in the Denver metropolitan area based on quality academics, highly-recognized research and creative work, a diverse and inclusive culture, and impactful civic engagement. The five strategic priorities are as follows:

1. **Student Success.** Our goal is to elevate student success through increased enrollment, retention and graduation rates.
2. **Scholarly Excellence.** We are focused on advancing scholarly excellence and innovation in teaching, research and creative work.
3. **Community Asset.** We are working towards strengthening our position as a vital community asset.
4. **Inclusive Culture.** We are committed to creating a more cohesive, collaborative and inclusive culture.
5. **Financial Sustainability.** Our objective is to achieve long-term financial sustainability and stability.

Faculty, staff and students across the campus have been working on various aspects of these priorities since they were first set in fall 2016. Learn about progress on each priority by clicking on the links above.

The priorities emerged from Chancellor Horrell's 2016 Reach Out and Listen Tour, a series of collaborative forums and meetings with faculty, staff, students and community members that established a shared vision for the future of CU Denver.

## University of Colorado System

The University of Colorado is a system of four campuses located in Boulder, Colorado Springs, Denver and Aurora. With combined total enrollments of over 60,000 students, the University of Colorado system consistently ranks in the top 15 among public universities and colleges in overall research expenditures and seventh among public universities in federally funded research. Awards for research within the system total more than \$920 million, with funding provided by federal agencies, appropriations from the state of Colorado and private foundations and donors.

## Board of Regents

**John Carson**  
District 6  
*term expires 2021*

**Glen Gallegos, Chair**

District 3

*term expires 2025*

**Heidi Ganahl**

*term expires 2023*

**Irene C. Griego, Vice Chair**

District 7

*term expires 2021*

**Chance Hill**

District 5

*term expires 2025*

**Jack Kroll**

District 1

*term expires 2023*

**Lesley Smith**

At Large

*term expires 2025*

**Sue Sharkey**

District 4

*term expires 2023*

**Linda Shoemaker**

District 2

*term expires 2021*

## **History and Evolution of the University of Colorado Denver**

1876 Legislature founds the University of Colorado

1883 Medical department opens with two students

1898 CU establishes School of Nursing

1912 CU organizes the Department of Correspondence and Extension in Denver

1913 CU establishes School of Pharmacy

1925 CU dedicates 9th and Colorado Blvd. medical center

1956 Regents purchase Tramway Building for Extension Division

1965 Regents change extension name to University of Colorado-Denver Center

1972 CU-Denver Center changes name to University of Colorado at Denver

1973 School of Dentistry enrolls its first class; state begins building Auraria Campus

1974 CU reorganizes as a four-campus system

1988 CU-Denver moves into the 257,000 square-foot North Classroom Building on the Auraria Campus

1992 School of Pharmacy moves from Boulder to Health Sciences Center

1995 Government conveys 217 acres at the Fitzsimons Army Base to CU for modern health sciences facility

2000 First new and remodeled facilities open at Fitzsimons

2004 Regents consolidate CU Denver and Health Sciences Center to form the University of Colorado at Denver and Health Sciences Center

2006 Fitzsimons campus renamed Anschutz Medical Campus

2007 Regents approve shortened version of the name: University of Colorado Denver

2008 Medical, dental, pharmacy and nursing students start classes, Colorado School of Public Health enrolls first students on the Anschutz Medical Campus

2011 Regents approve name change, to University of Colorado Denver | Anschutz Medical Campus

## Accreditation

The University of Colorado Denver is institutionally accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

The commission can be contacted at:

230 South LaSalle Street, Suite 7-500

Chicago, IL 60604

**Telephone:** 1-800-621-7440

Many professional organizations have also granted accreditation to specific academic programs, colleges and schools at the Denver Campus, including:

- Accreditation Board for Engineering and Technology
- Association for the Advancement of Collegiate Schools of Business-International
- Colorado State Board of Education
- Commission on Accreditation of Healthcare Management Education
- Council for Accreditation of Counseling and Related Educational Programs

- Council for the Accreditation for Educator Preparation
- Landscape Architecture Accreditation Board
- National Architectural Accrediting Board
- National Association of Schools of Music
- National Association of Schools of Public Affairs and Administration
- Planning Accreditation Board

## **Academic Programs**

CU Denver is devoted to the needs of the residents of the city and the region. A solid foundation of academic and general education is assured through a comprehensive core curriculum. Students may pursue graduate education through all of the campus' colleges and schools. Pre-professional training in the fields of education, architecture, law, journalism and health careers is also available. Complete listings of areas of study available on the Denver Campus are available in the Programs section of the catalog.

The colleges and schools sections of this catalog provide information on bachelor's, master's and doctoral degree programs, policies on requirements for graduation, course requirements, course-load policies, course descriptions and similar information.

## **Continuing and Professional Education**

The Division of Continuing and Professional Education offers certificate/certification courses, professional development programs, precollegiate outreach programs and personal enrichment courses across the state of Colorado. Courses are offered in a variety of formats, including traditional on-campus, off-campus, online, hybrid, weekend, evening, short and condensed courses and many others.

Registration and tuition vary by school or college. Contact the specific school or college to learn about current program and course offerings or send an inquiry to [continuingeducation@ucdenver.edu](mailto:continuingeducation@ucdenver.edu).

## **About Our Students**

The diversity of our student body is a source of deep pride. With students of color making up 42 percent of the student body, CU Denver is the most diverse research university in Colorado. Classes are filled with traditional students who enrolled after high school as well as transfer students and those who delayed college entry. Many professionals enroll mid-career to retool and strengthen their skills. The average age of an undergraduate student is 23 years while the average graduate student is 31 years old.

Bringing a rich mix of backgrounds, students travel across the country and the world to attend CU Denver. Domestic students come from 48 states and international students from 68 countries. All take advantage of convenient courses at times that meet their schedules.

An enviable student-to-faculty ratio of 18:1 and a high-tech advising platform means students receive focused attention from professors and a clear path to graduation.

## **Related Organizations**

### **CU Denver Alumni**

**Mailing Address:** 1380 Lawrence Street Center, Suite 1201, Denver, CO 80204 (*mailing and physical*)

**Telephone:** 303-315-2333

**Fax:** 303-315-2063

**E-mail:** alumni@ucdenver.edu

**CU Denver Alumni** is the formal name for our community of former students including over 94,000 graduates from any of the University's undergraduate, graduate, and certificate programs. While 69% of our graduates stay in Colorado, our global community stretches across 103 countries.

CU Denver Alumni advances the University of Colorado Denver through its graduates by inspiring pride, serving as a gateway for career resources, stimulating investment in the future, and illustrating the impact of alumni contributions to the University and each other.

**CU Denver Alumni Relations** sponsors activities and programs to benefit and engage alumni, current students, and friends of the university. By fostering loyalty among our alumni and providing opportunities for involvement, CU Denver Alumni Relations facilitates an environment in which alumni can establish life-long contact with their alma mater.

### **University of Colorado Denver - Office of University Advancement**

**Mailing Address:** 1380 Lawrence Street, Suite 1201, Denver, CO 80204

**Telephone:** 303-315-3601

**Fax:** 303-315-2063

**Email:** advancement@ucdenver.edu

The University of Colorado Denver Office of Advancement collaborates with faculty, staff, donors, alumni, and friends to raise private support for the university.

CU Denver academic leadership establishes priorities for private support, and gifts are directed to the specific schools, program, or purpose that the donor designates. CU Denver Advancement staff identify and/or generate interest in the university, assist donors in gift planning, solicit gifts in collaboration with academic partners and leaders, and establish and maintain relations with alumni. (Gift funds are managed and invested by the partner University of Colorado Foundation, which also manages the university endowment).

These gifts endow scholarships and professorships, further research, enrich academic programs, upgrade and construct facilities, and support projects and programs in all areas of the university.

## **University Quick Facts**

### **CU Denver Quick Facts**

#### **Enrollment**

- 14,947 students
- 74% undergraduate, 26% graduate/professional
- 73% full-time students
- 85% from Colorado
- 15% nonresident students of which 7% International students from 65 different countries
- 45% male, 54% female
- 44% of new undergraduate students are transfers
- 38% of CU Denver students are Pell recipients

#### **Student-to-Faculty Ratio:**

- 18:1

#### **Diverse Population:**

- 48% of undergraduates are students of color
- 52% of all new enrolled students are students of color
- Average age of undergraduate students: 23
- Average age of graduate students: 31
- Students from 48 states and DC and 65 countries

#### **Average entering ACT score:**

- 23.2 Composite

#### **Average entering SAT score:**

- 554 Math
- 559 Verbal

#### **Average high school GPA:**

- 3.5

## **Schools and Colleges on the CU Denver Campus**

College of Architecture and Planning  
College of Arts & Media  
Business School  
School of Education & Human Development  
College of Engineering, Design and Computing  
Graduate School  
College of Liberal Arts and Sciences  
School of Public Affairs

### **Programs**

More than 100 degrees and programs across seven schools and colleges

### **Degrees**

- Bachelor's
- Master's
- Doctoral
- First professional

### **Most-enrolled Undergraduate Degree Programs:**

- Biology
- Psychology
- Music
- Fine Arts
- Architecture

### **Most-enrolled Graduate Degree Programs:**

- Business Administration
- Public Administration
- Counseling
- Information Systems
- Architecture

### **Research Funding**

More than \$400 million in sponsored research annually

### **Alumni**

- 100,000+ alumni
- 71% live in Colorado

## **National Rankings**

### **US News and World Report 2019:**

- #112 among Top Public Schools
- #87 in graduate clinical psychology programs
- #69 in graduate biomedical engineering programs
- #28 in graduate healthcare management programs
- #25 among graduate public affairs programs
  - #11 in environmental policy and management
  - #21 in nonprofit management
  - #23 in public management and leadership
- #134 in online graduate education programs
- Among top public schools
- #48 for part-time MBA programs
- #52 for graduate statistics programs
- #78 for graduate mathematics programs
- #78 for graduate civil engineering programs
- #88 for overall undergraduate business programs

# INFORMATION FOR GRADUATE STUDENTS

## **Graduate School**

Welcome to the Graduate School at CU Denver. Almost half of our students on the Denver Campus are enrolled in graduate programs. We have a higher ratio of graduate to undergraduate students than most other universities in the country. This special emphasis on graduate education provides a strong culture of graduate studies on the campus and has engendered a number of innovative programs and teaching methods. Graduate programs on the Denver Campus also benefit from CU Denver's immediate proximity to the city, which provides rich opportunities for internships and employment, collaborations between the university and the city and a wealth of real-world problems that can test and elaborate ideas gained in the classroom.

The mission of the Graduate School is three-fold in support of the University, our students, the faculty, and our training programs.

1. **EDUCATION:** to enhance and advance outstanding educational experiences for all members of the university and the adjacent community through excellence in graduate education;
2. **INNOVATION:** to encourage and support excellence and innovation in research, creative and scholarly work;
3. **LEADERSHIP:** to recruit and train the next generation of highly educated leaders from diverse backgrounds to serve and lead in our communities, nation and the world

Not all post-baccalaureate programs at CU Denver|Anschutz fall under the auspices of the Graduate School. Programs that offer “professional” degrees that are independently accredited are overseen by their respective School or College.

For those Graduate Programs or Certificates that fall under the auspices of the Graduate School, the relevant administrative responsibilities are distributed between the central Graduate School office and the home School or College. The graduate programs that fall under the auspices of the Graduate School are listed in the Graduate School Policies and Procedures document found on the Graduate School website. Individual graduate programs are detailed in the school/college sections of this catalog.

## Graduate School Contacts

**Mailing Address:** P.O. Box 173364, Campus Box 163, Denver, CO 80217

**Website:** <https://graduateschool.ucdenver.edu>

## Admissions Requirements

Note that the following are minimum requirements. College and school regulations, if more stringent, take precedence over the minimum guidelines as set forth by the Graduate School.

### Regular Degree Students

Students are admitted by the Graduate School as regular degree students provided they meet the following criteria:

- Hold a baccalaureate or master's degree from an accredited college or university or demonstrate completion of work equivalent to the baccalaureate or master's degree given at CU Denver. Applicants whose credentials include studies or coursework at a College or University outside the USA (not taken as part of a semester abroad program) must include original transcripts and documentation in English (or certified English translation) of the transcript as evaluated by the CU Denver Office of International Affairs.
- Have an undergraduate grade point average of 3.00 or better ("A" is equal to 4.0) or a 3.00 or better GPA in twelve (12) credit hours or more of a partially completed graduate level Master's degree program. Applications from individuals who attended a College or University that does not issue grades or a GPA will be evaluated by the Graduate School on a case-by-case basis.
- Have adequate preparation to enter graduate study in the chosen program as demonstrated by their performance in the GRE or an appropriate substitute (i.e., MCAT, an earned MS/MA or PhD from a school in the United States, or completion of at least 12 credit hours of transferable graduate-level course work from an accredited US college or university). Although the Graduate School recommends that applicants take the GRE or other standardized tests, it is not a requirement for admission as a regular degree student if one of the other two indicators of preparedness is present. Some graduate programs, however, may require that all applicants take the GRE or an equivalent.
- Meet any additional requirements (such as particular undergraduate course work) for admission as established by the program.

International students must meet ALL of these requirements and also must provide:

- original transcripts and documentation in English (or a certified English translation) of the completion of a Bachelor's degree, Master's degree or the equivalent as evaluated by the CU Denver Office of International Affairs;
- financial and other documents as required by the International Student and Scholar Services Office to process immigration documents;
- a certified English translation of all academic records and references not in English, and
- evidence of proficiency in English as defined in the University policy Official Measures of English Language Proficiency for Admission of International Students (effective July 1, 2012) by satisfying one of the following criteria:
  - the applicant is a citizen of a country whose official language is English, which includes Australia, Belize, Botswana, Canada (except Quebec), Commonwealth Caribbean, Ghana, Great Britain, Ireland, Kenya, New Zealand, Scotland, Singapore, South Africa, and Zimbabwe; or
  - the applicant obtains a composite score of 75 or above on the Test of English as a Foreign Language (TOEFL, iBT) (minimum subscores of 15 in Reading, 15 in Listening, 19 in Speaking, and 20 in Writing) or a composite score of 6.5 or above on the International English Language Testing System (IELTS) (minimum

- subscores of 5.5 in each area). Schools or Colleges, or individual graduate programs may require higher standards on these tests; or
- the applicant has graduated from CU Denver's ESL Academy; or
  - the applicant has graduated with a bachelor's degree or higher from the United Kingdom or a US accredited school abroad where the language of instruction was English. (The applicant must provide a letter from the home institution verifying this information if the language of instruction is not clearly indicated on the official academic transcript.); or
  - the applicant has graduated with a bachelor's degree or higher from a US accredited school abroad where the language of instruction was English. (The applicant must provide a letter from the home institution verifying this information if the language of instruction is not clearly indicated on the official academic transcript.); or
  - the applicant has earned a bachelor's degree in the US or has successfully completed a minimum of 2 semesters (a minimum of 12 credits) of full-time study in a graduate-level master's program at an accredited institution in the US and obtained a "B" (3.00) cumulative GPA or higher.

Additional requirements and documentation may also be required.

## **Provisional Degree Students**

A Graduate Program that wishes to admit an applicant who does not meet the criteria for admission as a Regular degree student can petition the Graduate School to admit the applicant as a Provisional degree student. On the provisional form that accompanies the student's admission documents, the Graduate Program Director outlines the rationale to support such an admission. The form must include a description of the conditions that the student must meet in order to become a Regular degree student. The admission of the applicant as a Provisional degree student requires the approval of the Dean. Based on the requirements of the Graduate Program and the recommendations of the Graduate Program Director, the Dean will make a determination and advise the Program Director and the student of the conditions that the student must satisfy in order to be transferred from Provisional to Regular status. The Dean, in consultation with the Program Director, will also determine the time period (1 or 2 semesters for full-time students and a maximum of 4 semesters for part-time students) in which these conditions must be met. Provisional students are subject to the same standards of performance required of Regular degree students, plus any other requirements imposed by Program faculty as conditions of admission. At the end of the specified probationary period, the Dean, in consultation with the Program Director will review the performance of the Provisional degree student. Provisionally admitted students must either have satisfied the requirements for conversion and be admitted to Regular degree status or be dismissed from the Graduate Program to which they were provisionally admitted. The Graduate School will notify both the Program Director and the student whether the indicated requirements have been met and the student's status has been converted to that of a Regular student, or if the student failed to meet the requirements and has been dismissed.

# Application Procedures

## New Degree-Seeking Students

Applicants seeking admission to CU Denver's graduate programs should apply online at:

<http://www.ucdenver.edu/academics/colleges/Graduate-School/prospective/Pages/apply.aspx>

International applicants should refer to the Information for International Students chapter for more information regarding specific application instructions and requirements.

If applying to more than one program, you must submit a complete application and separate fee to each program.

Students transferring from another University of Colorado campus to the Denver Campus must apply and be accepted by the program on this campus.

A student who has completed a master's program at CU Denver must resubmit an online graduate application for acceptance into a doctoral program.

An applicant for admission must present:

- Submitted online application
- Official transcripts for all academic work in colleges and universities completed to date.
- Three letters of reference. The online application will automatically send recommendation forms to the recommenders indicated on the application.
- A nonrefundable application fee of \$50 for domestic students or \$75 for international students. *No application will be processed until this fee is paid.*
- Any other material required specifically by the program faculty. This may include scores from the GRE or other examination (GRE School code 4875). Check with program coordinators in the departments for additional information that may be required.

*Check with the program for the deadline for submitting the application.*

Students who wish to apply for a graduate student award (e.g., fellowship, scholarship, assistantship) should contact their department before the application deadline for information, since deadlines are usually earlier for aid requests than for admission.

## Nondegree-Seeking Students

A student who wishes to take graduate courses, but is not interested in earning a specific advanced degree, may apply as a nondegree student at:

<http://www.ucdenver.edu/academics/colleges/Graduate-School/prospective/Pages/apply.aspx>

Nondegree students will be allowed to register only on the campus to which they have been admitted.

Nondegree students who later desire to pursue a graduate degree program at this university are encouraged to submit the complete online graduate application and supporting credentials as soon as possible. Credits earned as a nondegree student at the University of Colorado may, at the discretion of the department to which the student is admitted, be transferred into a degree program. The maximum amount of credits allowed for transfer is 12 semester hours for the master's degree, 9 hours for the EdD program, and 30 hours for PhD degrees. These limit totals include both nondegree CU credits and those transferred from other institutions.

## **Certificate Students**

The application for students wishing to matriculate into a Graduate Certificate Program is completed online at <http://www.ucdenver.edu/academics/colleges/Graduate-School/prospective/Pages/apply.aspx>.

In addition to the online application, official transcripts from Colleges, Schools, and Universities in which the student received a degree are required. Individual Certificate Programs evaluate and select the students they want to admit. A letter of offer from the Certificate Program to the applicant must include a statement indicating that admission to the University is pending final approval of the Graduate School. The Graduate School confirms the applicant's credentials, including authenticating transcripts, and also determines whether the student meets the general requirements of the Graduate School and the specific requirements of the selected Certificate Program. Students admitted to a Certificate Program must meet the same admission criteria as outlined above for degree-seeking students.

Students who are already enrolled in a Graduate Degree Program in which a Certificate is also offered may be admitted into the Certificate Program upon approval of the Program Director and the Graduate School.

## **Readmission of Former Students**

Students who were previously admitted to a Graduate Program but who did not complete that degree program and who have not been registered for more than one (1) year [i.e., three (3) terms] at CU Denver|Anschutz must reapply to the Program supplying updated information and academic credentials. The following requirements must be satisfied before being readmitted:

- clarify their status with the Graduate Program and Graduate School to determine their eligibility to return and pursue the same degree;
- submit an application at least two weeks prior to the first day of the term in which you are interested in taking a course; and
- meet any new admission requirements required of matriculants (i.e., background checks, immunizations, etc.)

However, the Program is under no obligation to readmit the student, and the student should consult with the Program Director before applying.

## **Transferring Programs**

Students who are currently enrolled in a Graduate Program and in good academic standing (i.e., GPA of 3.00 or better) and who want to change Programs or major departments must complete the appropriate application forms and be accepted by the new Program into which they are transferring. The Graduate School maintains a current form for such transfers at [www.ucdenver.edu/graduateschool](http://www.ucdenver.edu/graduateschool).

## **New Student Orientation**

An orientation program for new students is held prior to the start of the fall semester. The orientation program provides information to new students about activities and services available on the Denver Campus. Information on the expectations, opportunities, registration process, parking and securing ID cards is also provided. Academic advising sessions are held before registration for the term. Students should contact their schools and colleges for additional information on advising, as well as special orientation sessions that may be scheduled for their programs.

## **Assistantships and Fellowships**

### **Graduate Student Teaching Appointments**

Many departments employ graduate students as part-time instructors or teaching assistants. The instructorship is reserved for those advanced graduate students already possessing appropriate degrees who may be independently responsible for the conduct of a section or course. Contact the department for further information.

### **Research Assistantships**

Research activities provide opportunities for graduate students to obtain part-time work as research assistants in many departments. Such assistantships are funded by external grants obtained by faculty members. Contact the department for further information.

## **Requirements for Graduate Degrees**

### **Graduate Student Handbooks**

The Graduate School provides the Graduate School Policies and Procedures that provides information and guidelines for graduate students at the University of Colorado Denver. Students are encouraged to be familiar with the policies outlined in this handbook and to use this handbook as a supplement to the personal feedback and guidance of faculty and staff in their departments.

Each graduate program is expected to provide students with a program-specific handbook indicating in some detail the curricular requirements, the expectations for satisfactory progress toward the degree completion, a timeline for the steps needed to meet these expectations and other features unique to each program (such as the composition and formation of thesis, project and dissertation committees to guide and review the student's progress).

## **GPA Requirements and Quality of Graduate Work**

To maintain satisfactory academic progress, advance to candidacy, and earn a certificate or graduate degree, students are required to maintain a minimum cumulative GPA of 3.00 for all graduate courses taken while in Graduate School, including any undergraduate (i.e., 4000 level) courses that may be required for the certificate program or graduate degree. Failure to maintain a 3.00 cumulative GPA will result in the student being placed on academic probation, as defined below. Courses in which grades below "B-" (2.7) are received may not be applied toward fulfillment of the requirements for any graduate (PhD or Master's) degree or certificate. Courses required by the degree-granting program or certificate in which the student receives a grade below B- must be retaken in order to achieve a B- or better grade. However, all grades received, including repeat courses, will appear on the student's transcript and will be included in the GPA calculation, but only one course enrollment may be counted towards graduation credits.

## **Transfer Credits**

A limited amount of high-quality resident graduate work done in a recognized graduate school elsewhere, or as a nondegree student at a University of Colorado campus, within the time allowed may be accepted, provided it is recommended by the department concerned and approved by the school or college dean. The maximum amount of work that may be transferred to this university is 12 semester hours for the master's degree, 9 hours for the EdD degree, and 30 hours for PhD degrees.

Courses taken as pass/fail or satisfactory/unsatisfactory will not be transferred. In addition, a grade of B- or above must be earned for a course to be transferred (individual programs may require a B or better for transfer credit and/or may require a B or better in the core classes of the particular discipline). Courses taken more than 7 years ago will need to be validated by the program director.

## **Certificate Program**

The minimum number of credit hours required for a Graduate Certificate is nine (9), although twelve (12) credit hours are strongly recommended, which is more in line with national norms. While it is expected that most of the coursework will be at the graduate level (5000 or above), no more than 3 credits may be earned at the undergraduate level

(4000 level only), and which requires the approval of the Certificate Program Director. All graduate level certificate courses (5000 or above) will be eligible for transfer into a subsequent Graduate Degree Program assuming they meet the minimum grade requirements of the Graduate Program (which may be more stringent than the Graduate School Rules), the classes are deemed appropriate for the specific Program of study, and are approved for transfer by the Graduate Program Director.

## **Admission to Candidacy**

Students who have completed the coursework required for a Graduate Certificate must apply for a Certificate of Completion. This form is available in the Graduate School and online and must be signed by the Certificate Program Director prior to submission to the Graduate School for final approval and filing. The form has to be submitted to the Graduate School no later than the posted graduation deadline during the semester in which a student plans to have their Certificate awarded. An approved form certifies that i) student's coursework is satisfactory, ii) that the Certificate Program curriculum described on the form meets the requirements of the Graduate School as well as the particular Certificate, and iii) that the student is eligible for the Certificate. Students cannot receive their certificate if they have a cumulative GPA of less than 3.00 in the certificate coursework.

## **Master's Degree**

The requirements stated below are minimum requirements; additional conditions may be set by the individual programs.

Students planning to graduate should obtain current deadlines from [www.ucdenver.edu/graduateschool](http://www.ucdenver.edu/graduateschool). It is the graduate student's responsibility to see that all requirements and deadlines are met (e.g., changing of *I* and *IP* grades, notification of final examinations, etc.).

## **Minimum Requirements**

The minimum number of credit hours required for a Master's degree is thirty (30). While it is expected that most of this coursework will be at the Graduate level (5000 and above), some Graduate Programs may allow specific undergraduate courses (4000 level and above) that are outside the specific discipline of their program to count towards the graduate degree and must be approved by the Program Director. Regardless, at least 24 credit hours of those required for completion of the Master's program must be at the graduate level (5000 and above) and undergraduate credits (4000 level and above) cannot exceed 20% of total credit hours required. Furthermore, undergraduate courses within the same discipline as the Graduate Program cannot be credited towards a graduate degree. If the program has a thesis, research paper or internship option as the culminating requirement, the thesis/research paper must count for three to six (3-6) credits, unless specified otherwise by individual programs. Independent study coursework cannot exceed 20 percent (6 credits) of the 30 credits of coursework required for the Master's degree.

## **Master's Thesis Credit**

Master's students who are enrolled in a program or track that requires a thesis, must also register for a minimum of three and a maximum of six hours of thesis work. Once all required semester hours of thesis work have been taken and all other course work is completed, students may register for Candidate for Degree (CAND 5940) for the semester in which they will defend their thesis. CAND 5940 carries no credit or grade, but students pay for one credit of resident tuition and minimal fees. Students may only enroll in this course once during their final semester. Students registered for the Candidate for Degree course will be considered full-time for financial aid and enrollment verification purposes.

## **Thesis Requirements**

Students who are enrolled in a program that requires a thesis must undertake their thesis work under the supervision of a thesis advisor and a faculty advisory committee. All research conducted for a master's degree must meet all appropriate regulatory standards specified by federal, state and local agencies regarding ethical research, animal use, human subjects, HIPAA and environmental safety. Each thesis is presented in partial fulfillment of the requirements for the master's degree and must meet the formatting criteria outlined in the Style and Policy Manual for Theses and Dissertations, available on the Graduate School webpage. The Graduate School performs format review and approval for all theses prior to electronic submission. Theses must be successfully defended before the student's committee before final submission.

A grade of In Progress (*IP*) will be assigned for thesis hours in all semesters until the final approved thesis is submitted to the Graduate School office. The thesis advisor determines the final thesis grade and then submits Change of Record forms to the Graduate School office to change all *IP* grades to this final grade.

## **Admission to Candidacy**

Students who wish to receive the master's degree must first become candidates. After completing or registering for all program-required course work, students must apply for graduation in their student portal and submit the signed Application for Admission to Candidacy to the Graduate School, by the graduation deadline posted for the semester in which they plan to graduate. The candidacy form is available online on the Graduate School website.

An approved form certifies that a student's work is satisfactory and that the program curriculum entered on the candidacy form meets all of the requirements of both the Graduate School as well as the particular graduate program, and that the student is a candidate for the degree. Students must have a minimum GPA of 3.00 to apply for candidacy.

## **Master's Degree Final Examination / Thesis Defense**

All candidates for the master's degree are required to take a final comprehensive examination, present a cumulative professional portfolio or successfully defend a project or thesis. The final examination or defense is conducted by a committee consisting of at least three members of the graduate faculty. The student's final examination/defense committee and the examination schedule must be approved by the program director. The Request for Graduate Examination form must be submitted to the Graduate School at least two weeks prior to the final exam/defense.

The examination or defense may be oral, written or both, or may consist of an evaluation of the cumulative professional portfolio. The chairperson and student must be present for the oral examination or defense, but a minority of members of the committee may participate by interactive video. If *one* faculty member cannot be present due to an *emergency*, the exam can proceed with the faculty who can attend, and the student will schedule a separate meeting with the absent faculty member at an alternate time. A majority of the examination committee members must vote for one of the following examination outcomes: Pass, Conditional Pass or Fail. The original signed form is sent to the student's respective school or college, or to the Graduate School.

For a Conditional Pass, the examining committee will clearly define the requirements for the student to receive an unconditional passing grade; these requirements must be completed to the satisfaction of the examination committee within four months. Failure to satisfy these conditions will result in failure of the examination. A student who fails the examination is subject to immediate dismissal from the program on the recommendation of the graduate program and concurrence of the dean.

A student who fails the examination is subject to immediate dismissal from the Program on the recommendation of the Graduate Program Director and concurrence of the Dean. At the program's discretion, a student who fails the examination may be allowed to retake the exam once. The retake must be completed by the end of the next academic semester. Both the original signed examination form noting the failure as well as the signed new exam form for the retake must be filed with the Graduate School.

## **Time Limit**

Master's students, whether enrolled full time or part time, have 7 years from the start of course work to complete all degree requirements, including the filing of the thesis with the Graduate School if the program requires a thesis. Students who fail to complete the degree in this seven-year period are subject to termination from the Graduate School upon the recommendation of the program director and concurrence of the Graduate School dean. For a student to continue beyond the time limit, the program director must petition the dean for an extension and include: 1) reasons why the program faculty believe the student should be allowed to continue in the program, and 2) an anticipated timeline for completion of the degree.

## **Doctoral Degree**

Students who receive a doctoral degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field. Furthermore, they must have shown the ability to work independently in their chosen field and must have made an original contribution of significance to the advancement of knowledge. The technical requirements stated below are minimum requirements for all candidates for the degree; additional conditions set by the departments or schools will be found in the announcements. Any department may make additional regulations consistent with these general rules.

## **Minimum Requirements**

The minimum number of credit hours required for a PhD degree is thirty (30) credits of coursework, all of which must be at the Graduate level (5000 and above) and thirty (30) dissertation credits. For the EdD program, the minimum credit hours required is thirty-nine (39) credits of coursework and fifteen (15) credits of dissertation. The PsyD program requires a total of ninety-four (94) credit hours, including four (4) hours of Externship, eight (8) hours of Internship, and four (4) hours of a capstone project. Graduate level coursework taken for a Master's degree may be applied toward a doctoral degree with Program approval.

All courses that count towards the minimum requirements for a doctoral degree must be at the graduate level; including graded on the A-F system (not pass/fail) and offered within a Degree Program at the 5000 level or above. With the approval of the Program Director, students enrolled in Graduate Programs at CU Denver|Anschutz can undertake graduate-level courses at other campuses within the University of Colorado system.

The minimum enrollment requirement at CU Denver|Anschutz for doctoral students is six (6) semesters of full-time scholarly work beyond the attainment of a bachelor's degree.

After completing all course work required by their doctoral program (a minimum of 30 hours), PhD students must register for at least 30 semester credit hours of dissertation (excluding students in the clinical health psychology doctoral program) to complete the requirements for the PhD degree. PhD students must register for a minimum of 5 hours (and a maximum of 10 hours) of dissertation credit in each fall and spring semester following successful completion of the comprehensive examination.

Once a student has completed 30 dissertation credits, they need to enroll for only one credit in each fall and spring semester until a successful defense of their dissertation. If defending in the summer semester, they must also register for one dissertation credit.

A grade of In Progress (*IP*) will be assigned in all semesters until the final approved dissertation is submitted to the Graduate School office. The dissertation advisor determines the final dissertation grade, and then submits Change of Record forms to the Graduate School office to change all *IP* grades to this final grade.

## **Registration Requirements**

A student (who is not on a leave of absence) who fails to register continuously in a given academic year (fall and spring semesters) for dissertation credit hours after passing the comprehensive examination may, at the discretion of the program director, be required to retake and pass the examination in order to regain status as a student in “good standing.”

Students who are unable to register for the minimum dissertation credits because of extenuating personal circumstances should apply for a leave of absence.

### **Leave of Absence**

Students who need to leave a CU Denver|Anschutz Graduate Program for a period of time should determine in consultation with their Program Director whether a petition for leave of absence is required for up to one (1) year. If approved by the Program Director and the Dean of the Graduate School, a copy of the Leave of Absence form is forwarded to the Registrar's Office. The original is retained in the student's file. Approved leaves of absence do not automatically extend the time limits for earning a degree or certificate, but they may be cited as supporting documentation to request an extension if needed. Requests for leaves of absence that exceed one (1) year will not be approved unless the Program Director provides the Dean with a compelling justification why such action should be approved. Students who are absent for longer than one (1) year will be considered to have withdrawn from the Program and will be required to reapply for admission and be considered with all other applicants.

### **Examinations**

Each PhD program will require at least comprehensive and final examinations. Notice of all examinations must be filed with the Graduate School at least two weeks prior to administration.

#### **Preliminary Examination**

Each program is responsible for ensuring that students are qualified for doctoral study by successfully passing a preliminary examination. Graduate programs that require students to have a master's degree before they enter their PhD program may exempt the student from taking a preliminary exam. The preliminary exam must occur within three semesters of completing the required courses as defined by the particular graduate program. The content and format of the preliminary examination are determined by the individual graduate program. The results (Pass/Fail) of the preliminary examination must be reported to the Graduate School. A student who fails the examination is subject to immediate dismissal from the Graduate School upon the recommendation of the program and concurrence of the dean; however, the preliminary exam may be retaken once at the program's discretion.

#### **Comprehensive Examination**

After completing or registering for all required program course work, and concurrent with applying for admission to candidacy for the PhD, students must take a comprehensive examination in their respective discipline. This exam will test a student's mastery of a broad field of knowledge, not merely the formal course work that s/he has completed. The oral part of the comprehensive exam is open to all members of the graduate faculty. This examination must be completed no later than the end of the third year for full-time students (fourth year for students enrolled in the PhD programs in applied mathematics and computer science and information systems). Individual programs may establish an earlier deadline.

The student's comprehensive examination committee and the examination schedule must be approved by the program director. The Request for Graduate Examination form must be submitted to the Graduate School at least two weeks before the exam. The examination committee consists of a minimum of three graduate faculty members; the chair of the committee must be a member of the degree-granting program. The student's dissertation advisor, if already identified, may *not* chair the examination committee. All members of the committee must be present for the examination, although a minority of members, but not the chairperson or the student, may participate by interactive video. If *one* faculty member cannot be present due to an *emergency*, the exam may proceed with the faculty who can attend, and the student will schedule a separate meeting with the absent faculty member at an alternate time. The student must receive votes from the majority of the examination committee for one of the following outcomes: Pass, Conditional Pass or Fail. The examination form must be signed by the committee and returned to the Graduate School office.

If a student receives a Conditional Pass, the examining committee will clearly define the requirements for the student to receive an unconditional passing grade, and these requirements must be completed to the satisfaction of the examination committee within four months. The committee chair is responsible for monitoring the conditions and reporting their outcome to the Graduate School. Failure to satisfy these conditions will result in failure of the examination.

A student who fails the comprehensive examination is subject to immediate dismissal from the Graduate School upon the recommendation of the program and concurrence of the dean; however, the exam may be retaken once at the program's discretion. The retake will be in the form designated by the committee and must be completed within twelve months. The original examination form noting the failure is signed by the committee and returned to the Graduate School office. New examination forms will be generated when the examination is rescheduled. Students will be required to meet registration requirements and be registered during the term in which the repeated exam is taken.

### **Final/Dissertation Examination**

After the dissertation has been completed, a final examination on the dissertation and related topics is conducted in two parts, an oral presentation of the dissertation research that is open to the public, and a closed examination conducted by the examining committee.

The program director will approve the student's final examination/defense committee and the examination schedule. The Request for Graduate Examination and Biosketch forms must be submitted to the Graduate School at least two weeks before the exam. The Graduate School office will send the final examination signature form to the program office to be placed in the student's file for use at the exam.

The dissertation defense committee consists of a minimum of four graduate faculty members. The chair of the committee must be a member of the degree-granting program. The student's dissertation advisor may not chair the examination committee. The student must submit finalized draft copies of the thesis to the defense committee at least two weeks before the examination date; some programs may require an earlier deadline.

All members of the committee must be present for the examination although a minority of members, but not the chairperson or the student, may participate by interactive video. If *one* faculty member cannot be present due to an *emergency*, the exam may proceed with the faculty who can attend, and the student will schedule a separate meeting with the absent faculty member at an alternate time. The examination form must be signed by the committee and returned to the Graduate School office. The student must receive votes from a strict majority of the examination committee for one of the following outcomes: Pass, Conditional Pass or Fail.

If a student receives a Conditional Pass, the examining committee will clearly define the requirements for the student to receive an unconditional passing grade, and these requirements must be completed to the satisfaction of the examination committee within 60 days of the defense. Under extenuating circumstances, the graduate program director may petition the Graduate School for additional time. If a student fails the examination, s/he may not continue in the program.

## **Dissertation Requirements**

A dissertation based upon original investigation and showing mature scholarship and critical judgment, as well as familiarity with the tools and methods of research, must be written on a subject approved by the student's dissertation advisor and the dissertation advisory committee. All research conducted for the PhD degree must meet all regulatory standards specified by federal, state and local agencies regarding ethical research, animal use, human subjects, HIPAA and environmental safety.

After selecting a dissertation advisor, the student, in collaboration with his or her dissertation advisor, will choose a Dissertation Advisory Committee, subject to the approval of the Graduate Program Director. Although it is recommended that the Dissertation Advisory Committee be the same as the Dissertation Examination Committee, the two committees need not be identical. Although the student's dissertation advisor may not chair the Comprehensive or Dissertation Examination Committees, Programs are given the flexibility to permit, or prohibit, the student's advisor to serve as Chair of the Dissertation Advisory Committee. The Dissertation Advisory Committee will serve an advisory function to the student and dissertation advisor and will also monitor the student's progress towards completing the dissertation. The Dissertation Advisory Committee will determine when the student has made sufficient progress to begin writing his or her

dissertation. All PhD students who have advanced to candidacy must meet with their Dissertation Advisory Committee at least once every year, although some Programs may require - and the Graduate School encourages - a greater frequency of meetings. It is the student's responsibility to identify the best available time and schedule the meeting. The Dissertation Advisory Committee shall evaluate the student's progress to ensure that s/he has made satisfactory progress since the previous meeting. The Committee Chair will complete the Dissertation Advisory Committee meeting form summarizing the student's progress, or lack thereof, and send copies to the student, the primary mentor if not the Chair, the Program Director and the Graduate Dean. In case of non-satisfactory performance, steps to be taken to rectify the situation should be suggested in the report. If a student fails to meet with their Dissertation Advisory Committee within the previous 12 months, the Graduate School will notify the student and dissertation advisor that the committee must meet within the next four (4) weeks. Students who fail to have a Dissertation Advisory Committee meeting by the end of this four (4) week probationary period will not be permitted to register for subsequent semesters. Once the student is in compliance with this rule, s/he will be permitted to register.

The student's dissertation must meet the formatting criteria outlined in the Style and Policy Manual for Theses and Dissertations, available on the Graduate School webpage. The Graduate School performs format review and approval for all dissertations prior to electronic submission. The formally approved dissertation must be submitted electronically, with the appropriate supporting documentation, within 60 days of the successful dissertation defense. Dissertation fees are paid upon submission online.

## **Time Limit**

Doctoral students, whether enrolled full time or part time, must complete all degree requirements within eight years of matriculation. Students who fail to complete the degree in this eight-year period are subject to termination from the Graduate School upon the recommendation of the program director and concurrence of the Graduate School dean. For a student to continue beyond the time limit, the program director must petition the dean for an extension and include: 1) reasons why the program faculty believes the student should be allowed to continue in the program and 2) an anticipated timeline for completion of the degree. Approved leaves of absence do not automatically extend the time limits for earning a degree, but they may be used as a reason to request an extension if needed.

# **INTERNATIONAL ADMISSIONS**

## **International Admissions**

CU Denver's International Admissions unit collaborates with our schools and colleges to facilitate the admission process for international graduate students. International students are students who currently have or will require a temporary, non-immigrant visa to study in the United States.

We also evaluate international academic credentials for US citizens, permanent residents, and other applicants who have studied outside the United States before studying at CU Denver.

This page contains information for international applicants to graduate programs. For information about applying to an undergraduate program as an international student, please visit this page.

**Physical Address:** Student Commons Building, Suite 1119, 1201 Larimer Street, Denver, CO 80204

**Mailing Address:** Campus Box A005/1001, PO Box 173364, Denver, CO 80217-3364

**Telephone:** +1 (303) 315-2382

**Email:** [application@ucdenver.edu](mailto:application@ucdenver.edu)

**Website:** <http://internationaladmissions.ucdenver.edu>

## **Application Information for Graduate International Students**

### **Application and Documentation Requirements**

Please review the Graduate Admissions page for information about transcripts. Make sure to visit the website for your program of interest to find the list of required documents and test scores for your major. If you have any questions, International Admissions is here to help - please feel free to contact us at any time.

**Note:** the application fee for international applicants is \$75.

### **Proof of English Language Proficiency**

International applicants to CU Denver must provide proof of English language proficiency (ELP) in order to be considered for full admission. Some graduate programs will consider international applicants for conditional admission if they apply without adequate proof of ELP. Contact International Admissions if you have questions about ELP or conditional admission.

You may meet the ELP requirement via any of the options listed below.

#### **1. Citizenship Exemption**

International applicants holding citizenship from the following countries do not need to prove their English language proficiency for admission to CU Denver. The Spring 2021 list is based on the United Kingdom government's list of countries exempt from proving English ability when applying for a UK student visa.

<b>Fall 2020 Admission</b>	<b>Spring 2021 Admission</b>
<ul style="list-style-type: none"><li>• Australia</li><li>• Belize</li><li>• Canada (except Quebec)</li></ul>	<ul style="list-style-type: none"><li>• Antigua &amp; Barbuda</li><li>• Australia</li><li>• The Bahamas</li></ul>

<ul style="list-style-type: none"> <li>• Commonwealth Caribbean</li> <li>• Ghana</li> <li>• Ireland</li> <li>• Kenya</li> <li>• New Zealand</li> <li>• Singapore</li> <li>• South Africa</li> <li>• Zimbabwe</li> <li>• United Kingdom</li> </ul>	<ul style="list-style-type: none"> <li>• Barbados</li> <li>• Belize</li> <li>• Canada</li> <li>• Dominica</li> <li>• Grenada</li> <li>• Guyana</li> <li>• Ireland</li> <li>• Jamaica</li> <li>• New Zealand</li> <li>• Saint Kitts &amp; Nevis</li> <li>• Saint Lucia</li> <li>• Saint Vincent &amp; the Grenadines</li> <li>• Trinidad &amp; Tobago</li> <li>• United Kingdom</li> </ul>
---	---

## 2. ESL Academy

International applicants may meet the English language proficiency requirement for any program of study at CU Denver by successfully completing every class in level 5 at CU Denver's ESL Academy.

## 3. English Language Proficiency Tests

CU Denver accepts the following tests as proof of English language proficiency.

**Note:** The scores listed below are the university minimum requirement. Some graduate programs require higher scores for admission. Please visit the website for your program of interest for more information.

### Minimum Score Requirements:

#### TOEFL iBT

CU Denver school code: 4875

CU Denver accepts TOEFL MyBest scores.

Comprehensive Score	Fall 2020 Admission	Spring 2021 Admission
	75	79

Subscores	Fall 2020 Admissions	Springs 2021 Admission
Reading	15	18

<b>Listening</b>	15	17
<b>Speaking</b>	18	20
<b>Writing</b>	17	17

### IELTS ACADEMIC

CU Denver accepts super-scored IELTS scores.

<b>Overall Band Score</b>	<b>Fall 2020 Admission and Spring 2021 Admissions</b>
	6.5

<b>Subscores</b>	<b>Fall 2020 Admission and Spring 2021 Admissions</b>
<b>Reading</b>	5.5
<b>Listening</b>	5.5
<b>Speaking</b>	5.5
<b>Writing</b>	5.5

### PTE ACADEMIC

<b>Overall Score</b>	<b>Fall 2020 Admissions</b>	<b>Spring 2021 Admission</b>
	51	58
<b>Subscores</b>	<b>Fall 2020 Admission</b>	<b>Spring 2021 Admission</b>
<b>Reading</b>	44	42
<b>Listening</b>	44	42
<b>Speaking</b>	49	42
<b>Writing</b>	47	42

### DUOLINGO ENGLISH TEST

International Admissions is currently piloting the Duolingo English Test for use in undergraduate admissions (except Nursing). Please contact International Admissions for more information.

Total Score	<u>Fall 2020 Admission and Spring 2021 Admission</u>
	160-point scale (test dates starting July 15, 2019): 105 100-point scale (test dates prior to July 15, 2019): 48

**Note:** The Duolingo English Test currently does not report sub-scores. International Admissions reserves the right to update our minimum requirements in the event that Duolingo starts reporting sub-scores.

#### **4. Coursework Completion**

International applicants who have completed the following coursework will be considered to have met the English language proficiency requirement.

##### Fall 2020 Admission:

A. The applicant has earned a bachelor's degree in the United States.

OR

B. The applicant has successfully completed of 2+ semesters in a graduate degree program in the United States.

##### Spring 2021 Admission:

A. The applicant has earned a bachelor degree in the United States; or has earned a post-secondary qualification, comparable to a US bachelor degree, in one of the exempt countries listed above; or has earned such a qualification at an institution accredited by an exempt country but located in a non-exempt country.

OR

B. The applicant has completed 12 or more semester hours of coursework in a master or doctoral degree program in the United States with an overall GPA of 3.0/4.0 or higher; or has completed a comparable amount of graduate coursework with a comparable GPA in one of the exempt countries listed above; or has completed such coursework at an institution accredited by an exempt country but located in a non-exempt country.

### **Application Deadlines**

Application deadlines vary significantly. Please contact your program of interest to learn more.

### **Immigration Process**

International Services Specialists in International Student & Scholar Services (ISSS) handle the immigration process for international students. ISSS will issue an immigration document (Form I-20 or Form DS-2019) to you, if applicable, only after you have confirmed your acceptance and submitted the Immigration Clearance Form (see below).

You will be contacted within five (5) business days of receiving your decision letter and will need to provide:

1. **Proof of Financial Support:** If you have already sent financial documents to the International Admissions Office, that information will be forwarded to ISSS. If you have not already provided this information, or if your information needs to be updated, you will have an opportunity to provide ISSS with your proof of financial support when you complete the online Immigration Clearance Form that your International Services Specialist will send to you.
2. **Passport/Visa Information:** If you have already sent this information to International Admissions, it will be made available to ISSS who will contact you if they need more information.

*Note: International students living outside of the U.S. will need to provide a copy of their passport, if it has not already been sent. Those living in the U.S. should be prepared to submit a copy of their passport, visa, Form I-94 Arrival/Departure Record and Form I-20, Form DS-2019, or Form I-797 (if applicable). In all correspondence, please use your name as it appears on your passport.*

Please visit ISSS for more information on Pre-Arrival, Arrival at CU Denver, I-20/DS-2019 Timeline, and more.

# BURSAR AND FINANCIAL AID & SCHOLARSHIPS INFORMATION

*At CU Denver, we have a longstanding belief that finances should never stand in the way of motivated, talented individuals who want to better themselves and make a positive impact on the world around them. Through a tradition providing strong financial assistance and aid programs, we enforce this belief every day.*

## **FAQ's**

## **Financial Aid & Scholarships**

**Director of Financial Aid & Scholarship Office:** Justin Jaramillo

**Office:** Student Commons Building, 5105

**Telephone:** 303-315-1850

**E-mail:** [financialaid@ucdenver.edu](mailto:financialaid@ucdenver.edu)

**Website:** [www.ucdenver.edu/finaid](http://www.ucdenver.edu/finaid)

## **Student Financial Aid Information**

The Financial Aid & Scholarships Office delivers more than \$128 million in financial aid awards to qualified students at the Denver Campus each year. Graduate Students will be

considered for a financial aid award primarily made up of student loans. Some work-study funding is available to graduate students as well.

## **Applying**

To be considered for financial aid, students should complete the (*Free Application for Federal Student Aid*) FAFSA annually. The application becomes available October 1 of each year for the upcoming year's funding. Upon completing the application, students should monitor their email provided on the FAFSA, University email, and UCDAccess portal To Do List for requests for follow up paperwork. To be considered for a financial aid award, all requested documents must be received and accepted by the Financial Aid & Scholarship Office. Students may also obtain important information online at [www.ucdenver.edu/finaid](http://www.ucdenver.edu/finaid). All financial aid policies and procedures are subject to change due to revisions in federal and state laws, regulations, guidelines and applicable institution policies.

## **Awards**

Students are informed by University email when awarded financial aid. The email notice advises students to review their award on the UCDAccess portal. Financial aid awards should be available for review approximately four to six weeks after all application materials have been accepted. The information provided will include types of award and amount of aid awarded.

## **Eligibility**

Each student must meet the following eligibility criteria to qualify for financial aid:

1. Be a U.S. citizen or eligible noncitizen.
2. Have a valid social security number (exceptions for students from the Republic of the Marshall Islands, Federated States of Micronesia, or the Republic of Palau).
3. Be classified as a degree-seeking student by the University of Colorado Denver Office of Admissions
4. Be enrolled at least half-time (3 credits hours for graduate students).
5. Meet financial aid Satisfactory Academic Progress (SAP) standards.
6. Not be in default on any student loan or owe a refund on any educational grant.
7. Male applicants must be registered with the Selective Service.
8. Sign the statement of educational purposes on the FAFSA application.

## **Qualifying**

Financial Aid eligibility is largely based on the concept of financial need. Financial need is calculated as the Cost of Attendance (tuition, fees, books, and living expenses) minus the Expected Family Contribution or EFC (student/spouse contributions and parents' contribution for dependent students). A student's EFC is assigned directly from the information provided on the FAFSA application.

Cost of Attendance is the estimated annual cost to attend CU Denver, including tuition and fees, room, board, books and supplies, transportation and personal expenses. The Financial Aid & Scholarships Office determines standard COA based upon average tuition and fees charged and other items established by the Colorado Department of Higher Education. Current COA figures are available on the website [www.ucdenver.edu/finaid](http://www.ucdenver.edu/finaid).

The EFC from the student and spouse (if applicable) are calculated by a standardized formula that is determined by data provided on the FAFSA and is required by federal law. The formula considers income, savings and other assets, family size, number of children in postsecondary school and other factors and then assigns a student an EFC.

Financial Aid is intended to supplement and not replace financial contributions from the student/spouse. If the EFC is equal to or greater than the COA, then the student will not qualify for need-based financial aid, but can still receive non-need based financial aid such as Federal Direct Unsubsidized Loans or Federal Direct Graduate PLUS Loans up to but not exceeding their COA. Direct Unsubsidized Loans and Direct Graduate PLUS Loans comprise the majority of all graduate students' financial aid awards regardless of financial need.

## Enrollment Status

Most graduate financial aid programs require at least half-time enrollment (3 credit hours per semester) to be eligible for awards.

**Notice for Graduate Students:** The financial aid definition of half-time enrollment may differ from the academic definition of half-time enrollment based on degree programs. See a financial aid advisor for more information.

## Grants, Loans and Work-Study

### Grants:

1. **Colorado Graduate Grant (CGG)** - CGG is a state funded grant program. High-need students (determined by the FAFSA) studying Science, Technology, Engineering or Math (STEM) are considered for the award, however it is not guaranteed. To be considered for this grant, students must be residents of the state of Colorado and enrolled in a minimum of 4 credit hours per semester. Amounts vary each year depending on funding and the number of eligible students.
2. **Federal Teach Grant** - TEACH Grant is a federally funded grant program available to students enrolled in specific programs who intend to teach in a public or private school that serves students from low-income families. Students can be considered for up to \$4000 per academic year, if eligible. To learn more, visit Student Aid on the Web.

### Loans:

1. **Federal Direct Unsubsidized Loan** - The Federal Direct Unsubsidized Loan is a non-need based, federally funded loan. To be considered for the loan, students should complete the FAFSA. Students receive a six-month grace period before entering repayment. The grace period begins six-months after the student ceases to be enrolled

at least half-time, discontinues their program of study or graduates. The yearly aggregate limit for the loan is \$20,500.

2. **Federal Direct Graduate PLUS Loan** - The Federal Direct Unsubsidized Loan is a non-need based, federally funded loan. To be considered for the loan, students should complete the FAFSA. The student receives a six-month grace period before entering repayment. The grace period begins six-months after the student ceases to be enrolled at least half-time, discontinues their program of study or graduates. Graduate PLUS Loans are awarded after the full yearly or lifetime (whichever limit is reached first) aggregate amount of the Direct Unsubsidized Loan is awarded (see above). Students must receive an approved credit result to borrow a Graduate PLUS Loan.

**Work-Study:**

1. **Federal Work-Study**- This is a federally funded, need-based work-study program that allows students to work on a part-time basis (on campus, off campus or at nonprofit agencies) to help meet their educational costs.

## **Satisfactory Academic Progress (SAP)**

To continue to be eligible for financial aid, students must meet Satisfactory Academic Progress. If a student is not meeting SAP standards, they may be ineligible for financial aid and scholarship. For more information, students should review the Satisfactory Academic Policy by visiting [www.ucdenver.edu/finaid/sap](http://www.ucdenver.edu/finaid/sap).

A student may appeal financial aid suspension by submitting a SAP Appeal. The SAP appeal should document the extenuating circumstances that led to the student's suspension. All appeals should include third party supporting documentation.

## **Withdrawals and Repayments**

Financial aid is disbursed based on the assumption a student will attend courses for the entire semester and earn passing grades. A student who withdraws or fails all courses and received financial aid must have a Return of Title IV (R2T4) calculation performed to determine the percentage of aid that was earned based on the amount of time the student attended their courses. Students are entitled to aid that was earned. The University will return any unearned aid to the appropriate Federal Title IV program, which may create a balance owed to the University.

CU Denver is required to verify a student began attendance in any course a student withdraws from or fails. If the Financial Aid & Scholarships Office receives notification that a student never began attendance, or is unable to document that a student began attendance in a course, the student's financial aid will be adjusted appropriately.

## **Scholarships**

The Financial Aid & Scholarships office awards over \$18 million dollars in scholarships annually. For a complete listing of the many scholarships offered at the Denver Campus, visit [www.ucdenver.edu/scholarships](http://www.ucdenver.edu/scholarships).

## Tuition and Fees

**Bursar:** Vacant (**Associate Bursar** - Eric Gray)

**Front Counter:** Student Commons (AB1) 5123

**Manager:** Debra Dorsey

**Telephone:** 303-315-1820

### **Bursar's Office Customer Service Phone Center**

303-315-1800 **Fax** 303-315-1805

- Application fees payments by credit card
- College Opportunity Fund
- Departmental deposit transactions
- Payment of tuition and fees
- Refunds and Direct Deposits
- Student account reconciliation
- Third-party billing and payments

All tuition and fee rates are established by the Board of Regents, the governing body of the University of Colorado, in accordance with legislation enacted annually by the Colorado General Assembly. The Regents set tuition rates and fees at a budget retreat each spring for the coming fall, spring, and summer terms, but reserve the right to change rates at any time. Rates for the current year are available online to assist prospective students in anticipating costs. Please refer to the web site at [www.ucdenver.edu/bursar](http://www.ucdenver.edu/bursar) in July for new rates.

## Drop Charge

Beginning the second Tuesday of the fall and spring terms until census date, a \$100 drop transaction charge will be assessed each time a student drops a course. Please refer to the academic calendar for summer dates. This includes student initiated drops done in order to change sections within a course. Section changes done for an administrative purpose through the deans' offices will be exempted from drop charges. If a student withdraws, dropping all classes, a drop charge will be assessed for each course.

## Payment of Tuition and Fees

All tuition and fees, except the application fee, are due on the day indicated on your billing statement. Students have an option to choose a payment plan available through QuikPAY, our payment processor. Specific information on the payment plan can be located [here](#).

Students who register for courses are liable for payment of tuition and fees if they withdraw from school after census date. Refund policies for students who withdraw from the university both before and after census date are included in the academic calendar. A student with financial obligations to the University will not be permitted to register for any subsequent term(s), to be issued transcripts or to be listed among those receiving a degree or special certificate. The only exception to this regulation involves federal student loans and other types of indebtedness that are due after graduation. Students may pay tuition and fees with personal checks, by credit card at the Bursar's Office, or through the UCDAccess portal. Any payment transaction that is returned by the bank will be assessed an additional returned payment charge.

The University of Colorado Denver is committed to providing students and their families a range of options for paying their educational expenses. The credit card payment method has become prohibitively expensive due to the fees charged by credit card companies to CU Denver for credit card transaction processing. This expense has been covered by University tuition revenues, and reduces the tuition dollars available for academic programs and services for all students. Therefore, a service fee of 2.75% of the payment amount will be assessed for all credit and debit card transactions.

Students who register in a non-degree status, and who later apply and are admitted to a degree status for that term, are responsible for the difference in tuition between the non-degree program and their applicable degree program and will be billed accordingly.

## Direct Deposit

Direct deposit is the standard method of issuing student account refunds to CU Denver students with credit balances. Students are strongly encouraged to sign up for direct deposit well in advance of any anticipated student account refunds, and may do so online via the UCDAccess portal - [How to Select Direct Deposit for Refunds](#).

Students who do not sign up for direct deposit will receive a paper refund check through the mail. Refunds will only be issued via direct deposit or through the mail. **Students are not allowed to pick up their refund check from the Bursar's Office.**

## Tuition Appeals

Students are responsible for abiding by the published deadlines. Tuition is not refundable when students drop or withdraw from courses after the published deadlines. If circumstances beyond the student's control have made the late drop or withdraw necessary, the student may file a tuition appeal.

Instructions and forms for submitting a tuition appeal are available on the Lynx Center website or in the Lynx Center.

## **Past Due Tuition and Fees**

Past due student accounts will be assessed a one-time per semester late fee and monthly service charge for every month the balance remains unpaid. After the semester of the past due debt, student accounts are referred to Student Debt Management. An overdue student account may be referred to a third party collection agency and reported to one or more credit bureau reporting services; the student explicitly authorizes University of Colorado Denver to release personal and financial information under those circumstances. To the extent permitted by applicable law, the student agrees to reimburse the University of Colorado Denver the fees of any collection agency, which may be based on a percentage at a maximum of 40% of the debt, and all costs and expenses, including reasonable attorney's fees, the University may incur in such collection efforts. In addition, while the student maintains a past due balance with the University of Colorado Denver, a hold will be placed on the student record preventing any future registration and the release of official transcripts.

Pursuant to C.R.S. § 23-5-115, in the event of a default on an amount owed to University of Colorado Denver, University of Colorado Denver may certify to the Colorado Department of Revenue information regarding persons with past due accounts. The Colorado Department of Revenue may then disburse funds to University of Colorado Denver in satisfaction of that debt from tax refund amounts owed to the individual, if any.

See the Tuition and Fees Payment Disclosure Statement.

For more information, please see the Bursar's Administrative Withdrawal Policy.

## **Residency Classification for Tuition Purposes**

Tuition classification is governed by Colorado statutes that apply to all state-funded institutions in Colorado. Institutions are bound by the provisions of this statute and are not free to make exceptions to the rules set forth.

Students are initially classified as in-state or out-of-state for tuition purposes at the time of application. The classification is based upon information furnished by the student and from other relevant sources. After the student's status is determined, it remains unchanged in the absence of satisfactory evidence to the contrary.

Once a student is classified as a nonresident for tuition purposes, the student must petition for a change in classification. Petitions must be submitted **NO LATER THAN THE MONDAY PRIOR TO THE FIRST OFFICIAL DAY OF CLASSES** of the term for which the student wishes to be classified as a resident. It is preferred that petitions be received 30 days prior to the beginning of the term. Late petitions will not be considered until the next semester. Specific information may be obtained from the Office of the Registrar.

The final decision regarding tuition status rests with the university. Questions regarding residence (tuition) status should be referred only to the tuition classification officer. Opinions of other persons are not official or binding upon the university. Additional information is available on our website.

## **Basic Requirements**

The statute provides that an in-state student is one who has been a legal domiciliary of Colorado for one year or more immediately preceding the beginning of the term for which the in-state classification is being sought. Persons over 23 years of age or who are emancipated establish their own legal domicile. Those who are under 23 years of age and are not emancipated assume the domicile of their parent or court-appointed legal guardian. A non-emancipated minor's parent/legal guardian must, therefore, have a legal domicile in Colorado for one year or more before the minor may be classified as an in-state student for tuition purposes.

## **Establishing Domicile**

Domicile is established when one has a permanent place of habitation in Colorado and the intention of making Colorado one's true, fixed and permanent home and place of habitation. The tuition statute places the burden of establishing a Colorado domicile on the person seeking to establish the domicile. The question of intent is one of documentable fact and needs to be shown by substantial connections with the state sufficient to evidence such intent. Legal domicile in Colorado for tuition purposes begins the day after connections with Colorado are made sufficient to evidence one's intent. The most common ties with the state are (1) change of driver's license to Colorado, (2) change of automobile registration to Colorado, (3) Colorado voter registration, (4) permanent employment in Colorado and most important, (5) payment of state income taxes as a resident by one whose income is sufficient to be taxed. Caution: payment or filing of back taxes in no way serves to establish legal domicile retroactive to the time filed. In order to qualify for in-state tuition for a given term, the 12-month waiting period (which begins when the legal domicile is established) must be over by the first day of classes for the term in question. If one's 12-month waiting period expires during the semester, in-state tuition cannot be granted until the next semester.

## **Resident Tuition for Military-Connected Students**

Military-connected students living in the state of Colorado may be able to receive in-state residency for tuition purposes at CU Denver and CU Anschutz as designated by Federal or State Law. Please review the information on the Veteran and Military Student Services website for more information.

# STUDENT SERVICES INFORMATION

## ***CAMPUS LIFE***

*The University of Colorado Denver, Denver Campus is physically located on the 151-acre Auraria Campus, which is shared with two other institutions-Metropolitan State University of Denver and Community College of Denver. Because we share facilities, our students have access to the level of resources found at much larger public universities. Since fall of 2006, the university has also been able to offer student housing adjacent to this traditionally commuter campus. Details about the campus and Campus Village are explained in this chapter.*

## **Auraria Campus**

Since opening in 1976, Auraria has become the largest campus in Colorado, enrolling nearly 50,000 students-20 percent of all the students in public higher education in the state. This is the most efficiently utilized campus in the state. Classrooms on the Auraria Campus are used an average of 50+ hours per week. Classes are held from 8 a.m. to 10 p.m. Monday through Thursday and from 8 a.m. to 6 p.m. on Friday, Saturday and Sunday. Some courses and programs are offered cooperatively by the Auraria educational institutions. Those pertaining to CU Denver students are outlined in this catalog.

The Auraria Campus offers numerous amenities to students, faculty and staff, from the largest bookstore in the Rocky Mountain region to a state-of-the-art fitness facility. Details of these amenities are outlined in this chapter.

In addition to its proximity to the thriving business and industry of downtown Denver, the Auraria Campus has a distinct historic flavor. The Tivoli Student Union is housed in a renovated brewery originally built in the 1860s. Historic Ninth Street Park, St. Cajetan's Church/Performing Arts Center, St. Elizabeth's Church, the Emmanuel-Sherith Chapel/Synagogue/Art Gallery and the Golda Meir House Museum are also located on campus.

### **Auraria Higher Education Center**

The Auraria Higher Education Center (AHEC) is the administrative body that coordinates the facilities, services and activities for the three educational institutions on campus. AHEC provides common services for the campus including: classroom scheduling, facilities services and construction, campus police, telecommunications infrastructure, student union, media services, book store, early learning center, parking and transportation, mail services and facilities master planning. Visit their website for additional information.

## **Campus Amenities**

### **Tivoli Station**

#### **(Formerly Auraria Campus Bookstore)**

**Location:** Tivoli Student Union, suites 105 and 205

**Phone number:** 303-556-4286

**Website:** [www.tivolystation.com](http://www.tivolystation.com)    **Facebook:** [facebook.com/TivoliStation](https://facebook.com/TivoliStation)

We've got you covered at Tivoli Station, your best resource for **technology, CU Denver spirit gear, and cost-saving options for textbooks**. We offer both convenience and value. Look to us for easy one-stop shopping and a variety of programs designed to benefit students.

#### **Tech Station**

As an **Apple Authorized Campus Store** and **Apple Authorized Service Provider**, we offer student discounts and in-store tech support. We also carry **Dell** computers, discounted HP technology, calculators, flash drives, headphones, and more.

#### **Book Station**

Thousands of textbook titles are available to rent (save up to 50%) or **buy new or used**. At the end of each semester, sell your used books for cash with the **Textbook Buyback Program**, a service we offer to help offset student expenses.

You can also visit [ahec.verbacompare.com](http://ahec.verbacompare.com) to compare textbook prices from the web, giving you options to find the best value available.

**Lynx Station**

Show your school spirit with **CU Denver clothing and gear**, such as shirts, hats, pants, lanyards, hoodies, mugs, and water bottles.

**Supply Station**

We offer a variety of course supplies, including general school supplies and art, culinary, and science lab materials.

**Reading Station**

In the general merchandise area, we provide study aids, reference materials, gift items, and discounted New York Times Bestsellers.

**Charging Station**

Charge your device for free using one of our phone ports or outlets.

**Snack Station**

Grab a snack while you are waiting for your device to charge, or take it on the go. We have pre-wrapped sandwiches, drinks, yogurt, chips, and candy.

**Campus Commitment**

We are committed to the campus. Revenue from the bookstore helps fund campus programs and keeps your student bond fee down. We are also one of the largest student employers on campus.

## Auraria Campus Event Services

**Location:** 900 Auraria Parkway, Suite 325 **Phone:** 303-556-2755

**Email:** [acesmaindesk@ahec.edu](mailto:acesmaindesk@ahec.edu) **Website:** [www.ahec.edu/eventservices](http://www.ahec.edu/eventservices)

Auraria Campus Event Services (ACES) manages all non-academic events that take place on the Auraria Campus. From a simple meeting to an impactful campus event like Spring Fling or Fall Fest, our team is committed to providing quality service and producing successful events.

A majority of the event spaces on campus are located in the Tivoli Student Union, but other event venues are also available in St. Cajetan's Event Center, the PE/Event Center, and several outdoor event spaces including the Tivoli Quad. Student groups can contact us for assistance with locating and booking a space and coordinating support services.

## Auraria Early Learning Center (Child Care Center)

**Location:** 950 9th Street Park **Phone Number:** 303-556-3188

The Auraria Early Learning Center (AELC) provides high quality early childhood care and educational programs to children 12 months and walking through 5 years old. The

programs at AELC are utilized by the children of college students, as well as children of faculty and staff on campus, and community members. There are 300 children in 12 classrooms and the center is open year round (except for holidays) from 7 AM to 6 PM, Monday through Friday. The Center also offers a fully accredited kindergarten program and a summer camp program. AELC has earned a 4 Star - or high quality - Qualistar rating, as ranked by Qualistar Early Learning.

## Auraria Event Center/Student Recreation Center

**Location:** PE Building/Event Center

**Phone:** 303-556-3210 (recreation), 303-352-4371 (fitness)

**Website:** <http://www.msudenver.edu/campusrec>

The Auraria Campus PE/Event Center is a 2,800-seat facility for team and individual sport activities, academic programs, events and conferences. Funds from the Student Recreation Fee support Campus Recreation at Auraria (CRA). At CRA, our purpose is to foster individual and community well-being through the power of engagement, leadership, partnership and recreation. CRA provides a wide range of affordable, high quality, and inclusive recreational and wellness opportunities designed to support personal, academic, community and institutional success of Auraria Campus students, faculty, staff, alumni and the community at-large. CRA consists of Fitness and Wellness, Outdoor Adventure and Leadership, Recreational Sports, Educations/Certification, Member Services, Employment Opportunities, Partnerships, and Community Outreach.

## Auraria Library

**Phone Number:** 303-556-2740

**Website:** <http://library.auraria.edu/services/askus>

The Auraria Library connects users with ideas through technology-enabled information discovery and delivery on an “anytime, anyplace” basis. The Library’s collections of learning materials, resources, and research services support the information, research, and curriculum needs of the Auraria Campus. Whether you are looking for a quiet place to read and reflect, a place to share a cup of coffee while working with classmates on a group project, a source of authoritative academic information, or a computer-enabled collaborative study room, the Library will meet your needs. Assistance from Library staff is available via one-on-one meetings, by phone, text, or chat on our website ([library.auraria.edu/services/researchhelp](http://library.auraria.edu/services/researchhelp)).

## Auraria Media Center and Classroom Support

**Location:** 1100 Lawrence Street (East side of the Auraria Library), 015

**Phone Number:** 303-556-2426      **Website:** <http://mediacenter.ahec.edu>

The Auraria Media Center and Classroom Support Services offers a full range of media services and classroom support:

- distance learning technologies including video conferencing, webinars, audio conferencing, video over IP and ISDN and videotaping of course delivery
- circulation of a wide range of audio, video and data (AVD) presentation equipment for one-time use
- long-term classroom equipment check-out
- production of content on digital tape, DVD, CD and videotape by an award-winning staff using state-of-the-art digital editing, graphics and animation systems
- quantity duplication of DVD, CD, audio and videotape media
- equipment maintenance and repair
- equipment/systems consultation and installation

The Auraria Media Center's 34-channel closed-circuit campus cable system can be used in the classroom to broadcast channels such as CNN, MSNBC, History, Discovery, A&E, PBS, CSPAN, NASA and local television networks. One channel is dedicated to and managed by each institution for distribution of programming of their choice.

Auraria Media Center staff are available to train faculty in the use of equipment in "smart" classrooms on campus and offer consulting services to faculty and other clients in such areas as media design and production, effective use of media types and effective use of distance learning technologies, effective use of those technologies and equipment selection to best meet instructional needs.

Auraria Media Center and Classroom Support Services will handle all of your classroom needs regarding furniture, projector screens, whiteboards, smart classroom equipment and ADA furniture placement.

## Emmanuel Gallery

**Location:** 10<sup>th</sup> and Lawrence Street Pedestrian Mall  
**Phone Number:** 303-315-7431

Tri-institutional campus on Auraria Campus for over 35 years. Historical landmark who received the Mayor's Art for Excellence in 2012 featuring national, international artists, designers and architects as well as featuring student and faculty shows for each school on campus. Stop in for a relaxing break

## Health Center at Auraria

**Location:** Plaza Building 150 **Phone Number:** 303-556-2525  
**24 Hour Mental Health Crisis Line:** 303-352-4455  
**Website:** [www.healthcenter1.com](http://www.healthcenter1.com)

### Medical Care

The Health Center at Auraria provides primary medical care, disease prevention, health education, wellness promotion, and various specialty services to all registered MSU Denver, CCD and CU Denver students.

The Health Center is open Monday through Thursday from 8 a.m. to 5 p.m., and Friday from 8 a.m. to 3 p.m.

## **Eligibility**

All current Students, faculty and staff on the Auraria Campus are eligible for medical services. Be prepared to show a Student I.D. card or a photo ID each time you check in. Payment Options

## **Payment**

Patients who participate or are enrolled in the MSU Denver or CU Denver Student Health Insurance will have their covered charges submitted directly to the insurance carriers. Patients are required to pay at the time of service for any plan exclusions and co-payments.

Health Center @ Auraria accepts most major health insurance plans because we understand the importance of health insurance for the individuals we serve. As insurance benefits shift and change, it is important to know your plan and what is covered before your appointment with your provider.

In an effort to assist our patients, Health Center @ Auraria has listed below the insurance plans we accept. We encourage you to access your individual policy, and identify what your specific plan will cover. Please note that, while many wellness and preventative services may now be covered 100% by your plan, specific benefits will vary according to your policy benefits.

It is imperative that patients review and understand their financial responsibility and portion of the services that are provided to them. Please contact your insurance carrier for specific details of your plan.

We currently accept most insurance plans with the following carriers:

**Aetna:** <https://www.aetna.com>

**Anthem Blue Cross/Blue Shield:** <https://www.anthem.com>

**Cigna:** <https://my.cigna.com>

**Cofinity:** (refer to the link on the back of your insurance card)

**Humana:** <https://www.humana.com>

**Multi-plan:** (refer to the link on the back of your insurance card)

**Rocky Mountain Health Plan:** <http://www.rmhp.org>

**TriCare:** <https://tricare.mil/>

**United HealthCare:** <https://www.myuhc.com>

## **Staff**

The Health Center is staffed by Physicians, Physician Assistants, Nurse Practitioners, Radiologic Technologists, Medical Assistants, and Allied Health Professionals. Psychiatrists and Gynecologists provide specialty medical care.

## **Appointments**

To be respectful of your time it is suggested that you schedule an appointment in advance by calling (303) 556-2525. Walk-in Care is also available on a “first come / first served” basis. Patients are encouraged to arrive early to increase the likelihood of Walk-in availability. Patients are scheduled for a same day or a future appointment according to the severity of their medical need.

## **Services**

The Health Center at Auraria can treat the majority of your health concerns on-site, including illnesses, injuries and physicals. See the list below for other on-site services.

- Illness Treatment
- First Aid
- Urgent Care
- Physical Examinations
- Lab Testing
- X-ray
- Medications
- Skin and Mole Evaluations
- Immunizations
- Blood Pressure Check
- Annual Gynecologic Exams
- Safer Sex Instruction
- Sexually Transmitted Disease Screening and Treatment
- Pregnancy Tests
- Birth Control Information and Supplies
- Colposcopy/Cryotherapy
- Referral to On-Site Physician Specialists
- Psychiatrist Consultations (referral needed)
- Cholesterol Screening/Fitness Analysis
- Minor Surgery/Suturing/Biopsies

## **Free clinical Services**

The Health Center at Auraria offers a variety of services at no charge regardless of insurance coverage. These exclusive free services are available to all MSU Denver, CU Denver, CCD and AHEC students, faculty and staff.

**Free services include:**

- Flu Vaccination
- HIV Testing, including Rapid HIV Testing
- Nutritional Counseling
- Prescriptive Exercise Rehabilitation
- Tobacco Cessation - includes free medication if indicated

## King Academic and Performing Arts Center

**Location:** 855 Lawrence Way **Phone Number:** 303-556-2179

**Website:** [www.ahec.edu/kingcenter](http://www.ahec.edu/kingcenter)

The King Center houses six performing spaces: three permanently assigned production studios, a 197-seat recital hall; 520-seat concert hall; and the 270 seat Eugenia Rawls Courtyard Theatre. There are dressing rooms, green room, recording studio, lighting lab, music electronics lab, classroom space, box office, scene shop, paint shop and costume shop. All spaces are fully equipped with state-of-the-art equipment and a variety of spaces for exhibiting fine art. The entire facility has more than 180,000 square feet dedicated to the education of the student and development of the student who wishes to study performance/arts. The center can support many forms of entertainment, anywhere from legit theatre to large choral ensembles and other forms of performances.

You can usually find staff in the offices between 9:00am - 4:30p. But we have employees on site at any given time and day of the week depending on the three institutions performance schedules.

## Tivoli Student Union

**Location:** 900 Auraria Parkway #325

**Phone Number:** 303-556-6330

**Website:** [www.ahec.edu/tivoli](http://www.ahec.edu/tivoli)

The Tivoli Student Union, managed by the Auraria Higher Education Center's Student Facilities Services department, provides a wide variety of amenities for the campus community. As the hub of the campus, the Tivoli Student Union houses the campus bookstore, called Tivoli Station, full-service restaurants and a food court, conference and meeting spaces, and facilities for recreational, social, and organized co-curricular student activities. The following services are located in the Tivoli Student Union:

- Tivoli Station (bookstore)
- Commuter Resource Center (ID Center)

- Sigi's Pool Hall
- Ricoh Copy Center
- Credit Union of Denver
- Public Service Credit Union
- i-lov-iT Market
- Free mobile charging stations (at Tivoli Station)
- Study lounges
- Restaurants, a coffee shop, and a food court

### **Club Hub**

**Location:** 900 Auraria Parkway, Suite 346    **Phone Number:** 303-556-8094

**Website:** [www.ahec.edu/club-hub](http://www.ahec.edu/club-hub)

The Club Hub provides free workspace for over 60 student clubs, as well as group meeting spaces and lounge areas. We support clubs in pursuing their goals and objectives, and also provide the opportunity to interact with other organizations on campus. Clubs must receive official recognition from their institution for Club Hub privileges. Our services include computer workstations with Internet access and printers, fax machines, mailboxes, and office supplies.

### **ID CENTER (COMMUTER RESOURCE CENTER)**

**Location:** 900 Auraria Parkway, Suite 269    **Phone Number:** 303-556-8385

**Website:** [www.ahec.edu/id-center](http://www.ahec.edu/id-center)

The Commuter Resource Center (ID Center) provides information about programs and services available to the campus community related to commuting to campus, student IDs, the RTD CollegePass, off-campus housing, getting around campus, and much more. Visit the ID Center to get your University of Colorado Denver student ID card and your RTD CollegePass smart card for unlimited rides on the RTD bus and light rail system.

### **SIGI'S POOL HALL**

**Location:** 900 Auraria Parkway, Suite 145    **Phone Number:** 303-556-3645

**Website:** [www.ahec.edu/sigis](http://www.ahec.edu/sigis)

Sigi's Pool Hall is a rec room for students to relax and meet with friends between classes. In addition to a lounge area with big screen TVs, lunch tables, and use of a microwave, we have pool, ping-pong, poker, and a variety of Xbox or Wii video games. Join us for monthly tournaments for the chance to win prizes! Sigi's is also home to the MSU Denver Food Bank.

## **Campus Safety**

**Auraria Police Department**

**Location:** 1201 5th Street, Denver, CO 80217

**Police Dispatch Number:** 303-556-3271

*Located in the Administration Building on the Auraria Campus*

### **Campus Police Mission**

The Auraria Campus Police Department is committed to enhancing the quality of life on the Auraria Campus by protecting life and property, and providing a wide range of services to prevent crime and resolve problems.

**Services** (*The Auraria Campus Police Department provides campus services 24 hours a day, 7 days a week.*)

- Crime prevention programs
- Informational services
- Police support to campus staff
- Night escorts to your vehicle
- Security patrols, bicycle patrols, foot patrols
- Vehicle unlocks
- Emergency response (Emergency Phone  
Map: <http://www.ahec.edu/campusmaps/index.htm>)
- Timely Notification Bulletin for the Auraria Campus
- Immediate notice of crimes affecting the Auraria Campus.

The Auraria Handivan Service is offered Monday through Thursday 7:00 am-10:00 pm and on Friday's from 7:00 am-6:00 pm. Also, take advantage of Auraria's Nightrider escort service. It will take you to any building or parking lot on campus Monday through Thursday, Sundown to 10:00pm. The wait time is usually no longer than 10 minutes. To arrange for the Nightrider, contact the Auraria Parking Office at (303) 556-2001. If the Nightrider is not running, contact the Auraria Campus Police Department at (303) 556-5000 to arrange for an escort to your car.

The Emergency Notification System (ENS) tool provided by the University of Colorado Denver (CU Denver) for students, faculty and staff provides timely life-safety alerts. You are able to receive these alerts via text, voice and email messaging. Your CU Denver email address has already been added to this system. If you would receive emergency alerts on your cell phone, make sure that you enter your cell phone number into the PROFILE section of your student or employee portal at <https://my.cu.edu/>. **Identify the phone type as a "Cellular" device and check it as the "Preferred" number.** If you have questions, please contact the CU Denver Emergency Manager, Essi Ellis, at [Essi.Ellis@ucdenver.edu](mailto:Essi.Ellis@ucdenver.edu) or by phone at 303-724-1031.

## **The Office of Commuter Services**

**Location:** Tivoli Student Union, 227

**Phone:** 303-556-2444 **Email:** [CommuterServices@ucdenver.edu](mailto:CommuterServices@ucdenver.edu)

**Off-Campus Housing Database Website:** [offcampushousing.ucdenver.edu](http://offcampushousing.ucdenver.edu)

The Office of Commuter Services supports students with commuting resources and an off-campus housing database that can be accessed through the link listed above. Any on-campus housing questions should be directed to Campus Village at 303-573-5272 or [Housing@ucdenver.edu](mailto:Housing@ucdenver.edu).

## **Student Right To Know and Disclosure Information**

### **Crime Statistics**

In compliance with the federal Student Right-to-Know and Campus Security Act, the Auraria Campus publishes crime statistics on campus in the Auraria Campus Clery Report. In an emergency, please contact Auraria Campus Police at 303-556-5000 or dial 911 from a campus phone.

### **Persistence and Completion Data**

Section 103 of Title 1 of Public Law 101-542 as amended by Public Law 102-26 (the Federal "Student Right-to-Know" Act) requires that institutions produce and make available to current and prospective students the completion rate of first-time, full-time, degree-seeking undergraduate students entering the institution. Six years after entering, 40 percent of the fall 2008 cohort graduated.

CU Denver's one-year fall-to-fall retention rate is 75 percent for the fall 2012 cohort. That is, of the first-time, full-time, degree-seeking undergraduate students who entered the university in fall 2012, 75 percent were enrolled at the Denver Campus in fall 2013 at the end of the term.

Voluntary System of Accountability (VSA) data indicate that the 2008 Denver Campus first-time, full-time, degree-seeking freshman cohort has an overall 4-year success rate of more than 80%, with 21% retained at another institution, 40% retained at CU Denver, nearly 15% graduated from CU Denver, and another 5.6% received degrees elsewhere.

### **Riot Law (Student Riot Bill)**

Student enrollment-prohibition-public peace and order convictions: 1) No person who is convicted of a riot offense shall be enrolled in a state-supported institution of higher education for a period of 12 months following the date of conviction; 2) a student who is enrolled in a state-supported institution of higher education and who is convicted of a riot offense shall be immediately suspended from the institution upon the institution's notification of such conviction for a period of 12 months following the date of conviction, except that if a student has been suspended prior to the date of conviction by the state-supported institution of higher education for the same riot activity, the twelve month suspension shall run from the start of the suspension imposed by the institution; 3) nothing in this section shall be construed to prohibit a state-supported institution of higher education from implementing its own policies and procedures or disciplinary actions in addition to the suspension under (2) of this section, regarding students involved in riot.

### **Sex Offender Information (Campus Sex Crimes Prevention Act)**

Sex offenders are required to list the locations of all institutions of post-secondary education where they volunteer or are enrolled or employed. The Colorado Bureau of Investigation maintains a database identifying all such persons and makes it available to all law enforcement agencies in which jurisdiction the institution of postsecondary education is

located. The campus community can obtain this information by contacting the Auraria Police Department at 303-556-5000.

**Voter Registration (National Voter Registration Act)**

In compliance with the National Voter Registration Act, the state of Colorado voter registration application form and information is available online at [www.sos.state.co.us/pubs/elections/](http://www.sos.state.co.us/pubs/elections/) or [www.fec.gov/votregis/vr.shtml](http://www.fec.gov/votregis/vr.shtml).

## ***STUDENT SERVICES***

### **Campus Assessment, Response and Evaluation (CARE) Team**

**Location:** Tivoli Student Union, Suite 227

**Phone Number:** 303-315-7306

**Website:** <http://www.ucdenver.edu/life/services/CARE/Pages/default.aspx>

**Email:** [shareaconcern@ucdenver.edu](mailto:shareaconcern@ucdenver.edu)

Submit a concern

at: [https://cm.maxient.com/reportingform.php?UnivofColoradoDenver&layout\\_id=1](https://cm.maxient.com/reportingform.php?UnivofColoradoDenver&layout_id=1)

The Campus Assessment, Response & Evaluation (CARE) Team is committed to improving campus safety and student success at both the CU Denver and CU Anschutz Medical Campus by proactively and collaboratively managing situations and individuals that pose, or may reasonably pose, a threat to the safety and well-being of the campus community. The team coordinates with students, faculty, and staff as well as concerned others, using objective and thoughtful approaches to identifying, assessing, and intervening with individuals of concern.

### **The Career Center**

**Location:** Tivoli Student Union, LynxConnect, Suite 339

**Phone Number:** 303-315-4000

**Website:** <https://www1.ucdenver.edu/services/career-center>

**Email:** [CareerCenter@cdenver.edu](mailto:CareerCenter@cdenver.edu)

The Career Center offers a full array of services that prepare students for their transition from college to career. Students are encouraged to participate in career-related events and services as early as their freshman year. This includes obtaining help in choosing a major, deciding on career options, and mapping out experiences necessary to be successful upon graduation. The Career Center also supports students in refining job search skills like resume & cover letter writing, interview preparation, and targeting employers through our internship and job board called Handshake.

The Career Center's mission is to provide personal and meaningful interactions with students, alumni and employers in order to prepare them for the world of work.

## Club Sports

**Location:** Lola & Rob Salazar Student Wellness Center

**Phone Number:** 303-315-9355

**Web:** <http://www.ucdenver.edu/clubsports>

**Email:** [lynxwellness@ucdenver.edu](mailto:lynxwellness@ucdenver.edu)

Club Sports is a program designed to provide students with the opportunity to engage in team sports in a friendly and competitive environment. The purpose of the program is to unite individuals with a shared interest in sports, develop lasting friendships, and build community among students across campus, all while increasing their overall well-being through physical activity. Any student who is enrolled in at least 1 credit hour and is paying the Club Sports fee may participate in Club Sports. Students can pick from a variety of sports to participate in and have the chance to serve in a leadership position during their time. All Club Sports serve under the Wellness and Recreation Services department and indoor practice spaces are housed in the Lola and Rob Salazar Student Wellness Center. Club Sports policies and guidelines can be found in the Club Sports Manual.

## Community Engagement

**Location:** Tivoli Student Union Suite 303

**Phone Number:** 303-315-7288

**Website:** <http://www.ucdenver.edu/life/services/studentlife/Pages/StudentLife.aspx>

**Email:** [Volunteer@ucdenver.edu](mailto:Volunteer@ucdenver.edu)

In college, getting involved with your community can lead to future job opportunities, discovering your passion, and making friendships that last a lifetime! Through the Office of Student Life, we offer a variety programs to help students get connected to the community. The Alternative Break program allows students to travel to various cities (and countries) to volunteer over spring, winter and summer breaks. Lynx to College Now! employs CU Denver students to work as mentors at Oakland Elementary School. Stop and Serve tables let students make a difference without even leaving campus, and Day of Service events are a great way to make friends while serving local nonprofits. Follow Community Engagement on OrgSync to hear about upcoming events, and be sure to stop by the Office of Student Life (Tivoli 303) to learn more about volunteerism and service.

## Office of Student Conduct and Community Standards

**Location:** Tivoli Student Union 309

**Phone Number:** 303-315-7311

**Website:** <http://www.ucdenver.edu/life/services/standards/Pages/default.aspx> **Email:** Please refer to website for more information

We serve the university community by meeting the developmental and educational needs of students related to community expectations, civility and respect for self and others. We support community members with conflict management and resolution, and respond to inappropriate and threatening behaviors. We provide student-centered educational services, which promote personal development and individual responsibility. We strive to create a dynamic, open and just environment where civility, cultural competence and learning are expected and celebrated.

## CU Denver Live!

**Location:** Various Locations: refer to website for more information **Phone Number:** 303-315-5483

**Website:** <https://cudenverlive.com/> **Email:** [live@ucdenver.edu](mailto:live@ucdenver.edu)

*CU Denver Live!* is a student run arts programming committee that works as a sub-committee under The Events & Partnerships. *CU Denver Live!* strives to program arts events that spark the interests of numerous types of students while maintaining a multicultural and educational mindset. Additionally the team hopes to create a fun and inclusive atmosphere that promotes school pride and a sense of community at CU Denver.

## Disability Resources and Services Office

**Location:** Student Commons Building, Room 2116 **Phone Number:** 303-315-3510

**Website:** <http://www.ucdenver.edu/disabilityresources> **Email:** [disabilityresources@ucdenver.edu](mailto:disabilityresources@ucdenver.edu)

The Office of Disability Resources and Services (DRS) is committed to providing equal opportunities and fostering the personal growth and development of students with disabilities. The DRS staff strives to meet the needs of a large and diverse community of students with disabilities. We are available to provide assistance and to arrange for reasonable accommodations that will address specific educational needs. Accommodations may include, but are not limited to, the following:

- Priority registration for classes
- Assistance in identifying volunteer note takers
- Alternative testing for assessment tests and classroom examinations
- Oral/sign language interpreters
- Real-time captioning
- Textbooks in alternate formats (audio taped, Braille, enlarged, scanned)

## Center for Identity & Inclusion

**Location:** Student Commons Building, Room 2007

**Phone Number:** 303-315-1880

**Website:** <http://www.ucdenver.edu/about/departments/odi/CII/Pages/default.aspx>

**Email Address:** [cii@ucdenver.edu](mailto:cii@ucdenver.edu)

**Office Hours:** 8:00 am - 5:00 pm

The Center for Identity & Inclusion (CII) provides services: a) to support underrepresented students and b) to promote a diverse and inclusive campus for all students, faculty, and staff.

### **American Indian Student Services**

Location: Student Commons Building, Room 2007C

Phone Number: 303-315-1882    [grace.tyon@ucdenver.edu](mailto:grace.tyon@ucdenver.edu)

### **Asian American Student Services**

Location: Student Commons Building, Room 2007E

Phone Number: 303-315-1879    [soyon.bueno@ucdenver.edu](mailto:soyon.bueno@ucdenver.edu)

### **Black Student services**

Location: Student Commons Building, Room 2007F

Phone Number: 303-315-1881    [omar.montgomery@ucdenver.edu](mailto:omar.montgomery@ucdenver.edu)

### **Latinx Student Services**

Location: Student Commons Building, Room 2007H

Phone Number: 303-315-1878    [abenicio.rael@ucdenver.edu](mailto:abenicio.rael@ucdenver.edu)

## ESL Academy

**Location:** 1100 Lawrence St #014

**Phone:** 303-315-2383

**Website:** <http://esl.ucdenver.edu>

**Email:** [esl@ucdenver.edu](mailto:esl@ucdenver.edu)

The University of Colorado Denver's English as a Second Language (ESL) Academy offers a rich diversity of academic, social, and cultural learning opportunities. The Academy offers high-quality, year-round ESL instruction specifically designed for university preparation. The curriculum helps students improve their language skills through a rigorous program of study, campus involvement, and cultural and educational activities.

Our program offers the following distinctive advantages when compared against other programs:

The curriculum is designed especially for university-bound students. In addition to mastering academic English, students will learn how to succeed academically at the University of Colorado Denver.

Students in the ESL Academy will be considered University of Colorado Denver students. They will be on the university campus from day one of our program and will be eligible to live in university housing, though there will be limited availability for students who join our program mid-term.

Students will have access to all of the activities and resources that the university has to offer, not to mention the spectacular outdoors and urban life in Denver and Colorado.

Students may be allowed to take one or two regular academic courses that count towards fulfillment of CU Denver degree requirements once they achieve a measure of English proficiency.

When a student completes the ESL Academy successfully, s/he will automatically fulfill the University of Colorado Denver's English language proficiency requirement and will be eligible for full admission.

Students will be issued a Form I-20 from the University of Colorado Denver for a seamless immigration experience and will not have to transfer their immigration status to begin their degree program upon complete completion of the ESL Academy.

Students will benefit from a seamless transition to university degree programs after they successfully complete the ESL Academy, thus maximizing the prospects of their success.

For full details, visit the ESL Academy online at [esl.ucdenver.edu](http://esl.ucdenver.edu). Here, students can get information about:

- The online application
- Program information
- Tuition and Fees
- International Student Services

If you have additional questions you may send an email to [esl@ucdenver.edu](mailto:esl@ucdenver.edu) or call 303-315-2383. Located at 1100 Lawrence Street #014 Denver, CO 80204

## Experiential Learning Center

**Location:** Tivoli Student Union, LynxConnect #439

**Phone Number:** 303-315-7258

**Website:** <http://www.ucdenver.edu/life/services/ExperientialLearning/Pages/default.aspx>

**Email:** [Experiential.LearningCenter@ucdenver.edu](mailto:Experiential.LearningCenter@ucdenver.edu)

Experiential learning includes a variety of activities with one common goal-to immerse you in hands-on learning outside the classroom where your experience is at the heart of the learning process. The Experiential Learning Center (ELC) serves students, faculty, and employers as a resource for experiential learning opportunities. We offer information, resources and support in the development and coordination of

academic and non-academic internship experiences, professional skill development opportunities, and undergraduate research experiences.

## **LGBTQ Student Resource Center at Auraria**

**Location:** Tivoli Student Union 213

**Phone Number:** 303-615-0515

**Website:** <http://www.ucdenver.edu/life/services/glbts/services/Pages/default.aspx> **Email:** [info@glbtss.org](mailto:info@glbtss.org)

The LGBTQ Student Resource Center is a tri-institutional office on the Auraria Campus serving the students, faculty and staff of Metropolitan State University of Denver, Community College of Denver and University of Colorado at Denver. We are available to all Auraria students as a resource for exploring issues of sexual orientation and gender identity.

The LGBTQ Student Resource Center is located in the Tivoli Student Union, Room 213, and is staffed by a director and assistant director, with the support of student employees and volunteers. Input and involvement from the entire campus community are welcomed. Our center offers a variety of support, education, and advocacy services for the entire campus community including:

- Support for those who may have questions about their own sexual orientation, gender identity, gender expression, or that of a friend or family member
- Advocacy for students experiencing discrimination or harassment based on a real or perceived LGBTQ identity
- Speakers for events, workshops, and classes on various aspects of sexual orientation/gender identification
- Programs and workshops about working more effectively with the gay, lesbian, bisexual, and transgender communities and combating misinformation, misconceptions, and homophobia
- Resource library with over 1700 books and videos (documentary and cinema) available for research and leisure as well as a multitude of free literature regarding other organizations and services throughout Denver and Colorado that provide outreach, services, and advocacy.

## **The Office of Global Education/Study Abroad**

**Location:** Tivoli Student Union, LynxConnect Suite 439

**Phone Number:** 303-315-2001

**Website:** [www.ucdenver.edu/studyabroad](http://www.ucdenver.edu/studyabroad)

**Email:** [study.abroad@ucdenver.edu](mailto:study.abroad@ucdenver.edu)

The Office of Global Education / Study Abroad provides academically and professionally relevant international experiences to a diverse student population at the University of Colorado Denver | Anschutz Medical Campus. These experiences equip students with cross-cultural skills necessary to succeed in an interconnected global society. The

Office of Global Education is committed to providing students with a wide range of engaging and affordable study, internship, research, and clinical opportunities.

International program offerings vary to meet the needs and interests of all students. These programs are open to undergraduate, graduate, and international students; it is not necessary to be a particular major to participate. Program lengths range from two weeks to an academic year or more. The vast majority of programs do not require language proficiency beyond the English language.

The Office of Global Education strives to keep study abroad programs affordable. In most cases, students are able to utilize financial aid and are eligible for an array of internal and external scholarships. For the most current information on programs, policies, and funding, please visit the Office of Global Education website at [ucdenver.edu/studyabroad](http://ucdenver.edu/studyabroad) or visit LynxConnect in the Tivoli.

## International Affairs

**Location:** Lawrence Street Center, Suite 932      **Phone Number:** 303-315-2230

**Website:** [www.ucdenver.edu/international](http://www.ucdenver.edu/international)      **Email:** Please refer to website for more information

The Office of International Affairs (OIA) serves the university by providing administrative support, strategic advice, technical services, collaborative educational programs with the university's 13 schools and colleges, and related services that contribute to the strategic international goals of the university. OIA provides visa and orientation services to international students and scholars; offers expertise in the development and maintenance of undergraduate, graduate and professional global education; assists with brokering and designing bilateral international educational programs; and offers comprehensive international recruitment and admissions services. OIA addresses international policy issues, has oversight of international risk management protocols, serves as a resource for best practices in the internationalization of higher education, maintains central data bases pertaining to international activities of the university, advises on the development of international affiliations and agreements, assists departments/programs and schools/colleges with the development of comprehensive international strategic planning, and seeks to promote and support initiatives that advance international research, education, and global cooperation in order to enhance the reputation of the University of Colorado Denver | Anschutz Medical Campus.

OIA also serves as a resource for faculty seeking international research opportunities, provides a comprehensive list of international scholarship/fellowship information, and serves as the institutional liaison for the CIES Fulbright Scholars Program.

The divisions of OIA include:

- ESL (English as a Second Language) Academy ([www.ESL.ucdenver.edu](http://www.ESL.ucdenver.edu))

- International Operations  
(<http://www.ucdenver.edu/academics/InternationalPrograms/oia/operations>)  
([www.international.ucdenver.edu](http://www.international.ucdenver.edu))
- Global Education: Study Abroad ([www.ucdenver.edu/studyabroad](http://www.ucdenver.edu/studyabroad))
- International Admissions ([www.internationaladmissions.ucdenver.edu](http://www.internationaladmissions.ucdenver.edu))
- International Student and Scholar Services  
([www.international.ucdenver.edu/ISSS](http://www.international.ucdenver.edu/ISSS))

## International Colleges and Partnerships

### International College

**Beijing-** <http://www.ucdenver.edu/academics/internationalprograms/oia/icb/Pages/default.aspx>

International College Beijing (ICB) is a joint education program between the University of Colorado Denver (CU Denver) and China Agricultural University (CAU), located in Beijing, People's Republic of China. The partnership, formed in 1994, was one of the first of its kind approved by the Chinese Ministry of Education.

At ICB students can choose to earn a CU Denver Bachelor of Arts degree in either economics or communication on site in Beijing. Students can also choose to study in Denver to complete their undergraduate programs after a year or two of study at ICB. As courses are taught in English by CU Denver faculty, U.S. students can learn or perfect their Chinese while pursuing rigorous courses alongside ICB Chinese students, fostering a truly global classroom experience.

ICB is located on the east campus of China Agricultural University in the Haidian district north of downtown Beijing. The campus is a 30-minute ride from downtown Beijing, Beijing International Airport and major cultural centers such as Tiananmen Square, the Forbidden City and the Summer Palace.

Joanne Wambeke, International Student Cohort and International Operations Manager, [joanne.wambeke@ucdenver.edu](mailto:joanne.wambeke@ucdenver.edu), 303-315-2121.

## International Student and Scholar Services

**Location:** Lawrence Street Center, Suite 932

**Phone Number:** 303-315-2230

**Website:** [international.ucdenver.edu/ISSS](http://international.ucdenver.edu/ISSS)

**Email:** [iss@ucdenver.edu](mailto:iss@ucdenver.edu)

The International Student & Scholar Services (ISSS) unit in the Office of International Affairs serves approximately 1,400 international students and 500 international scholars from all over the world each year. ISSS is responsible for ensuring university-wide compliance with a wide range of federal regulations relating to the enrollment and/or employment of international students and scholars. ISSS creates immigration documents, coordinates Check-In and Fundamentals sessions for new international

students, helps students maintain their immigration status once they are here, offers a variety of programs and activities, and advises students on everything from adjusting to a new culture to applying for work authorization. ISSS also works closely other members of the University of Colorado Denver community to ensure the success of our international students. For additional information about ISSS staff members and the services we provide, please visit our website at [international.ucdenver.edu/ISSS](http://international.ucdenver.edu/ISSS)

## Office of Case Management

**Location:** Tivoli Student Union 309

**Phone:** 303-315-7306

**Website:** <http://www.ucdenver.edu/life/services/care/case/Pages/default.auxt.aspx> **Email:** [esm@ucdenver.edu](mailto:esm@ucdenver.edu)

The Office of Case Management is here to support CU Denver | Anschutz students who may be experiencing difficult times related to mental health, safety concerns, interpersonal conflict, adjusting to college, family emergencies, feelings of isolation and anything else which may impact a student's ability to be successful at CU Denver | Anschutz. Our goal is to make sure that every student receives the support they need to thrive within the CU Denver | Anschutz community. Case Managers collaborate and consult with students, parents, faculty, staff, and other campus resources to best address the diverse needs of each student. Our office helps students navigate university systems, offices, and can assist with professor notifications, medical withdrawals, retroactive withdrawal processes, etc.

## Office of Information Technology

**Location:** Lawrence Street Center, 1350

**Phone:** 303-724-4357 (4-HELP)

**Website:** <https://www1.ucdenver.edu/offices/office-of-information-technology>

**Email:** [UCD-ITS-HelpDesk@ucdenver.edu](mailto:UCD-ITS-HelpDesk@ucdenver.edu)

The Office of Information Technology (OIT) works in partnership with academic and business units to provide technical support to meet the needs of faculty & staff at the Denver/Anschutz Medical Campus. OIT serves as the primary source of enterprise-wide technology and telecommunications services in support of all faculty and staff.

Services range from providing help desk and desktop services to enterprise-wide services in web development, networking, email, security, systems development, and telephony to protecting the integrity of the University's data and administrative systems. Users are encouraged to contact the Help Desk for assistance with any of these services.

OIT also provides student computing services to currently enrolled students within the computer labs located in the North Classroom 1206, The Student Commons Building 2nd floor, and the Tivoli 241. The computer labs have Macintosh and Windows-based

computers with Internet access available for student use on a first-come first-served basis. For more information, call the OIT Help Desk at 303-724-4357 (4-HELP) or UCD-ITS-HelpDesk@ucdenver.edu

## Ombuds Office

**Location:** Lawrence Street Center Building, Room 1003    **Phone:** 303-315-0046

**Website:** [www.ucdenver.edu/ombuds](http://www.ucdenver.edu/ombuds)

**Contact:** Teresa Ralicki;

**Email:** [Terese.ralicki@ucdenver.edu](mailto:Terese.ralicki@ucdenver.edu)

The Ombuds Office is a free service that assists students in resolving UCD conflicts, complaints, and disputes. The cornerstones of our office are: confidentiality, impartiality, informality, and independence. Students typically use our office when facing issues that seem unfair to them or when they just don't know what to do next.

A sampling of concerns are:

- The actions of faculty, staff, or other students
- Denials of petitions
- Harassment of any kind
- Administrative decisions
- Grading disputes
- Clarification of policies or procedures

We can assist you in identifying and evaluating your options for dealing with issues so you can have the best chance of reaching a satisfactory outcome. Our Ombuds can also mediate disputes involving student clubs and organizations and provide conflict management training. We will happily accommodate your schedule for a meeting time that works best for you.

## Student and Community Counseling Center

**Location:** Tivoli Student Union 454

**Phone Number:** 303-615-9911

**Website:** [www.ucdenver.edu/counselingcenter](http://www.ucdenver.edu/counselingcenter) **Email:** Please refer to website for more information

The Student and Community Counseling Center provides counseling sessions, groups and life skills workshops at no charge to students attending the Downtown Campus. Our services emphasize client strengths, recognizing diversity and promoting wellness to optimize academic success. We serve individuals, couples, families, and groups for mental health concerns including, but not limited to:

Anxiety, Crisis Intervention, Depression, Life skills, Relationships, Social justice issues, Stress management, Substance abuse, Biofeedback, and Trauma Therapy.

If appropriate, we refer students to additional on-campus and/or community resources through our WRAP (Wellness Resources Action Plan) program. By request, staff provide consultation, lectures and workshops to student, faculty, and staff groups on mental health topics, diversity, center services, and organizational and student development.

## Student Government Association

**Location:** Tivoli Student Union 301

**Phone Number:** 303-315-7286

**Website:** <http://www.ucdenver.edu/sga>

**Email:** [sga@ucdenver.edu](mailto:sga@ucdenver.edu)

The Student Government Association serves as a voice for students. Similar to the structure of the U.S. Government, SGA has executive, legislative and judicial branches. Executives, Senators, College Council Members, and SACAB representatives are elected each year in the spring semester. SGA assists students with information concerning student clubs and organizations, campus events, issues concerning student status and other information of general interest to students. SGA also provides student assistance with grievances and the opportunity to become more closely involved with the university community through active participation in student government itself or through service on university, tri-institutional and Auraria committees.

## Student Health Insurance Office

**Location:** Plaza Building, Suite 150

**Phone Number:** 303-615-9999

**Website:** <https://www.msudenver.edu/healthcenter/> **Email:** Please refer to website for more information

Hours: Monday- Thursday: 8:00am- 5:00pm, Friday 8:00am- 3:00pm

The Student Health Insurance Office strongly encourages all students to have adequate health insurance coverage. The university health plan is designed to coordinate services with the Health Center at Auraria to provide quality health care at the lowest possible cost. **For domestic students, the university health plan is voluntary.** International students with F-1 and J-1 student visas are required to carry the health insurance plan provided by the university. For more information for international students, please visit: <https://www.msudenver.edu/healthcenter/cudenverstudentinsurance/>

## The Office of Student Life

**Location:** Tivoli Student Union 303

**Phone Number:** 303-315-7288

**Website:** [www.ucdenver.edu/studentlife](http://www.ucdenver.edu/studentlife)

**Email:** [studentlife@ucdenver.edu](mailto:studentlife@ucdenver.edu)

The Office of Student Life integrates the academic, residential, and co-curricular spheres of student's lives, linking the out-of-class experience to the academic mission of the University while enhancing the overall educational experience of students through the development of, exposure to and participation in social, cultural, intellectual, recreational, leadership and governance programs. Student Life and Campus Community is the advising, coordinating, resource and general information center for student organizations, the academic honor societies student government and the student newspaper. We collaborate with students, faculty, administrators, and other partners both inside and outside of the CU Denver community to create safe environments for students. In addition, we create opportunities for students to learn through active participation and reflection where they can develop as responsible leaders and engage with their peers and cultivate appreciation for diversity and the betterment of our global society. Student Life and Campus Community is comprised of Student Organizations and Student Leadership Programs, Volunteer and Community Engagement, and Parent and Family Program.

## **Student Newspaper: CU Denver Sentry**

**Location:** Tivoli Student Union, 345

**Phone Number:** 303-556-2535

**Website:** [www.cu-sentry.com](http://www.cu-sentry.com)

**Email:** Please refer to website for more information

The purpose of the *CU Denver Sentry* is to provide students with information about campus issues and events. The newspaper strives to include good investigative reporting, feature articles and items of general interest to its campus readership. In addition, the newspaper is a tool to encourage and develop writers, journalists, artists and other student members of its general management and production staff.

## **Student Organizations and Student Leadership Programs**

**Location:** Tivoli Student Union 303

**Phone Number:** 303-315-7288

**Websites:** [www.ucdenver.edu/studentorganizations](http://www.ucdenver.edu/studentorganizations) [www.ucdenver.edu/leadership](http://www.ucdenver.edu/leadership)

**Email:** Please refer to websites for more information

Get involved with a student organization, student government or the campus newspaper. CU Denver has over 200 student organizations, honor societies, professional organizations and faith-based groups. We help students register with student organizations, and provide services, information, education, support, and advising to assist with the development and strengthening of students and student groups. In addition, we provide multiple opportunities for students to engage in practicing and developing their leadership skills. Leadership programs include diverse

leadership conferences including CO-Leads, a state wide multi-cultural leadership conference; and the Lynx Leadership Conference, a program designed to increase the leadership skills of CU Denver Students. We also provide leadership trainings that enhance the co-curricular experience on campus through programs such as Leadership On demand, a program designed for students involved in student organizations on campus; and Student Government Association, providing a voice for students on campus. We encourage students to take advantage of shared governance and increase the sense of community on campus through all of the leadership programs.

## **Office of Equity (Title IX: Sex Discrimination, Sexual Harassment and Sexual Misconduct)**

**Location:** Lawrence Street Center 12<sup>th</sup> Floor

**Phone Number:** 303-315-2567

**Website:** <http://equity.ucdenver.edu/>

**Email:** [equity@ucdenver.edu](mailto:equity@ucdenver.edu)

The Office of Equity exists to prevent, stop, and remedy sexual misconduct, discrimination, harassment, and related retaliation in our campus community. **We are working to make our campus a community in which Respect is Expected.**

### **The Sexual Misconduct Policy prohibits**

- sexual assault: non-consensual sexual intercourse;
- sexual assault: non-consensual sexual contact;
- sexual exploitation (such as taking or sharing intimate photos without consent);
- dating or domestic violence;
- gender-based stalking;
- sexual harassment;
- and any retaliation taken against those involved in the reporting process.

**The Nondiscrimination Policy** prohibits discrimination or harassment on the basis of race, color, national origin, pregnancy, sex, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy.

To report an incident of sexual misconduct, discrimination, harassment, or retaliation or to request a training, please contact the Office of Equity at:

- **Phone number:** 303-315-2567
- **Email address:** [equity@ucdenver.edu](mailto:equity@ucdenver.edu)
- **Office address:** Lawrence Street Center, 12th floor, Denver, CO 80204
- **Mailing address:** Campus Box 134, P.O. Box 173364, Denver, CO 80217-3364.
- **Or visit our website for an online report and more information about our policies, procedures, trainings, and other resources:** [www.equity.ucdenver.edu](http://www.equity.ucdenver.edu)

## **Veteran & Military Student Services**

**Location:** Tivoli Student Union 124

**Phone Number:** 303-315-7300

**Website:** <http://www.ucdenver.edu/life/services/Veteran/Pages/vmsshome.aspx> **Email:** [vmss@ucdenver.edu](mailto:vmss@ucdenver.edu)

Veteran & Military Student Services (VMSS) is the initial contact point for student active service members, veterans and their families attending CU Denver. The main priority of the office is to verify U.S. Department of Veterans Affairs education benefit certification for eligible students, ensuring that each student meets the Veterans Administration requirements for attendance, course load, content, as well as all other regulations necessary to receive educational benefit payments. This office assists students with filling out Veteran Affairs paperwork and in solving problems associated with the receipt of Veteran Affairs related educational benefits. The VMSS provides student peer to peer mentoring, transition assistance into higher education, scholarships, mental health services that are specific to the military and transition issues, and career preparation through the Boots to Suits Program. The office also serves as a liaison for numerous campus and community resources.

## Women and Gender Center

**Location:** Tivoli Student Union 310

**Phone Number:** 303-315-7262

**Website:** [www.ucdenver.edu/wrc](http://www.ucdenver.edu/wrc)

**Email:** [WGC@ucdenver.edu](mailto:WGC@ucdenver.edu)

The Women & Gender Center (WGC) at CU Denver is committed to advancing issues of gender equity and supporting the gender-focused needs of students, faculty, and staff on the Auraria campus. The mission of the Women and Gender Center is to address gender inequities and foster a campus community that values inclusion, social justice, equity, and respect for everyone regardless of background and experience. We are committed to enacting intersectional feminism in our programming by exploring gender as it overlaps and interacts with the multiple identities that people inhabit across their lifespans. We serve all members of the CU Denver community, regardless of gender identity.

## Writing Center

**Location:** North Classroom 4014

**Phone Number:** 303-315-7355

**Website:** <http://writingcenter.ucdenver.edu>

**Email:** [writing.center@ucdenver.edu](mailto:writing.center@ucdenver.edu)

The Writing Center at CU Denver is a free resource available to all university students who wish to improve as writers. Services include in-person and online one-on-one appointments; an asynchronous Graduate Drop Box for graduate students; an asynchronous After Hours Drop Box for all students; workshops on a variety of topics (for example: citation, literature reviews, C.V.s, and more); and downloadable handouts, podcasts, and videos. Professional Writing Consultants will work on any type of writing

and any aspect of the writing process, including (but not limited to) idea-generation, organization, thesis development, source usage, and grammar. Students bring in documents ranging from resumes, personal statements, and research essays to theses, rhetorical analyses, and grant applications. All writing is welcome. Interested students can schedule appointments (required) online and get more information (hours, directions, etc.) about each of our 9 locations/services for students right from the homepage ([writingcenter.ucdenver.edu](http://writingcenter.ucdenver.edu)):

- CU Denver: NORTH 4014
- CU Anschutz: HSL 1204
- CU South Denver: Student Commons, 2nd floor, Liniger Building
- Auraria Library: Knowledge Market, 1st floor
- Business School: Cordillera Conference Room, 1st floor
- Campus Village at Auraria (residents only): Cyber Café, 1st floor
- Online (real-time) consultations
- An asynchronous Graduate Drop Box for graduate students
- An asynchronous After Hours Drop Box for all students

# GRADUATE SCHOOL POLICIES AND PROCEDURES

## Graduate School Policies & Procedures

Each graduate program should have a handbook or other similar resource that describes what is expected of its students because each program operates differently within the scope and boundaries set by the Graduate School Policies & Procedures. The GS Policies & Procedures provide a foundation of minimum requirements but programs are free to set higher expectations provided those expectations are clearly communicated and applied uniformly.

Please click [here](#) to view the general Graduate School Policies & Procedures.

Listed below are all the schools/colleges and programs that are governed by the Graduate School Policies & Procedures:

### College of Architecture and Planning

- Design and Planning PhD
- Historic Preservation MS
- Urban Design MUD

### College of Arts & Media

- Recording Arts MS

## **Business School**

- Computer Science and Information Systems PhD

## **School of Education and Human Development**

- Education and Human Development PhD
- Leadership for Education Equality EdD
- School Psychology (PsyD)

## **College of Engineering, Design and Computing**

- Bioengineering MS
- Bioengineering PhD
- Civil Engineering MS
- Civil Engineering MENG
  - Offered in civil engineering, computer science & engineering, electrical engineering and mechanical engineering
- Civil Engineering PhD
- Computer Science & Information Systems PhD
- Computer Science MS
- Electrical Engineering MS
- Electrical Engineering MENG
- Engineering and Applied Science PhD
- Mechanical Engineering MS
- Mechanical Engineering MENG

## **College of Liberal Arts & Sciences:**

- Anthropology MA
- Applied Geography & Geospatial Science MA
- Applied Mathematics MS
- Applied Mathematics PhD
- Biology MS
- Chemistry MS
- Clinical Health Psychology PhD
- Communication MA
- Economics MA
- English MA
- Environmental Sciences MS
- Health and Behavioral Science PhD
- History MA
- Humanities MH
- Integrated Sciences MIS
- Integrative and Systems Biology, PhD
- Political Science MA
- Social Sciences MSS
- Sociology MA
- Spanish MA

## **School of Public Affairs**

- Criminal Justice MCJ
- Public Affairs PhD

# **UNIVERSITY POLICIES**

*Every organization, large and small, runs more smoothly when policies and procedures are in place. This chapter touches briefly on policies that are most important to students and their academic pursuits. The University of Colorado Denver's Policies and Guidelines website, [www.ucdenver.edu/faculty\\_staff/employees/policies/](http://www.ucdenver.edu/faculty_staff/employees/policies/), provides a complete list of policies for every facet of the organization, including those from other organizations that affect the Denver Campus, such as the Laws of the Regents and policies of the Auraria Higher Education Center.*

## **Academic Honor Code and Discipline Policies**

Policies related to academic credit and grades are explained in the Registration and Records chapter of this catalog.

### **University Policies**

**Phone:** 303-315-2724

**Website:** [http://www.ucdenver.edu/faculty\\_staff/employees/policies/pages/default.aspx](http://www.ucdenver.edu/faculty_staff/employees/policies/pages/default.aspx)

The Office of Policy and Efficiency - with input from system and campus policy owners - develops, oversees and maintains the University's system-wide policy-making process; facilitates the development, review, approval, and maintenance of University-wide policies.

#### **Policies include:**

- Inclusiveness and Non-Discrimination
- Anti-Violence Policy
- Sexual Harassment
- Drugs and Alcohol Policy
- For further information on University Policies please contact an individual via the information above.

### **Campus Policies**

**Phone:** 303-315-2102      **Email:** [policy@ucdenver.edu](mailto:policy@ucdenver.edu)

**Website:** [http://www.ucdenver.edu/faculty\\_staff/employees/policies/Pages/default.aspx](http://www.ucdenver.edu/faculty_staff/employees/policies/Pages/default.aspx)

The Campus Policy Office resides in the Provost Office. This office oversees all development, coordination, management, rescissions and archives for all CU Denver and CU Anschutz campus policies.

#### **Policies include:**

- Academic & Faculty Affairs
- Finance
- General Administration
- Human Resources
- Information Technology

- Research
- Student Affairs

For further information on campus-level policies please contact an individual via the information above.

## **Academic Integrity and Discipline Policies**

CU Denver Campus Policy 7050, Academic Integrity, defines academic misconduct and sets forth a uniform process for handling allegations of student academic misconduct at CU Denver. As members of the CU Denver community, students are expected to know, understand, and comply with the standards of the University and to accept the responsibility to maintain the highest standards of intellectual honesty and ethical conduct in completing all forms of academic work at the university. In particular, students must refrain from academic misconduct, defined in the policy as (1) a student's use of unauthorized assistance with intent to deceive an instructor or other person who is assigned to evaluate the student's work in meeting course and degree requirements, or (2) actions that interfere with the ability of the instructor to fairly judge the work of the student or other students. Academic integrity standards assist in promoting an academically sound, fair, and respectful community. CU Denver views the Academic Integrity process set forth in this policy as a learning experience that can result in growth and personal understanding of one's responsibilities and privileges within both the CU Denver community and the greater community. All students must adhere to these standards. Students who allegedly violate these standards and commit academic misconduct will be subject to the procedures described in this policy. Academic dishonesty is academic in nature, and students are encouraged to contact their academic advisor for details of the campus policy and procedures centered on the academic integrity policy.

### **Forms of Academic Dishonesty (Refer to Campus Policy 7050 for more detailed definition)**

Students are expected to know, understand and comply with the ethical standards of the university. Academic dishonesty is defined as a student's use of unauthorized assistance with intent to deceive an instructor or other such people who may be assigned to evaluate the student's work in meeting course and degree requirements. Examples of academic dishonesty include, but are not limited to the following:

#### *A. Plagiarism*

Plagiarism is the use of another person's distinctive ideas or words without acknowledgment. The incorporation of another person's work into one's own requires appropriate identification, regardless of the means of appropriation.

#### *B. Cheating*

Cheating involves the possession, communication or use of information, materials, notes, study aids or other devices not authorized by the instructor in an academic

exercise or communication with another person during such an exercise for the purpose of obtaining or providing unauthorized information or materials.

*C. Fabrication and Falsification*

Fabrication involves inventing or counterfeiting information, i.e., creating results not obtained in a study or laboratory experiment. Falsification, on the other hand, involves the deliberate alteration or changing of results to suit one's needs in an experiment or other academic or creative exercises.

*D. Multiple Submissions*

This is the submission of academic work for which academic credit has already been earned, when such submission is made without instructor authorization.

*E. Misuse of Academic Materials*

The misuse of academic materials includes but is not limited to the following: stealing or destroying library or reference materials, computer programs, another student's notes or materials or illegitimate possession of examination materials, forgery, falsification of university documents.

*F. Complicity in Academic Dishonesty*

Complicity involves knowingly allowing or contributing to another's academic misconduct.

**School/College Specific Policy**

*Business School*

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, falsification of official records and similar acts or any attempt to engage in such acts are grounds for suspension or expulsion from the university. In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as the student's own. It is recommended that students consult with the instructors as to the proper preparation of reports, papers, etc., to avoid this and similar offenses. Also, actions that disrupt the administrative process, such as misrepresentation of credentials or academic status, other forms of deception or verbal abuse of university staff are grounds for suspension or probation. All discovered acts of dishonesty must be referred to the Business School's Internal Affairs Committee.

*College of Engineering, Design and Computing*

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records and similar acts or attempts to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as the student's own.

The college has a Student Honor Code that all students are required to sign when they meet with their academic advisor. The code outlines the college's expectations of its students and faculty in establishing and maintaining the highest standards in academic work and is available on the college website (<http://engineering.ucdenver.edu>) under Student Services > Policies and Forms.

In addition, the college has a committee on discipline that hears cases of alleged violations of academic ethics and recommends disciplinary action. In a case of proven academic dishonesty/misconduct, the committee may invoke penalties that may include probation, suspension or expulsion. In a case of suspension or expulsion, a distinction may be placed on a student's academic record indicating the action was due to academic dishonesty/misconduct. Students who suspect or observe violations of academic ethics should report them to their instructor, the department chair or the Office of the Dean.

## **Academic Probation and Suspension Policies**

Academic probation and suspension policies vary by school/college. If your program falls under the auspices of the Graduate School, please see the Graduate School Rules. Otherwise, please contact your individual school/college for more information.

## **Registration**

### **Independent Study**

#### **School/College Specific Policy**

##### *College of Liberal Arts and Sciences*

Independent studies are faculty-mentored, individually structured courses or research or creative projects designed and scheduled outside of the standard course grid. Independent study allows for investigations beyond the structured curriculum and classroom and exploration of content material that closely relates to faculty and student interest. However, the College of Liberal Arts and Sciences does not guarantee that credit earned through an independent study will count toward graduation requirements or be accepted as transfer credits.

The CU Denver campus requires manual registration using a Special Processing Form for students participating in independent study. This form constitutes the course syllabus agreement between faculty and student. The Special Processing Form requires (1) project title, (2) short, detailed project description, including texts and practical

application of skills, and (3) explicit performance or grading criteria. The faculty should separately negotiate a schedule of meetings and deadlines with the student. The form is reviewed and approved by a CLAS Associate Dean/Assistant Dean prior to student registration.

The College faculty developed the following requirements relating to student and faculty participation in independent study. Faculty seeking to waive or modify any of the policies below should work with the appropriate CLAS Associate Dean/Assistant Dean.

### **Student Requirements**

- Enrollment as a CLAS student or, if enrolled in another major/minor, school/college, or institution, signed authorization on the Special Processing Form by the advisor/chair/dean of the originating
- school/college or institution prior to review by the CLAS associate or assistant dean.
- Graduate student status for 5840 (or higher), junior or senior status for 4840, sophomore status for 2840.
- Minimum GPA of 2.5 for undergraduates and 3.0 for graduate students.
- Submission of the Special Processing Form prior to the third week of a regular semester. After the third week, a petition to add is required. Summer and intensive sessions will have different deadlines.

### **Faculty Requirements**

- CLAS tenured, tenure-track, Clinical Teaching Track, Senior Instructor, or Instructor rank.
- CLAS graduate faculty status for faculty sponsoring graduate independent study.
- Direct, not indirect, supervision by the designated CLAS faculty member.
- For instructor-rank faculty, approval by the department chair, though all untenured faculty should limit the number of independent studies and are advised to consult with the chair before taking them on.

### **Project Requirements**

- CLAS discipline or directly discipline related content, though may be interdisciplinary.
- Unique or individually executed project content for each student.
- Not available as, or part of, a structured course offered during the same term.
- 3 student participation hours per week for each credit hour requested. Note: 4:1 ratio in summer.

## **Student Bill of Rights**

The University of Colorado Denver subscribes to the Student Bill of Rights as defined in HB 01-1263. Students enrolled in public institutions of higher education shall have the following rights:

- (a) Students should be able to complete their associate of arts and associate of science degree programs in no more than sixty credit hours or their baccalaureate programs in no more than one hundred twenty credit hours unless there are

- additional degree requirements recognized by the commission;
- (b) A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
- (c) Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
- (d) Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
- (e) Students, upon completion of core general education courses, regardless of the delivery method, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;
- (f) Students have a right to know if courses from one or more public higher education institutions satisfy the students' degree requirements;
- (g) A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferable.

## **Student Code of Conduct**

The following section is based in part on Regent Law 7.B.3. The behaviors listed below are prohibited, as are attempts to commit, aid, abet, or incite others to engage in behavior prohibited by the code of student conduct. All behaviors contained in this code of conduct are subject to the conduct process. Engaging in retaliatory acts against a person who reports an alleged violation of the code or testifies, assists, or participates in a conduct proceeding or investigation is a violation of this code.

1. Assaulting or physically abusing another person or being involved in brawling.
  - In the case of a student who is found responsible via the conduct process to have caused severe injury or bodily harm, the minimum sanction shall be suspension. Severe injury and bodily harm includes but is not limited to the following: broken bones, concussions, lacerations, etc.
2. Threatening or endangering the mental and/or physical health or safety of a person.
3. Public Exposure: Public exposure includes deliberately and publicly exposing one's intimate body parts, public urination, defecation, and public sex acts.
4. Non-Gender/Sex-Based Stalking: Means directly or indirectly through another person, repeatedly following, approaching, contacting, placing under surveillance or making any form of communication with another person, a member of that person's immediate family or someone with whom that person has or has had a continuing relationship, whether or not a conversation ensues in a manner that would cause a reasonable person to, (a) fear for his or her safety or the safety of others or; (b) suffer substantial emotional distress, including causing a person to respond by altering their activities.
5. Hazing: Any action or situation that recklessly or intentionally endangers the health, safety, or welfare of an individual for the purpose of initiation, participation, admission into or affiliation with any organization at the university. Hazing includes, but is not limited to, any abuse of a mental or physical nature, forced consumption of any food, liquor, drugs, or

substances, or any forced physical activity that could adversely affect the health or safety of an individual. Hazing also includes any activity that would subject the individual to embarrassment or humiliation, the willingness of the participant in such activity notwithstanding. (See Appendix 5)

6. Abusive Behavior, including verbal abuse, threats, intimidation, coercion, or other behavior which has caused a person substantial emotional distress and where the circumstances would cause a reasonable person to suffer substantial emotional distress
  - This policy should not be construed, and will not be enacted, to deny any student the right of free speech and expression.
7. Bullying: Severe aggressive behavior likely to intimidate or intentionally harm, control, or diminish another person, physically or mentally (that is not speech or behavior otherwise protected by the First Amendment)
  - Cyber-Bullying occurs when an individual is tormented, threatened, harassed, humiliated, embarrassed, or otherwise targeted by another person using the internet, interactive and digital technologies or mobile phones.
8. Violating any federal, state, or local law or university regulation or policy. University policies may include but are not limited to:
  - Nondiscrimination Procedures
  - Ethical Use of Computing Policy
9. Interference, Obstruction, or Disruption of University Activity: Materially and substantially interfering with, obstructing, or disrupting a university activity.
  - University activities include, but are not limited to, all normal university activities, such as teaching, research, recreation, meetings, public events, and disciplinary proceedings.
  - This prohibition includes, but is not limited to, the following: behavior disruptive of university functions; Behavior resulting in injury to persons or damage to property on the campus; and interference, obstruction, or disruption of the freedom of movement of students, or other members of the university community and their guests. Interference in any manner with the public or private rights of citizens, Behavior that threatens or endangers the health or safety of any person, and damage to property are prohibited.
10. Interfering with, obstructing, or disrupting police or fire responses. This prohibition includes, but is not limited to:
  - Resisting arrest.
  - Failing to abide by the directions of a peace officer.
  - Tampering with, impairing, disabling, or misusing fire protection systems such as smoke detectors, fire extinguishers, sprinklers, or alarms.
  - Failing to evacuate during a fire alarm.
  - Arson/setting fires.
11. Failing to comply with the direction of university and Campus Village employees who are performing their duties. Students are required to comply with instructions or directions given by university and Campus Village employees.

12. Knowingly providing false information to university employees, student conduct educators, or peace officers in performance of their duties. This section prohibits the use of false identification or the identification of another person to gain entrance to a facility or business. This also includes forging, altering, falsifying or misusing documents or records, or knowingly using/possessing forged, altered or false documents or records.
13. Retaliating against or discouraging an individual from participating in a University process, or acting in any way that would improperly influence a university conduct process.
14. Violating any policy or procedure listed in the Campus Village Apartments Resident Handbook while in Campus Village. See a complete list of Campus Village policies and procedures by clicking [here](#).
15. Unauthorized entry into, exit from, or presence in a University facility or on university property, including Campus Village Apartments, or property belonging to another.
16. Damaging University property or property belonging to another.
17. Engaging in, inciting, or arming someone for a riot or public disturbance (see Appendix 4)
18. Use of an electronic or other device to make an audio and/or visual recording of another person (including, but not limited to photographing, videotaping, filming, or audio recording) without the person's expressed permission when such recording causes the person to suffer substantial emotional distress and would cause a reasonable person to suffer substantial emotional distress. The storing, sharing, and/or distribution of such records by any means is also prohibited.
19. Possessing firearms, explosives, fireworks, incendiary devices, ammunition, or other weapons on campus except as permitted by law. "Weapon" as used in this provision may be an instrument of offensive or defensive combat; anything used, or designed to be used, in destroying, defeating, or injuring a person; an instrumentality designed or likely to produce bodily harm. A weapon may include, but not be limited to, the following: any firearm, slingshot, cross-knuckles, knuckles of lead, brass or other metal, any bowie knife, dirk, dagger or similar knife, or any knife having the appearance of a pocket knife, the blade of which can be opened by a flick of a button, pressure on the handle or other mechanical contrivance. A harmless instrument designed to look like a firearm, explosive, or dangerous weapon which is used by or is in the possession of a person with the intent to cause fear in or assault to another person is expressly included within the meaning of weapon. See Regents Policy 14.

*Note: Students, faculty, and staff possessing valid Concealed Handgun Permits are allowed to carry concealed handguns on campus in accordance with the law.*

20. Theft, including but not limited to, possessing property known to be stolen, or taking property of another without permission, even with an intent to return the property.
21. Possessing, using, providing, manufacturing, distributing, or selling drugs or drug paraphernalia in violation of law or University policies. Use or possession of marijuana, including medical marijuana used or possessed under Colorado Constitution Article 18, section 14, is strictly prohibited on campus. Any such use or possession is a violation of the student conduct code.

In addition, the state constitutional amendment authorizing individuals over the age of 21 to recreationally use marijuana (“Amendment 64”) does not change this prohibition or authorize a student to use marijuana. Federal law, including the Drug Free Schools Act, prohibits the presence or use of drugs, including marijuana. Thus marijuana use or possession, even if in compliance with Amendment 64, is prohibited on campus.

- Students may violate the student code of conduct if in the presence of prohibited behavior involving drugs. This includes students who knew, or reasonably should have known they were in the presence of drugs, or possessed, displayed, or was in the presence of drug paraphernalia.
- Misuse of legal substances; use of general products as intoxicants or “means to get high”; and inhaling or ingesting a substance (including but not limited to nitrous oxide, glue, paint, gasoline, solvent, etc.) other than in connection with its intended purpose is also prohibited.
- Driving while under the influence of drugs
- Use of a prescription drug other than by the person to whom the drug is prescribed and in accordance with the prescription is prohibited. This includes sharing drugs such as Ritalin or Adderall.
- Attending classes or university functions under the influence of drugs shall also be considered a violation of this code. This includes disruptive Behavior while under the influence of alcohol at official university functions.

22. Possessing, using, providing, manufacturing, distributing, or selling alcoholic beverages in violation of law or university policies.

- If an underage student is in Campus Village Apartments, this prohibition includes a student who knew, or reasonably should have known s/he was in the presence of alcoholic beverages, or possessed, displayed, or was in the presence of alcohol containers.
- Attending classes or university functions under the influence of alcohol shall also be considered a violation of this code. This includes disruptive behavior while under the influence of alcohol at official university functions where alcohol is served.
- Driving while under the influence of alcohol.

The health and safety of members of the University of Colorado Denver are the primary concerns of the university. The university is committed to ensuring that students obtain timely medical assistance for themselves and for their peers. To this end, we have instituted a “Good Samaritan” provision for drug, alcohol, and Intimate Partner violence related incidents. For more information about this provision please see Appendix 2.

The complete Code of Conduct, including a detailed explanation of the conduct process and sanctions, can be found online on the Student Conduct and Community Standards website.

You can also visit the Student Conduct and Community Standards office in the Tivoli Student Union Room 309.

# REGISTRATION & RECORDS

*CU Denver offers students a completely online system of planning their schedules and registering for classes. As a student, you are responsible for knowing the deadlines, rules, regulations, course loads, prerequisites and policies of the university, as well as those of the college or school in which you are enrolled, all of which is provided within this online catalog. Please refer to the Academic Policies section for more specific information related to records and registration.*

## Office of the Registrar

**Associate Vice Chancellor for Student Enrollment Operations & Compliance and**

**University Registrar:** Carrie John

**Office:** Student Commons Building, Suite 5005

**Telephone:** 303-315-2600

**E-mail:** registrar@ucdenver.edu

**Web site:** www.ucdenver.edu/registrar

## Academic Calendar

Consult the official CU Denver Academic Calendar to determine when registration will open and close for each term. CU Denver academic calendars for upcoming semesters can be found on the Registrar's Office webpage.

## Registration

Students should review the sections of this catalog that describe in detail the academic programs available at the Denver Campus.

The registrar's office will send an e-mail message to the student's university-assigned e-mail address, inviting the student to register, including registration information and a registration time assignment. Registration is by time assignment only. Students may register via the web on or after their assigned time.

## Web Registration and Student Information

Denver Campus students can register and obtain information regarding their academic and financial records by logging into their UCD Access portal.

Online registration allows the student to check the availability of specific courses prior to their registration time and to search for available courses by department, course level, or meeting time. If registration in a course is denied, the reason will be specified in UCD Access.

Student information available online currently includes mailing address verification (or change), admission application status, financial aid information, schedule by semester, grades by semester, unofficial transcript, account balance, online payment and degree audit (for some programs).

Additional information regarding programs, faculty, courses and policies are available through the home page: [www.ucdenver.edu](http://www.ucdenver.edu).

## **Definition of Full-Time and Part-Time Status**

Individual students receiving financial aid may be required to complete hours in addition to those listed below. The exact requirements for financial aid will be listed in the student's financial aid award letter.

### **Graduate degree and non-degree students:**

#### Full-time

- 5 or more semester hours
- 0 semester hours as a candidate for a degree
- 1 or more semester hours of thesis or dissertation (not master's reports or thesis preparation)

#### Half-time:

- 3 - 4.9 semester hours

### **Undergraduate students:**

- Full-time: 12 or more semester hours
- Half-time: 6 - 11.5 semester hours

### **Notes:**

Enrollment verification including full-time/part-time attendance can be certified beginning the first day of class.

Hours for calculating full-time/part-time attendance do not include interinstitutional hours, nor do they include hours on another CU campus, unless the student is enrolled through concurrent registration.

Students receiving veteran benefits should contact the Veteran Student Services manager for the definition of full-time status for summer sessions. Contact information: 303-556-2745 or [vaoffice@ucdenver.edu](mailto:vaoffice@ucdenver.edu).

Individual exceptions to the minimum graduate course-load levels are considered for financial aid purposes by the financial aid committee. Students must file a written appeal with the Office of Financial Aid.

## **Add/Drop**

Please review the current term's academic calendar for the most recent add/drop deadlines by visiting the registrar's website at [www.ucdenver.edu/registrar](http://www.ucdenver.edu/registrar).

## **Administrative Drop**

An administrative drop is implemented by university officials in the registrar's office or the dean's office. A student may be administratively dropped from one or more classes or withdrawn from all classes for any of the following reasons:

- failure to meet certain preconditions, including but not limited to:
  - class cancellations
  - failure to meet course prerequisites
- whenever the safety of the student, faculty member, or other students in a course would be jeopardized
- academic suspension, including but not limited to failure to attain or maintain a required GPA
- as a potential sanction for a violation of the code of student conduct
- disruptive behavior determined by the chair and/or associate dean or Office of Student Conduct and Community Standards to be detrimental to the progress of the course and the education of other students

## **Outstanding Debt/Administrative Drop Policy**

Students who owe a past due debt to the university in excess of \$300 will be administratively dropped from any future terms if past due amount is not paid in full before the Friday prior to the first day of classes of the next term.

## **Auditing Courses**

To qualify as an auditor for fall, spring or summer semester, a student must be 21 years of age or older or approved by the registrar. Auditors may not be registered for any other University of Colorado courses during the time they are auditing. Auditors are not eligible to audit courses if they are under suspension from the university or have outstanding financial obligations to the university.

The registrar's office does not keep any record of courses audited; therefore, credit for these courses cannot be established. Auditors may attend as many courses as they wish (except those courses with laboratories or where special equipment is used), provided they have received permission from each instructor.

An auditor's card is issued by the Bursar's Office after classes begin. An auditor's card is non-refundable. Auditors, whether resident or nonresident, pay for three semester hours of resident tuition for all audited courses during the fall, spring and or summer semester for class instruction and library privileges only. Auditors do not receive student parking privileges and are not eligible for other student services. This card should be presented to the instructor upon entering the class. For more information, contact the Bursar's Office.

## **Lifelong Learners Program**

Area residents who are 60 years of age or older may attend classes at the University of Colorado Denver on a non-credit/non-tuition basis during the fall and spring semesters. Note: Each academic department/unit may have its own policy regarding your acceptance into a specific class. Seniors may take any course (offered at the Downtown Campus) listed in the online course schedule except: courses which require laboratory or special equipment use, computer courses, courses offered through the Division of Extended Studies, courses with additional fees, CU online courses, CU Denver South campus or Anschutz Medical campus courses, and intensive and/or module courses (i.e. maymester, 6 week, or hybrid). Acceptance in class will be determined by the instructor, based on space availability, and the previous level of education obtained by the senior citizen student. Participants may register for classes beginning on the first day of class. The last day to register for a class via the SCP program is the second Friday after classes begin. Submissions after this day will not be reviewed. A limit of two courses may be taken per semester. Note: The instructor is NOT required to review written or oral exams, or assignments.

For more information please visit the Lifelong Learners webpage.

## **Candidate for Degree**

You must be registered for at least one course during the semester in which you take the comprehensive exam, defend your dissertation or thesis, or present your final project. If you are NOT registered for any other courses, you MUST register for CAND 5941 Candidate for Degree. You may only register for this course once.

To register for CAND 5940, Candidate for Degree, (you may NOT be registered for any other courses) obtain the class number from your department or program director. You will be billed at one credit hour of resident tuition plus the CU-SIS fee and the information technology fee. Students registered for CAND 5940 will be considered full-time for financial aid and enrollment verification purposes.

## **Course Load/Restrictions**

In most cases, students wishing to take more than 18 semester hours (12 in the summer session) must have the overload approved by the dean of their college or school. Consult the individual college or school for specific guidelines as to course-load restrictions.

## **No Credit**

Students may register for a course on a no-credit basis with the consent of their instructor and the dean of their school or college. No grade or credit is awarded. The transcript reflects the name of the course taken and an N/C notation.

## **Pass/Fail Procedure**

1. Students who wish to register for a course on a pass/fail basis (or to revert from pass/fail to graded status) may do so only during the drop/add period.
2. Up to 16 semester hours of course work may be taken on a pass/fail basis and credited toward the bachelor's degree. Only six hours of course work may be taken pass/fail in any given semester. (**Note:** Individual schools and colleges may have additional restrictions as to pass/fail credits. See the accompanying chart for an overview.)
3. Instructors will not be informed of pass/fail registration. All students who register for a pass/fail appear on the regular class roster, and a normal letter grade is assigned by the professor. When grades are received in the registrar's office, those registrations with a pass/fail designation are automatically converted by the grade application system. Grades of D- and above convert to grades of P. Courses taken pass/fail will be included in hours toward graduation. Pass grades are not included in a student's GPA. An F grade in a course taken pass/fail will be included in the GPA.
4. Pass/fail registration records are maintained by the registrar's office.
5. Exceptions to the pass/fail regulations are permitted for specified courses offered by the School of Education & Human Development, the extended studies programs and study abroad programs.
6. Graduate degree students can exercise the P/F option for undergraduate courses only. A grade of P will not be acceptable for graduate credit to satisfy any Graduate School requirement.
7. Students who register for a course on a pass/fail basis may not later (after the drop/add period) decide to receive a letter grade.

*Note:* many other institutions will not accept a P grade for transfer credit.

## **Module/Intensive Courses**

Students should contact the college/school for information on short-term courses offered each semester. Intensive, module, and off-cycle classes require the same amount of work and number of classroom hours as full-term classes. Intensive classes are less than five weeks. Module classes last five or more weeks, but less than full term. Off-cycle classes vary in length. Module/intensive classes may be added up until the first day of the class. After the first day of class, these classes may be added with the instructor's signature approval on a Schedule Adjustment Form. A Schedule Adjustment form may be required to drop these classes. Instructor approval is not required to drop the class within the first 15% of class meetings.

## **To Withdraw from CU Denver**

To withdraw from the University of Colorado Denver, students must drop all courses for the semester. Prior to census (see current academic calendar for census date), students must use the web registration system to drop courses. Courses dropped during this period are not recorded on the student's permanent record.

After the census date (see current academic calendar for census date), through the 10th week (fourth week for summer) students may withdraw from their courses using

the UCDAccess Portal. Courses dropped during this period will be recorded on the student's permanent record with a grade of W.

Courses dropped during this period will be recorded on the student's permanent record with a grade of W.

Students seeking to withdraw after the 10th week (fourth week for summer) must petition the associate dean of their school or college. A student who stops attending classes without officially withdrawing from the university will receive grades of F for all course work during that term.

Deadlines for dropping module and intensive courses appear in the student portal.

## **Medical Withdrawal**

A student who wishes to withdraw under the Medical Withdrawal Policy must withdraw from all classes. Additionally, international students must contact their assigned International Services Specialist to discuss visa implications associated with withdrawing. Students seeking to withdraw for non-medical reasons will need to review the withdrawal policies and procedures for their respective school or college. For more information, see The Office of Case Management.

## **Other Registrations**

### **Intercampus Enrollment with Other CU Campuses**

The Intercampus Enrollment Program is open to all CU Denver degree seeking students who are currently enrolled in CU Denver courses. This program helps students fulfill degree requirements so that they may graduate in a timely manner. Students who wish to utilize this program and enroll in courses at the Boulder or Colorado Springs campus concurrently, must meet with their Academic Advisor from their School/College at the Home (Denver) Campus to confirm that the course taken at a Host Campus is equivalent to the course needed to graduate, and to ensure that all required prerequisites/requisites are fulfilled.

Actively-enrolled CU Denver degree seeking students may be eligible for enrollment in up to two (2) courses OR six (6) credit hours, whichever is greater, at another CU campus, by submitting the Intercampus Enrollment and Policy Form to the Registrar's Office prior to the Add Deadline date of the Host Campus (Boulder/Colorado Springs). The Intercampus Enrollment and Policy Form can be obtained by accessing the CU Denver Registrar's Office website or by visiting the office in person.

Students who wish to utilize this program must meet the following requirements for eligibility:

- Must be currently enrolled in at least one (1) course at their home campus during the term in which they are seeking enrollment at CU Boulder/CU Colorado Springs.
- Students must have their Academic Advisor confirm that all requisites have been met by the student prior to enrollment in the requested Intercampus course(s).

- Courses requested through the Intercampus Enrollment Program must be Main Campus courses. Continuing Education courses are NOT eligible under any circumstance.
- Some Undergraduate & Graduate Students may be exempt from Home campus enrollment if seeking a degree in the following programs at the campus listed:
  - Applied Mathematics (PhD) - Boulder, Denver
  - Architecture & Planning, (PhD) - Boulder, Denver
  - Civil Engineering, (PhD) - Boulder, Denver
  - Computer Science (MS & PhD) - Boulder, Denver
  - Education Administration (All Careers) - Denver
  - Electrical Engineering - Boulder, Colorado Springs, Denver
  - Geography (MA) - Boulder, Colorado Springs
  - Master of Engineering - Boulder, Colorado Springs, Denver
  - Mechanical Engineering - Boulder, Denver
  - Psychology - Boulder, Colorado Springs, Denver
  - Public Affairs - Colorado Springs, Denver

Enrollment and the dropping of Intercampus Enrollment course(s) can only be performed by the student's Home Campus Registrar's Office.

Students enrolled for course(s) at a Host Campus are responsible for requesting the adding and/or dropping of courses within the host campus's deadlines, published on the Host Campus Academic Calendar.

Any questions regarding this program should be directed to the "Home Campus" Intercampus Enrollment Coordinator within the Registrar's Office.

## **Academic Records**

### **Grading System and Policies**

The following grading system and policies have been standardized for all academic units of the university.

#### **Grade Symbols**

The instructor is responsible for whatever grade symbol (e.g., A, B, C, D, F, I or IP) is to be assigned. Special symbols (NC and W) are indications of registration or grade status and are not assigned by the instructor. Pass/fail designations are not assigned by the instructor but are automatically converted by the grade application system, as explained under "Pass/Fail Procedure."

Standard Grades

Quality  
Points

<i>A = superior/excellent</i>	4
<i>A(-) =</i>	3.7
<i>B(+)</i> =	3.3
<i>B = good/better than average</i>	3
<i>B(-)</i> =	2.7
<i>C(+)</i> =	2.3
<i>C = competent/average</i>	2
<i>C(-)</i> =	1.7
<i>D(+)</i> =	1.3
<i>D =</i>	1
<i>D(-) = minimum passing</i>	0.7
<i>F = failing</i>	0

Instructors may, at their discretion, use the PLUS/MINUS system but are not required to do so.

I-incomplete-converted to an F if not completed within one year.

IP-in progress-thesis at the graduate level only.

P/F-pass/fail-P grade is not included in the GPA; the F grade is included; up to 16 hours of pass/fail course work may be credited toward a bachelor's degree.

NC indicates registration on a no-credit basis.

W indicates withdrawal without credit.

## **Incomplete Grade**

An I is an incomplete grade. Policies with respect to I grades are available in the individual college and school dean's offices.

An I is given only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

The instructor who assigns an I sets the conditions under which the course work can be completed and the time limit for its completion. The student is expected to complete the requirements by the established deadline and not retake the entire course.

It is the instructor's and/or the student's decision whether a course should be retaken. If a course is retaken, it must be completed on the Denver Campus or in extended studies classes. The student must re-register for the course and pay the appropriate tuition.

The final grade (earned by completing the course requirements or by retaking the course) does not result in deletion of the I from the transcript. A second entry is posted on the transcript to show the final grade for the course, with a notation that the course was 'originally graded as I.'

At the end of one year, I grades for courses that are not completed or repeated are changed to an F.

## **Grade Point Average (GPA)**

GPA is computed by multiplying the credit points per hour (for example, B = 3) by the number of semester hours for each course. Total the hours, total the credit points and divide the total points by the total hours. Grades of P, NC, \*\*\*, W, IP, and I are not included in the GPA. I grades that are not completed within one year are calculated as F in the GPA.

If a course is repeated, all grades earned are used in determining the GPA. Grades received at another institution are not included in the University of Colorado GPA.

Undergraduate, graduate and non-degree graduate GPAs are calculated separately. Enrollment in a second undergraduate or graduate program will not generate a second undergraduate or graduate GPA.

Students should refer to their academic dean's office for individual GPA calculations as they relate to academic progress and graduation from their college or school.

### **Sample GPA Calculation**

Grade Earned: **A**; Credit Points per Hour: **4.0**; x Credit Hours: **4.0** = Credit Points in Course: **16.0**

Grade Earned: **A-**; Credit Points per Hour: **3.7**; x Credit Hours: **4.0** = Credit Points in Course: **14.8**

Grade Earned: **B+**; Credit Points per Hour: **3.3**; x Credit Hours: **4.0** = Credit Points in Course: **13.2**

Grade Earned: **P**; Credit Points per Hour: **-**; x Credit Hours: **3.0** = Credit Points in Course: **- (excluded)**

Grade Earned: **F**; Credit Points per Hour: **0**; x Credit Hours: **3.0** = Credit Points in Course: **0**

**Total of 15 credit hours with 44 credit points, so  $44/15 = 2.93$  GPA**

## **Good Academic Standing**

### **Degree Seeking Students**

Students at the University are expected to maintain progress in their degree program, as defined by being in “good academic standing.” Good academic standing requires minimally a cumulative grade point average (GPA) of 3.0 on all University of Colorado course work.

## **Non-degree Seeking Students**

Continuation as a non-degree graduate student is contingent upon maintaining an overall GPA of 3.0.

Failure to maintain the required average will result in a non-degree student being suspended. The suspension is for an indefinite period of time and becomes part of the student’s permanent record at the university. While under suspension, enrollment at the university is restricted. For more information contact the dean’s office of the school /college you are enrolled in.

## **Final Grades**

Grades are normally available within two weeks after the end of the semester and can be accessed by logging into the UCD Access portal.

## **Graduation**

### **SCHOOL/COLLEGE SPECIFIC POLICY**

#### ***College of Liberal Arts and Sciences***

***The College of Liberal Arts and Sciences requires the following degree requirements for all graduate degree granting programs outlined below:***

All graduate degree programs must follow the Graduate School Policies and Procedures.

#### **The Master’s degree**

Minimum credits 30, at least 24 credits must be completed at 5000 level or above.

If the program has a thesis, research paper or internship option as the culminating requirement, the thesis/research paper must count for three to six (3-6) credits, unless specified otherwise by individual programs. Independent study course work cannot exceed 20 percent (6 credits) of the 30 credits of coursework required for the Master’s degree.

#### **The Doctoral degree**

Minimum credits 60, 30 must be coursework related and 30 must be dissertation credits. All courses must be completed at 5000 level or higher. ***(All students should check the***

***specific requirements of their Program, since some Programs have adjusted their credit hour requirement to meet national standards)***

### **The certificate**

Graduate certificates require a minimum of 9 credit hours (in any discipline).

No more than 3 credits may be earned at the undergraduate level.

Because a certificate is a CU certification of a student's specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at UC Denver.

Minimum GPA of 3.0 with no course below a B- for a graduate certificate

A single course may not fulfill more than two graduation requirements.

### **Graduates**

Students on the Denver Campus must file an application for candidacy with their graduate school office and complete an intent to graduate application found on the Office of the Registrar's Web page under Degree Planning between the first day of registration for the term and the last day of drop/add. Check with your school for more information. Students will not be officially certified to graduate until a final audit of the student's record has been completed, approximately six weeks after the end of the term. After students have been certified to graduate, they must reapply to return to CU Denver.

### **Commencement**

In early March, informational brochures will be mailed to students eligible to participate in the May spring-semester commencement. In early October, information regarding the December commencement will be mailed to students who graduated in the summer term or expect to graduate in the fall term. Information will be provided about ordering special display diplomas, fittings for caps and gowns and obtaining diplomas and transcripts with the degree recorded. This information is also available at [www.ucdenver.edu/student-services/graduation/Pages/Graduation.aspx](http://www.ucdenver.edu/student-services/graduation/Pages/Graduation.aspx).

### **Official Transcripts**

The official transcript includes the complete undergraduate and graduate academic record of courses taken at all campus locations or divisions of the University of Colorado. It contains the signature of the registrar and the official seal of the university.

Official transcripts with posted grades for any given semester are available approximately three weeks after final exams. A transcript on which a degree is to be recorded is available approximately eight weeks after final exams.

For Denver Campus students, transcripts may be ordered through the online ordering portal by visiting [www.ucdenver.edu/transcripts](http://www.ucdenver.edu/transcripts).

Transcripts are prepared when a student submits an order online. A student with financial obligations to the university that are due and unpaid will not be granted a transcript. The official PDF transcript is delivered within twenty-four hours, and mailed transcripts are processed within one business day. Rush service is available and processed within one business day.

## **FERPA**

### **FERPA: FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT**

FERPA is a federal privacy law that protects students' educational records. Under this law, students have three primary rights:

- Inspect and review their education records.
- Seek to amend incorrect education records.
- Have some control over the disclosure of information from their education record.

FERPA directory information is information contained in a student's education record that generally would not be considered harmful or an invasion of privacy if disclosed. Under current CU Denver policy, the following information is designated as directory information:

- Student name. If provided, a preferred name will be used when there is not a documented business or legal reason to provide a student's primary name. Students may also select a diploma name for graduation and commencement materials.
- Hometown (city, state).
- Campus email address.\*
- Dates of attendance.
- Previous educational institutions attended.
- School/college or division of enrollment.
- Majors, minors and field of study.
- Classification level (e.g., freshman, sophomore, graduate student).
- University-recognized honors and awards.
- Degree status (e.g. expected graduation date and/or conferral dates/terms).
- Enrollment status.
- Employment related to student status (e.g. teaching assistant, resident assistant or work-study) and dates for positions held.
- Participation in officially recognized activities/sports, including height and weight of athletes.
- Photos and videos taken or maintained by the university.

\*Campus email addresses are only disclosed to requestors who agree not to use them for solicitation.

Although these items are designated by CU Denver as directory information, only a limited amount of this information is routinely disclosed by CU Denver university officials. The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights.

Students may ask the University not to publicly disclose directory information. Be aware, however, if you are seeking employment, the Registrar's Office cannot release your enrollment, degree status or major to anyone unless you come to the Registrar's Office with a photo ID.

Forms to prevent disclosure of directory information can be obtained at the Registrar's Office, located in the Student Commons Building, or via the Registrar's website at [www.ucdenver.edu/registrar](http://www.ucdenver.edu/registrar).

Information that is never released without your consent includes grades, tuition/fees owed, financial aid, etc. If you would like to give permission to someone else to have access to that information, you can submit a Release of Confidential Information Form to the Office of the Registrar. This form also must be submitted in person.

More information about FERPA can be found in the University Catalog. If you have questions regarding your rights under FERPA, please contact the Office of the Registrar.

Denver, CO 80202

## Overview

The College of Architecture and Planning offers the only accredited degrees in architecture, urban and regional planning, and landscape architecture in the State of Colorado as well as the only master's degrees in historic preservation and urban design, and the only doctoral degree in design and planning. The college offers a Bachelor of Science in Architecture degree and graduate programs for over 700 students. Programs are accredited by the Landscape Architectural Accreditation Board (LAAB), National Architectural Accrediting Board (NAAB) and Planning Accreditation Board (PAB). Many students intending to enter the design and planning professions complete the college's undergraduate degree as preparation for our graduate-level professional programs. Those who already hold an undergraduate degree in an unrelated field are also eligible for admission into our graduate programs. We offer graduate certificates in Design Build, Historic Preservation (with History), Integrated Construction Management and Leadership (with Business and Engineering) and Geospatial Information Science, as well as ten options for earning dual graduate degrees. In addition, students can earn a certificate from the Institute of Classical Architecture and Art, by taking focused courses in this area. With an outstanding faculty committed to excellence in teaching, research, scholarship and creative work, the college provides students with opportunities beyond the classroom including study abroad, internships, mentorships, and participation in design and planning competitions. The College of Architecture and Planning ignites evolution that enriches places for people and the planet through learning by doing, practicing co-creation, and valuing the unique spark of each person as well as the full range of professional and historical traditions.

## College Facilities

The college is located at 1250 14th Street in downtown Denver, on the northeastern edge of the Auraria Campus on Larimer Square. This favorable location gives easy access both to the extensive campus facilities and the urban dynamism of Denver's lively lower downtown. Most of the major professional design offices in Denver and many planning firms and agencies are nearby, offering many opportunities for contact between students and practitioners. College facilities include studio spaces for students, lecture and seminar rooms, design jury spaces, exhibition spaces and faculty offices. Students have access to our well-equipped and well-maintained 3,000-square-foot Design Fabrication Lab that houses a full-scale furniture-making shop, model-making tools, a large spray booth and four laser cutters. An annex adjacent to the building provides additional shop space, plasma cutters, and a 5-AXIS CNC Router. The Visual Resource Center (VRC) provides access to a variety of photographic and audiovisual equipment, two portfolio photography studio rooms, and digital image collections. There are two computer labs focused on computer aided design (CAD), computer 2-D and 3-D imaging and analytic tools for planning. These computer labs include Windows PCs and Macs, small and large format scanners, large format plotters, laser printers and computer data projection devices. All systems are 100base T Ethernet / Internet savvy and accessible 24 hours a day in secure rooms. Find more details about college

facilities on the website. Also associated with the college is a geographic information systems (GIS) computer laboratory, open to all CU Denver students.

## **Computing in the College**

The College of Architecture and Planning requires all incoming graduate students to acquire and use their own computers and software applications in their studies. Neither the College nor the University endorses or requires you to buy a computer from a particular vendor or manufacturer. In general, students widely use products like Microsoft Office for word processing, e-mail, presentations and spreadsheet applications. Consult with instructors or view course syllabi regarding specific software application (program) requirements for imaging, CAD, GIS, modeling or rendering before you buy them. Software requirements for incoming students in all masters programs are per department recommendation, and otherwise stipulated by the course syllabus. For further information, consult the college website.

## **Graduate Programs**

### **Learning Experiences**

Learning experiences address real issues facing designers and planners as they create healthier, more sustainable, more meaningful environments. Through hands-on education, CAP students learn how to apply knowledge to real-world projects. The faculty and students are extensively engaged with Colorado communities, in service learning and applied research. Students have built award-winning solar-powered homes; discovered ecological design principles in Colorado ranches; helped re-envision the I-70 corridor through north Denver; proposed ways for communities to recover from natural disasters; and designed learning landscapes for all 96 Denver elementary school playgrounds. The award-winning Design Build program has developed projects as varied as micro cabins for the Colorado Outward Bound School, environmentally sustainable homes in the Navajo Nation, schools in Guatemala and Nicaragua, a performing arts stage for a mountain community, and outdoor classrooms for urban farming education and environmental groups.

### **Special Activities**

The college provides a diverse range of opportunities that enrich and enhance the education of its students. Through activities and functions - including a lecture series, design juries, exhibitions, publications and active student organizations - the college encourages contact among students, faculty and members of the design professions. The college is a leader in providing international study opportunities. In addition to numerous study abroad courses, there are collaborative design studios with Dar Al-Hekma University in Saudi Arabia, and a summer urban design studio that has been held in Copenhagen, China's Shanghai-Nanjing corridor, and Greece. The Bixler International Initiatives encompass travel opportunities, scholarships, lectures, and

exhibitions. The college supports an active and focused internship program for its students, giving them access to elective internship opportunities in the Denver metropolitan area and beyond. There are extensive opportunities for civic engagement, including through paid internships at the college's Colorado Center for Community Development (CCCD), Center of Preservation Research (CoPR), and Colorado Center for Sustainable Urbanism (CCSU).

## **Scholarships/Financial Aid**

Graduate students in the college have access to a number of scholarships and other financial assistance funds. Some are based on need, others on performance and still others are specifically intended to provide enrichment opportunities. Some of these funds are provided by the institution itself, while others are provided by external sources like the American Institute of Architects Architectural Education Foundation, the American Planning Association and the Associated Landscape Contractors of Colorado. For further information on scholarships and graduate tuition awards, visit the college's website. For information on federal and state financial aid, contact the Office of Financial Aid at the University of Colorado Denver or visit its website.

## **Admissions for Graduate Programs**

### **Application Deadlines**

For Fall Semester:

- Master of Architecture Program (MArch): January 15
- Master of Landscape Architecture Program (MLA): February 1
- Master of Urban and Regional Planning Program (MURP): January 15
- Master of Science in Historic Preservation Program (MSHP): Priority Deadline March 15
- Master of Urban Design Program (MUD): Priority Deadline February 15, Final Deadline March 15
- PhD in Design and Planning Program (PhD): February 1

Decision notification dates vary by program.

For Spring Semester:

- We do not offer spring admissions for any graduate programs.

### **General Requirements**

The college periodically updates admissions deadlines and application procedures. Please visit the college website to view current deadlines, application procedures and required materials.

Applicants to the College of Architecture and Planning graduate programs are required to submit the following credentials:

- University of Colorado Denver online application.
- Official transcripts from each institution the applicant has attended excluding study abroad institutions where the courses are included on the home institution transcripts.
- A statement of purpose that addresses career objectives and reasons for pursuing the intended program of study.
- A portfolio of creative work - required for Architecture, Landscape Architecture and Urban Design. Suggested for Historic Preservation for students with prior design experience.
- A sample of writing or a work project - required for Urban and Regional Planning.
- Three letters of recommendation.
- Graduate Record Exam (GRE) scores are encouraged for the Urban and Regional Planning program.
  - However, if you are applying to the Urban and Regional Planning program and your GPA is below 3.0, you must submit GRE scores.
- Graduate Record Exam (GRE) scores are highly advised if your GPA is below 3.0 and you are applying for the Architecture, Landscape Architecture, Historic Preservation or Urban Design programs.
- GRE scores are strongly encouraged for applicants to the PhD program.
- You must hold at least a bachelor's degree for admission to all professional master's programs. For admission to the Master of Urban Design program, a prior professional degree - normally the master's - is required in addition to a bachelor's degree.
- Application fee. Nonrefundable (\$50, U.S. residents; \$75, International applicants).
- English language proficiency scores are required for international applicants when English is not their first language. Please see the International Admissions website for current minimum score requirements.

## **Confirmation Deposit**

A nonrefundable confirmation deposit of \$150 is required to secure an applicant's place in the college. The deposit is due at the time the applicant accepts the program's offer of admission. The deposit will be applied to the first semester's tuition when the student registers for classes. This deposit is in addition to the \$150 Registration Advanced Deposit that all students are required to pay to the Bursar's Office before the first semester that they register.

## **Academic Policies for Graduate Programs**

### **Academic Standing**

Students must maintain a minimum overall GPA of 3.0 in the graduate programs to remain in good standing and to graduate. If a student's GPA falls below a 3.0, then he or she will be placed on academic probation beginning the following semester. If the GPA remains below a 3.0 after the probationary semester, then he or she may be dismissed from the college.

## **Grade Policy**

In addition to maintaining a GPA of 3.0 or above, each program requires specific minimum grades which a student must earn in order to count a class towards their degree. Students should meet with their academic advisor or reference the student handbook to learn more about the minimum passing grades.

## **Grade Appeals**

Any student may appeal the grade he or she receives in a class within 30 days from the issuance of the grade. The student should first discuss the issue and adjustment sought with the relevant course instructor. If the course instructor does not reply within 30 days, the student submits a written appeal to the department chair. Within 30 days, the department chair shall process the appeal and prepare a written report explaining the reason(s) for the department recommendation. If the grade appeal still remains unresolved at the department level, the student submits a written request to the associate dean of academic affairs, who will direct the Academic Affairs Committee to review the appeal. If the grade appeal remains unresolved at the college level, the student may appeal to the dean.

## **Attendance and Timeliness of Work**

Students are expected to attend all meetings of classes. Excessive unexcused absences may result in a grade reduction at the discretion of the instructor. Absence from a class will be excused for verified medical reasons, religious obligations or for extreme personal emergencies. The student may be required to furnish evidence.

Students' assignments are to be completed in a timely manner. Any assignment turned in late may have its grade reduced by an amount set at the discretion of the instructor. An assignment may be turned in late without penalty for verified medical reasons, religious obligations or for extreme personal emergencies. Students must have their instructor's written permission to turn an assignment in late. Students with excused late work may turn in the assignment by the end of finals week without penalty. Otherwise, the grade "I" will be assigned at the discretion of the faculty.

## **Course Sequencing and Advancement**

Programs in the college are structured so that certain courses must be taken concurrently, others sequentially. Students will not be allowed to enroll in a course if its co-requisites or prerequisites have not been satisfied.

## **Originality of Work**

Students must submit their own work. Where other sources are used in a student submission, they are to be clearly identified and referenced. The university considers plagiarism and similar acts of falsification to be a serious matter that may result in

suspension or expulsion. Information on codes of conduct and grievance procedures are available from the university's Office of Community Standards and Wellness.

## **Retention of Student Work**

The College of Architecture and Planning may, with a student's written permission, retain student work submitted in fulfillment of class requirements for a period of time. This retained work is normally used to provide accrediting agencies with tangible evidence of performance, to serve as additional visual aid material in presentations to other students and to contribute to possible educational exhibits requested by the university community and the general public.

Joern Langhorst, Diplom (MLA), University of Hannover  
Jody Beck, MArch, PhD, University of Pennsylvania

### **Assistant Professors (Clinical Teaching Track):**

Leila Tolderlund, MLA, University of Colorado Denver

### **Instructor:**

Emmanuel Didier, MLA, MArch, University of Virginia

Additional information about faculty in this department is on the college's website.

## **Overview**

The Master of Landscape Architecture program balances theory and practice to prepare students to create health, well-being and environmental resilience through design in the

public realm. Our fully accredited professional program takes full advantage of our location in the heart of Denver and the rapidly growing metro area. The program enables students to enter practice and offers distinctive opportunities for students to engage in meaningful projects that impact our communities and our built environment. We educate landscape architects to lead the design and planning process; successful graduates pursue diverse practices and occupations in public and private arenas around the world.

Our students study relevant issues through classes and immersive experiences that challenge them to think critically about the applications and implications for the work we do. While grounded in design and professional skills, the curriculum is structured to fluidly address evolving concerns for our profession, our communities and our environment through topics such as health and well-being, water in the west, food systems, and emerging sustainable practices.

## **The Degree**

The Master of Landscape Architecture (MLA) curriculum revolves around a sequence of design studios, supported by core content classes and a variety of seminar courses. We deliver a fully accredited Master of Landscape Architecture for first professional degree students and post-professional students (those already holding a Bachelor of Landscape Architecture or Bachelor of Architecture degree).

Our program balances theory and practice and emphasizes design to create health and well-being and environmental resilience through design in the public realm. The curriculum fosters an ethic of responsibility grounded in natural systems and processes and an understanding of cultural and community values. Students learn skills working on relevant urban and civic projects in both local and global contexts and at a variety of scales. Studios and courses engage current issues, define future trends, and explore the role of landscape architecture in a rapidly changing world. Throughout the program, our students learn and apply design and planning skills, approaches and technologies to enhance community, foster equity and environmental balance, conserve and regenerate resources, and create places that hold value for current and future generations.

Denver's vibrant professional design and planning community supports our students through guest lectures and participation in design reviews, internships and mentor programs, and opportunities to visit offices and meet practitioners and leaders in our fields.

## **Program Objectives**

The department has developed five broad program objectives in support of our educational mission. These objectives identify what students should know and be able to do by the time they graduate and are linked to a series of measurable student learning outcomes. The five categories are:

- **Design:** Students will be able to formulate questions and arguments about landscape and its role as a significant cultural medium, and determine processes and practices that lead to transformative actions based on ethical, communicative and content knowledge criteria.
- **Communication and Representation:** Students will be able to create and employ appropriate representational media to effectively convey ideas on subject matter contained in the professional curriculum to a variety of audiences, and to articulate and convey ideas orally and in writing.
- **Professional Ethics:** Students will be able to critically evaluate local and global ramifications of social issues, diverse cultures, economic and ecological systems, and professional practice as guiding principles for design thinking and implementation.
- **Content Knowledge:** Students will be able to develop a critical understanding and application of the histories, theories and practices of landscape architecture and its role in reflecting and shaping culture and environments.
- **Research:** Students will be able to develop and apply a diligent, systematic and critical inquiry in support of design and scholarship.

## Central Themes

The MLA program prepares students to address current and future problems and challenges in local, regional and global contexts. An issues-based approach ensures that students will be exposed to and participate in the development of new responses to emergent and ongoing crises and opportunities, emphasizing environmental and social justice as a key element for the design of livable, sustainable and resilient places and landscapes. Examples of this are deep in the department's work over the past twenty-five, with examples such as working for five years with the local community of the Lower 9th Ward in New Orleans addressing issues around recovery after Hurricane Katrina, and the Learning Landscapes program which successfully redesigned almost 100 schoolyards in Denver, an initiative which is now focused on Philadelphia schools. Recently we have addressed issues of water, food scarcity and urban agriculture in Denver, the redesign and recovery of post-industrial sites and mining landscapes throughout the state, and issues of health and livability in disadvantaged communities and neighborhoods. Many of these projects have involved multiple classes over several years, and have made major impacts on the places and communities they have engaged. Students are immersed in opportunities to not just learn, but to make meaningful change, and interact with community members and professionals from many different backgrounds and disciplines, gaining invaluable experience and skills in working and communicating in interdisciplinary teams.

## Big Thinking

We believe that the issues, challenges and opportunities landscape architects face are interrelated, spanning all scales from a small private yard to neighborhood to city to region to the world, and involve a wide range of social, cultural, ecological and

economic systems, requiring critical and creative thinking that transcends scales and is cross-, trans- and interdisciplinary.

## **Critical Issues**

We strongly believe that Landscape Architecture is uniquely positioned to make major contributions to the big and urgent questions and issues that affect human and non-human systems. Climate change, resource scarcity, water and food are as critical as the design and building of landscapes and places that are about more than just sustainability and resilience and provide opportunities for people to thrive.

## **Meaningful Change**

While the functioning and performances of human and non-human systems are critical, good design does more than just provide solutions to problems. It provides opportunities for people to interact with places over time, it empowers them to understand the dynamics that affect their environments and to participate in the ongoing processes of changing place and changing communities, thus becoming authors and co-authors of the places they shape and inhabit.

Additional information about faculty in this department is available on the college website.

## Overview

The Department of Urban and Regional Planning at the University of Colorado Denver has evolved to become one of the strongest, most unique graduate planning programs in the United States, offering a real-world, experientially-oriented program that uses Colorado as a classroom and engages students with the community. It offers the Master in Urban and Regional Planning degree, the only accredited graduate planning degree in the state of Colorado.

We believe that successful city-building requires expertise, breadth, interdisciplinary understanding, and creativity. Our program looks beyond traditional professional silos and instead centers on issues at the forefront of planning practice. Our three Initiatives - Healthy Communities, Urban Revitalization, and Regional Sustainability - form the basis of our research, instruction, and community outreach.

We encourage all students to follow their passion and develop expertise in the areas that matter most to them. Our unique, self-directed curriculum that allows students to understand the breadth of the planning field while gaining the technical expertise demanded by the profession.

Our list of program faculty includes some of the most respected researchers and educators in the planning field, as well as top local planning practitioners, all of whom bring a wealth of experience to the classroom. All of our faculty make teaching a top priority.

Our presence in a College of Architecture and Planning ensures that our approach to planning education has a strong connection to design, and our location in the heart of downtown Denver offers students endless opportunities for experiential learning and interaction with the community.

## Program Mission and Values

Our vision is to be a national leader in educating skilled, engaged planners and creating vibrant, sustainable communities.

Inspired by our setting in the downtown of a thriving urban center in the dynamic Rocky Mountain region, our mission is to:

- Teach - Teach our students the knowledge, skills, and values they need to be confident, principled, and visionary planners, using Colorado as our classroom to engage students in real-world, experiential learning.

- Advance - Advance the field of planning through insightful, relevant research that directly informs policy and improves our built, natural, and social environments.
- Serve - Serve as a vital resource for communities and professionals, and help develop sustainable solutions to our region's complex planning challenges.

Several core values inspire all the work we do:

- Advocacy - We believe planners must be visionary in their work, politically engaged, and articulate proponents for positive change.
- Collaboration - We believe planners must understand and value the principles and perspectives of allied disciplines that participate in planning and city building.
- Engagement - we believe students should learn planning by interacting directly with professionals and the public to solve real-world planning challenges.
- Interdependency - We believe cities are inextricably tied to each other and to their ecological, regional and global contexts.
- Service - We believe our program should serve as a resource for planning professionals and the public by offering ideas, solutions, research, advocacy, and inspiration.
- Sustainability - We believe planning must be based on the principles of economic viability, environmental resiliency, and social equity.
- Urbanism - We believe in the potential of cities and towns to be the most efficient, equitable and inspiring forms of human settlement.

## **Our Faculty**

The faculty of the Department of Urban and Regional Planning consists of a purposeful mix of full-time tenured/tenure-track faculty, full-time clinical-track faculty, and a diverse group of part-time lecturers who keep one foot in the professional practice of planning and one in the classroom. The MURP program and its students benefit from the rich contributions of the scholarly research accomplished by our tenured/tenure-track faculty, and the practice-oriented instruction provided by our lecturers and instructors. To learn more about our MURP faculty members, please visit the college website.

## **Our Students**

Our commitment to our students extends across many areas: providing them with exceptional instruction and research-backed knowledge about planning; inspiring them to achieve great things in their personal and professional lives; exposing them to planning professionals, real-world planning situations, and state-of-the-art learning resources; and helping them choose their best academic and career paths through advising and mentoring.

## **Curricular Approach**

### **Program Features**

Our passion for teaching students the knowledge, skills and values they will need to be confident, principled, and visionary planners is reflected in the five key features we've integrated across our program and curriculum:

- **Physical Planning and Design** - We emphasize physical planning and design throughout our curriculum. Housed within the College of Architecture and Planning, we work closely with the College's Architecture, Urban Design, Landscape Architecture, and Historic Preservation programs to provide our students access to an expanded design-focused education.
- **Experiential Learning and Engagement** - Throughout the program, we provide significant opportunities for students to gain hands-on planning experience and have direct interaction with Colorado's planning professionals. We use Denver's diverse urban landscape as a real-world classroom for students to experience and analyze the built, social, political, and economic environments.
- **International Learning Opportunities** - We provide students the opportunity to study planning from an international perspective. By offering lecture courses that focus on global planning issues and studios that involve on-site coursework in other countries and collaborations with partner universities abroad, we help students expand their personal and educational worldview.
- **Innovative Planning Technologies** - We integrate innovative planning technologies into many of our program's courses and activities. We capitalize on the Denver region's entrepreneurial spirit and tech-focused economy by providing access to state-of-the-art planning technologies and teaching students how these tools can support the planning process.
- **Self-Directed Curriculum** - We offer our students the unique ability to craft an education suited to their career goals and personal interests. Students may choose any combination of elective courses, whether oriented towards one of our three Program Initiatives, a traditional specialization, or a generalist survey of the planning field.

## **Program Initiatives**

We focus on teaching students how to address critical issues and complex problems facing cities and regions today. For planners to take the lead in the city-building process, they need to understand the breadth of their field and know how to work in cross-disciplinary teams. Therefore we have structured our whole program - research, curriculum, faculty and student efforts, etc.- around three issue areas, which we call Initiatives.

Our three Program Initiatives (Healthy Communities, Urban Revitalization, and Regional Sustainability) represent issues at the forefront of the planning profession today and are also prominent topics in Denver and Colorado.

### **Healthy Communities**

The link between human health and the built environment has become a key factor in planning cities and regions. Colorado is known for its physically fit and active adult population, but our vulnerable populations face significant challenges such as childhood

obesity, disconnected neighborhoods, and lack of access to healthy food. Colorado has become a national leader in finding ways to plan and design healthier environments, and the MURP program's Healthy Communities Initiative is part of that effort. We work with partners at the local, state and federal levels, as well as the non-profit, educational and private sectors, to provide students comprehensive and interdisciplinary training in the tools, innovations and policies necessary for creating physically, socially, and economically healthy communities.

### **Urban Revitalization**

After decades of suburbanization, segregated land uses, and automobile-dependent development, the U.S. is now experiencing a resurgence of traditional urbanism and a reorientation toward central cities. Nowhere else is that phenomenon more evident than in Denver, where infill and transit-oriented development, historic preservation, adaptive reuse, and multi-modal transport are transforming the urban landscape. The MURP program's Urban Revitalization Initiative gives students opportunities to engage with local developers, planners, designers and policymakers to help revive and enhance established cities, retrofit the suburbs, and plan sustainable new developments.

### **Regional Sustainability**

Climate change, environmental degradation, resource scarcity, and sprawling development present critical challenges to planners worldwide. In the Rocky Mountain West, the impacts are evident in habitat loss, wildfire risk, and conflicts over water and energy resources. The MURP program's Regional Sustainability Initiative explores ways that Colorado and its neighbors can tackle these issues together. At the metropolitan level, Denver and its adjacent communities already serve as a model for regional planning and cooperation, exemplified by the visionary FasTracks transit program. Our Initiative draws on Denver's success in regional land use, transportation, economic development and resource planning to help students understand how built and natural environments can co-exist more sustainably at various regional scales.

### **Dual Degrees**

As part of encouraging among planners an appreciation for and a knowledge of the perspectives and practices of the other disciplines that participate in planning and city-building, we offer several dual degree opportunities, both with programs within the College of Architecture and Planning and with other units across the University of Colorado system. In every instance, the total credit requirement of the Dual Degree is considerably less than would be needed if each degree were independently pursued. The degrees that may be combined with the Master of Urban and Regional Planning include:

- Master of Architecture (MURP+MARCH)
- Master of Landscape Architecture (MURP+MLA)
- Master of Public Health (MURP+MPH)
- Master of Public Administration (MURP+MPA)
- Master of Business Administration (MURP+MBA)
- Master of Science degree in Historic Preservation (MURP+MSHP)

- Juris Doctorate (Law Degree) (MURP+JD-in collaboration with the CU Boulder Law School)

Information about the dual degrees can be found on the College website.

## **About the College of Arts & Media**

### **Mission**

*Our mission is to effect change by preparing students to successfully pursue their passions. Our students acquire the skills they need to excel in an academically rigorous, experiential learning environment energized by creative exchange, real-world experience and diversity of voice.*

## **Core Values**

**Creative Excellence** - Academic and artistic rigor, creativity and innovation are bedrock principles of the CAM community and the cornerstone of how we define excellence. As champions of creative excellence in art making and artistic expression we support risk-taking, intellectual freedom and social responsibility.

**Discovery** - We believe in a culture of shared discovery. Our students learn by doing, and as emerging peers, are important contributors to the knowledge exchange. We value rigorous investigation, critical thinking, diversity, collaboration and invention.

**Denver** - We are committed to learning both inside and outside the classroom. The accessibility, diversity and cultural energy of Denver make CAM a better place to teach, work and learn, We strive to offer reciprocal experiences to the citizens of this great city and pay it forward by extending our reach and impact in the global community.

## **Programs of Study**

### ***Music & Entertainment Industry Studies***

- Master of Science in Recording Arts with Emphasis in Media Forensics
- CAM also offers a wide range of undergraduate degree options. Please see the **Undergraduate Catalog** or contact CAM@ucdenver.edu for more information.

## **Facilities**

CAM is constantly working to enhance and add to its facilities; see below for just some of the resources.

### **National Center for Media Forensics Facilities**

- Computer lab featuring multimedia analysis and processing software such as Cognitech, Ocean Systems, DAC, Agnitio, iZotope Rx Advanced, Adobe Creative Cloud, MATLAB, EnCase, Cellebrite and Cedar Cambridge hardware/software systems
- Security DVR and camera lab
- Graduate student workstations accessible from anywhere in the world via Remote Desktop Connection
- ENF (Electric Network Frequency) databases around the US

## **CAM General Academic Policies**

Please see the Academic Policies and the Information for Graduate Students pages of this catalog for academic policies that apply to all students at the university. The policies that follow apply specifically to all graduate students in the College of Arts & Media. Contact [ncmf@ucdenver.edu](mailto:ncmf@ucdenver.edu) with any questions about these or other college/university policies.

Students must also follow the policies outlined in the Graduate School Policies and Procedures. Visit the Academic Policies page in this catalog and click on the link to access this reference.

### **Adding/Withdrawing from Courses After Census**

Students wishing to add or withdraw from a full-term course after the semester add/drop deadline (census) should contact [ncmf@ucdenver.edu](mailto:ncmf@ucdenver.edu) for guidelines and instructions.

### **Grade Appeals**

For College of Arts & Media courses:

- When a student has questions or concerns regarding academic issues such as project grades, final grades, attendance policies, etc., the student is encouraged to speak directly with the faculty member teaching the course.
- If resolution or clarity of understanding is not reached, the following procedure should be followed:
  - The student contacts the chair of the department offering the course to discuss the concerns and his/her point of view.
  - The department chair speaks with the faculty member to ascertain the faculty member's point of view.
  - The department chair facilitates a meeting between the student and faculty member to discuss the issue.
  - If the student still has concerns after completion of these procedures, the student should contact the College of Arts & Media associate dean of academic and student affairs.

### **Incompletes**

The College of Arts & Media has strict policies for granting incomplete grades. They include but are not limited to the following:

- Reason for incomplete must be a verifiable circumstance beyond the student's control that made completion of the course impossible. The student must provide documentation.

- The majority of course requirements (75 percent) must have been completed with a passing grade to be eligible for an incomplete (B (3.0) for courses toward recording arts; B- (2.7) for courses toward media forensics).
  - Whether the student has successfully completed 75% of the course with a passing grade is determined by the instructor and based on the requirements listed in the syllabus.
- CAM course completion agreement must be signed by both the instructor and student, with final approval by the dean's/advising office.
- All course work must be completed within one calendar year of the end of the original course, unless an earlier deadline is specified.
  - The final grade (earned by completing the course requirements) does not result in deletion of the incomplete (I) from the transcript. A second entry is posted on the transcript to show the final grade for the course, with a notation that the course was 'Originally graded as Incomplete.'
  - At the end of one year, I grades for courses that are not completed will automatically revert to an F.
- Requests for a retroactive change from a letter grade to an incomplete will not be considered.

The student is responsible for requesting an incomplete grade and submitting all of the appropriate paperwork and obtaining approvals. Please contact [ncmf@ucdenver.edu](mailto:ncmf@ucdenver.edu) for additional information.

## **Curricular Changes and Course Substitutions**

Graduate students fall under the degree requirements that were in place when they first enrolled in their programs. If a program revises its curriculum, students have the option of following their original degree requirements or the revised curriculum. Courses under the original requirements may no longer be taught or may not be available for a set duration. In this case, the department faculty will approve reasonable course substitutions.

Course substitutions in the graduate degree must be approved by the designated area head in the specific program area, the department chair and/or possibly the associate dean. Please contact [ncmf@ucdenver.edu](mailto:ncmf@ucdenver.edu) for additional information.

## **Applying to Graduate**

Students expecting to graduate are required to apply to graduate via UCDAccess by the published deadline. Students who do not apply by the deadline must apply to graduate for the following semester.

Applications will be accepted starting the first day of the student's registration for the semester in which the student plans to graduate. Applications are due by 5 p.m. on census date (the drop/add deadline) of the semester in which the student is applying to graduate, as noted on the published academic calendar. Students are encouraged to

meet with a faculty advisor the semester before they intend to graduate to review graduation procedures and degree requirements.

Students who have not attended the university for one calendar year (three consecutive semesters, including summer term) or longer must gain readmission to the university prior to applying for graduation. It is the student's responsibility to apply with enough time for the readmission process to be finalized by the census date.

### **Academic Policies, Procedures and Curriculum Committee**

The CAM Academic Policies, Procedures and Curriculum Committee is the appellate committee for all student-related academic petitions, issues and appeals. The committee is responsible for the evaluation and interpretation of the approved academic policies of the college. Questions about the interpretation of policies may be directed to CAM Advising and Student Services. Procedures and petition guidelines are available at the CAM website or by emailing [ncmf@ucdenver.edu](mailto:ncmf@ucdenver.edu).

### **Admissions/Advising**

Undergraduate: 303-315-8110  
Graduate: 303-315-8110

## **Application Deadlines**

## **Graduate**

*Fall-* Domestic applications April 15

International applications March 15

*Spring-* Domestic applications October 15

International applications September 15

*Summer-* Domestic applications February 15

International applications January 15

Applications received after these dates may not be eligible for scholarships.

## **Executive MBA**

*Fall-* June 1

## **One Year MBA**

*Fall-* June 15

Located in the heart of the Rocky Mountain business community, the Business School at the University of Colorado Denver prepares students with the knowledge and skills necessary to become effective, responsible business professionals. We're able to achieve a standard of excellence by bringing together nationally recognized faculty and highly motivated, mature students in an intellectually challenging academic environment. CU Denver's Business School is a research institution. Because our faculty are nationally recognized for scholarly research as well as for their teaching skills, our students have the opportunity to be on the leading edge of business management theory and practice. Our class schedules and curriculum offer flexibility to meet your needs whether you plan to attend full or part time, day or evening. Whether you're an experienced working professional seeking an advanced degree or preparing for a new career in the business world, you'll gain the knowledge and perspective necessary to succeed in today's challenging business environment.

## **Educational Goals**

The Business School is committed to superb teaching, connecting theory to practice that focuses on:

- current and relevant knowledge and skills necessary for success in the highly competitive global business environment
- experience in cooperative and team-based work skills
- integrated professional and functional expertise
- sensitivity to cultural and ethnic diversity

Our graduate programs serve both traditional and nontraditional students who have extensive work experience. The MBA serves the needs of students who desire a general business education. The professionally oriented MS degrees serve the needs of students who desire greater specialization, particularly students who have already obtained an undergraduate business degree. Large numbers of our graduate students will be drawn from national and international locales.

Our undergraduate program, which serves both traditional and nontraditional students, leads to a baccalaureate degree in business with a liberal arts component. The program

is closely linked, through articulation agreements, to lower-division programs offered by Colorado's four-year and community colleges.

Key elements of our academic programs are the provision of top-quality career advising and placement services, as well as flexible schedules and programs to meet a wide range of student needs. We are committed to assisting our students' efforts to pursue rewarding careers.

## **Faculty**

Our nationally recognized faculty members are vigorous and enthusiastic about teaching and research. Faculty members hold degrees from the nation's leading business schools, including Berkeley, Harvard, Stanford, University of Chicago, University of Pennsylvania, UCLA and Yale. Many of them also bring years of valuable experience in private industry. Their interdisciplinary expertise, academic achievements, scholarly research and business experience provide students with a dynamic learning environment.

## **Scholarships and Financial Aid**

Many programs for financial aid are administered by the Office of Financial Aid. Call 303-315-1850 for detailed information.

Thanks to the generous support of the Colorado business community and others, the Business School has a significant number of scholarships to offer its students. Scholarships are awarded on the basis of merit and/or financial need. The amount of the award and the number of awards available vary.

Over 30 different scholarships are available to eligible Business School students, with multiple awards from most scholarships.

Further information about these scholarships, including eligibility criteria and application forms, may be obtained by visiting the Financial Aid & Scholarships website, by calling 303-315-1850, or by viewing scholarship information on the Business School website.

## **Study Abroad**

Transfer credit from study abroad programs requires prior written approval from the Assistant Dean. Students must meet with a business staff advisor to determine course acceptability prior to the semester in which they intend to study abroad. Information on the various programs is available at the Office of International Affairs.

## **Institute for International Business**

CU Denver's Institute for International Business (IIB) was created in 1988 by the Board of Regents of the University of Colorado to serve as a center for the advanced study and teaching of international business (IB). The US Department of Education

designated the IIB as a Center for International Business Education and Research, a prestigious center of excellence award that it has competitively held since 1993. CU Denver is one of only 15 CIBERs in the United States and the only one in Colorado. Among others, the IIB/CIBER promotes interdisciplinary and multi-campus collaboration at the University of Colorado; hosts monthly International Executive Roundtable lectures on global competitiveness; and sponsors IB development programs, conferences and workshops for faculty and the business community in Colorado, the Rocky Mountain region and the United States. The IIB/CIBER works closely with CU Denver's Business in advancing its international business programs and research, as well as other colleges, schools, and departments at CU to promote various internationalization initiatives. Call 303-315-8884 or visit the IIB website at [www.ucdenver.edu/institutes/international-business](http://www.ucdenver.edu/institutes/international-business) for more information.

## **General Academic Policies**

Academic policies that apply to all students at CU Denver are described in the Office of the Registrar website and in the Academic Policies and University Policies sections of the catalog. The policies outlined on the following pages are relevant for both undergraduate and graduate students in the Business School. Individual policies appropriate only to undergraduate or graduate students are described under separate headings. Each student is responsible for knowing and complying with the academic policies and regulations established for the school. The school cannot assume responsibility for problems resulting from a student's failure to follow the policies stated in this catalog. Similarly, students are responsible for all deadlines, rules and regulations stated on the student portal.

## **Academic Ethics**

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, falsification of official records and similar acts or any attempt to engage in such acts are grounds for suspension or expulsion from the university. In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as the student's own. It is recommended that students consult with the instructors as to the proper preparation of reports, papers, etc., to avoid this and similar offenses. Also, actions that disrupt the administrative process, such as misrepresentation of credentials or academic status, other forms of deception or verbal abuse of university staff are grounds for suspension or probation. All discovered acts of dishonesty must be referred to the Business School's Internal Affairs Committee.

## **Admission to Business Courses**

Enrollment in business courses is limited to students who have been admitted to business degree programs and to other students as described in the separate

undergraduate and graduate policy sections. The course registration criteria are designed to meet a number of objectives:

- to assure access to business courses for students admitted into a business degree program
- to serve students in other colleges who have business-related education objectives or requirements
- to serve nondegree students who have specific career or education goals

Refer to the student portal each term for course availability and prerequisites.

## **Attendance Regulations**

Students are required to attend classes, including online classes, on a regular basis. Absences must be arranged with the instructor and must conform with university and instructor policies on attendance. When possible alert your instructor prior to the absence.

## **Prerequisites**

Students are expected to know and fulfill all prerequisites when registering. Prerequisites are in place for the benefit of the student. The Business School wants our students to have the best experience in their courses, and having the prerequisites for a course ensures that you are ready for the material that will be covered. See course listings in the schedule planner for relevant prerequisites as many are strictly enforced. The Business School reserves the right to administratively drop students who enroll without the correct prerequisites. This action may result in the loss of tuition.

## **Course Numbering**

The course numbering system used at CU Denver identifies the class standing required for enrollment. Students are expected to take 1000-level courses in their freshman year, 2000-level courses in their sophomore year, 3000-level courses in their junior year and 4000-level courses in their senior year. Courses at the 5000 and 6000 level are restricted to master's-level business students, and courses at the 7000 level are restricted to PhD students.

## **Adding Courses**

Students may add courses to their original schedule through the census date (first 12 days of the fall or spring semester, first eight days of summer session), Instructor and Dean's signature is required to add a business course after census date.

## **Dropping Courses**

Students may drop a course through the census date and it will not appear on the transcript. After census, and through the 10th week of a regular semester a student who wishes to drop a course may do so through the student portal without instructor or dean signatures. The course and a grade of *W* will appear on the transcript. Beginning the 11th week of a regular semester, a student who wishes to drop must obtain written approval from both the instructor and assistant dean or designate. The course and a grade of *W* will appear on the transcript. In order to drop after the 10th week, it will also be necessary to document circumstances beyond a student's control and complete the appropriate late withdrawal petition form. Any student who is failing a class will not be allowed to drop simply because of their grade. See the academic calendar for deadlines and costs involved and for drop information for other terms. Contact the advising offices for the forms needed to drop after the 10th week of the regular semester terms.

## **Withdrawal**

See the Office of the Registrar chapter of the catalog and website for university-wide withdrawal policies. Note that after the 10th week of the regular semesters, the Business School normally requires instructors' signatures on withdrawal forms before the assistant dean's approval is granted. If a Business student is dropping all courses in a particular semester, the student must complete a petition to withdraw form and submit to the assistant dean or designate for signatures. It will also be necessary to document circumstances beyond a student's control with the petition.

## **Administrative Drop**

The school reserves the right to administratively drop students who are incorrectly enrolled in business courses. While we do our best to administratively drop students prior to the census date to avoid tuition charges, time may not always allow for that timeline and tuition charges may apply.

Note that students who never attend class are not automatically dropped from the course. The student is responsible for dropping courses and failure to do so will result in a tuition charge for the class and an "F" grade.

## **Appeal Procedure**

Students may contact an advisor in the Business School's programs office (303-315-8110) for appeal and petition procedures pertaining to rules and regulations of the school.

## **Grade Appeal Procedure**

Students must follow the process below.

- If the issue is not resolved after a conversation with the faculty member, discuss concerns with the Discipline Director.

- If the issue is not resolved after a conversation with the Discipline Director, discuss concerns with the Associate Dean of Programs.

Neither the Dean, nor any director, will offer an opinion with respect to the qualitative assessment of a student's work, but, may consider whether the procedures used to determine a grade were consistent with the syllabus and written amendments to the syllabus. No passing grade will be changed after one year. Requests for grade adjustments/appeals must be made in the semester immediately following the semester in which the disputed grade was earned. Students may reach out to the advising office to determine the names and contact information of the appropriate Discipline Directors and/or Associate Dean by emailing [undergrad.advising@ucdenver.edu](mailto:undergrad.advising@ucdenver.edu) or [grad.advising@ucdenver.edu](mailto:grad.advising@ucdenver.edu) or by calling 303.315.8110.

## General Grading Policies

*For undergraduate students pursuing a BSBA, a 2.0 cumulative GPA in both campus and Business courses must be achieved to graduate. If the required cumulative GPAs are not maintained, the student will be placed on academic probation. While on probation, the student will need to follow the guidelines outlined by campus and the Business School in order to continue their education. Contact an advisor for details. The Business School cannot confer the degree if the required GPAs are not met.*

*For graduate students pursuing an MBA or an MS, a minimum cumulative graduate business GPA of 3.0 or higher must be achieved and maintained for courses taken toward a graduate business degree. All CU Denver graduate business courses are computed in the graduate business cumulative GPA, regardless if the coursework pertains to the current degree or if the courses were taken as a graduate non-degree seeking business student. Transfer hours and grades from other institutions and/or from University of Colorado courses taken on the Boulder Campus, Colorado Springs Campus, or the Anschutz Medical Campus, are not computed in the business GPA. However, degree credit may be awarded for those transfer courses through a petition process. If the required cumulative GPA does not meet the minimum requirement of 3.0 or higher, the student will be placed on academic probation. While on probation, the student will have 9 credits or 3 semesters to reach the required cumulative GPA of 3.0 or higher. If after that probation period the student is still not at the required 3.0 or higher GPA, the Business School cannot confer the degree.*

*Plus/Minus Grading.* Faculty have the option to use plus/minus grading.

*Incomplete Grades.* The only incomplete grade given in the school is an *I*. An *I* grade is assigned only when documented circumstances clearly beyond the student's control prevent completion of course requirements (exams, papers, etc.). Students must sign a contract outlining how they will make up the missing work with the instructor giving the *I*. If and *I* is assigned, students do not register for the course a second time. Instead, they work with the faculty member to make up the remaining requirements. All *I* grades must be made up within the contract period (which may not exceed one year), or the *I* will automatically be changed to the grade of *F*.

The student is responsible for contacting the instructor to schedule the completion of the coursework.

*Grade Changes.* Grades as reported by instructors are final. Grade changes will be considered only in cases of documented clerical errors, approved grade appeals, or

when a student is making up an incomplete grade (*I*). All changes must be made within one year after the course has been taken, unless highly unusual circumstances can be documented and the change has been approved by the school.

*Pass-Fail or No Credit (Audit)*. With the exception of internships, experiential learning and travel study courses, the Business School does not permit the election of pass-fail grading for any business course required for the student's degree. Students are not allowed to audit business courses.

## Academic Programs

A carefully designed curriculum to prepare students for success in business administration is available for the student seeking either an undergraduate or graduate degree. The school offers courses leading to the bachelor of science in business administration (BSBA), master of business administration (MBA), the master of science (MS) and doctor of philosophy (PhD) degrees.

As an undergraduate student, it is possible to pursue two major simultaneously or consider a major and a minor.

It is possible to pursue two graduate degrees simultaneously, such as an MBA and an MS, or two MS degrees, through our dual degree programs. In addition to the programs in the Business School itself, we partner with other university departments to offer dual programs in MS finance and risk management/economics and the MBA in combination with graduate programs in architecture, bioengineering, economics, political science, urban planning and the MD.

## Graduate Business Programs (MBA/MS/PhD)

**Associate Dean:** Ronald Ramirez

**Assistant Dean:** Linda Brooker

**Telephone:** 303-315-8110

**Fax:** 303-315-8199

**E-mail:** bschool.admissions@ucdenver.edu

The Business School offers programs leading to a doctor of philosophy, the master of business administration and the master of science in specific fields of business and health administration. In addition, the master of business administration for executives (executive MBA) is offered as a multi campus program of the University of Colorado business schools, and the executive program in health administration (executive MBA/HA) is offered through the executive health network.

The PhD, MBA, executive MBA, MS and BS degrees in business are accredited by AACSB International, the Association to Advance Collegiate Schools of Business. The health administration MBA and MS degrees are also accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). In addition, the accounting programs have earned a separate AACSB International accreditation.

For a list of graduate business programs, see Program Curricula below.

## **Requirements for Admission to the MBA and MS Programs**

### **Admissions/Advising**

Persons contemplating graduate study are encouraged to learn about admission and program requirements by scheduling an appointment with our recruiting staff or attending one of the regularly scheduled prospective student information meetings. Call 303-315-8110 to schedule an appointment.

Admission to the graduate programs in business is granted only to students showing high promise of success in graduate business study. Admission is based on the following indicators of the candidate's likelihood to succeed in the program.

### **Academic Record**

The bachelor's degree must be earned from a regionally accredited university. The total academic record is considered, including the GPA, the course of study, and the quality of the program.

### **Required Testing**

The GMAT or GRE is required for admission consideration for any applicant who does not have a previously awarded master's degree. GMAT waivers are available on a case-by-case basis and can be requested while completing the online application. The GMAT or GRE is administered at numerous centers throughout the world. For information and to register for the test, write to: GMAT/GRE, Educational Testing Service, CN 6103, Princeton, NJ 08541; or phone 1-800-GMATNOW; or visit [www.mba.com](http://www.mba.com). The code numbers for CU Denver's graduate business programs are as follows:

MBA: MPB-OG-78  
One Year MBA: MPB-OG-65  
MS: MPB-OG-75  
PhD: MPB-OG-29

GMAT is preferred for *all* the graduate business programs. Students may submit a GRE score for any of the graduate degree programs, but the decision to accept the GRE is on a case by case basis. If you have not taken either the GMAT or the GRE, we strongly recommend the GMAT. GMAT waivers are available on a case-by-case basis and can be requested while completing the online application. GMAT waivers are primarily considered based on a previous graduate degree and/or considerable work experience. Other graduate admission exams such as the MCAT and LSAT may also be considered, but, some programs will not accept either. See individual program information for specifics. The MS in business analytics program does not accept the

LSAT or MCAT in place of the GMAT or GRE without extensive verifiable evidence of the student's prior mathematical preparation and coursework. For more detailed information on admissions requirements, phone the graduate programs office 303-315-8211 or email them at: [bschool.admissions@ucdenver.edu](mailto:bschool.admissions@ucdenver.edu).

### **Work Experience**

While we do not require work experience, a record of appropriate employment at increasing levels of responsibility is considered a positive indicator of the likelihood of successful completion of graduate work. A resume must be submitted with the application materials.

### **Background Requirements**

Students applying for graduate programs in business *do not need an undergraduate degree in business*. The MBA program is specifically designed so that the required courses cover the material needed for completion of the degree. There are no prerequisites needed to start the MBA program. Students with non-business backgrounds have completed the program successfully. However, applicants for some of the MS degrees may be required to take background or common body of knowledge business courses, depending on the individual's academic background. For more detailed information on which background courses may be needed refer to the individual program information in this catalog or on our website, or phone the graduate programs office to schedule an appointment with a graduate academic advisor, 303-315-8110 or email the advisors at: [grad.advising@ucdenver.edu](mailto:grad.advising@ucdenver.edu).

It is expected that students have an adequate level of personal computer proficiency in a word processing and spreadsheet software, as well as a good working knowledge of basic algebra and English grammar.

### **Letters of Recommendation**

Some programs require letters of recommendation while others do not. Please see individual graduate program details for specifics.

### **The Admission Process**

Mailing address for applications:

Graduate Admissions  
The Business School  
University of Colorado Denver  
Campus Box 165, P.O. Box 173364  
Denver, CO 80217-3364

Students seeking admission to the One Year MBA, MBA with an emphasis in health administration, MS in health administration or executive programs should consult with the relevant catalog sections for additional application criteria or requirements.

### **Domestic Application Requirements**

- Complete parts I and II of the application for graduate admission and the four essay questions.
- Have required GMAT or GRE scores sent directly to the graduate business admissions office from the Educational Testing Service. The code for CU Denver's graduate business programs are as follows:

MBA: MPB-OG-78  
One Year MBA: MPB-OG-65  
MS: MPB-OG-75  
PhD: MPB-OG-29

- Have two official transcripts (not student copies) mailed directly from each school, college, and university ever attended past high school. Transcripts must be sent even if credit course work completed was not part of a degree program or was taken after an undergraduate degree was earned.
- Resumé
- Enclose a check for \$50 for the MBA, MS or PhD programs, or \$50 for the dual MBA/MS or dual MS/MS, made payable to the University of Colorado at Denver. Personal interviews are not required, except for the One Year MBA and the MBA and MS in health administration. You will be contacted to schedule the interview.

*Deadlines.* To be considered for admission, applicants for graduate programs must submit all materials prior to the following dates:

*Fall-* Domestic applications April 15

International applications March 15

*Spring-* Domestic applications October 15

International applications September 15

*Summer-* Domestic applications February 15

International applications January 15

The One Year MBA option only admits students each fall. The application deadline for the One Year MBA is June 15.

Early applications are encouraged because, if admitted, the student receives priority for registration time assignment. Applications received after published deadlines with complete supporting documentation, scores, fees and transcripts will be considered; however, those students may not meet scholarship deadlines and in some cases, course availability is limited for the later applicants.

### **International Application Requirements**

See International Students.

## **Academic Policies for Graduate Students**

### **Advising**

As soon as possible, after being admitted, students should schedule an appointment with a graduate advisor to discuss general degree requirements and determine if any background course work may be required and/or what common body of knowledge business courses or prerequisites might be waived for the MS degrees. Call 303-315-8110 to schedule an appointment or email them at [grad.advising@ucdenver.edu](mailto:grad.advising@ucdenver.edu).

## **Degree Plan**

All students are encouraged to meet with a graduate advisor during their first semester to review their degree plan. Students are also encouraged to meet with a graduate advisor throughout their program to ensure the correct sequencing of courses. In order to ensure that registration runs smoothly, an advising hold will be placed on newly admitted students in our MS in accounting and our MS in international business programs. Those students must schedule a time to meet with an advisor prior to registration in their first semester. Call 303.315.8110 to schedule an appointment.

## **Course Load**

The normal course load for full-time graduate students is 9-12 semester hours. However, because many students are also pursuing a career, it is possible to attend classes on a part-time basis by enrolling in 3-6 semester hours. For financial aid purposes, 5 semester hours of graduate study is considered full time during the fall and spring terms and 3 semester hours for the summer term. Graduate courses are scheduled primarily in the evening or online to accommodate work schedules. Students wishing to take more than 12 credits in one semester must get approval from the assistant dean. Contact [grad.advising@ucdenver.edu](mailto:grad.advising@ucdenver.edu) for details.

## **Transfer of Credit**

Upon approval of the program specific director, a maximum of 12 semester hours of graduate business course work may be transferred to the MBA and 9 semester hours for the MS degrees (9 semester hours for each the MBA and MS degree for a dual MBA/MS degree program). Note: for the MS in business analytics only 6 semester hours may be transferred into the program. Courses must have been taken from another AACSB accredited graduate school of business or one of the top 200 universities in the country and courses must have been completed within the last five years with a grade of at least B (not B-). No transfer courses will be accepted if they have been used to satisfy degree requirements of a previously awarded degree. Graduate business courses taken at other University of Colorado Business Schools are considered transfer hours and are included in the transfer limit. Transfer of quarter hours of graduate business credit may satisfy a course requirement, but may not satisfy the total number of hours required. One-quarter hour equals .667 semester hour.

## **Transfer to Another Business School Program**

Because admission standards *vary* between degree programs, students who wish to transfer from one CU Denver Business School degree program to a different Business School degree program must meet the admissions standards for the program they wish to apply. There are no automatic transfers between programs and admission into one program does not guarantee admission into another program. Also, graduation from one program does not guarantee admission into another program because the admissions standards vary between programs.

## **Time Limits**

Master's students are required to complete all degree requirements within five years and one semester (seven years and one semester to earn dual MBA/MS or MS/MS degrees, or a PhD). Courses completed outside of these time limits will not be accepted toward the degree without an approved petition. Time-limit extensions are given only for external situations that restrict a student's ability to complete the program in a timely manner. If you do not take graduate business courses for more than three consecutive semesters, you will need to reapply for admission and meet the admission standards in place for the new application term. At the time of re-admission, your time limit will also be evaluated to determine which courses may meet the time limits listed above.

## **Former Students**

Any Denver campus graduate student who has not been enrolled in his or her admitted program of study for three consecutive semesters (summers included) is considered a former student and must reapply for admission to the program by submitting part I of the application for graduate admission, in-state tuition classification form, along with the applicable fee. Readmitted students must conform to degree requirements in effect during the term in which they are readmitted. If the new requirements differ significantly from the former degree plan, a petition may be submitted requesting exceptions.

## **Graduation**

Students must complete the online intent to graduate form on the Registrar's website ([www.ucdenver.edu/registrar](http://www.ucdenver.edu/registrar)) when they register for their last semester. Contact the graduate advising office with questions at [grad.advising@ucdenver.edu](mailto:grad.advising@ucdenver.edu).

## **Grade Point Average Requirements**

A minimum cumulative graduate business GPA of 3.0 must be achieved and maintained for courses taken toward a graduate business degree. All CU Denver graduate business courses, regardless if the coursework pertains to the current degree and including courses taken as a graduate non-degree seeking business student, are computed in the graduate business cumulative GPA. Transfer hours and grades from other institutions and/or from University of Colorado courses taken on the Boulder Campus, Colorado Springs Campus, or the Anschutz Medical Campus, are not computed in the business GPA. However, degree credit may be awarded for those transfer courses through a

petition process. If the required cumulative GPA does not meet the minimum requirement of 3.0 or higher when degree course requirements have been met, the student will be placed on academic probation. Academic probation will only be offered at that time if the student can mathematically achieve the required 3.0 cumulative GPA by taking the additional 9 semester credits of coursework. While on probation, the student will have 9 credits or 3 semesters to reach the required cumulative GPA of 3.0. If after that probation period, the student is still not at the required 3.0 GPA to graduate, the Business School cannot confer the degree.

## **Probation and Suspension**

If after completing 9 semester hours a student's cumulative graduate business GPA falls below 3.0, the student will be placed on academic probation and given three semesters (one calendar year) or 9 semester hours of graduate business course work (whichever occurs first) in which to achieve the required 3.0 cumulative average. If the student achieves that required cumulative GPA, they are cleared from probation and may continue their studies with us. Failure to achieve the required GPA within the allotted time period may result in suspension for one year. Suspended students may not attend any campus of the University of Colorado including continuing education/extended studies. Students on suspension may petition for readmission to the school after waiting a minimum of one year from the term in which they were suspended. Any suspended student readmitted to the school will be placed on continued probation status to monitor required progress. To be considered for readmission, a petition form plus a new graduate application part I and in-state tuition classification form must be submitted along with the appropriate fee. Generally, petitions are granted only on rare occasions. Re-admitted students must meet any new admission requirements that may be in place. In addition, if a student cannot mathematically achieve the required 3.0 cumulative GPA with the remaining required courses, the petition to return will not be approved.

### **Passing Grades**

Any grade below a C (2.0) is a failing grade for graduate students (C is passing; C-, D+, D, D- and F are failing). Graduate students must repeat a required course for which they have received a grade below a C. Both the original grade and the grade for the repeated course count in the computation of the business GPA. If a grade lower than a C is earned in an elective course, the student may repeat that course or select another course. NOTE: C is a passing grade, while C-, D+, D, D- and F are failing grades.

### **Repeating Graduate Business Courses**

A failed course (any grade below a C such as C-, D+, D, D- or F) must be repeated if it is a required course. Both the original and the repeated grade will remain on the student's transcript and both grades will be calculated into the student's cumulative GPA. A course in which a grade of C or better is obtained may not be repeated. Graduate business courses repeated without approval may not be used in the graduate business GPA calculation.

### **Drop/Withdrawal**

Classes dropped prior to census date will not appear on the transcript. Thereafter, to drop after census date, with a grade of *W*, a student must be earning a grade of *C* or better; otherwise, an *F* will appear on the transcript. Students will not be permitted to drop a course or withdraw from all courses after the 10th week of the semester, unless circumstances outside the student's control are documented. The late request to drop or withdraw must be approved by the assistant dean and the course instructor(s). If a student requests to drop a course after the 10th week solely due to a failing grade, the request will be denied. Requests to drop after the 10th week must include a petition explaining the reason for the late drop.

## **Registration for Graduate Business Courses**

Students admitted to graduate business degree programs have priority for graduate business course registration. Nondegree students and graduate students from other University of Colorado schools or colleges may be permitted to attend on a space-available basis by meeting the qualifications and submitting a nondegree application form. (See the college website for the form.) Some graduate-level (6000-level) courses may be offered simultaneously with undergraduate 4000-level courses. However, most 6000-level courses are reserved exclusively for graduate business students.

## **Master of Business Administration Programs**

The master of business administration (MBA) program provides a general background in management and administration. This background enables the student to have the breadth of exposure and depth of knowledge required for an advanced-level management career. The program is devoted to developing the concepts, analytical tools and communication skills required for competent and responsible administration of an enterprise viewed in its entirety, within its social, political and economic environment.

The professional MBA program allows the scheduling of classes with maximum flexibility so students can progress through the program at their own pace, by taking as little as one class per semester or as many as five classes per semester, at times that are convenient to their work schedule. The program can be completed in as little as 16 months or as long as five years plus one semester.

Online courses add additional flexibility. Students may complete all degree requirements online, or combine online and campus courses to broaden the choice of electives or to fit a business travel schedule or personal learning style. All the core courses are offered online in the fall and spring terms, with limited online offerings in the summer semester. Your choice of online electives and specializations is limited.

The MBA program is also available in different configurations: One Year (full time, see relevant section), fully online, health administration and the executive MBA (see relevant section). All MBAs have the same curriculum requirements; they differ only in their focus, the choice of electives, the flexibility of course scheduling and the time required to complete the program. The One Year and executive MBAs are lockstep

programs, where all the students complete all program requirements together. No course transfers, waivers or substitutions are permitted in the lockstep programs.

For a list of MBA programs, see Program Curricula below.

## **Master of Science Programs**

Master of science degrees (MS) are offered in the fields of accounting, business analytics, finance and risk management, global energy management, health administration, information systems, international business, management, marketing, and taxation.

The MS degree affords the opportunity for specialization and depth of training within a particular field. The specialization and expertise developed within the MS program prepares the student for more specialized staff positions in industry, the nonprofit sector and government.

The course requirements for the MS degree in each of the fields are divided into different components-common body of knowledge (CBK), graduate core, and elective requirements. The CBK requires business courses to develop general breadth and competence in the fields of business administration. These requirements differ among MS degree programs and some MS degree programs have eliminated CBK requirements. Some CBK requirements may be waived if evidence of equivalent undergraduate or graduate-level coursework is shown and if the course work has been completed within the past 10 years. An undergraduate degree in business administration earned from an AACSB or regionally accredited university will meet most of the CBK requirements. The graduate core and elective courses require at least 30 semester hours of graduate-level coursework. BUSN courses lower than 6800 may not be used as free electives in the majority of our MS programs. Contact a graduate staff advisor for any exceptions at [grad.advising@ucdenver.edu](mailto:grad.advising@ucdenver.edu).

No comprehensive exams are required.

For a list of graduate MS programs, see Program Curricula below.

## **Dual Degree Programs**

Dual degree program options within the Business School include:

- MBA/MS
- MS/MS
- MBA/MD
- MBA/MS in Bioengineering
- MBA/MURP (Urban and Regional Planning)
- MBA/Political Science

Please be aware that admission into one of our programs does not guarantee admission into another program. If adding a dual, you must meet the admission requirements for both programs. All programs have their own unique admissions requirements. Graduation from one program does not guarantee admission into another program.

## PhD CSIS Program

**Program co-director:** Jiban Khuntia (Ph: 303-315-8424, email: jiban.khuntia@ucdenver.edu)

The computer science and engineering (CSE) department in the College of Engineering and Applied Science and the Business School offer a joint doctor of philosophy degree program in computer science and information systems (CSIS). Known as **the CSIS Ph.D., this program provides two tracks:**

- The Computer Science (CSIS CS Track) in the College of Engineering and Applied Science.
- The Information Systems (CSIS Business Ph.D.) in the Business School.

The CSIS Business Ph.D. program is located Business School of the University of Colorado Denver. Students admitted to CSIS Business Ph.D. will work with the Information Systems Department of the Business School at the University of Colorado Denver. The primary mission of the CSIS Business Ph.D. program is to produce individuals who will contribute to the discovery and dissemination of scientific knowledge through continued careers in research, publishing, and teach at research-oriented universities and research-oriented non-academic institutions throughout the world.

A prospective student requiring admission to this program, needs to choose the CSIS Business Ph.D. track and complete the application process. The admission to the program is competitive and is decided based on the following criteria.

1. Undergraduate GPA (should be above 3.4)
2. Standardized GMAT or GRE scores (test must have been taken within the last five years of intended term of enrollment. No score minimum)
3. TOEFL scores (for international applicants only who have not graduated from a U.S.A. institution. Test must have been taken within two years of the intended term of enrollment)
4. A statement of purpose essay describing an applicant's motivation and an initial plan for doctoral study
5. Curriculum Vitae, that includes work experience with dates of employment, reflecting prior achievements in academic and industry
6. Three letters of recommendation

Documents reflecting the above criteria, along with relevant fees, need to be uploaded through the online application process

at <http://www.ucdenver.edu/academics/colleges/business/apply-now/Pages/PhD-Admissions.aspx>

### **Application Deadlines:**

- For Fall admissions, the applications need to be completed by January 31st (5:00 p.m. MST).
- For Spring admissions, the applications need to be completed by September 31<sup>st</sup> (5:00 p.m. MST)

**Financial Aid:** The financial aid is decided after acceptance into the program. Doctoral students in the CSIS Business Ph.D. receive financial assistance through either research or teaching assistantships. These assistantships are decided based on merit, academic performance, and funding availability.

**Program Requirements:** Business School IS Ph.D. students should complete at least 60 credit units of coursework. This includes 30 units of Ph.D. level Information Systems (IS) theory-based, and research methods courses; and 30 dissertation topic units. Students are not holding a master's degree in IS, and demonstrating insufficient skills, may need to take additional coursework prior to the start of their Ph.D. program.

Each student will develop a detailed program plan with the consultation of advisor(s) to outline two years of required course works, take the prelims and comprehensive exams, fulfill their teaching requirement, and complete their dissertation. Students generally complete the IS theory-based and methods coursework within the first two years of their program. After completing all required coursework, students immediately take a comprehensive exam, typically during the Maymester time-period if finishing coursework in the Spring. Besides these general requirements, students should work with faculty on various research assignments that ultimately may be published in top-ranked IS journals.

Following successful completion of the comprehensive exam, students begin to work on their dissertation research during the Summer before the start of their 3rd year. The dissertation is an independent research project conducted by the student under the supervision of a dissertation committee assembled by the student. It is strongly recommended that students do research consistent with the research interests of current faculty. These topics include Behavioral, Organizational, Economics and Social issues related to information systems. The specific sequence of courses can vary depending on the schedule of classes being offered. The following is a sample milestone for the program schedule and completion requirements.

## **Executive Programs**

### **Executive MBA**

### **Faculty and Resources**

The faculty are senior faculty of the Business Schools from three of the university's campuses. The executive MBA program is offered jointly by the Graduate Schools of Business Administration in Boulder, Colorado Springs and the Business School in Denver. Faculty are nationally recognized, and all possess both practical managerial experience and a demonstrated ability to work effectively with executive-level students.

## **Admission Requirements**

The executive MBA program is designed for men and women who have eight to 10 years experience in a decision-making position. In the selection process, significant attention will be given to the depth and breadth of the candidate's experience, progression in job responsibility, total work experience and the ability to benefit from this integrative classroom/work environment. The admissions committee will base its decision on the application, former academic record, relevant test scores, the employer's nominating letter, other letters of recommendation and a personal interview.

**For application and additional information, write to:**

Executive MBA Program  
University of Colorado Denver  
P.O. Box 480006  
Denver, CO 80248-0006  
303-623-1888

## **Executive MBA in Health Administration**

**Program Manager:** Roger Japp  
**Telephone:** 303-315-8015 or 1-800-228-5778

## **Program Sponsors**

The executive program in health administration is a cooperative program of CU Denver and the Network for Healthcare Management.

The University of Colorado Denver serves as the degree-granting institution for the executive program. The graduate program in health administration is located in the Business School.

The Network for Healthcare Management is an educational consortium representing healthcare executives and academic faculty from major health administration graduate programs in the United States and Canada, including Arizona State University, Northwestern University, Ohio State University, San Diego State University, the University of California at Berkeley, the University of California at Los Angeles, the University of Colorado Denver, the University of Michigan, the University of Missouri, the University of North Carolina, the University of Southern California, the University of Toronto, the University of Washington and Virginia Commonwealth University.

## **Extend your education**

Whether you are looking to advance in your current field or prepare for an entirely new career, the Business School offers opportunities to meet your goals.

A variety of classes and programs are available to community members and alumni. Classes are taught by expert faculty or influential members of the Denver business community, imparting knowledge that is readily applicable in the field.

### **Entrepreneurship**

The Jake Jabs Center for Entrepreneurship offers programs for those looking to start a new venture or enhance their entrepreneurial skills. See the college website for more information.

### **Certificate Specialization Programs**

Modern career paths are flexible, so it's beneficial to have a flexible degree. If you already have a graduate business degree from an AACSB accredited school, the CU Denver Business School allows you to add specialized knowledge through our post-graduate certificates. See the college website for more information.

**Website:** <https://education.ucdenver.edu/>

### **Mailing Address**

School of Education & Human Development

P.O. Box 173364, Campus Box 106

Denver, CO 80217-3364

## **Overview**

The School of Education & Human Development is a vibrant community of practicing educators and counselors, educational leaders and researchers who have a strong service ethic locally, nationally and globally and a dedication to excellence.

## **Mission**

### **Leadership for Educational Equity**

Prepare and inspire education and mental health leaders to have a profound impact in fostering student opportunity, achievement and success in urban and diverse communities.

### **Vision**

A leading school of education providing national expertise on educational issues and socially-just solutions for urban and diverse communities. Through innovative research and partnerships, we strive to be passionate agents of change, inspiring upcoming generations to learn from the past and shape the future.

### **Our Role in the Community**

We are committed to developing forward-thinking educators and counselors who have a deep sense of inquiry, a concern for pressing social problems, a great desire to live their lives purposefully, a passion for giving back to the community and the cultural competence needed to serve urban and diverse populations.

### **Diversity and Inclusion**

At the School of Education & Human Development (SEHD), we believe strongly that all students-diverse in race, ethnicity, economic resources, language, fluency, abilities, geography, first-generation status, age, gender, and sexual identities-deserve the opportunity to learn. To advance our mission and meet the changing interests of our local and global communities, the Office of Diversity and Inclusion has been established to create positive momentum towards educational access, equity, and success.

### **Accreditations**

The School of Education & Human Development is fully accredited by the Colorado Department of Education (CDE).

The School of Education & Human Development is fully accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP) in Clinical Mental Health Counseling, School Counseling and Marriage and Family Therapy/Counseling.

The School of Education & Human Development is accredited on contingency by the American Psychological Association (APA) in School Psychology. We anticipate receiving full accreditation on or prior to the expiration date of April 15, 2023.

## **Programs Leading to Degrees, Licenses and Endorsements**

The School of Education & Human Development offers three doctoral programs, one educational specialist degree, master's degrees in seven program areas as well as undergraduate degrees with teacher licensure through a partnership with the College of Liberal Arts and Sciences. We offer a variety of endorsements and certificate programs as well. Students may pursue a variety of state licenses for teaching and school administration or may elect to earn these licenses without pursuing a graduate degree.

# LEADERSHIP FOR EDUCATIONAL ORGANIZATIONS

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**Email:** [academicservices@ucdenver.edu](mailto:academicservices@ucdenver.edu)

**Website:** <https://education.ucdenver.edu/academics/graduate/leadership-for-educational-organizations>

The Leadership for Educational Organizations (LEO) program is designed to develop outstanding educational leaders. Students will develop in-depth understanding about leadership roles and responsibilities, contemporary educational issues and collaboration, as well as a thorough awareness of legal, financial and political dimensions impacting education.

The LEO program seeks students who possess:

- High intellectual ability
- Strong sense of equity and social justice
- Strong academic backgrounds, and
- Clear leadership potential.

## Faculty

For information about faculty in this area, visit: <https://education.ucdenver.edu/about-us/faculty-directory>

The primary responsibility of the leadership for educational organizations (LEO) faculty is to prepare future ready leaders to make an impact for public education in Colorado and the nation. Currently, the principal license is required for people seeking building-level administrative positions in Colorado. Alternatively, the administrator license may be required for district-level leadership positions in Colorado.

Click on any of the following to go to that information:

- Principal Licensure
- Leadership for Educational Organizations MA Principal Licensure
- Leadership for Educational Organizations (non-licensure): Early Childhood Education Concentration
- Leadership for Educational Organizations EdS with Principal Licensure
- Administrator License - Executive Leadership Program
- Leadership for Educational Equity EdD with Principal or Administrator License
- Education and Human Development PhD with a concentration in Leadership for Educational Organizations

# CURRICULUM AND INSTRUCTION

Return to: School of Education & Human Development

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-5001

**E-mail:** [ASPIRE@ucdenver.edu](mailto:ASPIRE@ucdenver.edu)

## **Faculty**

Information about faculty in this program is available online

at <https://education.ucdenver.edu/continuing-education/aspire/team>

The faculty of the Curriculum & Instruction MA works with educators to adopt a pedagogy that is holistic, experiential, relational and liberatory. Students examine the political nature of schooling and the systemic inequities (social, economic, gender, ethnocultural background, racial geography, etc.) that help create unequal education opportunities for a variety of learners. The program aims to introduce participants to an approach to teaching and learning that moves beyond transmission and mastery of content towards teaching/learning that promotes the practice of freedom, liberation, justice and community.

C&I faculty also emphasize the importance of teachers as scholars and reflective practitioners. To help you transition to this graduate student role, the program requires students to leverage the text, *They Say / I Say: The Moves That Matter in Academic Writing*, 3rd edition (authors: Graff and Birkenstein) prior to your first course in the program. The book prepares students for the program's academic writing expectations. Graff and Birkenstein use a metaphor of academic writing as a conversation. Each chapter describes relevant argumentative moves, examples, and templates to assist you in integrating the language, ideas, and arguments of others into your writing. Students will find the text to be a quick read and an invaluable resource throughout the program.

## **Program Options**

- Critical Pedagogy MA

# EARLY CHILDHOOD EDUCATION

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**E-mail:** [academicservices@ucdenver.edu](mailto:academicservices@ucdenver.edu)

**Website:** [www.ucdenver.edu/education](http://www.ucdenver.edu/education)

## **Faculty**

More information about faculty in this program is available online at <https://education.ucdenver.edu/about-us/faculty-directory/-in-category/categories/sehd/program-areas/early-childhood-education>

## Early Childhood Education Program

The Early Childhood Education (ECE) program leads to a master's degree in early childhood education and/or licensure or added endorsement in early childhood special education specialist (ECSE). The program prepares early education leaders who will enrich the life experience of young children (ages birth to 8 years) and their families through a variety of professional roles. In addition, ECE offers its courses in a variety of formats to meet your learning and personal circumstances (i.e. online, face to face and hybrid formats).

ECE Program students may select from three program options:

- Early Childhood Education MA
- Early Childhood Special Education Specialist Endorsement with or without MA
- Early Childhood Special Education Specialist Licensure with or without MA

The ECE program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. Our program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. The program draws on university resources and the clinical expertise of various professionals and early childhood partners in the community. There is a strong emphasis on fieldwork and practicum experiences in both regular and special education concentrations. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Practicum experiences are designed for students to apply knowledge and practice skills in a closely supervised environment.

The MA in ECE and ECSE focus share course content in:

- language and literacy development,
- child growth and development,
- teaching and learning approaches with young children,
- learning, development and education grounded in culture, context and identity of young children,
- research methods for education,
- early childhood curriculum and program development for culturally and linguistically diverse inclusive classrooms collaborative program development and supports for children with families and communities,
- leadership of programs and early childhood professionals for practice, advocacy and social change

The early childhood special education program provides specialized preparation in:

- screening and assessment of young children

- inclusive intervention strategies with infants, preschoolers and primary aged children
- social emotional competence and classroom support for children with severe and persistent challenging behavior
- collaborative team membership on a transdisciplinary team
- learning and development of children from diverse sociocultural backgrounds and abilities inclusive services for children diagnosed with low incidence disabilities including autism, developmental delay and chronic illness

## **Program Requirements**

Semester Hour Requirements:

MA in ECE: 30 semester hours

ECSE specialist license: 36 semester hours

MA in ECE plus ECSE specialist license: 42 semester hours

MA in ECE plus ECSE specialist added endorsement: 36 semester hours

ECSE specialist added endorsement: 24 semester hours

## **Fieldwork and Practicum Requirements**

For the MA in ECE plus the ECSE specialist initial license, a total of 650 hours of fieldwork/practica is required. Approximately 200 hours of fieldwork are associated with course assignments; 450 hours of intense, culminating practica occur toward the end of the second year of study. Students seeking an added endorsement in ECSE specialist complete 450 hours of practicum experiences.

# **LEARNING, DEVELOPMENTAL AND FAMILY SCIENCES**

## **Learning, Developmental and Family Sciences MA**

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**Fax:** 303-315-6311

**E-mail:** academicservices@ucdenver.edu

**Website:** www.ucdenver.edu/education

## **Faculty**

Faculty information is available online at <https://education.ucdenver.edu/about-us/faculty-directory>

## **Master's Degree**

The MA program in Learning, Developmental and Family Sciences (LDFS) prepares students to facilitate the teaching/learning process and to lead and work in community-based environments. Thus, many students pursue the degree to enhance their skills as professional classroom teachers or lead in the community. The degree also provides skills necessary for a variety of roles in educational and teaching settings or community environments where knowledge of learning, development, understanding family and community systems, motivation, and research is essential such as teaching at the community college and teaching-based colleges and universities levels, teaching adults, consulting, developing assessments, community-based leadership, and conducting program development and evaluation. Other students seek the MA as preparation for advanced study in educational psychology, family science and human development, research, or related fields.

### **Areas of Study**

Two major areas of concentration are available- learning and human development and family relations:

- Regardless of the concentration area selected, all students must demonstrate competence in Learning, Developmental and Family Sciences by successfully completing 30 semester hours of relevant course work;
- Students complete a capstone experience, either an applied project or a master's thesis in consultation with their faculty advisor based on the students' professional and academic goals. Please see final capstone section for more details.

### **Learning**

The concentration is committed to the systematic study of psychological, social, and cultural processes of learning and development, and design of environments that support learning and development, drawing upon multidisciplinary nature of work. The concentration examines learning in various formal and informal contexts (e.g., learning in classrooms, schools, centers, communities, homes) from multiple perspectives (e.g., psychological, sociocultural, design-based, neuroscience). Within the networks of professional and academic communities, students will engage in designing adaptive learning environments that facilitate optimal learning and developmental opportunities for participants in diverse educational and community contexts, including our unique urban context. The Learning concentration offers courses such as: Human Learning; Human Development Over the Life Span; Designing Environments for Learning and Development; Cognition and Instruction; Motivation in Contexts; Mind, Brain and Education; Advanced Child Growth and Development; and Social Contexts of Adolescence.

### **Human Development and Family Relations (HDFR)**

Students will engage in developing their skills to work in and lead community-based organizations including, but not limited to secular, faith-based, for profit, nonprofit, school-based, and local, state, federal and international organizations. The importance of family diversity and social justice is stressed throughout the HDFR curriculum through its courses and experiences. Students can also develop their knowledge in family relations in preparation for doctorate studies in family science and human development or related areas.

The LDFS program does provide a pathway for MA students (HDFR and Learning areas) to pursue their PhD in Education and Human Development with a Family Science and Human Development concentration. For more information, please visit our School of Education and Human Development.

The HDFR area also provides classes to all School of Education and Human Development (SEHD) graduate programs, offering courses in family theories, family dynamics, and diverse family systems, Latino family, school and community systems, family resource management, leadership and organizations, grant writing and fundraising, program development and other family relations based courses.

### **Final Capstone Culminating Applied Project/Thesis**

All LDFS MA students (D1–Downtown Campus) will complete a Capstone Applied Project or Thesis to be able to graduate from the LDFS MA regardless of concentration area. Students who are graduating in the Fall, Spring or Summer of their last year of studies will register for LDFS 6950 Culminating Capstone Experience. LDFS 6950 will only be offered in the Fall semester of each academic year. There will be no Spring or Summer LDFS 6950 sections offered. LDFS 6950 has two focuses, the Applied Project and the second focus the Thesis. The Applied Project is generally completed in one semester during the Fall LDFS 6950 class. However, if a student requires an additional semester that student would have to receive permission from the LDFS 6950 faculty teaching that course section during the Fall semester and their faculty advisor for the additional time. The second focus the Thesis will require 2 semesters to complete or 1 semester and a Summer Session. Please keep in mind the Thesis often requires university approval and IRB approval for Human Subjects research. Students will receive a letter grade upon completion of their Capstone. Students are expected to attend one of the required LDFS MA Capstone Orientation provide by the LDFS faculty during the Fall and Spring semester of each academic year. For more specific details concerning the Capstone please contact your faculty advisor.

# LEARNING DESIGN AND TECHNOLOGY

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**E-mail:** [academicservices@ucdenver.edu](mailto:academicservices@ucdenver.edu)

**Website:** <https://education.ucdenver.edu/>

## Faculty

Information about LDT faculty is available online at <https://education.ucdenver.edu/about-us/faculty-directory>

The Learning Design and Technology (LDT) MA program helps people use various digital and social media tools and technologies for learning, teaching, and professional leadership. Applying sound principles of learning, instructional and media design, and professional development, you will use a variety of learning strategies and technologies - such as digital and online media, digital storytelling, social media and networking, games, and smart and mobile tools - to support learning and development goals in school and workplace settings. Throughout the program, you will engage in assessment and evaluation activities to improve services, be accountable for outcomes, and develop professional identities as thought leaders in your professional communities of practice. The LDT MA program is fully online and may be completed in two years.

## Technology Expectations

The LDT MA program relies heavily on computers and related technologies for course delivery and learning activities. Students are expected to use their campus email accounts and check them frequently. Students need convenient, consistent, and reliable access to Internet-connected computers. In addition to textbooks, software purchases may be required or recommended for specific courses.

### Concentration Areas:

Learn more about our Learning Design and Technology degree and endorsement programs in:

- Learning Design and Technology: eLearning Design and Implementation MA
- Learning Design and Technology: Instructional Design and Adult Learning MA
- Learning Design and Technology: Digital Media for Teaching and Learning (K-12) MA
- Learning Design and Technology: Instructional Technology Specialist Endorsement

CU Denver also offers the #1 Teacher Librarian program in Colorado! Our Teacher Librarian Leadership program has changed dramatically in recent years to reflect changes in Learning Design and Technology. School libraries can and should be the heart of the school where students, staff, and administration look for collaborative support. Teacher librarians are now called upon to help lead technology planning, instruction, and professional development, as well as provide students resources to help them succeed in their studies.

Learn more about our Teacher Librarian degree and endorsement programs in:

- Learning Design and Technology: Teacher Library MA
- Teacher Librarian Endorsement

# SCHOOL PSYCHOLOGY

**Program Leader:** Bryn Harris, PhD

**Office:** Lawrence Street Center, 1114

**Phone:** 303-315-6315

**Email:** bryn.harris@ucdenver.edu

**Website:** <https://education.ucdenver.edu/academics/doctoral/detail/School-Psychology-PsyD>

## **Faculty**

Information about faculty in the school psychology program is available online at: <https://education.ucdenver.edu/about-us/faculty-directory/-in-category/categories/sehd/program-areas/school-psychology>

## **Degree**

The doctor of psychology (PsyD) degree in school psychology is a 100 graduate semester-hour program that leads to eligibility for licensure as a school psychologist by the Colorado Department of Education and licensure as a psychologist by the Colorado State Board of Psychologist Examiners.

The PsyD program at CU Denver is currently Accredited, on Contingency by the American Psychological Association (see the APA Accreditation website for further details). The program is also approved by the National Association of School Psychologists (NASP). The PsyD training program aligns with accreditation standards and the following domains of psychology: affective, biological, cognitive, and developmental aspects of behavior; data-based decision-making and accountability; consultation and collaboration; interventions and mental health services to develop social and life skills; school-wide practices to promote learning; preventative and responses services; family-school collaboration services; diversity in development and learning; research and program evaluation; and legal, ethical and professional practice.

Consistent with a practitioner-scholar model, the PsyD Program in School Psychology prepares professional school psychologists through rigorous academic study integrated with intensive supervised clinical practice. The program includes an emphasis on the delivery of culturally-responsive mental health services in schools, as well as the development of advanced level practice skills. The Program stresses the application of scholarly findings to practice, as well as a respect for all aspects of diversity. Graduates of this program are license eligible for independent practice in schools, hospitals, child agencies and clinics, and other settings.

## **Bilingual School Psychologist Concentration Option**

This optional specialization provides School Psychology students with the knowledge and skills to effectively serve bilingual learners in the school setting. In addition to the

three required courses and practicum component, the Bilingual School Psychologist concentration consists of language proficiency assessments to ensure that school psychologists are adequately proficient in another language to provide psychoeducational services. CU Denver provides one of the few bilingual school psychology concentration areas in the country making our graduates even more desirable in their future endeavors.

## **Admission Requirements**

Successful applicants to the school psychology (SPSY) program will have obtained a minimum 3.2 undergraduate GPA and a combined score of at least 300 on the verbal and quantitative sections of the Graduate Record Exam (GRE) and a minimum score of a 3.5 on the written portion of the GRE. Applicants will also submit a current resume or vita, a personal statement that outlines their reasons for pursuing a degree in school psychology at CU Denver, and three letters of recommendation. The highest ranked applicants will be invited to a full-day group interview that includes a program orientation, a writing assignment, and a campus tour.

- Application materials are available at: <http://www.ucdenver.edu/admissions/Pages/index.aspx>. All materials must be submitted online by December 1 for fall semester admissions. Application materials include the following:
- \$50 application fee for domestic students, \$75 application fee for international students (may be paid via credit card, e-check or by mailing in a check)
- letter of intent/personal statement
- resume or vita
- three letters of recommendation
- one official transcript from each higher education institution attended (in the original, sealed envelope)
- official GRE scores sent directly to the University of Colorado Denver. The GRE is a general scholastic aptitude test that yields separate verbal and quantitative scores. A minimum score of 300 (verbal score + quantitative score) with an approximate score of 3.5 on the written portion is required for consideration as an applicant. When taking the GRE use the code number for CU Denver, 4875, to ensure scores will be sent electronically to CU Denver. GRE scores are required for the School Psychology program unless you already hold a Doctoral Degree.

School Psychology PsyD

# **RESPONSIVE LITERACY EDUCATION**

**Office:** Lawrence Street Center, 701  
**Telephone:** 303-315-6300  
**E-mail:** academicservices@ucdenver.edu

The Responsive Literacy Education program provides educators with advanced knowledge and training to work with diverse student populations as they develop reading, writing and oral language skills. Course work includes language and literacy acquisition, culturally relevant teaching practices, literature, literacy assessment and informed instruction, hands-on practice, and other areas.

### **Faculty**

Information about faculty in this program is available online at <https://education.ucdenver.edu/about-us/faculty-directory/-in-category/categories/sehd/program-areas/literacy-education>

### **Program Options**

- Literacy Education MA
- Literacy Education MA with Reading Teacher K-12 Endorsement
- Literacy Education MA in English Education
- Reading Teacher K-12 Endorsement
- Certificates:
  - Early Literacy
  - Literacy and Language Development for Diverse Learners

The MA degree options in Literacy Education will enhance your literacy instruction skills and credentials while providing advanced knowledge and training to work with diverse student populations as they develop reading, writing, and oral language skills. The program requires access to students in order to complete the methods courses. We stress the importance of recognizing a variety of literacies - home, school, community, and mainstream - in both first and second languages, and the meaningful use of literacy and language to improve students' quality of life.

By placing emphasis on the reading, writing, oral and visual language development of culturally, linguistically and academically diverse student populations, this master's program is at the forefront of the field. Language is approached from a socio-psycholinguistic perspective that emphasizes the learner's construction of meaning rather than the learning of isolated skills. Importance is placed on using theory, inquiry and personal reflection to inform classroom practice. The program prepares teachers to become decision makers capable of developing learner-centered curricula where each student's reading and writing abilities are assessed to address developmental or special needs.

# CULTURALLY AND LINGUISTICALLY DIVERSE EDUCATION

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**E-mail:** academicservices@ucdenver.edu

The Culturally and Linguistically Diverse Education (CLDE) program helps licensed teachers enhance their skills and credentials to support diverse languages, cultures, and abilities in the classroom. Graduates are prepared to become leaders to serve multilingual learners in K-12 classrooms. This program emphasizes a socio-cultural approach to issues of language and learning, acknowledging the legitimacy of linguistic and cultural differences, and recognizing that academic settings represent important socializing forces in students' lives. We emphasize the "whole learner" in our teaching and in teacher education, understanding that individuals do not merely add a language to their repertoire of communication but make fundamental identity adjustments as they progress in their studies. Course work includes language teaching methodology, language acquisition, linguistic analysis of English, multicultural foundations, assessment, literacy, and other areas.

The MA program also provides a foundation in teaching English to multilingual learners in a variety of contexts in the United States and abroad. Teachers who work in CLDE programs or in other content areas (such as art, language arts, math, music, science, social studies or technology), and who wish to integrate CLDE principles and strategies into their instruction for their multilingual learners, will find the MA program relevant to their interests and goals.

This program has been developed as an advanced course of study for practicing teachers or individuals with some teaching experience. Applicants who are new to teaching, and who wish to teach in U.S. K-12 public school settings, should inquire about the Master of Arts in Teaching.

The program is intended for:

- graduate-level students interested in the master's degree (30 semester hours) with or without the added endorsement to a current license.
- licensed elementary and secondary teachers returning to acquire Colorado endorsement credentials (24 semester hours)
- endorsed CLDE teachers who wish to add the Culturally and Linguistically Diverse Bilingual Education endorsement

Non-degree option:

Licensed elementary and secondary teachers returning to graduate studies for a certificate to aid them in helping their English language learners succeed (TCLD: 9 semester hours)

**Program Options:**

- Master of Arts in Culturally and Linguistically Diverse Education
- Master of Arts in Culturally and Linguistically Diverse Education with K-12 Endorsement
- Culturally and Linguistically Diverse Education Endorsement: K-12
- Culturally and Linguistically Diverse Bilingual Specialist Endorsement

Non-degree option:

- Teaching for Cultural and Linguistic Diversity (TCLD) Certificate

## STEM EDUCATION

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**E-mail:** academicservices@ucdenver.edu

The STEM Education program promotes elementary and secondary mathematics and science teachers' passion, confidence, and competence in providing mathematics and science teaching-learning processes informed by insightful theories, effective learning activities, and innovative teaching strategies, as well as by international perspectives. This program focuses on the integration of theory, research, and practice to enable teachers to make instructional decisions and implement mathematics and science lessons that promote students' conceptual understandings and problem solving, including opportunities for doing research.

**Faculty**

Information about faculty in this program is available online at: <https://education.ucdenver.edu/about-us/faculty-directory/-in-category/categories/sehd/program-areas/stem-education>

**Program Options**

- STEM Education MA with a concentration in Mathematics Education: On Campus
- STEM Education MA with a concentration in Mathematics Education: Online
- STEM Education MA with a concentration in Science Education
- STEM Education MA with a concentration in Math and Science Education
- Master of Science in Education in Mathematics Education MSED
- Middle School Math Endorsement
- Graduate Certificate in Mathematical Content Knowledge for Teaching

## SPECIAL EDUCATION

**Office:** Lawrence Street Center, 701  
**Telephone:** 303-315-6300  
**E-mail:** academicservices@ucdenver.edu  
**Website:** www.ucdenver.edu/education

The Special Education (SPED) program offers three options: an MA degree, an MA degree plus Special Education Generalist Endorsement, Ages 5-21 and an endorsement only. The SPED program emphasizes the development of reflective practitioners through trans-disciplinary training, fosters reflective inquiry about teaching and learning, as well as the development of the skills, knowledge, and dispositions necessary to teach in elementary and secondary classrooms serving students with disAbilities. Reflection and inquiry provide an informed and integrated basis for advocating for all learners.

The time needed to complete the various special education program options varies based on previous experience, coursework, and needs of students. In addition to traditional on-campus offerings, a wide selection of courses are available in online formats. During the academic year, core special education courses are typically scheduled in late afternoons and evenings to avoid conflict with teaching responsibilities.

If you are **NOT** a teacher and are seeking an initial teaching license in Special Education, please see our Master of Arts in Teaching program.

If you are interested in the Early Childhood Special Education Specialist (Birth-8 years) endorsement, please see the Early Childhood Special Education Specialist Endorsement program.

**MA SPED Degree, MA Degree + SPED Endorsement, and SPED Endorsement Only**

<b>MA Degree: Personalized Professional (no license or endorsement)</b>	<b>MA Degree + Endorsement</b>	<b>Endorsement Only</b>
Special Education	MA in Special Education with Special Education Generalist (Ages 5-21) Endorsement	Special Education Generalist Endorsement Only

The Master of Arts (MA) in Special Education offers two degree paths:

1. MA in Special Education (Personalized Professional): The customizable 30 credit hour MA path provides the opportunity for you to tailor your coursework to your specific needs as an educator. Students have the flexibility to choose courses from across all SEHD programs for additional learning from the from the Thematic Course Categories list to allow for a more in-depth approach to the field. The Thematic Course Categories is a collection of courses across all SEHD disciplines designed to allow students to expand student learning. **This MA does NOT lead to a license or an endorsement.**
2. MA plus endorsement: The MA plus endorsement allows students to complete an MA, and add a SPED Generalist Ages 5-21 endorsement to their current teaching

license. Recommendation for endorsement is made by the SPED Program, but endorsement is granted by the State of Colorado. Individual State requirements vary and may include teaching experience and in addition to a valid teaching credential. Students should consult with the Colorado Department of Education or the state in which they wish to be endorsed for the most updated endorsement requirements.

# RESEARCH AND EVALUATION METHODS

**Office:** Lawrence Street Center, 701  
**Telephone:** 303-315-6300  
**Email:** [academicservices@ucdenver.edu](mailto:academicservices@ucdenver.edu)  
**Website:** <https://education.ucdenver.edu/>

The MA in Research and Evaluation Methods (REM) degree prepares students to lead in professional practice in the following responsibilities: (1) interpreting, analyzing, and applying research in educational settings; (2) applying knowledge about research methods, statistics, and measurement; and (3) applying inquiry skills and creative thought in solving practice-based problems. Graduates of the program typically work in school district research/assessment departments, state or federal government agencies, research and evaluation firms, non-profit organizations, or companies that have data/research offices.

Students acquire the skills necessary for a variety of roles in educational and teaching settings or community environments where knowledge of learning, development, assessment, and research is essential. Many of our graduates also seek this MA as preparation for advanced study in educational psychology, assessment, research methods, and related fields.

## Faculty

Focusing on applied skills and techniques, students will learn both quantitative and qualitative research methods. Through research and data analysis, students are encouraged to focus on larger issues of social injustices.

Information about faculty in this program is available [here](#).

### Program Options:

- Research and Evaluation Methods MA
- Research and Evaluation Methods MA with a concentration in Assessment

# MASTER OF ARTS IN TEACHING

1380 Lawrence Street Center, Suite 701  
**Telephone:** 303-315-6300

**Email:** academicservices@ucdenver.edu

**Website:** <https://education.ucdenver.edu/>

**Mailing Address**

School of Education & Human Development

P.O. Box 173364, Campus Box 106

Denver, CO 80217-3364

## **Graduate Teacher Education Program Overview**

The Graduate Teacher Education program culminates in a Master of Arts in Teaching and an initial teacher license. The program prepares educators who are culturally affirming and responsive, collaborate closely with families and communities, and have the knowledge and skills to create engaging, relevant, and rigorous classroom communities where all students can achieve and grow. We work alongside our P-12 partner educators throughout the CU Denver Professional Development School Network comprised of over 20 urban schools across numerous districts in the Denver metro region. Teacher education students live the life of a teacher for an entire academic year while enrolled in the program through a series of residency internships in a professional development school. Ultimately our goal is that all teacher candidates- whether their emphasis is elementary, secondary, or special education- have the unique knowledge and skills to positively impact urban and diverse schools and act with a sense of urgency to support equity in education for all children. The Graduate Teacher Education Program is a nationally accredited program that exceeds expectations.

## **Education Pathways**

The graduate teacher education program at CU Denver is designed to allow individuals with a minimum of a bachelor's degree to seek a master's degree along with an initial Colorado teacher's license in the following areas:

- **Elementary Education (K-6)** (48 semester hours)
- **Secondary Education (7-12)** (39 semester hours)
  - English
  - Mathematics
  - Science (General Science, Biology, Earth Science, Physics, Chemistry)
  - Social Studies
  - World Language (K-12) (Spanish, French)
- **Middle School Math (6-8)** (39 semester hours)
- **Special Education Generalist (Ages 5-21)** (54 semester hours)
- **Dual General Education/Special Education (63-72 semester hours)**

## **Program Structure**

The program admits teacher candidates in cohort groups that begin either in the summer or fall. The cohort model provides a unique learning community for candidates

and engenders significant support for success. The program includes full time 1 - 1.5 year licensure plans for regular education and a 1.5 - 2 year full-time option for initial special education and dual special education. Students enroll in course work at the university and clinical internships in one of CU Denver's professional development schools throughout the program. By enrolling in several courses and internships together, elementary, secondary, and special education teacher candidates are well prepared to support K-12 students with a wide range of diverse needs.

## **Clinical Experience in Professional Development Schools**

While in the program, teacher candidates intern in a professional development school for an entire academic year, gradually beginning with two days a week early on and increasing over time to five days per week by the end of the program. University courses are closely integrated with the sequence of clinical internship experiences providing teacher candidates with multiple opportunities to engage in the authentic work of teachers. Teacher candidates co-teach closely with practicing teachers in the school and gradually assume full responsibility for teaching by the end of the program. Elementary teacher candidates generally spend an entire academic year in a single partner elementary school, whereas secondary teacher candidates spend their internships in one of the partner middle schools and one of the partner high schools. Special education teacher candidates complete internships at multiple levels, P-12 due to the wide-span of their license that enables them to support students with special needs ages 5-21. The schools are located in several Denver metropolitan districts serving large populations of low-income and/or minority students, as well as a sizeable number of students for whom English is a second language as well as students with special needs. Each school is supported by a site professor from the university one day per week and by a master teacher, called a site coordinator, who supports teacher candidates through their academic year of internships.

## **Assessment**

Both the coursework and the internship experiences have been created to align with the Colorado Teacher Quality Standards, as well as frameworks for culturally and linguistically responsive instruction and Universal Design for Learning. Students in all programs engage in a common set of learning opportunities and internship assessments. They also engage in Program Level Assessments at different stages of the program. Colorado mandates that all teacher education programs be "performance-based" in order to recommend candidates completing the program for licensure; thus all candidates in the Urban Community Teacher Education program must demonstrate proficiency in both the university-based coursework and their internships.

## **Programs of Study**

Due to the complex nature of teacher preparation that is governed by state and national accreditation and legislative mandates that can change from year to year, please see current programs of study in the teacher education handbook.

## Requirements for Admission

**Admission Deadline:** February 15 for summer and April 1 for fall start dates.

### Graduate Teacher Education Admission Requirements

Competitive undergraduate cumulative GPA of 3.0 (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)

- Completion of any outstanding prerequisite content courses that are needed per a transcript evaluation. Consult with your advisor to create a plan for completing these requirements.
- A complete application which can be obtained online at <https://education.ucdenver.edu/academic-services/admissions> which includes transcripts, essays, recommendations, and an interview.
- Attend an admissions interview. All individuals who submit a COMPLETE application will receive an email with the interview invitation that contains all details approximately one week before the scheduled interview. During this group interview, prospective students participate in highly interactive group discussions and activities to further assess each applicant's readiness as well as aid in internship placement.

# COLLEGE OF ENGINEERING, DESIGN AND COMPUTING

## **Application Deadlines**

Applicants must make arrangements to ensure all their materials (including transcripts, references, and any required test scores) are received by the relevant deadlines below. Applications with outstanding materials are considered incomplete and will be canceled unless a request for deferment to a later term is requested.

### **Domestic Applicants**

#### **Bioengineering** (fall admittance only)

- MS: April 15 priority; July 15 final
- PhD: December 1

#### **Civil Engineering**

- MS/MEng/PhD: fall - May 1; spring - October 1; summer - February 15

#### **Computer Science**

- MS/CSIS PhD: fall - May 1; spring - December 1

#### **Electrical Engineering**

- MS/MEng: fall - May 15; spring - November 30

#### **Mechanical Engineering**

- MS/MEng: fall - May 1; spring - October 1

#### **Engineering and Applied Science PhD**

- fall - February 1; spring - September 1

### **International Applicants**

#### **Bioengineering** (fall admittance only)

- MS: March 15
- PhD: December 1

#### **Civil Engineering**

- MS/MEng/PhD: fall - April 15; spring - September 15; summer - February 1

#### **Computer Science**

- MS/CSIS PhD: fall - April 15; spring - September 15

#### **Electrical Engineering**

- MS/MEng: fall - May 15; spring - November 30

#### **Mechanical Engineering**

- MS/MEng: fall - April 15; spring - September 15

## Engineering and Applied Science PhD

- fall - February 1; spring - September 1

## Overview

The College of Engineering, Design and Computing at the University of Colorado Denver meets the needs of the Denver metropolitan area by providing nationally accredited engineering education programs in a flexible format that suits both students and employers. Recognizing the importance for students to pursue professional studies and related employment simultaneously, the college offers undergraduate and graduate degree programs in bioengineering, civil engineering, mechanical engineering, electrical engineering and computer science through late afternoon and evening studies or through a more traditional schedule of day classes. As a practicing engineer, you can improve and update your professional capabilities and earn a graduate degree. Or, through our interdisciplinary master of engineering degree, you can obtain graduate education in business, management, computer science, behavioral science or other areas together with new engineering skills in your field.

A listing of the fields in which engineers work would have hundreds of entries. The following list is a brief summary of the engineering fields available at CU Denver.

**Bioengineering** offers opportunities for interdisciplinary graduate training for master of science and doctor of philosophy degrees. Our programs are uniquely integrated with the CU Anschutz Medical Campus. Students enjoy opportunities to learn from clinicians and engineers and to perform research or medical device design in world-class hospitals and clinical research labs. Bioengineering is one of the fastest growing job markets this decade, according to the Bureau of Labor Statistics. A degree in this area provides numerous opportunities to work in health care, biomedical industry, government regulatory agencies and academia.

**Civil engineering** offers interesting and challenging careers in the design and construction of buildings, bridges, dams, aqueducts and other structures; in transportation systems including highways, canals, pipelines, airports, rapid transit lines, railroads and harbor facilities; in the distribution of water and the regulation of rivers; in the development of water resources for urban use, industry and land reclamation; in the control of water quality through water purification and proper waste treatment; in the construction and contracting industry; and in the problems concerned with our physical environment and the growth of cities.

**Computer science** offers graduates the solid foundation needed for jobs in computing and enabling technology encompassing many areas across diverse fields such as healthcare, business, natural & applied sciences, mathematics and visual arts. Career paths in computer science involve designing and implementing software, devising new computer applications and developing effective ways to solve computing problems.

**Electrical engineering's** graduate program prepares students for technical leadership roles in industry, academia and government in our rapidly changing technological world. The program offers numerous specialties within electrical engineering, including computer engineering, embedded systems, electromagnetics, microwave systems, optics, electrical neuroscience engineering, control systems, communications and signal

processing, power systems, smart grids, renewable energies, VLSI system design, and electron devices.

**Mechanical engineering** offers a wide range of interesting and challenging career opportunities in research, design, development, manufacturing, testing and marketing for either private industry or government. Mechanical engineers help develop a wide range of products such as engines, transmissions, compressors, pumps, oil field drilling rigs, missiles, space satellites, earth-moving equipment, container-manufacturing machines, medical equipment and many other products encountered in daily life.

## **Comcast Media and Technology Center**

**Website:** [www.comcastmediatechcenter.org](http://www.comcastmediatechcenter.org)

Established to be the premier scholarly hub for design innovation research and practice, the Comcast Media and Technology Center uses an interdisciplinary methodology and combines academic theories with practical applications in a technologically advanced setting. This unique approach is then applied to relevant societal challenges to produce imaginative solutions in engineering and design.

Born from the powerful partnership that exists in Denver within the public and private sectors, and made possible by generous contributions from the Comcast Corporation, the Comcast Media and Technology Center is a state-of-the-art, 1,900 sqft innovation suite located within the Tivoli Student Union in the heart of CU Denver's Auraria Campus. It serves as a catalyst for innovation for the College of Engineering, Design and Computing and the College of Arts & Media, as an exciting example of the experiential learning that can happen for students in an encouraging interdisciplinary environment.

Projects overseen by center staff are assessed with-in a research-based theoretical framework in a forum where creative ideation is encouraged. Team members are chosen because of their diverse academic backgrounds to work in intentionally arranged interdisciplinary groups to complete assignments, where they are encouraged to utilize their unique skill sets, and scholarly experiences to problem solve and create solutions. Specific projects can vary from design work (digital or practical), research, ideation, production, fabrication, prototyping, testing, data collection, systems design, process modeling, focused research/analysis or application, simulation, 4D/3D printing, data visualization, industry/market studies, and reporting creating an opportunity to learn and grow new skillsets.

## **Graduate Study in Engineering**

The College of Engineering, Design and Computing offers graduate programs in bioengineering, civil engineering, computer science and engineering, electrical engineering and mechanical engineering, as well as an interdisciplinary doctoral degree in engineering and applied science.

For information regarding courses and requirements leading to the master of science, master of engineering or the PhD degree, see the appropriate discipline heading in this

section. For general graduate admission information and policies, see the Information for Graduate Students section of this catalog.

## **TOEFL/Language Requirements**

For the most up-to-date information about TOEFL/language requirements, please visit the Office of International Admissions website.

## **Education for Employed Professional Engineers**

Continuing education for employed engineers grows more important each year. Therefore, the college puts great emphasis upon making graduate courses available through late afternoon and evening courses. The master of engineering degree permits graduate students more flexibility in defining specialized interdisciplinary fields that meet their professional needs. This degree has standards equivalent to those of the master of science degree.

## **Nondegree Students**

Nondegree graduate students may apply 9 semester hours of graduate-level course work toward a master's degree in engineering from CU Denver.

## **Programs of Study**

Courses listed in the following curricula are typical illustrations. Changes in specific courses may be necessary to accommodate students' needs and/or changes in institution requirements; students should take courses in logical sequence.

Specialties: Soft tissue mechanics, vascular and cardiac imaging diagnostics, translational biomechanics

Steven Lammers, PhD

Instructor

steven.lammers@cuanschutz.edu

Specialties: 3D printing & design, bioprintable materials, tissue engineering of 3D cellularized scaffolds

Craig Lanning, MS

Research Instructor

craig.lanning@cuanschutz.edu

Specialties: Digital manufacturing, reverse engineering, medical device and software design

Chelsea Magin, PhD

Assistant Professor

chelsea.magin@cuanschutz.edu

Specialties: Bio-inspired materials for tissue engineering, R & D product development

Keith Neeves, PhD

Professor

keith.neeves@cuanschutz.edu

Specialties: Hematology and oncology

Daewon Park, PhD

Associate Professor

daewon.park@cuanschutz.edu

Specialties: Biomaterials, drug delivery, tissue engineering and regenerative medicine

Bradford Smith, PhD

Assistant Professor

bradford.smith@cuanschutz.edu

Specialties: Lung structure-function relationships, optimized mechanical ventilation, and high performance computing

Jennifer Wagner

Instructor

jennifer.wagner@cuanschutz.edu

Specialties: Medical imaging, 3D modeling, surgical guides/tools, tissue engineering, and material characterization

Richard Weir, PhD

Research Associate Professor

richard.weir@cuanschutz.edu

Specialties: Neural engineering, biomechatronic design, and rehabilitation engineering

Michael Yeager  
Associate Clinical Professor  
michael.yeager@cuanschutz.edu

Specialties: Cardiopulmonary disease, autoimmunity, in vivo cell lineage tracing & imaging

Bryan Yunker, PhD  
Research Instructor  
bryan.yunker@cuanschutz.edu

Specialties: Product design & development, product marketing, intellectual property, reconstructing physical anatomy in virtual reality

### **Affiliated Faculty**

Students receive instruction from affiliate faculty in the University of Colorado system, including CU Boulder and the CU School of Medicine. Faculty research areas include imaging and biophotonics, cardiovascular biomechanics and hemodynamics, orthopedic biomechanics, neuromuscular control and assistive technology, surgery and urological sciences, ophthalmology, neuroscience engineering, polymers and diabetes. Please consult our website ([ucdenver.edu/bioengineering](http://ucdenver.edu/bioengineering)) for more information.

## **Mission Statement**

The Department of Bioengineering bridges the fields of engineering and medicine with a core mission of applying engineering principles and analyses to improving human health. The department will fulfill this mission by providing opportunities for training, research, and service in bioengineering to faculty, students, and residents of Colorado and the greater Rocky Mountain region.

## **Program Objectives**

The Department of Bioengineering offers high-quality training in bioengineering that is both flexible and multidisciplinary. A design-based focus permeates every aspect of our training philosophy which can be summarized by the following question: what does the user want and how can I best utilize my bioengineering training to achieve this need? Our academic instruction focuses on developing core competencies in life sciences, quantitative methods, technology, and research methods.

## **Graduate Program**

All graduate students begin the program with intensive study of the bioengineering core. In consultation with an advisor, each student chooses elective courses, training pathways, and research to fit talents, preparation, and career plans. Students earn the MS, MS-MBA, MD-MS, MD/PhD, or PhD degree in bioengineering with a choice of training pathways in basic research, clinical applications, or commercialization of

medical technologies. Graduate School Rules apply to all programs. Please consult our website ([ucdenver.edu/bioengineering](http://ucdenver.edu/bioengineering)) for more information on admissions requirements, degree requirements, core courses, training pathways and faculty research areas.

## Faculty

### Professors:

Nien-Yin Chang, PhD, Ohio State University, PE-Ohio and Colorado

James C.-Y. Guo, PhD, University of Illinois at Urbana-Champaign, PE-Colorado

Bruce N. Janson, PhD, University of Illinois at Urbana-Champaign

Yail Jimmy Kim, PhD, Queen's University, PE-Canada

Kevin L. Rens, PhD, Iowa State University, PE-Colorado

Jonathan T.H. Wu, PhD, Purdue University

### Associate Professors:

Caroline Clevenger, PhD, Stanford University, PE, RA-Colorado

Arunprakash Karunanithi, PhD, University of Connecticut

Chengyu Li, PhD, Arizona State University; PE-Colorado, North Carolina, New Mexico,

Washington; SE-Utah, Arizona, Washington

Wesley Marshall, PhD, University of Connecticut, PE-Connecticut

David C. Mays, PhD, University of California at Berkeley, PE-Colorado, California

### Assistant Professors:

Moatassem Abdallah, PhD, University of Illinois at Urbana-Champaign

Heidi Brothers, PhD, University of Cincinnati

Allison Goodwell, PhD, University of Illinois at Urbana-Champaign

Frederick R. Rutz, PhD, University of Colorado, PE-Colorado

**Professors Emeriti:**

Paul E. Bartlett, MS, University of Colorado, PE-Colorado  
David W. Hubly, PhD, Iowa State University, PE-Colorado  
Lynn E. Johnson, PhD, Cornell University, PE-Connecticut  
Oren G. Strom, PhD, University of Texas at Austin

## Mission Statement

The mission of the Department of Civil Engineering:

- deliver high-quality comprehensive degree programs (BS, MS, MEng, PhD, EAS PhD) to all of our students at both the undergraduate and graduate levels
- matriculate students who excel in professional practice and leadership and who possess compassion and respect for people of all cultural backgrounds
- teach our classes with excellence, whether in a traditional classroom setting or online
- offer our students state-of-the-art laboratories, equipment and classrooms with the latest technology needed for a complete learning experience
- develop ambitious and innovative research programs involving both faculty and students through funding from federal, state and local sources
- provide supportive mentoring and guidance to our students through teaching, research and advising
- produce students who can work as leading professionals in civil engineering and in many other fields for which civil engineering knowledge can be a foundation

## Graduate Program

### Requirements for Admission

Applicants to the master of science in civil engineering (MS) program must satisfy all requirements specified in the Information for Graduate Students chapter of this catalog. Most applicants have an ABET accredited undergraduate degree in civil engineering. An undergraduate GPA of 3.0 (on a 4-point scale) or better is required for regular admission. Applicants must submit evidence of adequate preparation for graduate study by either (a) submitting official GRE scores, or (b) documenting an earned bachelor's degree with a GPA of 3.00 or higher from an institution accredited by a U.S. accreditation body, or an earned master's degree with a GPA of 3.50 or higher from an institution accredited by a U.S. accreditation body. Applicants whose undergraduate degree is in a field other than civil engineering may also be admitted into the MS in civil engineering degree program, if they have or will complete undergraduate prerequisite courses as required by the Department of Civil Engineering and the student's graduate advisor.

Applicants to the master of engineering (MEng) program must have a baccalaureate degree in engineering, math, science, economics or planning from an accredited college or university and satisfy all requirements specified by the Graduate School.

Prospective PhD students should contact the Department of Civil Engineering to inquire about application requirements and to obtain the “Rules and Policies for the Coordinated PhD Program,” a coordinated program with the University of Colorado Boulder.

In addition to the coordinated Civil Engineering PhD, the multidisciplinary engineering and applied science PhD is available through the Department of Civil Engineering.

Requests for applications for graduate study in civil engineering should be addressed to CU Denver Department of Civil Engineering, Campus Box 113, P.O. Box 173364, Denver, CO 80217-3364.

Applicants who are not citizens or permanent residents of the United States should apply through the Office of International Admissions, Campus Box 185, P.O. Box 173364, Denver, CO 80217-3364. All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials.

# COMPUTER SCIENCE AND ENGINEERING

**Chair:** Gita Alaghband

**Program Manager:** Christina Ridd

**Administrative Assistant:** Megan Rogers

**Office:** Lawrence Street Center, 8th Floor

**Telephone:** 303-315-1408

**Fax:** 303-315-1410

**Website:** [engineering.ucdenver.edu/cse](http://engineering.ucdenver.edu/cse)

## Faculty

### Professors

Gita Alaghband, PhD, University of Colorado

Research areas: parallel and distributed systems, parallel algorithms, applications and languages, high-performance computing

Tom Altman, PhD, University of Pittsburgh

Research areas: algorithms, optimization, theory

Min-Hyung Choi, PhD, University of Iowa

Research areas: computer graphics, animation, virtual reality, human computer interface

### **Associate Professors**

Ellen Gethner, PhD, University of British Columbia; PhD, Ohio State University  
Research areas: graph theory, number theory, combinatorics, discrete geometry, computational geometry, visualization, algorithms

Ilkyeun Ra, PhD, Syracuse University

Research areas: computer networks, cloud computing, high-performance computing, distributed computing systems

### **Assistant Professors**

Farnoush Banaei-Kashani, PhD, University of Southern California

Research areas: big data, data science, data management and mining, database systems, applied machine learning, computational biomedicine and biology

Ashis Biswas, PhD, University of Texas at Arlington

Research areas: machine learning, data mining, big data analysis, bioinformatics

Liang He, PhD, Nankai University

Research areas: cyber-physical systems, cognitive battery management, IoTs, mobile computing

Haadi Jafarian, PhD, University of North Carolina Charlotte

Research areas: proactive security for cyber threats, big data analytics for cyber threat intelligence, security for cyber-physical systems & critical infrastructures, security for IoTs, security analytics & automation, science of security

### **Assistant Professors (Clinical Teaching Track)**

Madhuri Debnath, PhD, University of Texas at Arlington

Research areas: data mining, spatio-temporal data analysis, data science, machine learning

Salim Lakhani, PhD, Purdue University

Research areas: cloud computing and security, distributed computing & database systems

### **Senior Instructor (Clinical Teaching Track)**

Diane Yoha, MS, University of Colorado Denver

Research areas: artificial intelligence, linguistic geometry, natural language processing

### **Professor Emeriti**

Boris Stilman, PhD, National Research Institute for Electrical Engineering, Moscow, Russia

## **Mission Statement**

With the advances in technology and the rapid and prevalent growth of the information-based economy, computer science has become an enabling science for nearly all disciplines that impact engineering, science, business, health and government. The future of the discipline promises even more innovative advances. The Department of Computer Science and Engineering at the University of Colorado Denver is committed

to providing outstanding education and research training to our diverse undergraduate and graduate students for productive careers in industry, academia and government in the Denver metropolitan area, state and beyond. Our faculty strives for excellence in teaching, research and service by covering a broad spectrum of the discipline's core fundamentals, as well as applied aspects including those of interdisciplinary nature. We actively engage our students in classroom and out-of-classroom research and help them develop the skills needed to solve complex real-world technological problems of modern society.

The Department of Computer Science and Engineering offers MS and PhD degrees:

- The MS degree is awarded in computer science (CS) to those students who wish to pursue graduate studies to further develop their education. The MS in CS graduate program covers the core knowledge of key concepts of computer science as well as offers flexibility to pursue specializing in various fields of interests.
- A **track in Data Science in Biomedicine** is offered as a MS thesis option. Students who choose this track will adopt biomedical applications of data science to learn data science methodologies and technologies.
- The graduate certificate in software engineering is designed for working professionals, or computer science students beginning their careers, who are in the field of software engineering and/or software development.
- The graduate certificate in cybersecurity & defense is designed for working professionals in the field of computer science, network and/or security operations. The certificate program in Cyber Security and Defense will prepare Computer Science professionals to identify, analyze, and mitigate technical cybersecurity related vulnerabilities, exploits and attacks against network and critical cyber infrastructure.
- The Computer Science and Information Systems PhD is awarded from the College of Engineering, Design and Computing. The CSIS PhD program is an interdisciplinary, joint program between the Department of Computer Science and Engineering and the Information Systems program in the Business School.
- The multidisciplinary engineering, design and computing PhD degree is available through the Department of Computer Science and Engineering.

Most up-to-date information on all programs offered through the Computer Science and Engineering Department can be obtained from the department's website at: [engineering.ucdenver.edu/cse](http://engineering.ucdenver.edu/cse).

## Graduate Programs

The Department of Computer Science and Engineering (CSE) offers a master of science in computer science. The CSE department also offers a doctoral degree in computer science and information systems. In addition, the engineering and applied science doctor of philosophy degree is available through the CSE department.

Expertise expand several areas of research including algorithms, artificial intelligence, big data management & mining, cloud computing, computer architectures, computer graphics, computer networks, computer security, cyber-physical systems, cyber security

& defense, data science, database systems, distributed computing, graph theory, high-performance computing, Internet, machine learning, mobile computing, operating systems, parallel and distributed systems, software engineering and virtual reality.

Requests for applications for graduate study in computer science and engineering should be addressed to:

Graduate School  
Campus Box 163  
P.O. Box 173364  
Denver, CO 80217-3364

COURIER ADDRESS (UPS, FEDEX, etc.):  
Graduate School  
1380 Lawrence Street, Suite 1251  
Denver, CO 80204

Contact Email: [CEASGApplications@ucdenver.edu](mailto:CEASGApplications@ucdenver.edu)  
Phone: 303-315-2179

All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials.

## **Master of Science (MS) in Computer Science**

### **Admission Requirements**

Applicants should hold a bachelor's degree from an institution comparable to the University of Colorado. They need to have sufficient programming experience and mathematical maturity to understand advanced courses. Qualified applicants holding a degree outside computer science or equivalent fields may need to take additional foundational undergraduate courses before starting the graduate program.

Admission decisions are based on prior academic performance, letters of recommendation, English proficiency, if applicable, as well as the applicant's written statement of purpose.

Additional requirements include:

- (1) 10 credit hours, on the semester basis, of university-level calculus
- (2) at least one math course beyond calculus, such as advanced calculus, differential equations, linear algebra, probability, statistics or combinatorial analysis.

Students lacking some of these requirements, whose background is otherwise satisfactory, may be admitted with the understanding that the certain undergraduate courses have to be completed after admission. Additional information regarding the admissions process may be found at [engineering.ucdenver.edu/cse](http://engineering.ucdenver.edu/cse).

### **Required GPA**

Regular admission: Applicants should have an undergraduate GPA of at least 3.0.

### **Transfer Credit**

A maximum of 9 semester hours of graduate course work may be transferred into the program based on department approval. In principle, core courses must be taken from the CSE department at CU Denver.

Note: Candidates applying for MS study will be individually evaluated by the department's graduate committee. A letter with a decision will be sent to the applicant by the graduate committee chair.

## **Computer Science and Information Systems (CSIS) PhD**

### **Admission**

The Computer Science and Information Systems PhD Computer Science track is awarded from the College of Engineering, Design and Computing. Students interested in the information systems track are referred to CU Denver Business School CSIS PhD program. The CSIS PhD degree is an interdisciplinary program designed to provide an infrastructure for a wide spectrum of research possibilities in the computer science and information systems field by emphasizing the scientific, algorithmic, system design and computing aspects of the field.

Admission criteria include GPA (undergraduate and graduate), standardized test scores (GRE), letters of recommendation, prior achievements in academia and industry and an application portfolio essay describing an applicant's motivation and an initial plan for doctoral study. The application portfolio is important to gauge an applicant's motivation for research training.

Exceptionally motivated students with BS degrees in computer science, information systems, or closely related fields may apply to the CSIS PhD program directly. Students without a master's degree must complete at least 30 hours of CSIS PhD required course work in addition to the 30 hours of dissertation.

### **Supervision of the PhD Program**

The PhD program is supervised by the two program co-directors. The duties of the co-directors include scheduling of doctoral courses, setting program policies subject to approval of business and CSE faculty, working with advisors to ensure compliance with the program guidelines, resolving disputes, measuring performance of the program over time and providing the final decision on admittance of students.

### **Advisor**

Upon entering the program, each chooses an advisor to provide mentoring and guidance throughout the program and work with the student to prepare a program of study. Requests to change advisors must be approved by the program co-directors, and this happens in very rare circumstances.

### **Program Requirements and Milestones**

For details about program requirements in the computer science track, see the CSIS PhD Handbook.

## **Engineering, Design and Computing PhD**

Graduate School Policies and Procedures apply to this program

The multidisciplinary Engineering and Applied Science Doctor of Philosophy degree program is offered by the College of Engineering, Design and Computing and consists of a primary and secondary concentration. Applicants apply and enter the program through one of four departments, called the host department, which is chosen based on the applicant's intended primary concentration of study. The four departments that serve as host departments are:

- Civil Engineering
- Computer Science and Engineering
- Electrical Engineering
- Mechanical Engineering

Each host department offers several concentrations. A list of concentrations can be found on each department's website. Go to [engineering.ucdenver.edu](http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering. The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

## **Requirements for Admission**

Requirements for admission to the Engineering and Applied Science PhD program can be found under the Degree Programs link on each host department's website.

- Civil Engineering ([engineering.ucdenver.edu/civil](http://engineering.ucdenver.edu/civil))
- Computer Science and Engineering ([engineering.ucdenver.edu/cse](http://engineering.ucdenver.edu/cse))
- Electrical Engineering ([engineering.ucdenver.edu/electrical](http://engineering.ucdenver.edu/electrical))
- Mechanical Engineering ([engineering.ucdenver.edu/mechanical](http://engineering.ucdenver.edu/mechanical))

## **Degree Requirements**

The minimum degree requirements consist of 30 semester hours of course work in the primary and secondary areas of concentration, as well as 30 semester hours of research/dissertation credit. Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination. Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the

program. Each student must also satisfy the degree requirements of the CU Denver Graduate School.

### **Program Requirements and Milestones**

For details about program requirements in the computer science track, see the CSIS PhD Handbook.

# **ELECTRICAL ENGINEERING**

**Chair:** Stephen D. Gedney

**Program Manager:** Annie Bennett

**Administrative Assistant:** Karla Flores

**Office:** North Classroom, 2615

**Telephone:** 303-315-7520

**Website:** [engineering.ucdenver.edu/electrical](http://engineering.ucdenver.edu/electrical)

## **Faculty**

### **Professors**

Hamid Fardi, PhD, University of Colorado Boulder

Stephen Gedney, PhD, University of Illinois at Urbana-Champaign

Mark Golkowski, PhD, Stanford University

Miloje Radenkovic, PhD, University of Belgrade, Yugoslavia

### **Associate Professor**

Dan Connors, PhD, University of Illinois Urbana-Champaign

Tim Chifong Lei, PhD, University of Michigan

Fernando Mancilla-David, PhD, University of Wisconsin at Madison

Jaedo Park, PhD, The Pennsylvania State University

### **Assistant Professors**

Satadru Dey, PhD, Clemson University

Vijay Harid, PhD, Stanford University

Chao Liu, PhD, Purdue University

Alireza Vahid, PhD, Cornell University

## **Electrical Engineering Programs**

Modern electrical engineering is a very broad and diverse field. Never before has there been such a challenge and opportunity for electrical engineering to serve mankind.

Today's electrical engineers are involved in the development of technology, materials and products to improve the quality of life. They are concerned with the generation and transmission of power, the control and utilization of natural and synthetic resources, the communication of data and information and the intelligent use of computers in consumer as well as industrial products and processes. Systems in electrical

engineering range in size from microprocessors through megawatt energy conversion systems to global audio and video communication networks.

## **Mission Statement**

We provide graduate programs and an ABET-accredited undergraduate program that are accessible to a diverse group of students—students of different racial and cultural backgrounds, full-time students as well as those who have considerable work and family commitments outside their academic learning and students with a wide variety of work experiences.

## **Graduate Program**

The Department of Electrical Engineering offers graduate programs with the following areas of emphasis: communications and signal processing; controls and signal processing; microelectronics and VLSI; fields, waves and optics; computer engineering and embedded systems design; and energy and power systems. The department offers graduate programs leading to the degrees of master of science in electrical engineering and master of engineering. In addition, the multidisciplinary engineering and applied science doctor of philosophy degree is available through the Department of Electrical Engineering.

## **Requirements for Admission**

Additional admissions information, including links to the online application, is available on the college website.

The minimum requirements for “regular” admission to the master’s program are: BS in electrical engineering, or equivalent degree in math, physics or other engineering disciplines, from a reputable institution, with a GPA of at least 3.0, on a 4.0 scale. Satisfaction of minimum requirements does not guarantee admission: The grades obtained in the student’s area of concentration are important factors in the consideration, and so are possible multiple repetitions of fundamental courses. Students who do not meet the requirements for direct admission to the program may be admitted “conditionally”: that is, they may be required to take or repeat certain undergraduate courses before their admission to the program is official.

For those undergraduate students with degrees in science and non-electrical engineering wishing to pursue graduate study in the electrical engineering department, there is no restriction or constraint in being admitted into the master of science in electrical engineering graduate program. However, they must fulfill any prerequisite course requirements assigned to any graduate course in the department. Students with an undergraduate degree in areas other than electrical engineering must receive approval from their graduate advisor before registering for a class in electrical engineering. All students must plan a program of study in consultation with their departmental advisor(s), during the first semester of study, and submit for approval to the department.

Applicants must submit evidence of adequate preparation for graduate study by either (a) submitting official GRE scores, or (b) documenting an earned bachelor's degree with a GPA of 3.00 or higher from an institution accredited by a U.S. accreditation body, or an earned master's degree with a GPA of 3.50 or higher from an institution accredited by a U.S. accreditation body.

All applications must be submitted online. Send all supporting application materials to the Graduate School at the following address:

**MAILING ADDRESS:**

Graduate School  
Campus Box 163  
P.O. Box 173364  
Denver, CO 80217-3364

**COURIER ADDRESS (UPS, FEDEX, etc.):**

Graduate School  
1380 Lawrence Street, Suite 1251  
Denver, CO 80204

For admissions questions, contact [graduateadmissions@ucdenver.edu](mailto:graduateadmissions@ucdenver.edu) or 303-315-2179.

## **International Applicants**

More information for international applicants is available through the Office of International Admissions.

# **MECHANICAL ENGINEERING**

**Chair:** Samuel W. J. Welch

**Office:** North Classroom 2024

**Telephone:** 303-315-7500

**Fax:** 303-315-7501

**Website:** [ucdenver.edu/mechanical](http://ucdenver.edu/mechanical)

## **Faculty**

**Professor:**

Peter E. Jenkins, PhD, Purdue, MBA, Pepperdine, PE-Texas

**Associate Professors:**

R. Dana Carpenter, PhD, Stanford University

Kannan N. Premnath, PhD, Purdue University

Ronald A. L. Rorrer, PhD, Virginia Polytechnic Institute and State University, PE-Colorado

Mohsen Tadi, PhD, Virginia Polytechnic Institute and State University  
Samuel W. J. Welch, PhD, University of Colorado Boulder  
Christopher M. Yakacki, PhD, University of Colorado Boulder

**Assistant Professors:**

Kai Yu, PhD Georgia Tech

**Assistant Professor (Clinical Teaching Track):**

Maryam Darbeheshti, PhD, University of Denver

**Senior Instructor:**

Joseph F. Cullen Jr., MS, University of Colorado

**Professor Emeritus:**

James Gerdeen, PhD, Stanford University

J. Kenneth Ortega, PhD, University of Colorado Boulder

**Associate Professor Emeritus:**

B. Thomas Arnberg, MS, University of Colorado

## **Mission Statement**

The mission of the Department of Mechanical Engineering is to contribute to the economic development of the state of Colorado and the Denver metropolitan area by providing high-quality bachelor's, master's (BS, MS and MEng) and PhD programs in mechanical engineering for a diverse group of working students.

## **Program Objectives**

The programs offered by the Department of Mechanical Engineering of the University of Colorado Denver can be completed in the afternoon and evening hours to accommodate both working and traditional students. The department seeks to graduate a diverse population of students with bachelor's and master's degrees, who within a few years of graduation are able to:

- be employed by a diverse group of industries, research laboratories and educational institutions
- pursue careers in engineering, interdisciplinary areas, research and education
- pursue postgraduate education and advanced degrees

## **Graduate**

The Department of Mechanical Engineering offers graduate courses, a master of science (MS) degree program and a master of engineering (MEng) program. In addition, the multidisciplinary engineering and applied science doctor of philosophy degree is available through the Department of Mechanical Engineering. The areas of research interest in which a student may undertake studies at the Denver campus include

manufacturing processes, fluid mechanics, solid mechanics, bioengineering, energy thermodynamics and composite materials.

As a student in the MS or MEng program, you must meet with your graduate advisor before or during your first semester and design a sequence of elective courses that form a coherent program plan.

All applicants should apply online at: [www.ucdenver.edu/academics/colleges/Graduate-School/prospective/Pages/apply.aspx](http://www.ucdenver.edu/academics/colleges/Graduate-School/prospective/Pages/apply.aspx)

Inquiries about graduate study in mechanical engineering should be addressed to:

CU Denver Department of Mechanical Engineering  
Campus Box 112  
P.O. Box 173364  
Denver, CO 80217-3364

Applicants who are not citizens or permanent residents of the United States should make application through the Office of International Admissions, Campus Box 185, P.O. Box 173364, Denver, CO 80217- 3364. (See the International Students section of the catalog.) All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials.

## **Concurrent Bachelor's/Master's Degrees**

Students wishing to obtain a BS degree with a major in mechanical engineering and either the MS or the MEng degree in mechanical engineering may do so with up to 6 semester hours of 5000-level or above courses applying to both degrees. The 5000-level courses must meet the degree requirements for the graduate degree sought and must be suitable technical electives for the undergraduate degree. This option is open only for students seeking both degrees at CU Denver. Students must meet admission requirements to be accepted into the graduate program. Completion of two 5000-level courses does not guarantee admission into the graduate program. Please see an advisor for restrictions and guidelines.

## **Engineering and Applied Science PhD Program**

The engineering and applied science doctor of philosophy program consists of studies in engineering and engineering-related disciplines. It is a multidisciplinary program in keeping with the interdisciplinary nature of modern research. The degree is conferred by the College of Engineering, Design and Computing. However, applicants to the degree program apply to and enter the program through one of four departments, called the host department, of the college. The applicant chooses his/her host department based on his/her intended primary concentration of study. The four departments of the college that serve as host departments are Civil Engineering, Computer Science and Engineering, Electrical Engineering and Mechanical Engineering. Each host department offers several concentrations. The secondary concentration can be chosen from any

remaining department of the college, including Bioengineering. The secondary concentration may also be chosen from another college/school at CU Denver. The course work in the primary and secondary areas must consist of ten courses (30 semester hours). In addition to other courses, a student must take at least five courses in his/her primary area of concentration and at least three courses in a secondary area of concentration. Other courses may be recommended by the student's advisor. Research that spans across two or more of the five college departments is strongly encouraged and is a major strength of the program.

# COLLEGE OF LIBERAL ARTS AND SCIENCES

## **CLAS Dean's Office**

North Classroom, Suite 5014  
Phone: 303-315-7000  
Fax: 303-315-7016

**Pamela Jansma**, Dean, Professor of Geography and Environmental Sciences

**Richard Allen**, Associate Dean for Teaching, Learning and Curriculum; Professor of Psychology

**Laura Argys**, Associate Dean for Research and Creative Activities; Professor of Economics

**David P. Tracer**, Associate Dean for Student Success; Professor of Health & Behavioral Sciences

**Marjorie Levine-Clark**, Associate Dean for Diversity, Outreach and Initiatives; Professor of History

**Kathleen, Bollard**, Associate Dean for Faculty and Staff Affairs; Professor of Spanish

## **Academic Advice and Information**

The College of Liberal Arts and Sciences partners with the Graduate School to assist with the administration of our graduate degrees. Graduate students in the college are expected to assume responsibility for planning their academic programs in accordance with Graduate School Rules, CLAS policies and degree program requirements. Graduate students must work with the Student Progress Coordinator in the Graduate School in addition to their faculty advisor upon matriculation into the college. The Student Progress Coordinator in the Graduate School is responsible for advising graduate students of University and Graduate School policies and procedures and for certifying that degree requirements have been met for graduation purposes.

Graduate students should meet with a faculty advisor in their department as soon as they begin their degree program. The faculty advisor is responsible for advising students about coursework and degree requirements and for certifying that program requirements are complete at graduation. Students should consult with their faculty advisor at least once a semester following admission to the program. While students are strongly encouraged to meet with their faculty advisor every semester, they *must* meet with their faculty advisor at the beginning of their last semester to verify that all degree requirements have been met and to have their candidacy form approved and signed. This must be done before the campus census date and is considered an absolute deadline.

To learn more about admissions, transfer credits, readmission, changing degree programs, graduate courses, GPA requirements, residency requirements, academic probation, incomplete grades, thesis/project/dissertation procedures and defense, research protocol, comprehensive exams, application to graduate and candidacy to graduate, deadlines and time limits, please consult with your faculty advisor and refer to the Graduate School Rules.

**Graduate School Dean's Office**

Lawrence Street Center, Suite 1251

Phone: 303-315-2183

Email: [graduate.school@ucdenver.edu](mailto:graduate.school@ucdenver.edu)

**David Engelke**, Graduate School Dean

**Inge Wefes**, Graduate School Associate Dean

**Stephanie Puello**, Graduate School Student Progress Coordinator

**Kelly Santa-Maria**, Director of Graduate Admissions

The mission of the College of Liberal Arts and Sciences is to foster academic excellence, to create and impart knowledge critical to a modern society and a global economy, and to ensure the acquisition of skills essential for professional careers and graduate study. Our vision is to enact a new paradigm for a liberal arts education that retains the proven values of a broad education while imparting research and career-oriented skills throughout the curriculum.

The College of Liberal Arts and Sciences (CLAS) offers a variety of excellent graduate programs, ranging from the highly specialized PhD in Clinical Health Psychology to the broad interdisciplinary MA in Humanities or Social Sciences. CLAS faculty members are recognized as research leaders, dedicated mentors, and engaged scholars. Bringing real-world experience and academic expertise to our classrooms, CLAS faculty are dedicated to instilling in students a lifelong love of learning and inquiry, cutting-edge research training, respect for free thinking and commitment to collaborative endeavors. Our graduate programs draw on our downtown location and make use of the city's many resources partnerships with Denver businesses and non-profit organizations. CLAS students have excellent opportunities to participate in first-class research in collaboration with faculty and the community.

## College of Liberal Arts and Sciences Educational Goals

CLAS defines liberal education as including four major components:

1. Central elements of knowledge including:
  - a. knowledge of the diversity and significant dimensions of human culture and a specific understanding of American culture, including its political and ethnic diversity;
  - b. aesthetic awareness and appreciation of the cultural contributions made to the human experience by the social sciences and humanities;
  - c. an understanding of the methods of inquiry and development of theory that form the basis of knowledge in the natural and physical sciences;
2. Essential skills for critical analysis, writing, computation, communication and decision making;
3. The development of a constructive orientation toward society through the enhancement of the individual's capacity to make informed and responsible choices based on reflective consideration of the democratic principles of due process, civil liberties and the balance between individualism and the common good;
4. The ability to apply knowledge of the arts and sciences to society's specific needs.

## Graduate Programs

Graduate degree programs offered by CLAS are listed below. Many degrees provide the opportunity for students to specialize in concentrations within the discipline; these are noted below the degree title.

### ***Master of Arts (MA)***

Anthropology

*Concentrations:* archaeological studies; biological anthropology; medical anthropology

Applied Geography and Geospatial Science

Communication

Economics

English

History

*Concentrations:* European history; global history; public history; United States history

Political Science

*Concentrations:* politics and public policy, off-campus New Directions

Sociology

Spanish

### ***Master of Humanities (MH)***

*Concentrations:* philosophy and theory; visual studies

***Master of Integrated Sciences (MIS)***

***Master of Science (MS)***

Applied Mathematics

Biology

Chemistry

*Concentrations:* biochemistry, synthesis and measurement, molecular modeling, traditional chemistry

Environmental Sciences

*Concentrations:* air quality; ecosystems; environmental health; environmental science education; geospatial analysis; hazardous waste; water quality

Health Economics

Statistics

***Master of Social Science (MSS)***

*Concentrations:* community health science; international studies; society and environment; social justice; women's and gender studies

***Doctor of Philosophy(PhD)***

Applied Mathematics

Clinical Health Psychology

Health and Behavioral Sciences

Health Economics

Integrative and Systems Biology

**Certificate Programs**

The college offers graduate certificate programs that demonstrate proficiency in a specialized field of study. Certificates may cross traditional disciplinary boundaries and may be awarded independently of formal graduation.

Certificate programs are open to degree-seeking students as well as those who aren't seeking a degree but want to enhance their professional expertise.

***Graduate Certificates***

Applied Econometrics and Data Analytics (Economics)

Applied Statistics (Mathematical and Statistical Sciences)

Digital Studies (Interdisciplinary)  
Environmental Science Education (Geography/Environmental Sciences)  
Free and Open Source Software for Geospatial Applications  
(Geography/Environmental Sciences)  
Geographic Information Science (Geography/Environmental Sciences)  
Global History (History)  
Health Economics and Outcomes Research (Economics)  
Historic Preservation (History)  
Labor Leadership (Political Science)  
Public, Nonprofit and Community Leadership (Political Science)  
Scientific Foundations of Technical Innovation (Physics)  
Strategic Communication (Communication)  
Sustainable Urban Agriculture (Geography/ Environmental Sciences)  
Teaching College-level Language and Literacy (English)  
Teaching College-level Literature and Film (English)  
Teaching English Language Learners (English)  
Women's and Gender Studies (Interdisciplinary)

## **Continuing and Professional Education (CPE)**

The College of Liberal Arts and Sciences (CLAS) participates in the University's Continuing and Professional Education (CPE) programs, which include credit courses offered through extended studies during evenings, weekends and at off-campus sites. CPE also includes non-credit courses offered for continuing education units (C.E.U.s) or for professional development and personal enrichment.

### **Programs**

#### **Certificate**

- Digital Studies Certificate

#### **Doctor of Philosophy**

- Health Economics PhD

#### **Dual Degree**

- 4+1 International Studies to Masters in Humanities or Social Sciences
- 4+1 Philosophy to Masters of Humanities
- 5 Year BA/BS and Masters in Public Health

#### **Master of Science**

- Health Economics MS

## **Anthropology**

## **Graduate Program**

- ▶ Graduate School Policies and Procedures apply to this program

The unique intellectual challenge of anthropology is to integrate knowledge from many disciplines for a global understanding of cultural and biological diversity in the past and the present. Individual courses in cultural and biological anthropology and archaeology cut across lines of the humanities and social and natural sciences. Because of this integrative perspective on the human condition-and the training provided in objectively assessing cultural patterning and social interaction-anthropology graduates have a strong and versatile base for careers in a variety of fields. Graduates of our program get jobs as professional archaeologists; work in international NGOs as researchers in the health sciences and public health, as college teachers and in international development; while others have been very competitive in prestigious PhD programs (e.g., Berkeley, Pennsylvania, McMasters, Oxford, Stanford).

## Specialties and Tracks

CU Denver's Department of Anthropology provides an outstanding graduate education in anthropology, giving students a broad yet thorough grounding in the three major subfields of anthropology, as well as specialized instruction in one or more research orientations in which department faculty have substantial expertise. The graduate faculty in anthropology are particularly known for their research and publications in medical anthropology; immigrant health and immigration; disability; maternal and child health; human growth and development; human evolution; modern human variation; human locomotion; experimental economics; visual anthropology; ethnicity and identity; political economy; Southwestern, Mexican and Neanderthal archaeology; paleoenvironment; and urban and community anthropology. Across the specializations there is a strong emphasis on research design and methodology, providing students concrete job-related skills. Area studies emphases include Latin America, East Africa, the Mediterranean, and the US Southwest. Students also have opportunities to study abroad, to participate in one of several field schools, and to gain international research experience.

## Topical Concentrations

- Medical Anthropology
- Archaeology
- Biological Anthropology

Click [here](#) to learn about the **Anthropology MA Plans of Study**.

The graduate program in Anthropology is an active participant in the Western Interstate Commission for Higher Education's Western Regional Graduate Program ([www.WICHE.edu](http://www.WICHE.edu)). Students from WICHE states (Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) pay in-state tuition while maintaining residency in their home state. Just indicate in your application packet that you wish to take advantage of this program.

## Application Process

Application is open to holders of a BA, BS or higher degree in any field. We welcome applications from individuals pursuing particular interests and careers, especially those related to one of the areas of concentration noted above. The departmental deadline for receipt of all application materials is **February 15** for admission the following fall.

Acceptance to the program is competitive and based on the application as a whole rather than preference in any one area:

- an undergraduate record of good quality (3.0 GPA or higher for all undergraduate studies)
- prior training in Anthropology\*
- GRE scores (verbal, analytic and quantitative)

- three letters of recommendation
- a statement of the applicant's goals, both in graduate school and in their career, after completing the degree
- One copy of transcripts from all undergraduate/graduate institutions attended

If you have no prior anthropology training, we encourage you to gain the necessary background as a non-degree student before applying to the graduate program.

\*Students may be admitted without prior anthropology training, but may be required to make up deficiencies without graduate credit during the course of their graduate study.

## **Financial Aid**

The department offers limited tuition assistance, teaching assistantships and research assistantships for graduate students on a semester-by-semester basis. Appointment is competitive and is typically based on a student's academic credentials, GRE scores and preparation in anthropology. Contact the department for details. For information on grants, federal work-study programs, scholarships and loans, contact the CU Denver Financial Aid Office (website: [www.ucdenver.edu/student-services/resources/CostsAndFinancing/FA/Pages/FinancialAid.aspx](http://www.ucdenver.edu/student-services/resources/CostsAndFinancing/FA/Pages/FinancialAid.aspx)).

### **Master of Arts**

# **ANTHROPOLOGY MA**

► Graduate School Policies and Procedures apply to this program.

## **Plans of Study**

The unique intellectual challenge of anthropology is to integrate knowledge from many disciplines for a global understanding of cultural and biological diversity in the past and the present. Individual courses in cultural anthropology, biological anthropology and archaeology cut across lines of the humanities, social sciences and natural sciences. Because of this integrative perspective on the human condition, and the training provided in objectively assessing cultural patterning and social interaction, an advanced degree in anthropology provides a versatile base for career development.

Students in our terminal Master's program have the benefit of receiving the faculty's full attention. Our program is unique in several respects. First, for students wishing to find employment after their MA, the department offers a mentorship program that pairs them with alumni who have forged careers in students' fields of interest. Second, our program also offers students a range of opportunities for professional development that are unusual in programs that focus on PhD students. For students considering the possibility of doctoral-level work in anthropology, the department has an excellent

record in placing students in top-tier graduate programs. Students with residency in 14 states are eligible for in-state tuition, and funding opportunities in the form of Teaching Assistantships and graduate fellowships are available to students on a competitive basis.

The University of Colorado Denver Department of Anthropology provides outstanding graduate education in anthropology, giving students a broad yet thorough grounding in the four subfields of anthropology as well as specialized instruction in one or more of a number of research orientations and/or geographic area concentrations. These orientations encompass the areas of research and application in which department faculty have substantial expertise.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

MA students may pursue the thesis or non-thesis option.

- **Thesis Option:** A thesis is characterized by three factors: 1) it is based in a research question or problem; 2) it involves original research; 3) there is a fully developed research proposal. A thesis can also encompass a range of format alternatives to the traditional thesis (e.g. article submitted for publication to a peer-reviewed journal, or a video production, internship or museum exhibit, each generally accompanied by a companion paper developing a theoretical or problem-oriented question). The thesis option requires 30 semester hours, including 4-6 hours of thesis.
- **Non-Thesis Option:** This track is defined by additional course work in lieu of a thesis. The non-thesis option requires 36 semester hours of course work.

## Thesis Option

The thesis is a major requirement for those in the MA in anthropology thesis track. The thesis should demonstrate the student's ability to apply knowledge and skills gained from the anthropology department's curriculum. A desirable goal for an excellent thesis would be a work of sufficient rigor and quality that it could be considered for publication. Original data collection ("fieldwork") is recommended but not required for the thesis. Analysis of secondary data-whether quantitative, qualitative, visual or other formats-is perfectly acceptable as long as the research is informed by a clearly articulated research question and under-girded by a research proposal.

The traditional thesis is a single document that often incorporates a literature review, definition of a problem, discussion of methods to address the problem, the subsequent research activity and results. However, the student may design a thesis with different emphases, in consultation with their advisor. For example, the goal may instead be a

more compact paper submitted to a peer-reviewed journal. Other thesis plans may combine some research activity such as a video production, museum exhibit or an internship, with an accompanying paper. Students pursuing the thesis option must develop a topic and research proposal that specifies their plans in the semester after their completion of 18 credit hours.

The thesis must be defended before a committee of three faculty, at least two of whom need to be on the Department of Anthropology faculty (which includes senior instructors and research faculty). The structure of the thesis is largely determined by the Graduate School Policies and Procedures ; i.e., a thesis must conform to the rules.

1. For the thesis, students must prepare a full research proposal which must be approved by their thesis chair before beginning their research. This proposal must be completed by the semester after the student has completed 18 credit hours. Sections of the proposal should include, at a minimum:

- a) Introduction and statement of the problem: Should include a one sentence statement of the problem on the first page, and a discussion of its significance (i.e., why is it important that this topic be researched).
- b) Literature review covering theoretical and topical material.
- c) Research design and methods including a data analysis plan.

*Note:* Wenner-Gren and National Science Foundation both provide good models and templates for the research proposal. Those in the medical anthropology track might want to consider following the NIH model, depending the nature of their research questions and career goals.

2. All students proposing to work with humans or data on modern humans must apply for and receive approval from the Human Subjects Research Committee before they begin their research. Note: most of the material for the application will be drawn from the research proposal.
3. The draft thesis must be reviewed and approved as “defensible” by the student’s thesis committee faculty chair before a thesis defense date can be set. Defensible means the chair has reviewed the draft and suggested changes have been made.
  - a) The draft sent to the student’s committee must be substantively complete: All references must be in the text and properly formatted in a references cited section; there should be no “track changes” comments in the text; the text should be formatted according to Graduate School requirements.
  - b) Given the complexity of faculty and student schedules, consultation on a defense date should be done as far in advance as possible.
  - c) There must be a minimum of three weeks between the agreed-upon date for the defense and distribution of the draft thesis defined as defensible by the student’s chair. If you would like feedback from your committee members before the defense, you should plan to distribute the thesis at least 4 weeks before the defense date.

*Note:* If you intend to graduate the same semester you defend your thesis, you must schedule, successfully defend, and complete all recommended changes in accordance with CU Denver thesis and dissertation guidelines. This effectively translates to having the thesis completed and “defensible” before the middle of the semester.

## **Non-Thesis Option**

The non-thesis option allows students to pursue their own educational goals through the selection of additional courses that fit their interests. We strongly encourage students who choose this option to consider an internship position arranged around an area of expertise or the development of a skill-set. The internship may be in a governmental agency or non-governmental organization in Colorado, the U.S. or internationally. Successful completion of an internship will be acknowledged on the transcript of the MA program. The decision to pursue the non-thesis option should be made by the semester following the completion of 18 credit hours.

### **Additional Information**

Students must maintain an overall GPA of 3.0 to remain in good standing and receive a grade of *B-* or better in a course to have it count toward graduation. The Graduate School on the Downtown Campus allows up to five years to complete a master’s degree, but students are strongly discouraged from spending more than four years. While it is possible to finish the MA in two years, most of our students work part-time, which limits the time they can dedicate to the program; most finish within three years. Four semesters must be taken in residence at CU Denver. All students are required to pass a written comprehensive examination, taken after core course work has been completed.

Some students may benefit from adding a specific skills-based certificate program onto their graduate program. For example: archeology students may wish to gain expertise in Geographic Information Systems through the GIS certificate offered through the Department of Geography and Environmental Sciences, while medical anthropology students may benefit from the certificate in public health offered through the School of Public Health. Graduate-level courses in certificate programs can often fulfill elective requirements in the anthropology program.

One doctoral program at the CU Denver campus that may be of particular interest to graduates of the anthropology MA program is the PhD in Health and Behavioral Sciences . It is highly interdisciplinary and a natural extension of a master’s degree in medical anthropology.

## **Course Requirements**

Your graduate anthropology education begins by taking ANTH 5810, Integrating Anthropology, plus two core courses each from two subdisciplines of Anthropology.

After completing this core, you will select from among the specialized elective courses in the research concentrations described in more detail below. You will work closely with an advisor in selecting the range of courses appropriate both to a problem orientation and to your career objectives.

## **Required core courses (18 semester hours)**

**Required in fall of first year:**

- ANTH 5810 - Integrating Anthropology

**All students must complete or demonstrate competence in the following:**

- ANTH 5053 - Quantitative Methods in Anthropology

**Choose two of the following three sets of core courses (Students are not required to take these courses sequentially)**

### **Archaeology**

- ANTH 6307 - Contemporary Perspectives in Archaeology
- ANTH 6317 - Archaeological Research Design and Analysis

### **Biological**

- ANTH 6503 - Biological Anthropology Core: The Fossil Record
- ANTH 6513 - Biological Anthropology Core: Modern Human Variation

### **Cultural**

- ANTH 6063 - Qualitative Research Design and Methods
- ANTH 6103 - Current Theory in Ethnography

## **Research Concentrations (8-18 semester hours)**

You will round out your program by selecting from the diverse range of courses offered in the department according to your particular interests in anthropology, your career goals and your plans for future graduate study. You may take courses in one or more concentrations. The courses listed are suggestions only; you must work closely with your advisor in constructing your particular program of study.

## **MEDICAL ANTHROPOLOGY**

Our MA program in cultural anthropology offers a unique focus on Medical Anthropology. Medical anthropology is a subdiscipline of anthropology that includes the

study of all aspects of health, illness and disease in human communities and populations. It draws on all of the perspectives that distinguish anthropology as a unique discipline: the analysis of human evolution and adaptation; cultural development, expressions, and variability; and historical change and continuity. Medical anthropology takes as its subject a broad range of specific topics, including the study of health care systems, factors that affect the distribution and determinants of disease in populations, maternal and child health, nutrition and food habits, human development, political ecology, health policy, health disparities, community-driven wellness practices, visual storytelling, social media designed to promote health equities, and language and communication in health care contexts.

Faculty members take a variety of theoretical approaches to the topic, but our program is distinguished by its applied and engaged perspectives. A particular strength of our program is its integration of theoretical knowledge with community- and field-based training opportunities and challenges. We prepare students for careers in nonprofit and community groups, non-governmental organizations, advocacy, public health, health care institutions, and health sciences research; our graduates also attend doctoral programs at selective institutions. Courses in the department are complemented by electives in other departments (sociology, biology, psychology, history, geography, political science) and programs on the CU Denver campus (public affairs, education, health administration) and at the Anschutz Medical Campus (Schools of Medicine, Public Health, Pharmacy and Nursing).

## **Courses**

As part of the MA degree, students may take between 6 and 18 credits of electives in this track, choosing from:

- ANTH 5000 - Special Topics in Anthropology
- ANTH 5014 - Medical Anthropology: Global Health
- ANTH 5040 - Anthropology of Food and Nutrition
- ANTH 5060 - Evolutionary Medicine
- ANTH 5080 - Global Health Practice
- ANTH 5090 - Drug Syndemic
- ANTH 5150 - Human Biocultural Adaptability
- ANTH 5180 - The Nature of Power
- ANTH 5290 - Anthropology and Public Health
- ANTH 5300 - Migrant Health
- ANTH 5350 - Anthropology of Globalization
- ANTH 5450 - Development and Conservation: Contemporary Issues
- ANTH 5460 - Development and Conservation: Theory and Practice
- ANTH 5600 - Medical Anthropology
- ANTH 5800 - Special Topics in Medical Anthropology
- ANTH 5200 - Gender in Cross-Cultural Perspective

Note: Students are encouraged to take elective courses in GIS mapping (geography), ecology (biology/anthropology), public policy, public health, epidemiology and biostatistics as it is relevant to their course of study.

## **ARCHAEOLOGY**

The archaeological studies program concentrates on the study of past human societies using archaeological data collected in field and museum settings. While a quantitative and scientific approach is emphasized, the theoretical perspectives employed draw heavily from political economy and cultural ecology. The department offers a variety of theoretical, methodological and area courses, which may be supplemented by others in the geography and environmental sciences and history departments. Internships are available in local museums and historic preservation offices in the Denver metropolitan area.

### **Courses**

- ANTH 5320 - Archaeology of Mexico and Central America
- ANTH 5330 - Lithic Analysis
- ANTH 5380 - Archaeology of Hunters-Gatherers
- ANTH 5400 - Archaeology of Power and Inequality
- ANTH 5570 - Landscape Archaeology
- ANTH 5580 - Neanderthals and the Origin of Modern Humans
- ANTH 5910 - Field Experience in Archaeology
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5080 - Introduction to GIS
- GEOG 5220 - Environmental Impact Assessment
- HIST 5231 - History in Museums
- HIST 5232 - Historic Preservation
- HIST 5234 - Introduction to Public History

## **BIOLOGICAL ANTHROPOLOGY**

The biological anthropology concentration is concerned with modern human biological diversity and the past evolutionary history that has led to such diversity. Students in this concentration develop a firm understanding of the evolutionary processes that lead to physical and behavioral variation in humans and nonhuman primates. The concentration also emphasizes the theoretical and quantitative methods used to explore and explain this variation. Students may take courses in diverse areas including evolutionary biology, genetics, ecology, ethnobiology, epidemiology, nutrition, medical anthropology, paleoanthropology, paleontology and primatology. Because biological anthropology is multidisciplinary in nature, students are encouraged to consider courses offered outside the department.

### **Courses**

- ANTH 5014 - Medical Anthropology: Global Health
- ANTH 5030 - Ethnobiology
- ANTH 5040 - Anthropology of Food and Nutrition
- ANTH 5060 - Evolutionary Medicine
- ANTH 5150 - Human Biocultural Adaptability
- ANTH 5500 - Advanced Issues in Human Evolution
- ANTH 5530 - Anthropological Genetics
- ANTH 5550 - Primate Comparative Anatomy
- ANTH 5560 - Human Ecology
- ANTH 5580 - Neanderthals and the Origin of Modern Humans
- ANTH 5640 - Darwinian Approach to Human Behavior
- BIOL 5074 - Human Reproductive Biology
- BIOL 5134 - Human Genetics
- BIOL 5494 - Population and Evolutionary Genetics
- HBSC 7031 - Human Ecology and Environmental Adaptation
- HBSC 7310 - Environmental Epidemiology

**Instructors:**

Vanessa Fishback, PhD, University of Northern Colorado

Kyoung Kim, PhD, University of Notre Dame

Chemistry is the study of matter and its transformations, from the smallest scale - atoms and subatomic particles - to the macromolecules that provide structure and function to living organisms. Chemistry is often called the “central science” because it touches on other STEM disciplines including physics, biology, medicine, environmental science, geology, mathematics, materials science, technology, and many others. A degree in Chemistry can prepare you for a wide range of meaningful careers discovering and applying scientific knowledge. Modern chemistry combines computer modeling and experimental observation using procedures that are much safer and more environment-friendly than in past generations. Learning chemistry also teaches you important critical thinking skills that can be valuable in any career. Students with MS degrees have job opportunities in research and technical laboratory services. In addition, flexible programs can be designed to combine chemical knowledge and skills with other interests of the MS-level student (i.e. biology or environmental science).

## Graduate Program

The MS degree offered at CU Denver is a broad-based chemistry degree that allows students to take courses and do research in the following basic fields: analytical, biochemistry, inorganic, organic, physical or environmental chemistry.

The MS program is available to both full- and part-time students. The chemistry faculty strives to ensure that students receive excellent advising and supervision of work. Students enrolled in the program have an opportunity to be appointed as laboratory teaching assistants. Research activities on the part of the chemistry faculty provide opportunities for graduate students to obtain research assistantships.

Click here to learn about the **Chemistry MS** program.  
Click here to learn about the **Chemistry BS/MS** program.

## **Programs**

### **Bachelor of Science/Master of Science**

# CHEMISTRY BS/MS

While students are completing a BS degree in chemistry or biochemistry, they may also complete some of the requirements for an MS degree in chemistry by participating in the BS/MS program, using the following guidelines:

- The student must apply and be accepted for participation in the BS/MS program prior to completion of the BS degree in consultation with both the undergraduate and graduate advisors.
- Up to 12 semester hours of graduate-level course work may be taken as an undergraduate and applied toward the MS degree. This course work may not be applied toward the BS degree or ACS certification requirements for the BS degree.
- In addition, up to 3 semester hours of directed research may be applied toward the graduate degree if that research is expanded and continued for a portion of the master's thesis research. This requires the approval of the student's graduate research advisor in chemistry, and the chemistry graduate program director.
- The chemistry department will waive the requirement for placement examinations in each area of chemistry for which the student has completed the undergraduate sequence of courses and laboratories at the Downtown Campus with grades of B (3.0) or better for each course.
- The student must apply for and be admitted to the MS program in chemistry beginning the semester immediately following completion of the BS degree in chemistry at the Downtown Campus.

The BS/MS program allows undergraduate students who have begun their research as undergraduates to complete up to 12 semester hours (with approval of the graduate dean) toward the 30 semester hours required for a Plan I MS degree in chemistry while they are still completing their BS degree. This makes it possible for students to complete an MS degree in chemistry in only one year beyond the BS degree in chemistry. Students entering the MS program through the BS/MS program option must fulfill all of the requirements of the Plan I or Plan II MS degree programs.

### **Master of Science**

# CHEMISTRY MS

- ▶ Graduate School Rules apply to this program

**Program Director:** Scott Reed

**Email:** Scott.Reed@ucdenver.edu

**Office:** SI 4131

**Phone:** 303-315-7644

The MS program in chemistry focuses on providing students with the skills and knowledge necessary to conduct specialized research in preparation for careers in chemistry and related disciplines. Completing an MS in Chemistry at CU Denver can provide valuable experience that can help students land a job in the pharmaceutical, biotechnological, or other industry or can serve as a stepping stone for admission to a competitive PhD or health sciences program. Our faculty serve as mentors and advisors and assist students on the path to a more satisfying career in science. Prospective students are encouraged to contact the Graduate Program Director visit the Department of Chemistry website for additional details concerning the chemistry program, admission procedures, financial assistance and faculty research interests.

### **Admission Requirements:**

Applicants must meet the Downtown Campus Graduate School admission requirements according to Graduate School Policies and Procedures in addition to the following requirements of the Department of Chemistry:

An undergraduate major in Chemistry or a closely related discipline is required, including two semesters of organic chemistry as well as training in analytical chemistry, physical chemistry, and inorganic chemistry. Students missing more than one of these courses may be limited in the tracks that they are eligible to select. Students missing more than one of these courses may be provided a provisional admission. An undergraduate GPA of 3.0 (on a 4 point scale) is desired although each application is considered on its own merits.

- The GRE examination is recommended but not required.
- International students have additional admission requirements concerning immigration status, proof of financial responsibility and acceptable TOEFL or IELTS scores or completion of the CU Denver English as a Second Language Academy.
- Students currently in a BS program at CU Denver or elsewhere may want to consider the Chemistry BS/MS. This option includes the opportunity to enroll in graduate classes before enrolling in the MS program at CU Denver. At least 20 credits must be earned on campus. However, for the remaining courses, enrollment through CU ONLINE or on one of the other CU campuses is possible. Furthermore, the Chemistry Master's Program accepts transfer credits from accredited Universities with approval from the Graduate Program Director.

**In addition to selecting Plan I or Plan II, all MS students must select a track for their degree**

- Students interested in specializing within Chemistry must select from one of the tracks listed below. Each track has separate placement examinations. Therefore switching between tracks requires approval from the graduate program director

**Study Plans:**

<p><b>Plan I:</b></p> <p>Plan I (Thesis) is a research oriented program involving a minimum of 30 semester hours with the following requirements:</p>	<p><b>Plan II:</b></p> <p>Plan II (Course Work) is a coursework oriented program involving a minimum of 30 semester hours with the following requirements:</p>
<p>Students interested in specializing within Chemistry must select from one of the tracks listed below. Each track has separate placement examinations. Therefore switching between tracks requires approval from the Graduate Program Director</p>	
<p><b>Tracks:</b></p> <p>Track 1: Biochemistry</p> <p>Track 2: Synthesis and Measurement</p> <p>Track 3: Molecular Modeling</p> <p>Track 4: Traditional Chemistry</p>	

## Completing an MS in Chemistry - Graduation Requirements

**All Chemistry MS students must meet the following requirements for graduation:**

- A cumulative GPA of 3.0 or better at the time of graduation
- A grade of B- (2.7) or better in all courses to be counted toward the degree.
- Compliance with all Graduate School Policies and Procedures
- Every student must select a thesis or non-thesis plan. As most of the requirements overlap, a student may switch between these plans with permission from the Graduate Program Director.
- Although degrees can be completed in as little as one year, all work must be completed within five years after enrolling in the first graduate class in the department unless an exception is granted by the program director.
- Students are eligible to apply for a research assistantship or a teaching assistantship positions. Students who are interested in improving teaching skills can enroll in CHEM 5655 Teaching Assistant Bootcamp. This course is required for all students who are interested in working as a teaching assistant in the department.

- A minimum of 20 semester hours must be earned in formal lecture courses in the Department of Chemistry. Other credits can be acquired through research, internships, thesis work, independent study, transfer credits, etc.

**Plan I (Thesis) is a research oriented program involving a minimum of 30 semester hours with the following requirements:**

- An acceptable formal thesis consistent with the Graduate School Policies and Procedures
- Successful oral defense of the master's thesis before a committee of at least three Regular Graduate Faculty, two of whom must be tenure track faculty members and have an appointment with the Graduate School through the Department of Chemistry.
- Completion of a high quality research project suitable for publication in a peer-reviewed journal.
- 3 semester hours of CHEM 6950 - Master's Thesis
- All thesis students must complete 1 credit of CHEM 5610 - Understanding & Presenting Chemical Research no later than the semester before they defend their thesis.

**Plan II (Course Work) is a coursework oriented program involving a minimum of 30 semester hours with the following requirements:**

- All Plan II students are required to take a final written examination about primary research articles in their discipline. This exam may be taken any semester after 20 semester hours of graduate course work have been completed. Students may attempt the exam once per semester a maximum of three times and must be registered during the semester that they attempt the final examination.
- All non-thesis students are encouraged to take 1 credit of CHEM 5610 - Understanding & Presenting Chemical Research
- Plan II students may arrange for an internship at a local company that employs Chemists and take up to 6 credits of CHEM 5939 - Internship Students must be in good academic standing and have completed 6 graduate semester hours at CU Denver before starting an internship. Approval of the graduate program director is required prior to selecting an internship and enrolling for credit.

**Track Options:**

**Track 1: Biochemistry**

Understanding of biochemical principles governing metabolic diseases, cancer and neurodegenerative diseases.

Take the following required course:

- CHEM 5810 - Graduate Biochemistry I

Take **one** of the following required courses:

- CHEM 5310 - Advanced Organic Chemistry
- CHEM 5530 - Advanced Physical Chemistry

Take **two** of the following elective courses:

- CHEM 5815 - Structural Biology of Neurodegenerative Diseases
- CHEM 5825 - Biochemistry of Metabolic Disease
- CHEM 5830 - Graduate Biochemistry II
- CHEM 5835 - Biochemistry of Gene Regulation and Cancer
- CHEM 5845 - Molecular Modeling and Drug Design
- CHEM 5600 - Graduate Topics in Chemistry (course topic must match to the topic area of the track and be preapproved by the Graduate Program Director)

CHEM 5310 or CHEM 5530 may be taken as electives, if not used as a required course above. Additional courses within the department (a minimum of 20 semester hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department must be approved by the Graduate Program Director.

## Track 2: Synthesis and Measurement

Students in this track will learn how to prepare and characterize molecules and materials and how to measure their properties.

Take **one** of the following required courses:

- CHEM 5010 - Advanced Inorganic Chemistry
- CHEM 5310 - Advanced Organic Chemistry

Take **one** of the following required courses:

- CHEM 5110 - Advanced Analytical Chemistry
- CHEM 5221 Practical Applications for Spectroscopy

Take **two** of the following elective courses:

- CHEM 5510 - Computational Chemistry
- CHEM 5530 - Advanced Physical Chemistry

- CHEM 5421 - Cannabis Chemistry
- CHEM 5845 - Molecular Modeling and Drug Design
- CHEM 5600 - Graduate Topics in Chemistry (course topic must match to the topic area of the track and be preapproved by the Graduate Program Director)
- CHEM 5700 - Environmental Chemistry
- CHEM 5810 - Graduate Biochemistry I
- CHEM 5815 - Structural Biology of Neurodegenerative Diseases
- BIOE 5420 - Special Topics in Bioengineering (course topic must be preapproved by the Graduate Director)

CHEM 5010, CHEM 5110, CHEM 5221 or CHEM 5310 may be taken as electives if not used as a required course above. Additional courses within the department (a minimum of 20 semester hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department must be approved by the Graduate Program Director.

### Track 3: Molecular Modeling

Students in this track will learn fundamental principles and modern techniques in computer modeling and apply the acquired knowledge to solve practical problems in chemistry, biochemistry, biophysics, and material sciences.

Take all of the following required courses:

- CHEM 5510 - Computational Chemistry
- CHEM 5530 - Advanced Physical Chemistry

Take **two** of the following electives:

- CHEM 5010 - Advanced Inorganic Chemistry
- CHEM 5310 - Advanced Organic Chemistry
- CHEM 5845 - Molecular Modeling and Drug Design
- CHEM 5600 - Graduate Topics in Chemistry (course topic must match to the topic area of the track and be preapproved by the Graduate Program Director)
- CHEM 5815 - Structural Biology of Neurodegenerative Diseases
- CHEM 5810 - Graduate Biochemistry I

Additionally, students are recommended to take one or two courses from other departments:

- MATH 3191 - Applied Linear Algebra
- MATH 4387 - Applied Regression Analysis
- MATH 5310 - Probability

- MATH 5387 - Applied Regression Analysis
- MATH 5660 - Numerical Analysis I
- CSCI 1410 - Fundamentals of Computing
- CSCI 2312 - Object Oriented Programming
- CSCI 4650 - Numerical Analysis I
- CSCI 5660 - Numerical Analysis I

Additional courses within the department (a minimum of 20 semester hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department and not on the above elective list must be approved by the Graduate Program Director.

### Track 4: Traditional Chemistry

Students that are interested in gaining experience in a broad range of chemistry including the critical sub-disciplines of organic, inorganic, analytical, and physical chemistry are encouraged to consider the traditional track.

Traditional Chemistry MS degree students must complete **the following required courses and a thesis or a final written examination.**

- CHEM 5010 - Advanced Inorganic Chemistry
- CHEM 5110 - Advanced Analytical Chemistry
- CHEM 5310 - Advanced Organic Chemistry
- CHEM 5530 - Advanced Physical Chemistry

Additional courses within the department (a minimum of 20 credit hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department must be approved by the Graduate Program Director.

Barbara J. Walkosz, PhD, University of Arizona

Our vibrant community of scholars and teachers is committed to providing a real-world, hands-on, and theoretically robust master's degree that will enrich students' communication knowledge and skills for the twenty-first century. Our program is a 33-credit generalist degree designed to enhance students' intellectual and professional growth through the understanding and practice of effective communication. Our faculty members are nationally and internationally recognized leaders in their field. Students who complete our program often receive offers to top-notch PhD programs or accept

positions related to communication management, public relations, human relations, and corporate and non-profit communication.

## **Graduate Program**

Click here to learn about the **Master of Arts in Communication**.

## **Grade Requirements**

Students must maintain a GPA of 3.0 or higher across all courses applied to a graduate degree or to a graduate certificate.

## **Course Transfer Policy**

A maximum of 12 semester hours of relevant graduate course work may be transferred from another university. Students cannot receive credit for transferred courses in which less than a *B* grade was earned. Course work transferred from another university must be approved by the director of the MA program and must not have been used for another graduate degree.

## **Time Limits for Completion of Degree**

Students have seven years from the date of the beginning of their course work to complete all requirements for a master's degree in communication.

## **Application Procedures for U.S. Citizens**

Students must submit the following materials to apply for admission to the MA program:

- letter of application explaining career plans and reasons for interest in the degree
- online graduate admission application
- three letters of recommendation, preferably from university faculty (those writing the recommendations must use the request for recommendation form and their own letterhead stationery)
- two official transcripts from every college or university attended
- strongly preferred 3.25 undergraduate GPA
- resume or *vita*
- academic writing sample (showing ability to make and sustain an argumentative analysis)
- Optional GRE scores
- \$50 application fee (nonrefundable)
- international students need TOEFL scores

## **Deadlines for Application**

**February 15:** Priority deadline for fall semester start and full consideration for Graduate Teaching Assistantships (GTA). Applications will be considered until May 1, which is the non-priority deadline for fall semester start and excludes GTA consideration.

**October 1:** Deadline for spring semester start. Graduate Teaching Assistantships are generally not offered for spring semester start.

**Application deadlines are firm.**

All application materials not uploaded through the online application process should be sent to:

Graduate School  
University of Colorado Denver  
Campus Box 163  
1380 Lawrence Street, Suite 1250  
P.O. Box 173364 Denver,  
CO 80217-3364

Students are notified by e-mail of the graduate admission committee's decision concerning their admission.

## **Application Procedures for International Students**

Students who are not U.S. citizens should begin the process of application to the MA program in Communication by contacting the Office of International Affairs (website: [www.ucdenver.edu/academics/InternationalPrograms/OIA/admissions/Pages/default.aspx](http://www.ucdenver.edu/academics/InternationalPrograms/OIA/admissions/Pages/default.aspx)) at CU Denver. This office will assist students in compiling their application materials, which then are submitted to the Communication department. See the International Students chapter for further information.

## **Graduate Certificate**

[Click here](#) to learn about the Strategic Communication Graduate Certificate.

## **Grade and Residency Requirements for Certificates**

A grade of *B* or better must be earned in each course completed as part of the certificate (*B-* is not acceptable). All semester hours for a certificate must be earned at CU Denver.

## **Programs**

### **Certificate**

# STRATEGIC COMMUNICATION GRADUATE CERTIFICATE

► Graduate School Policies and Procedures apply to this program.

Strategic Communication has been defined as the management function that entails planning, research, publicity, promotion and collaborative decision-making to help any organization's ability to listen to, appreciate and respond appropriately to those persons and groups whose mutually beneficial relationships the organization needs to foster as it strives to achieve its mission and vision. The Graduate Certificate in Strategic Communication is designed to provide students with the principles and theories that guide the work of public relations practitioners in commercial, public and nonprofit contexts.

Non-degree students who enroll in the MA program following completion of the certificate may transfer up to 12 hours of credits earned for the certificate into credits for the MA degree. The certificate also is designed for students enrolled in a CU Denver's master's program, including the Department of Communication's MA program. For such students, the certificate can be completed as part of or in addition to the coursework required for the master's degree.

Recipients of the Undergraduate Certificate in Strategic Communication are ineligible to complete this certificate.

## **Application Procedures and Additional Information**

Students should apply for the Graduate Certificate in Strategic Communication before or after the completion of the required courses. To apply, students must complete the certificate application, attach it to an unofficial transcript, and return it to Dr. Hamilton Bean in room 3010 of the Student Commons Building, or mail to Department of Communication; P. O. Box 173364, Campus Box 176; University of Colorado Denver; Denver, CO 80217-3364. The approved certificate is posted to the transcript and mailed to the student after final grades are posted for the semester.

Students who are not already enrolled at CU Denver must also complete an online Application for Non-Degree Admission prior to registering for courses.

Additional information about the Graduate Certificate in Strategic Communication may be obtained from Dr. Hamilton Bean, Department of Communication, Student Commons Building, 1201 Larimer Street, Suite 3010, 303-315-1909, [Hamilton.Bean@ucdenver.edu](mailto:Hamilton.Bean@ucdenver.edu).

## Certificate Requirements

1. Students must complete a minimum of 12 credits from approved courses.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All of the credit hours for the certificate must be earned from faculty at the University of Colorado Denver.

Complete the following courses:

- COMM 5051 - Advanced Strategic Communication
- COMM 5240 - Organizational Communication
- COMM 5939 - Internship
- An elective at the graduate level from the College of Arts & Media, School of Business, the School of Public Affairs, or the Anschutz Medical Campus. The elective must be approved in consultation with the Department of Communication.

Students may be permitted to take courses other than those listed above to fulfill the requirements for the certificate if those courses fit their professional goals better. Requests for approval for substitute courses, including an explanation for the substitution, must be made in writing to Dr. Hamilton Bean.  
Master of Arts

# COMMUNICATION MA

► Graduate School Policies and Procedures apply to this program

Our vibrant community of scholars and teachers is committed to providing a real world, hands-on, and theoretically robust master's degree that will enrich students' communication knowledge and skills. Our program is a 33-credit generalist degree designed to enhance students' intellectual and professional growth through the understanding, analysis and practice of effective communication. Our faculty members are nationally and internationally recognized leaders in their fields, and our students hail from all over the world.

Some students who complete our program receive offers to top-notch PhD programs while others accept or continue in positions related to communication management,

strategic communication, public relations, media relations, human relations, and corporate and non-profit communications.

## **Degree Requirements**

1. Students must complete a minimum of 33 credits from approved courses.
2. Students must complete a minimum of 27 credits at the graduate level.
3. Students must earn a minimum grade of B (3.0) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. All credits for the degree must be completed with CU Denver faculty.

## **Required Introduction Course**

Students must take COMM 6013 in the first semester it is available.

- COMM 6013 - Introduction to Graduate Work in Communication

**Total: 3 Hours**

## **Required Methods Course**

Students must take COMM 5221 in the first semester it is available.

- COMM 5221 - Research Methods: Qualitative

**Total: 3 Hours**

## **Seminars**

Seminars are Communication courses at the 6000 level and are often special topics classes taught in faculty areas of expertise. Students must take two graduate Communication seminars in addition to the required COMM 6013 course. The optional COMM 6950 Master's Thesis or COMM 6960 Master's Project do not count as seminars.

**Total: 6 Hours**

## **Electives**

Students must complete seven elective courses. All electives must be at the 5000 or 6000 level; however, 1 course (3 credits) is permitted at the 4000 level from outside the

Communication department. A total of 6 credits may be outside the Communication department.

Courses that count as electives include:

- Any Communication courses taken at the 5000 or 6000 level that do not fulfill another program requirement.
- Communication internships (max 6 credit hours)
- Communication independent studies (max 6 credit hours)
- Courses from outside the Communication department (max 6 credit hours; more with the approval of the student's advisor and the Director of Graduate Studies).
- Thesis credit, if applicable

**Total: 21 Hours**

## **Optional Thesis**

Students who choose to complete a thesis must register for between 3-6 semester hours of thesis work, which may substitute for one or two elective courses. Students who complete a thesis still complete a total of 33 credit hours.

**Total: 3-6 Hours**

All students must pass a comprehensive examination at the end of course work.

Students must comply with all Graduate School Policies and Procedures

**Degree Total: 33 Hours**

Chun-Chieh Hu, PhD, Syracuse University

Economics is the science of decision making. The rigorous and general approach that characterizes economics lends itself to a remarkably wide field of practical application. Economists are noted for major contributions in a number of fields including government policy, taxation, law, regulation, political economy, international trade and finance, international and U.S. development, marketing, environmental studies, medical policy, portfolio management and banking. The broad and rigorous training of economics majors accounts for their significant demand in virtually every industry and government agency. Economics provides excellent preparation for advanced graduate study as well. Recent studies indicate that economics is a preferred degree for prestigious MBA programs and law schools.

## **Graduate Program**

The Department of Economics offers an MA program in Economics and MS and Ph.D. programs in Health Economics. The MA program in Economics trains students in quantitative and applied economic skills and is directed toward two groups: (1) those

who look on the MA as a key to career development in business or government service, and (2) those who desire to go on to pursue the PhD in economics or related fields. The strong quantitative emphasis of the department's MA program is ideally suited for the pursuit of both these goals. Our graduates are sought out by energy companies, defense contractors, health care agencies, consulting firms, financial institutions, and other companies looking for employees who know how to use real-world data to answer research questions. Many of our graduates use their MA degree in economics at CU Denver as a springboard towards pursuing a Ph.D. degree in economics at highly ranked programs across the country.

The MS and Ph.D. programs in Health Economics are designed to train scientists to engage in modern economic research related to questions pertinent to health policy, health behaviors, and health care services. Both programs are collaborative among faculty in the Department of Economics (ECON), housed in the College of Liberal Arts and Sciences, and the Department of Health Systems, Management & Policy (HSMP), housed in the Colorado School of Public Health. The ECON coursework grounds students in rigorous economic theory and modern statistical methods, whereas the HSMP coursework connects students to institutional details of the health care sector, study design, quantitative methods, cost-effectiveness analysis, and grant writing. The Health Economics programs equip students with an applied interdisciplinary skill set that integrates creative knowledge with the technical expertise that is in demand in the health care industry, enhancing their career and professional development.

### **Certificate**

# APPLIED ECONOMETRICS AND DATA ANALYTICS GRADUATE CERTIFICATE

## Introduction

The Graduate Certificate in Applied Econometrics & Data Analytics provides students with a strong graduate-level foundation in modern applied econometrics and quantitative analysis. The unique analytic skill set delivered in this certificate is sought out by energy companies, defense contractors, health care agencies, consulting firms, financial institutions and other companies in the Denver area that are looking for employees who know how to use real world data to answer research questions. Upon earning the certificate, students will be able to:

1. Explain the potential outcomes framework and how it informs empirical research.
2. Distinguish between causal and correlational relationships.
3. Set-up randomized experiments and understand factors that could contaminate them.
4. Identify natural experiments and how to apply them in research.
5. Understand the Difference-in-Difference estimator and its applications.
6. Apply matching techniques.
7. Use Panel data models, such as fixed effects estimators.
8. Understand the use of instrumental variables and how they are applied in research.
9. Apply the Regression Discontinuity estimator and apply it in economic research.

These certificate requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their certificate advisor and CLAS advisor to confirm the best plans of study before finalizing them.

## Program Delivery

This is an on-campus program.

## General Requirements

[Click here](#) for information about Academic Policies.

## **Admission Requirements**

- Degree: BA/BS
- A minimum GPA of 3.00 is recommended

## **Application Process**

Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:

- Graduate Certificate Application Form:
- Official Transcripts
- Resume
- Letter of interest

Upon approval of the student's admission by the Graduate Certificate Program, the program director will send the student's certificate admission file to the Graduate School. The Graduate School will confirm the applicant's credentials, will determine whether the student meets the general academic requirements of the Graduate School, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

## **Additional Requirements**

- Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking graduate student with a bachelor's degree.
- Students should have completed Introduction to Econometrics (ECON 4811), or equivalent coursework, or have professional experience in statistical analysis.
- International students must submit TOEFL scores or otherwise satisfy the University's English Language Proficiency requirement.

## **Certificate Requirements**

1. Students must complete a minimum of 12 ECON credit hours.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

## **Certificate Restrictions, Allowances and Recommendations**

1. Students have 7 years to complete this certificate.
2. Students should evaluate course descriptions to determine if the prerequisites or corequisites have been completed in order to move forward in the certificate.
3. No course may be taken more than twice.
4. Graduate level ECON credit counted towards the Graduate Certificate in Health Economics & Outcomes Research may be subsequently counted towards a CU Denver graduate degree in Economics. Certificate students are not guaranteed admission to the M.S. program in Health Economics. However, certificate students can apply to the M.S. program in economics at any time.
5. Students who complete the Graduate Certificate in Health Economics & Outcomes Research and later apply to the M.S. program in Health Economics at CU Denver may submit their certificate in place of GRE scores and letters of recommendation.
6. Students admitted to the M.A., M.S., or Ph.D. programs in economics at CU Denver may complete the graduate certificate concurrently with their degree program. However, courses that have already been counted towards any degree already awarded (undergraduate or graduate) may not be counted towards the certificate retroactively.

## **Required Courses**

Complete **all** the following ECON courses:

- ECON 5030 - Data Analysis with SAS
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics I
- ECON 6054 - Seminar In Applied Economics II (3 credits total across ECON 6053 and 6054)

**Total: 12 Credit Hours**

# **HEALTH ECONOMICS AND OUTCOMES RESEARCH GRADUATE CERTIFICATE**

Graduate Certificate in Health Economics & Outcomes Research is designed to train scientists to engage in modern economic research related to questions pertinent to

health policy, health behaviors, and health care services. The unique analytic skill set delivered in this certificate is sought out health care agencies, state agencies, and consulting firms in the Denver area that are looking for employees who know how to use health data to answer research questions. Upon earning this certificate, students will:

1. Have sufficient knowledge of econometric theory and techniques to make them an effective consumer and producer of empirical research in health economics.
2. Understand the challenges in identifying causal relationships using health data.
3. Understand the fundamentals of the potential outcomes framework, randomized experiments, natural experiments, panel data models, matching, instrumental variables and regression discontinuity designs.
4. Understand the economic approach to studying the healthcare sector, health behaviors, and health outcomes.
5. Understand how different markets function in the health care sector, such as the market for health care, health insurance, health labor (such as physicians and nursing), and pharmaceuticals.

These certificate requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their certificate advisor and CLAS advisor to confirm the best plans of study before finalizing them.

## **Program Delivery**

This is an on-campus program.

## **General Requirements**

[Click here for information about Academic Policies.](#)

## **Admission Requirements**

- Degree: BA/BS
- A minimum GPA of 3.00 is recommended

## **Application Process**

Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:

- Graduate Certificate Application Form
- Official Transcripts

- Resume
- Letter of interest

Upon approval of the student's admission by the Graduate Certificate Program, the program director will send the student's certificate admission file to the Graduate School. The Graduate School will confirm the applicant's credentials, will determine whether the student meets the general academic requirements of the Graduate School, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

## **Additional Requirements**

- Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking student with a bachelor's degree.
- Have completed Introduction to Econometrics (ECON 4811), or equivalent coursework, or have professional experience in statistical analysis.
- International students must submit TOEFL scores or otherwise satisfy the University's English Language Proficiency requirement.

## **Certificate Requirements**

1. Students must complete a minimum of 12 ECON credit hours.
2. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
3. All credit hours for the certificate must be earned at the University of Colorado Denver.

## **Certificate Restrictions, Allowances and Recommendations**

1. Students have 7 years to complete this certificate.
2. Students should evaluate course descriptions to determine if the prerequisites or corequisites have been completed in order to move forward in the certificate.
3. No course may be taken more than twice.
4. Graduate level ECON credit counted towards the Graduate Certificate in Health Economics & Outcomes Research may be subsequently counted towards a CU Denver graduate degree in Economics. Certificate students are not guaranteed admission to the M.S. program in Health Economics. However, certificate students can apply to the M.S. program in economics at any time.
5. Students who complete the Graduate Certificate in Health Economics & Outcomes Research and later apply to the M.S. program in Health Economics at CU Denver may submit their certificate in place of GRE scores and letters of recommendation.

6. Students admitted to the M.A., M.S., or Ph.D. programs in economics at CU Denver may complete the graduate certificate concurrently with their degree program. However, courses that have already been counted towards any degree already awarded (undergraduate or graduate) may not be counted towards the certificate retroactively.

## Required Courses

Complete **all** the following ECON courses:

- ECON 5030 - Data Analysis with SAS
- ECON 4812-Advanced Econometric Methods or ECON 5823 - Econometrics II
- ECON 7661 - Health Economics I
- ECON 7662 - Health Economics II

## Total: 12 Credit Hours

### Master of Arts

# ECONOMICS MA

► Graduate School Policies and Procedures apply to this program

**Graduate Advisors:** Brian Duncan and Hani Mansour

The MA program in economics is designed to train students in the quantitative and applied economic skills that will best enhance their future employment opportunities in the private and public sectors, or their pursuit of PhD studies in economics or related fields.

Our MA program emphasizes extensive training in mathematical and quantitative analysis, including the provision of substantial exposure to applied econometrics, working with large and diverse data sets, and a wide range of statistical software. The program gives students the applied skills that employers demand, provides those pursuing advanced degrees an edge in gaining admission to top-flight PhD programs- and enhances the likelihood of the student's ultimate success.

## Admission Requirements

- Meet all general admission requirements of the Graduate School (including a 2.50 undergraduate grade-point average).
- Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an

additional academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).

- Submit official transcripts from all colleges attended.
- Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and intermediate macroeconomic theory (upper division courses).
- Have completed courses in calculus and statistics (preferably a year of calculus and a course in econometrics or similar upper division statistics course. A course in linear algebra and/or differential equations is recommended).
- Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. Most students admitted to the MA program in economics score 154 or above (690 or above using the prior test scale) on the quantitative section of the GRE. However, this is not a minimum GRE cutoff score, nor is it a score above which admission is guaranteed. GRE scores are used in conjunction with other indicators of academic success at the Master's level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.
- International students must submit TOEFL scores. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), or 6.5 (IELTS). The institution code for CU Denver is 4875. The minimum TOEFL scores are a requirement of the Graduate School and cannot be waived by the department of economics. The Graduate School may waive the TOEFL requirement for applicants who have attended a college or university in the United States as a full-time student and have completed two semesters of academic work with a "B" average (3.0 GPA or higher). Please contact the International Admissions office if you have questions about this requirement.

### **Application Deadlines:**

**Fall - June 1**

**Spring - December 1**

The Department of Economics accepts late applications after these official deadlines. However, there is no guarantee that a late application will be processed in time for the start of the semester. Students are encouraged to apply well in advance the application deadline.

International students who apply after the June 1 or December 1 deadline may not have time to obtain a student visa. Being admitted to the MA program in economics does not guarantee that a student will receive a student visa in time for the start of the semester. International students who are admitted to the MA program, but fail to obtain a visa in time, may defer admission for up to one year. All questions about student visas should be directed to the Office of International Admissions.

## **Degree Requirements**

1. Students must complete a minimum of 30 credit hours of coursework, of which 21 hours are core requirements. Each student's plan will be worked out in conjunction with the graduate advisor. Students are expected to meet all course prerequisites.
2. Students must complete a minimum of 30 graduate (5000 and above) level credit hours.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail. No course may be taken more than twice and only one attempt will retain the credit.
4. Students must complete all credits for the degree with CU Denver faculty.

## **Core Courses**

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics or ECON 6054 - Seminar In Applied Economics II
- ECON 6073 - Research Seminar

**Total: 21 Credits**

## **Electives**

Three courses numbered 5000 or higher with an ECON subject code. After completing 6 credit hours of ECON 6053/6054 as part of the economics core, additional ECON 6053/6054 courses may be counted as electives.

**Total: 9 Credits**

**Degree Total: 30 Credits**

# ECONOMICS MA/PUBLIC ADMINISTRATION MPA DUAL DEGREE

► Graduate School Policies and Procedures apply to this program

**Graduate Advisors:** Brian Duncan and Hani Mansour

The fields of public administration and economics are inextricably linked. Economists provide much of the theory and analytic foundation that administrators use to evaluate and implement policy. Given that the capital of the state of Colorado is in Denver, there is great need for administrators that fully understand methods of program evaluation and have the theoretical background needed to forecast how individuals and institutions will respond to new proposals. Similarly, good theory and practice must take into account how the proposals will be implemented and results interpreted. Both administrators and economists need to be engaged in constructive dialog for either to be fully effective.

A “dual” degree means that students who complete the program earn two master’s degrees: MA in economics and MPA in public administration. Students interested in completing the dual degree in economics and public administration must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the public administration program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the School of Public Affairs.

[Click here](#) or admissions requirements for the MA program in Economics

[Click here](#) for admissions requirements for the MPA program in Public Administration

## **Degree Requirements**

The requirements for the dual degree in economics and public administration include completing 21 credit hours in ECON and 27 credit hours in PUAD (48 total credit hours).

Students are expected to meet all course prerequisites. A grade of B- or better is required in all courses, with a cumulative grade point average of B (3.0) or above. No course may be taken more than twice.

## **Economics Core Courses (15 Hours)**

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II

## **Public Administration Core Courses (18 credits)**

- PUAD 5006 - Public Service Leadership and Ethics
- PUAD 5008 - Evidence-Based Decision-Making
- PUAD 5001 - Introduction to Public Administration and Public Service
- PUAD 5002 - Organizational Management and Behavior
- PUAD 5003 - Research and Analytic Methods
- PUAD 5004 - Economics and Public Finance
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5503 - Public Budgeting and Finance

## **Economics Electives (3 or 6 hours)**

Any course numbered 5000 or higher with an ECON prefix. Students planning on taking ECON 6073 are strongly encouraged to take 3 elective hours of ECON 6053/6054.

## **Public Administration Electives (6 or 9 hours)**

Any course numbered 5000 or higher with a PUAD prefix. Contact a graduate SPA advisor for information about their course requirements.

## **Capstone Course**

- ECON 6073 - Research Seminar

OR

- PUAD 5361 - Capstone Seminar

If the student takes ECON 6073, then 3 hours of elective credits must come from Economics and 9 from SPA. If the student takes PUAD 5361, then 6 hours of elective credits must come from Economics and 6 from SPA.

**Master of Science/Master of Arts**

# **ECONOMICS MA/APPLIED MATHEMATICS MS DUAL DEGREE, WITH A FOCUS IN APPLIED STATISTICS**

► Graduate School Policies and Procedures apply to this program.

**Graduate Advisors:** Brian Duncan and Hani Mansour

The fields of mathematics and economics are inextricably linked. In economics, mathematics and statistics are used extensively in theory construction, tests of existing theories and discovery of regularities to inform new theories. Economics also gives mathematicians/statisticians new challenges, new outlets and new ideas to incorporate in mathematics. These complementarities have long been recognized and economics graduate students have always been advised to take advanced courses in statistics.

A “dual” degree means that students who complete the program earn two master’s degrees: MA in economics and MS in applied mathematics. Students interested in completing the dual degree in economics and applied mathematics must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the applied math program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the Math Department.

[Click here for admissions requirements for the MA program in Economics](#)

[Click here for admissions requirements for the MS program in Applied Mathematics](#)

There are an increasing number of economics MA students wishing to obtain graduate training and a degree in statistics. Having an MA degree in economics and an MS degree in Applied Mathematics will make a student highly employable in the job market and provide them an edge in applying for elite PhD programs.

## Degree Requirements

The requirements for the dual degree in economics and applied mathematics include completing 21 credit hours in ECON and 21 credit hours in MATH (42 total credit hours).

Students are expected to meet all course prerequisites. ECON 5803 – Mathematical Economics is a prerequisite for ECON 5073 - Microeconomic Theory and ECON 5813 - Econometrics I. This prerequisite requirement is waived for students who are currently admitted to the MS Applied Mathematics program.

A grade of B- or better is required in all courses, with a cumulative grade point average of B (3.0) or above. No course may be taken more than twice.

## Core Courses

Take all of the following courses:

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics or ECON 6054 - Seminar In Applied Economics II
- ECON 6073 - Research Seminar
- MATH 5070 - Applied Analysis
- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5718 - Applied Linear Algebra
- MATH 6330 - Workshop in Statistical Consulting

Take one of the following courses:

- MATH 5394 - Experimental Designs
- MATH 6376 - Statistical Computing
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7826 - Topics in Probability and Statistics
- An additional course given prior approval by the student's advisor and the Director of the Program in Statistics.

**Total: 36 hours**

## Electives

One 5000 or higher course with a MATH prefix (3 semester hours), except MATH 5000-5010, MATH 5017, MATH 5198, and MATH 5250. Contact a graduate advisor in the Math Department for information about Math course requirements.

One 5000 or higher course with an ECON prefix (3 semester hours).

Contact a graduate advisor in the Economics Department for information about Econ course requirements.

**Total: 6 Hours**

## Dual Degree Total: 42 Hours

**Master of Science in Finance/Master of Arts in Economics**

# ECONOMICS MA/FINANCE MS DUAL DEGREE

► Graduate School Policies and Procedures apply to this program

**Graduate Advisors:** Brian Duncan and Hani Mansour

For students interested in combining the quantitative skills of an economics degree with the specific applications of a business degree, we offer an MA economics / MS finance dual degree. This 42-semester-hour program is offered jointly with the Business School.

A “dual” degree means that students who complete the program earn two master’s degrees: MA in economics and MS in finance. Students interested in completing the dual degree in economics and public administration must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the finance program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the Business School.

[Click here for admissions requirements for the MA program in Economics](#)

Click [here](#) for admissions requirements for the MS program in Finance and Risk Management

The dual degree program is intended to create highly-skilled research professionals with considerable econometric skill as well as familiarity with their chosen financial institutions. Given the similarity in course work within the two programs, there can be considerable time savings for the student. Essentially, the program allows students to complete the two programs that separately would require 60 hours of course work with 42 hours of combined course work.

## **Degree Requirements**

The requirements for the dual degree in economics and finance include completing 21 credit hours in ECON and 21 credit hours in FNCE (42 total credit hours)

Students are expected to meet all course prerequisites. A grade of B- or better is required in all courses, with a cumulative grade point average of B (3.0) or above. No course may be taken more than twice.

## **Core Courses**

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6073 - Research Seminar
- BUSN 6640 - Financial Management
- FNCE 6300 - Macroeconomics and Financial Markets
- FNCE 6330 - Investment Management Analysis
- FNCE 6380 - Futures and Options

**-OR-**

- FNCE 6382 - Survey of Financial Derivatives

**-OR-**

- FNCE 6410 - Real Options and Decisions Under Uncertainty

**Total: 30 Hours**

## **Electives**

Three 6000 or higher courses with a FNCE prefix (9 semester hours), except FNCE 6290 - Quantitative Methods. Contact a graduate advisor in the Business School for information about Finance course requirements.

One 5000 or higher course with an ECON prefix (3 semester hours). Students are strongly encouraged to take 3 elective hours of ECON 6053/6054 or to meet with an economics graduate advisor to discuss how to otherwise prepare for ECON 6073 - Research Seminar. Contact a graduate advisor in the Economics Department for information about ECON course requirements.

**Total: 12 Hours**

**Dual Degree Total: 42 Hours**

**Other Programs**

# ECONOMICS BA/MA

## Introduction

Please click [here](#) to see Economics department information.

## Program Delivery

- This is an on-campus program.

## Declaring This Major

- Students should meet with the graduate program director and undergraduate faculty advisor to learn more about admissions requirements for this program.

## General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

Program Requirements

## Course Requirements

Undergraduate required courses (30 or 31 credit hours):

- ECON 2012 - Principles of Economics: Macroeconomics

- ECON 2022 - Principles of Economics: Microeconomics
  - ECON 4071 - Intermediate Microeconomic Theory
  - ECON 4081 - Intermediate Macroeconomic Theory
  - MATH 3382 - Statistical Theory
- OR**
- ECON 3811 - Statistics with Computer Applications

Undergraduate electives (9 credit hours):

- Three undergraduate economics courses and at least 2 of them must be at 4000-level

Graduate courses (18 credit hours):

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics
- ECON 6054 - Seminar In Applied Economics II
- ECON 6073 - Research Seminar

The “Seminar in Applied Economics” (ECON 6053, 6054) are 8-week 1.5 credit modules. After completing 3 credit hours of ECON 6053/6054 as part of the economics core, additional ECON 6053/6054 courses may be counted as electives

Graduate electives (9 credit hours):

Any course numbered 5000 or higher with an ECON prefix.

Total economics/mathematics credit hours = 66 or 67

Total credit hours for the combined degrees = 135

**Note:** The mathematics courses that students take also fulfill some of CU Denver (up to 8 hours) and CLAS (up to 4 hours) graduation requirements.

- MATH 2411 - Calculus II
- MATH 2421 - Calculus III
- MATH 1401 - Calculus I

## Dual Credits

Students need to take only three electives at the undergraduate level; the three electives taken at the graduate level are double counted in fulfilling both BA and MA graduation requirements.

ECON 5803 (Graduate Mathematical Economics) is waived or can be counted as one graduate-level elective. The total dual credits are 12 hours.

## **Additional Graduation Requirements**

All other grade and GPA requirements towards the BA and MA degrees (e.g., a C- or better is needed in each undergraduate-level required course and a B- or better is needed in each graduate-level required course). Students are expected to meet all course prerequisites. Students will earn the BA degree in their fourth year upon completing all the requirements for the BA degree. Students are expected to be admitted to the Graduate School in their final two semesters prior to earning the MA degree.

## **Admission Requirements**

1. Meet all general admission requirements of the Graduate School
2. Be a current CU Denver Economics major with a GPA of 3.5 or better
3. The following courses must have been completed at CU Denver with a grade of B+ or better: MATH 2411, MATH 2421, ECON 4071, and ECON 4811
4. Students should apply in the semester when requirement 3 is satisfied (typically in the end of the fall semester of their junior year - as in the sample curriculum below)
5. Students who do not meet requirements 2 and 3 may apply, but must submit GRE scores and two letters of recommendation; otherwise both are waived
6. To apply, students should submit a regular application to the MA ECON program here: <https://application.admissions.ucdenver.edu/apply/>. Students who meet the admission requirements are not required to pay the application fee, submit GRE scores, letters of recommendation, or a personal statement. Students must contact the graduate advisor after their application is submitted to have this material waived (brian.duncan@ucdenver.edu)

**Assistant Professors:**

Andrew Scahill, PhD, University of Texas, Austin

The English Studies graduate program provides a strong foundation in primary knowledge areas, including the history of the English language, the major genres and the theory of genre, approaches to literacy, and the impact of technology on reading and writing. The program invites MA candidates to build on this foundation by developing an expertise in teaching, and by expanding their content knowledge with courses in rhetoric, literature, film, and applied linguistics.

### **Programs**

#### **Certificate**

# **TEACHING COLLEGE-LEVEL LANGUAGE AND LITERACY**

Graduate School Policies and Procedures apply to this program.

The English Department at the University of Colorado Denver offers a Graduate Certificate in Teaching College-level Language and Literacy. It fulfills the increasing needs of educators seeking to deepen and to broaden their specialization. It allows an English Master's Candidate to specialize in an area of study in addition to the primary area of degree focus. The certificate does not grant state licensure. It ensures competency for those who already are licensed, provides documentation in expertise for those teaching in community colleges, and enables specialization for those with master's degrees in related fields (i.e. Rhetoric, Composition, Literature, Film Studies, Humanities, Education).

*This certificate can be completed fully online, fully on campus, or a combination of the two.*

### **General Requirements:**

1. Students must complete a minimum of 18 ENGL credit hours
2. Students must complete all 18 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

4. All credits for the certificate must be completed with CU Denver faculty.
5. All courses must be completed with ENGL subject code.
6. All candidates must possess a Bachelor's of Arts in any field.

## **Additional Information**

Additional Information about the Graduate Certificate in Teaching College-level Language and Literacy may be obtained from:

**Associate Professor:** Rodney Herring

**Office:** 1061 9th St. Park, Room 102

**Phone:** 303-315-7848

**E-mail:** Rodney.Herring@ucdenver.edu

## **Required Courses (12 Hours)**

- ENGL 5093 - Teaching of Writing
- ENGL 5155 - Genres of Writing

OR

- ENGL 5135 - English Language Study
- ENGL 5165 - Literacy and Technology
- ENGL 5601 - Principles and Practices of Second Language Acquisition

OR

- ENGL 5651 - Second Language Writing

## **Electives**

Choose 2 graduate level courses (may include 6 hours of Denver Writing Project Summer Institute)

# **TEACHING COLLEGE-LEVEL LITERATURE AND FILM GRADUATE CERTIFICATE**

Graduate School Policies and Procedures apply to this program

The English Department at the University of Colorado Denver offers a Graduate Certificate in Teaching College-level Literature and Film. It fulfills the increasing needs of educators seeking to deepen and to broaden their content specialization. It allows an English Master's Candidate to specialize in an area of study in addition to the primary area of degree focus.

The certificate does not grant state licensure. It ensures competency for those who already are licensed, provides documentation in expertise for those teaching in community colleges, and enables specialization for those with master's degrees in related fields (i.e. Rhetoric, Composition, Literature, Film Studies, Humanities, Education).

### **General Requirements:**

1. Students must complete a minimum of 18 ENGL credit hours
2. Students must complete all 18 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.
5. All courses must be completed with ENGL subject code.
6. All candidates must possess a Bachelor's of Arts in any field.

### **Additional Requirements:**

# **TEACHING ENGLISH LANGUAGE LEARNERS GRADUATE CERTIFICATE (CTELL)**

► Graduate School Policies and Procedures apply to this program.

**Program Advisor:** Joanne Addison, Professor

**Office:** 1059 Ninth Street Park, Room 104

**Telephone:** 303-315-7000

**E-mail:** Joanne.Addison@ucdenver.edu

## **Program Description**

To meet the increasing needs of individuals seeking advanced training in teaching English as a second language, the English department at CU Denver offers a graduate Certificate in Teaching English Language Learners (CTELL).

The certificate program, which can be completed through CU Online, is designed to build the necessary skills to teach adults English as a second language through focused preparation. It is primarily aimed at native speakers of English who want to teach overseas, but may serve the needs of international students wanting to teach English in their home country or other countries.

Upon successful completion of the program, CTELL participants will be able to:

- Discuss the theoretical basis of second language instruction
- Demonstrate a variety of effective ESL teaching techniques
- Explain, in pedagogically relevant ways, the linguistic structures of the English language

## Curriculum

1. Students must complete a minimum of 12 ENGL credit hours
2. Students must complete all 12 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.
5. All courses must be completed with ENGL subject code.
6. All candidates must possess a Bachelor's of Arts in any field.

## Required Courses

- ENGL 5171 - Language Theory
- ENGL 5601 - Principles and Practices of Second Language Acquisition
- ENGL 5651 - Second Language Writing

**Total: 9 Hours**

## Elective Courses (Choose one of the following)

- ENGL 5093 - Teaching of Writing
- An alternative elective such as a special topic course (i.e., ENGL 5190 Advanced Topics in Writing & Digital Studies ) approved by the program advisor.
- An internship (ENGL 5939 Internship ) approved by the program advisor.

**Total: 3 Hours**

**Total: 12 Hours**

## Additional Information

### LENGTH OF TIME

The course of study will typically last one academic year, including the summer session.

### WHEN YOU MAY BEGIN

You may begin in any semester. There is no fixed deadline for application for admission.

## **PREREQUISITES**

All applicants must have a bachelor's degree or the equivalent, with a 3.0 GPA, to be accepted to the program. Graduate students at CU Denver will also be permitted to apply for the certificate while they are concurrently completing another graduate degree. Permission may not be granted to graduate students in the applied linguistics option of the Master of Arts in English program.

Non-native speakers of English are required to submit an official TOEFL (Test of English as a Foreign Language) report showing a score of at least 600. Those who score below 600 but above 500 on the TOEFL may be admitted conditionally to the program. Under these conditions, students will have their English language skills assessed by the faculty of the program immediately after they arrive on campus to determine whether further courses are needed to develop English language proficiency. After assessment, the students may be assigned to full-time language study in an intensive English program, permitted to take graduate-level classes on a conditional basis along with further designated language study or permitted to begin graduate study without further restrictions.

### **Master of Arts**

# **ENGLISH MA**

► Graduate School Policies and Procedures apply to this program

**Program Director:** Nancy Ciccone

**Telephone:** 303-315-7833

**E-mail:** nancy.ciccone@ucdenver.edu

The department offers an English MA degree focused around five core courses with specializations available in literature, rhetoric and the teaching of writing, and applied linguistics.

Contact the graduate program director for more information on these programs.

## **Requirements for Admission**

The deadline for summer or fall admission is April 1; the deadline for spring is October 1. Complete applications must include the following:

- A completed University of Colorado graduate application

- One copy of all graduate and undergraduate transcripts, and for any nondegree courses previously taken
- Three letters of recommendation in which the recommender specifically addresses the candidate's ability to pursue successfully the program chosen
- Graduate Record Exam scores are optional. You may provide them if you wish, but they are no longer required.
- Evidence of a 3.0 GPA in previous courses
- A one-page statement of purpose
- 10-page critical writing sample

In addition to these requirements, applicants for the program must have successfully completed 24 semester hours in English courses (graduate or undergraduate), excluding courses in composition, creative writing or speech. At least 15 of these semester hours must be at the upper-division level.

## **Transfer of Credits from Other CU Campuses**

Students admitted to graduate study in English may complete all of their course requirements for the MA degree at CU Denver. Up to 9 semester hours (total) may be transferred from the University of Colorado Boulder, University of Colorado Colorado Springs or other graduate programs; however, such transfer requires the written approval of the graduate advisor. Only 9 semester hours of courses taken at CU Denver before acceptance into the program can be counted toward the degree. Further, work already applied toward a graduate degree received at the University of Colorado or at another institution cannot be transferred toward another graduate degree of the same level at CU Denver. (For other rules concerning transfer of graduate credits, see the Graduate School Policies and Procedures) For more information, contact the graduate program director at 303-315-7847.

## **Degree Requirements**

### **GENERAL REQUIREMENTS**

- Satisfactory completion of all required course work
- Demonstrated fourth-semester proficiency in a foreign language. Old English or Latin will also satisfy this requirement
- Compliance with all graduate school policies and requirements

### **COURSE REQUIREMENTS (30 SEMESTER HOURS MINIMUM)**

1. Students must complete a minimum of 30 ENGL credit hours.
2. Students must complete all courses at the graduate (5000 and above) level.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded

attempts in required and elective courses are calculated in the major GPA.

Students cannot complete major or ancillary course requirements as pass/fail.

4. Students must complete a minimum of 21 ENGL credits with CU Denver faculty,
5. All courses are 3 credit hours unless otherwise noted.
6. All courses must be completed in the ENGL subject code.

## REQUIRED COURSES

- ENGL 5100 - Introduction to Graduate Studies
- ENGL 5135 - English Language Study
- ENGL 5145 - Theory (Literary and Rhetorical Theory)
- ENGL 5155 - Genres of Writing
- ENGL 5165 - Literacy and Technology

**Total: 15 Hours**

## AREA REQUIREMENTS

Students may choose to concentrate 12 hours of English graduate courses in a particular area of study that meets the student's goals in the program.

**Total: 12 Hours**

## THESIS OR PORTFOLIO OPTIONS

- ENGL 6950 - Master's Thesis

*Students must consult with and submit a proposal to the graduate committee for approval. (4-6 credit hours)*

**OR take**

- ENGL 6970 - Portfolio Exam

(3 hours)

**Total: 3-6 Hours**

## Additional Information

**Candidate for Degree:** Graduate students must be registered for at least one credit hour during the semester that they graduate. Those who have completed all required courses and requirements may register for Candidate for Degree: CAND 5940 section 900.

**Teaching Assistantships:** Graduate students who receive a teaching assistantship must take

ENGL 5913 - Practicum in Language and Rhetoric in the fall during their first semester as a teaching assistant. ENGL 5913 may also be counted as an elective.

**Independent Study:** Graduate students may only count 6 credit hours of Independent Study toward the English MA degree.

# GEOGRAPHY AND ENVIRONMENTAL SCIENCES

**Chair:** Peter Anthamatten, PhD

**Program Assistant:** Sue Eddleman

**Administrative Assistant:** Meron Ayele

## Faculty

### Professors:

Anne Chin, PhD, Arizona State University

Pamela Jansma, PhD, Northwestern University (CLAS Dean)

### Professors Emeritus:

Wesley E. LeMasurier, PhD, Stanford University

Martin Lockley, PhD, University of Birmingham, England

John W. Wyckoff, PhD, University of Utah

### Associate Professors:

Peter Anthamatten, PhD, University of Minnesota

Frederick B. Chambers, PhD, Arizona State University

Rafael Moreno-Sanchez, PhD, Colorado State University

Brian Page, PhD, University of California, Berkeley

Gregory Simon, PhD, University of Washington

Bryan S. Wee, PhD, Purdue University

### Associate Professors- Clinical Teaching Track:

Rudi Hartmann, PhD, Technical University of Munich

### Assistant Professors- Clinical Teaching Track:

Matthew Cross, PhD, University of Colorado Denver

**Assistant Professors:**

Christy Briles, PhD, University of Oregon

Benjamin Crawford, PhD, University of British Columbia, Vancouver

Katharine Kelsey, PhD, University of Colorado Boulder

**Senior Instructors:**

Amanda Weaver, PhD, University of Denver

Thomas Duster, PhD, University of Notre Dame

**Instructors:**

Kirsten Christensen, MSS, MURP, University of Colorado Denver

Yi-Chia Chen, PhD, Louisiana State University

**Lecturers:**

Richard Ashmore

Tim Connors

Hope Dalton

Richard DeGrandchamp

James Fleming

Jenne Mayne

David Murray

Xuantong Wang

Geography is a science that focuses on the spatial analysis of human/physical patterns and processes. Geographers attempt to identify the factors affecting the distribution of people and their activities on the surface of the earth and to provide meaningful solutions to problems faced by societies. This discipline is an ideal major for the liberal arts student, providing exposure to the concepts and techniques utilized in investigating the physical sciences, environmental and sustainability issues, socioeconomic problems and planning policies. In the United States and around the world, balancing the preservation of the natural environment with the imperatives of economic development along with concerns for social well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions.

Environmental Sciences is a multidisciplinary study of the environment, housed in the Department of Geography and Environmental Sciences. Academic fields involved in environmental sciences include chemistry, biology and ecology, physics, geology, geography, anthropology, engineering, political science, law, economics and the health sciences. Students planning to pursue the MS in environmental sciences must either have earned a bachelor's degree or have taken significant coursework in the natural/physical sciences or engineering and completed several other prerequisites (see the following graduate information). Graduate-level certificates in environmental

sciences are also offered. The certificates may be earned stand-alone or as options in the MS in environmental sciences.

Environmental careers encompass a broad range of professions, from those with a strong foundation in the natural/physical sciences or engineering to those based in the social sciences and/or humanities. Students interested in environmental issues and careers should investigate the whole field before deciding which course to follow. At CU Denver, the MS in environmental sciences emphasizes the natural/physical sciences and engineering with the addition of the social sciences and humanities.

### **Certificate**

# **ENVIRONMENTAL SCIENCE EDUCATION GRADUATE CERTIFICATE**

► Graduate School Policies and Procedures apply to this program.

**Certificate Advisor:** Bryan Wee

**E-mail:** [bryan.wee@ucdenver.edu](mailto:bryan.wee@ucdenver.edu)

### **Introduction**

Please click here to see Geography and Environmental Sciences Department information.

## **Certificate Objectives**

1. Students will synthesize environmental science content with relevant educational practices
2. Students will recognize, understand and apply environmental science education in either formal or informal educational settings
3. Students will utilize education research methods to support disciplinary learning
4. Students will identify a broader set of career options (see list below)

### *Sample list of career options*

- K-12 Teacher or curricular specialist
- UNICEF/UNESCO/World Heritage Foundation
- National Parks Service or U.S. Forest Service
- Non-profit organizations (e.g. Colorado Alliance for Environmental Education)
- Regulatory Agencies (e.g. U.S. Environmental Protection Agency)
- Environmental and/or Educational Consultancy Firms
- Adjunct lecturer or instructor

## **Program Delivery**

This is both an on-campus and field-based program.

## **Declaring This Certificate**

Please see the Certificate advisor.

## **General Requirements**

[Click here](#) for information about Academic Policies.

## **Eligibility**

Environmental Science Education has broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

## **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the Certificate advisor. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

## **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions:* <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PROGRAM EXPECTATIONS**

Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the Environmental Science Education Certificate may be used towards one other degree requirement. Any changes to the standard curriculum program must be approved in writing by the Certificate advisor. Please pay close attention to prerequisites for specific courses.

## **PERFORMANCE EXPECTATIONS**

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

### **Certificate Requirements**

As a graduate or non-degree student at CU Denver, the requirements for the Environmental Science Education Certificate are two core classes and two electives, totaling 12 hours. All classes must be taken at the graduate level (5000 or above) to fulfill the requirements of the Certificate.

### **Required Courses (6 credit hours)**

- ENVS 5340 - Equity & Culture in Science Education: Local/Global
- ENVS 5650 - Environmental Education

### **Electives (6 credit hours)**

Select from the following list of electives. Students should consult with the certificate advisor about other courses that may count toward this requirement.

- ANTH 5170 - Culture and the Environment
- BIOL 5154 - Conservation Biology
- COMM 5282 - Environmental Communication

- ENVS 5020 - Earth Environments and Human Impacts
- ENVS 5305 - Water Quality and Resources
- ENVS 5470 - Sustainable Urban Agriculture Field Study II
- GEOG 5265 - Sustainability in Resources Management
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5440 - Science, Policy and the Environment
- PSCI 5354 - Seminar: Environmental Politics and Policy

# FREE AND OPEN SOURCE SOFTWARE FOR GEOSPATIAL APPLICATIONS GRADUATE CERTIFICATE

Graduate School Policies and Procedures apply to this program

**Certificate Advisor:** Rafael Moreno

**E-mail:** rafael.moreno@ucdenver.edu

**Certificate Objectives:**

1. Provide students and working geospatial professionals with the knowledge and skills for the effective use and development of FOSS4G solutions in diverse application contexts. This complements and enhances the knowledge and skills they have in the use of geospatial proprietary software solutions.
2. Students will be exposed to several FOSS4G alternatives to address the needs of a geospatial information infrastructure from desktop, database management systems, systems automation/customization, all the way to Web/Cloud-based applications and enterprise level solutions.
3. Students will acquire the necessary knowledge and skills to effectively use the most advanced FOSS4G alternatives to develop solutions for each of levels of a geospatial information infrastructure previously mentioned.
4. Students will have the knowledge and hands-on skills that will enable them to design and develop hybrid geospatial information infrastructures that make use of proprietary software and FOSS4G incorporating each them in a combination that maximizes efficiency of the end infrastructure.

**Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the GISci Certificate Coordinator. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

### **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions: <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.*

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

### **PERFORMANCE EXPECTATIONS**

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

#### **Credit hour requirements:**

A total of 12 credits are required for the certificate. The students will have the option to take other courses above and beyond the core requirements for the certificate.

#### **Required Courses**

- GEOG 5091 - Open Source Software for Geospatial Applications

*This course exposes students to the diversity of FOSS4G solutions that exist for each of the elements of geospatial information infrastructure. They acquire the necessary hands-on skills to effectively use one FOSS4G to address the needs of each of the levels of a geospatial information infrastructure.*

- GEOG 5092 - GIS Programming and Automation

*Students learn programming principles and techniques to automate processes and customize a geographic information system (GIS), and to integrate and coordinate the functions of diverse geospatial software (e.g. a database management system with a GIS).*

- CVEN 5385 - GIS Relational Database Systems

*Students learn the principles and techniques to design a spatial database and perform multiple analyses and functions in a FOSS4G spatial database management system.*

- GEOG 5086 - FOSS4G Systems Integration

*This course functions as the capstone for the certificate. It concentrates on applying all the knowledge and skills previously obtained and adding more in the area of integration of geospatial information infrastructures based on FOSS4G. Students work on integrating systems from desktop to Web/Cloud-based applications.*

### **Optional Courses**

Students can choose to take one or more of the following courses that can complement their formation in specific topics. However, these course are not required as part of the certificate program.

- BIOL 3763 - Biostatistics
- BIOL 6764 - Biological Data Analysis

Both of these courses use the open source software R for environmental data analysis including spatial statistics and geostatistics.

- CVEN 5389 - Open Source Desktop Mapping, Modeling & Data Processing

*This course uses different FOSS4G for the creation of Web-based mapping solutions.*

- GEOG 5050 - Applied Spatial Statistics

*This course is offered annually as part of the GES offerings. It also uses R for data analysis including spatial statistics and geostatistics.*

- GEOG 5095 - Deploying GIS Functionality on the Web

*This course uses FOSS4G for database analysis and creation of Web-based GIS systems.*

# GEOGRAPHIC INFORMATION SCIENCE GRADUATE CERTIFICATE

► Graduate School Policies and Procedures apply to this program.

**GISci Certificate Advisor:** Matt Cross

**E-mail:** matthew.cross@ucdenver.edu

The Geographic Information Science (GISci) Certificate in the Department of Geography and Environmental Sciences is designed to provide CU Denver undergraduates and graduates, as well as non-degree seeking students interested in professional development, with proficiency in the application of spatial thinking, geographic information science, and geo-technologies in the social and physical sciences, spanning the natural, built and human environments and emphasizing human-environment interconnections. The GISci Certificate core establishes a broad foundation in spatial technologies and methodologies, including geographic information systems, remote sensing, cartography, spatial extensions to database management systems, and statistics. From this base, students can delve into various specialization areas depending on their interests.

Upon successful completion of the certificate, students will be able to:

- articulate and apply basic theoretical underpinnings of spatial analytical principles, methodologies, and techniques;
- effectively utilize at least three different types of software used for spatial analysis;
- apply geo-spatial thinking, geographic information science, and geo-technologies appropriately; and
- analyze diverse real-world problems that have a spatial dimension and develop alternative solutions to them.

## **Eligibility**

Geographic information science and geo-technologies have broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

You must complete the Application for GISci Certificate, which can be obtained from the GISci Certificate Coordinator. The application requires copies of former transcripts indicating that an undergraduate degree has been previously granted or an unofficial transcript from CU Denver showing that you are a current undergraduate or graduate student. This application is required to be formally registered in the GISci Certificate program, and must be completed no later than the semester prior to the scheduled completion of the certificate.

### **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the GISci Certificate Coordinator. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

### **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions: <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.*

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PROGRAM EXPECTATIONS**

To earn the certificate, students must complete a specific set of geospatial classes. Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the GISci Certificate Program may be used towards one other degree requirement. Any changes to the standard curriculum program must be approved in writing by the GISci Certificate Coordinator. Please pay close attention to prerequisites for specific courses.

## **PERFORMANCE EXPECTATIONS**

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

### **Course Requirements**

As a graduate or graduate-non-degree student at CU Denver, the requirements for the GISci Certificate are four core classes and two electives, totaling 18 hours. All classes must be taken at the graduate level (5000 or above) to fulfill the requirements of the Graduate GISci Certificate. It is assumed that graduate students have some prior knowledge in basic mapping skills, therefore GEOG 2080 is not required. All core classes are required for completion of the GIS Certificate and are offered at least on a yearly basis. The statistics course requirement can be filled by enrolling in the GEOG 5050 Applied Spatial Statistics, or one of several graduate level (5000 or above) classes offered by CU Denver and approved by the certificate coordinator. There is a prerequisite requirement of a basic statistics class taken at the undergraduate college level prior to taking any graduate level statistics class at CU Denver. Any additional two electives can be taken from the elective list. If you are currently a graduate student at CU Denver and also attended CU Denver as an undergraduate, you may apply only one 3 credit hour undergraduate course (4000 level) to the GISci Certificate. The required classes are as follows:

### **Prerequisite Course**

Note: this course does NOT count as part of the total credits required for the certificate.

- GEOG 2080 - Introduction to Mapping and Map Analysis

### **Core Courses**

- GEOG 5050 - Applied Spatial Statistics
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing

(May also take as GEOL 5060)

- GEOG 5080 - Introduction to GIS
- GEOG 5081 - Cartography and Computer Mapping

**OR** equivalent course approved by the GISci Certificate Coordinator

### **Total: 12 Hours**

### **Elective (choose two from the following):**

- GEOG 4086 - FOSS4G Systems Integration
- GEOG 5070 - Remote Sensing II: Advanced Remote Sensing

(May also take as GEOL 5070)

- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5090 - Environmental Modeling with Geographic Information Systems
- GEOG 5091 - Open Source Software for Geospatial Applications

- GEOG 5092 - GIS Programming and Automation
- GEOG 5095 - Deploying GIS Functionality on the Web
- GEOG 5235 - GIS Applications in the Health Sciences
- CVEN 5382 - Geospatial Data Development
- CVEN 5385 - GIS Relational Database Systems

One of these courses may be substituted with an elective approved by the GISci Certificate Coordinator

**Total: 6 Hours**

**Certificate Total: 18 Hours**

# SUSTAINABLE URBAN AGRICULTURE GRADUATE CERTIFICATE

**Certificate Advisor:** Amanda Weaver

**E-mail:** amanda.weaver@ucdenver.edu

## **Introduction**

Please click [here](#) to see Geography and Environmental Sciences Department information.

The goal of the certificate program is to provide GES students advanced training in sustainable urban agriculture through the integration of university classroom study and field-based practicum conducted at the department's field research station. Requirements for the certificate are therefore divided between on-campus courses and field courses.

Upon successful completion of the certificate, students will:

- Have knowledge of the history of urban farming
- Understand the modern agro-food system
- Participate in sustainable urban agricultural practices

## **Program Delivery**

This is both an on-campus and field-based program.

## **Declaring This Certificate**

- Please see the Certificate advisor.

## **General Requirements**

- Click here for information about Academic Policies.

## **Eligibility**

Sustainable Urban Agriculture has broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

## **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the Certificate advisor. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

## **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions: <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.*

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PERFORMANCE EXPECTATIONS**

For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

## **Certificate Requirements**

1. Students must complete a minimum of 12 hours taken from the approved courses below.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All

graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

4. All 12 credit hours for the certificate must be earned at the University of Colorado Denver.

### **Program Restrictions, Allowances and Recommendations**

1. Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver.
2. Any changes to the standard curriculum program must be approved in writing by the certificate advisor.
3. Courses taken within the Sustainable Urban Agriculture Certificate Program may be used towards one other degree requirement.
4. Please pay close attention to prerequisites for specific courses.

Take **all** of the following courses (9 credit hours):

- ENVS 5450 - Urban Food and Agriculture: Perspectives and Research
- ENVS 5460 - Sustainable Urban Agriculture Field Study I
- ENVS 5470 - Sustainable Urban Agriculture Field Study II

Take **one** of the following elective courses (3 credit hours):

- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5640 - Urban Geography: Denver and the U.S.
- GEOG 5680 - Urban Sustainability: Perspectives and Practice
- GEOG 5939 - Internship (a sustainable agriculture internship with a local food/urban agriculture community organization)

### **Master of Arts**

# APPLIED GEOGRAPHY & GEOSPATIAL SCIENCE MA

► Graduate School Policies and Procedures apply to this program

**Program Director:** Gregory Simon

**Office:** North Classroom

**Fax:** 303.315-7526

**E-mail:** gregory.simon@ucdenver.edu

**Web site:** Applied Geography & Geospatial Science MA

## Introduction

In the United States and around the world, balancing the preservation of the natural environment with the imperatives of economic development along with concerns for social well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions. Graduates of the M.A program in Applied Geography and Geospatial Science will have the knowledge, training, and tools to become leaders in this rapidly growing field.

The program's research focus is human-environment interaction, a longstanding hallmark of the discipline of Geography. Within this area of critical geographic inquiry, the program emphasizes geospatial science, a federally recognized STEM subject area that includes geographic information systems (GIS) as well as computer cartography, remotely sensed image analysis, and spatial statistics. Students apply their geospatial research skills in the context of hands-on, faculty-led research projects that stress professional development through community engagement and interactive service learning.

## Requirements for Admission

Applicants must hold a Bachelor's degree from an accredited institution.

The University of Colorado Denver has a minimum requirement of 3.0 undergraduate grade point average (GPA) for applicants to the Graduate School. The number of applicants admitted to the MA in Applied Geography & Geospatial Science in any year depends, in part, on space availability. The program is competitive, and we generally discourage applicants whose undergraduate GPA is below 3.0. Notification of acceptance or refusal for admission into the program is mailed to the applicant approximately six weeks after the deadline for submission of applications.

## Application Process

We accept applications once per year, **before or on February 1st**, for admission in the following fall. As part of the admission review process, applicants are required to submit: a graduate application, statement of purpose that articulates the goals of pursuing a graduate degree in this program, a writing sample, a minimum of three letters of recommendation (academic references are preferred), and official transcripts from all institutions previously attended. The GRE is not required. However, applicants

with less than a 3.0 GPA are welcome to submit GRE scores as further evidence of their qualifications.

## **Financial Aid**

There are three types of financial aid available: teaching assistant student hourly positions; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available aid and positions. All other aid should be requested through the CU Denver Financial Aid Office, Student Commons Building, 5th floor, Campus Box 125, P.O. Box 173364, Denver, CO 80217-3364. Telephone: 303-315-1850.

## **Internships**

Students in the Applied Geography & Geospatial Science MA program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to geographical sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

## **Degree Requirements**

The program is offered by the faculty of the Department of Geography and Environmental Sciences in the College of Liberal Arts and Sciences. Students undertake 36 credit hours over a two-year period. These 36 hours include required core classes (6-9 credit hours), a required service learning studio (3 credit hours), and required geo-spatial science coursework (12 credit hours). Students can elect to undertake either of two tracks: the first “coursework” track involves a further 15 hours of elective courses, whereas the second “thesis” track involves 9 hours of electives, and preparation of a written thesis (3 credits).

## **Thesis Option**

Take **all** of the following:

- GEOG 5050 - Applied Spatial Statistics
- GEOG 6300 - Foundations Seminar in Human-Environmental Interaction (3 hours)
- GEOG 6750 - Research Design (3 hours)
- GEOG 6800 - Community-Based Research Practicum (3 hours)

Take 12 additional hours of Geospatial Science courses

Take 9 hours of Elective courses (up to 6 hours can be taken outside the Department of Geography & Environmental Sciences, as approved by advisor)

- GEOG 6950 - Master's Thesis (3 hours)

33 hours of coursework and 3 thesis hours

## **Non-thesis Option**

- GEOG 6300 - Foundations Seminar in Human-Environmental Interaction (3 hours)

Take **all** of the following:

- GEOG 5050 - Applied Spatial Statistics
- GEOG 6800 - Community-Based Research Practicum (3 hours)

Take 12 hours of Geospatial Science courses

Take 15 hours of Elective courses (up to 6 hours can be taken outside the Department of Geography & Environmental Sciences, as approved by advisor)

36 hours of coursework

## **Notes**

1. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
2. Courses applied to either a certificate\* or an MA degree may later be applied toward the other if all pertinent coursework is completed within a five- year time period.
3. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
4. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.
5. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.

6. Students may transfer up to 9 hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses.
7. Students may count up to 6-credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
8. Students may count up to 6-credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)
9. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.
10. Students may take a maximum of 2 online courses, or petition to the GES Graduate Committee beyond two.
11. Students may enroll in thesis preparation and writing hours only after submission of signed committee form, which requires approval of the thesis proposal.
12. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.
13. Students must follow the graduate school deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.
14. Work submitted for the environmental sciences options must have a grade of B (3.0) or better.

\* GES offers Geospatial, Environmental Education, and Urban Agriculture independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the Geographic Information Science Graduate Certificate , Sustainable Urban Agriculture Graduate Certificate , and Environmental Science Education Graduate Certificate descriptions.)

Diana F. Tomback, Integrative Biology

**Associate Professors:**

Leo P. Bruederle, Integrative Biology

Greg Cronin, Integrative Biology

Michael J. Green, Integrative Biology

Timberly M. Roane, Integrative Biology

Michael Wunder, Integrative Biology

**Assistant Professors:**

Annika Mosier, Integrative Biology

Alan Vajda, Integrative Biology

Environmental Sciences is a multidisciplinary study of the natural/physical environment. Academic fields involved in environmental sciences include chemistry, biology and ecology, physics, geology, geography, anthropology, engineering, political science, law, economics and the health sciences. Students planning to pursue the MS in Environmental Sciences must either have earned a bachelor's degree or have taken significant course work in the natural/physical sciences or engineering and completed several other prerequisites (see the following graduate information).

Environmental careers encompass a broad range of professions, from those with a strong foundation in the natural/physical sciences or engineering to those based in the social sciences and/or humanities. Students interested in environmental issues and careers should investigate the whole field before deciding which path to follow. At CU

Denver, the MS in Environmental Sciences emphasizes the natural/physical sciences and engineering with the addition of the social sciences and humanities.

The MS in Environmental Sciences degree is designed to provide training in engineering, natural/physical sciences and social sciences. The goals of the program are (1) to enhance the interdisciplinary communication and analytical skills of the student, and (2) to provide a multidisciplinary approach for more intensive study of a particular environmental issue. Students will receive instruction in the physical and biological dynamics of various ecosystems, environmental engineering and socioeconomic issues associated with environmental analysis.

Graduates of the MS in Environmental Sciences program are involved in many different areas, such as reviewing environmental impact statements, monitoring groundwater quality and communicating with the public. Many students have found employment in various agencies (U.S. Environmental Protection Agency, U.S. Geological Survey, Colorado State Department of Public Health and Environment) and private-sector environmental and engineering firms.

## Requirements for Admission

The program is for students who either have baccalaureate degrees or have a significant background in one of the natural/physical sciences or engineering. In addition, minimum undergraduate science and math requirements are:

- one semester of calculus and one semester of upper-division statistics (*if applicant is missing the statistics course, he/she can be admitted but must take ENV5 5600, Applied Statistics, or an approved statistics course as an elective before receiving the MS in Environmental Sciences degree*)
- either two semesters of general chemistry with lab or two semesters of general biology with lab
- one semester of physics

If only two semesters of the prerequisite courses are lacking, students may be admitted, but must take them in the first year in the program. Applicants who have fulfilled all prerequisites have a better chance of acceptance. Applicants may be required to take additional prerequisite courses (necessary for completing particular core or elective courses). The prerequisite courses will not count toward the MS in environmental sciences degree. As part of the admission review process, applicants are required to submit a graduate application, a minimum of three letters of recommendation and transcripts from all institutions previously attended. CU Denver has a minimum requirement of a 3.0 undergraduate GPA for applicants to the Graduate School. The program admits new students for the fall semester only, and the number of students admitted to the program depends, in part, on space availability. **Applicants must submit all materials by the February 1st deadline.**

## Financial Aid

There are three types of financial aid available: student hourly teaching assistantship; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available aid and positions. All other aid should be requested through the CU Denver Financial Aid Office, Student Commons Building 5th floor, Campus Box 125, P.O. Box 173364, Denver, CO 80217-3364. Telephone: 303-315-1850.

## **Internships**

Students in the MS in Environmental Sciences program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to environmental sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

## **Program Requirements**

The MS in Environmental Sciences is a 39-hour program that provides students with two alternate plans: Plan I requires a thesis, while Plan II is a non-thesis program. General requirements for the program include a set of core courses (9-12 semester hours) and elective courses (24-27 semester hours minimum). Students choosing to complete the thesis option must also complete 3 hours of thesis credit, while those choosing the non-thesis option must complete 3 hours of additional elective coursework.

The degree is offered through the College of Liberal Arts and Sciences with the cooperation of the College of Engineering, Design and Computing. In addition, some courses offered by the College of Architecture and Planning, the School of Public Affairs and the Business School are relevant and applicable to the program.

## **Thesis Option**

Take **all** of the following:

- ENVS 6002 - Research Topics in Environmental Sciences (3 hours)
- ENVS 6100 - Research Topics in Environmental Management (3 hours)

**OR**

- GEOG 6750 - Research Design (3 hours)
- ENVS 6800 - Community-Based Research Practicum (3 hours)

Take 24 hours of elective courses

- GEOG 6950 - Master's Thesis (3 hours)

36 hours of coursework and 3 thesis hours

## **Non-thesis Option**

Take **all** of the following:

- GEOG 5440 - Science, Policy and the Environment

**OR**

- ENVS 6100 - Research Topics in Environmental Management (3 hours)
- ENVS 6002 - Research Topics in Environmental Sciences (3 hours)
- ENVS 6800 - Community-Based Research Practicum (3 hours)

Take 30 hours of elective courses

39 hours of coursework

## **Elective Courses**

(See the MS in Environmental Sciences website for a complete list of elective courses for the MS in Environmental Sciences program.)

Students, with the coordinator and/or an advisor, will complete a program plan that will include 24-30 semester hours of elective requirements that will meet their interests. Students may choose to use four of the electives to fulfill one of the following options offered in environmental sciences: air quality, ecosystems, environmental health, environmental science education, geospatial analysis, hazardous waste or water quality. Students must have the prerequisites for each course and must meet the requirements listed in the notes below. Contact the option advisor for the particular option of interest before starting. Upon graduation, the option will be noted on the student's transcript.

**Following are the requirements for each environmental sciences option:**

### **AIR QUALITY OPTION**

**Option Advisor:** Frederick Chambers

**E-mail:** Frederick.Chambers@ucdenver.edu

## **Required Courses**

- CHEM 5710 - Air Pollution Chemistry
- ENVS 5730 - Air Quality Modeling and Analysis

**Total: 6 Hours**

## **Electives**

Choose two:

- CHEM 5720 - Atmospheric Sampling and Analysis
- CVEN 5800 - Special Topics  
  
(when Air Pollution Control is the topic)
- URPL 6800 - Special Topics: Urban and Regional Planning  
  
(when Air Quality Planning and Policy is the topic)

**Total: 6 Hours**

**Option Total: 12 Hours**

## **ECOSYSTEMS OPTION\***

**Option Advisor:** Christy Briles

**E-mail:** Christy.Briles@ucdenver.edu

## **Required Courses**

- BIOL 5415 - Microbial Ecology
- ENVS 5010 - Landscape Biogeochemistry

**Total: 6 Hours**

## **Electives**

Choose two:

- ENVS 5731 - Mountain Biogeography
- ENVS 6220 - Toxicology (see Note 2)

- BIOL 5050 - Advanced Biology Topics  
(when Seminar in Aquatic Ecology is the topic)
- BIOL 5154 - Conservation Biology
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing

**Total: 6 Hours**

**Option Total: 12 Hours**

\* BIOL 5445, Applied Environmental Biology, is required as a prerequisite for the ecosystems option.

### **ENVIRONMENTAL HEALTH OPTION\***

**Option Advisor:** Peter Anthamatten

**E-mail:** Peter.Anthamatten@ucdenver.edu

### **Required Courses**

- ENVS 6220 - Toxicology (See Note 2)  
(fall, even years)
- ENVS 6230 - Environmental Epidemiology  
(spring, even years)

**Total: 6 Hours**

### **Electives**

Choose two:

- ENVS 5500 - Topics in Environmental Sciences (when Ecological Risk Assessment is the topic)  
(See Note 2)
- ENVS 6210 - Human Health and Environmental Pollution  
(spring, odd years)

- GEOG 5710 - Disasters, Climate Change, and Health

**Total: 6 Hours**

**Option Total: 12 Hours**

\* ENVS 6200, Risk Assessment, is required as a prerequisite for the environmental health option.

## **ENVIRONMENTAL SCIENCE EDUCATION OPTION**

**Option Advisor:** Bryan Wee

**E-mail:** bryan.wee@ucdenver.edu

### **Required Courses**

- ENVS 5340 - Equity & Culture in Science Education: Local/Global
- ENVS 5650 - Environmental Education

**Total: 6 Hours**

### **Electives**

Choose two:

- ANTH 5170 - Culture and the Environment
- BIOL 5154 - Conservation Biology
- COMM 5282 - Environmental Communication
- ENVS 5020 - Earth Environments and Human Impacts
- ENVS 5470 - Sustainable Urban Agriculture Field Study II
- GEOG 5265 - Sustainability in Resources Management
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5440 - Science, Policy and the Environment

**Total: 6 Hours**

**Option Total: 12 Hours**

## **GEOSPATIAL ANALYSIS OPTION\***

**Option Advisor:** Rafael Moreno

**E-mail:** Rafael.Moreno@ucdenver.edu

## **Required Courses**

- GEOG 5080 - Introduction to GIS
- GEOG 5090 - Environmental Modeling with Geographic Information Systems

**Total: 6 Hours**

## **Electives**

Choose two:

- GEOG 5050 - Applied Spatial Statistics
- GEOG 5086 - FOSS4G Systems Integration
- GEOG 5091 - Open Source Software for Geospatial Applications
- GEOG 5092 - GIS Programming and Automation
- CVEN 5382 - Geospatial Data Development
- CVEN 5385 - GIS Relational Database Systems

**Total: 6 Hours**

**Option Total: 12 Hours**

\* GEOG 3080, Introduction to Mapping and Map Analysis, is required as a prerequisite of the geospatial analysis option.

## **SUSTAINABLE URBAN AGRICULTURE OPTION**

**Option Advisor:** Amanda Weaver

**E-mail:** amanda.weaver@ucdenver.edu

## **Required Courses**

- ENVS 5450 - Urban Food and Agriculture: Perspectives and Research
- ENVS 5460 - Sustainable Urban Agriculture Field Study I

**Total: 6 Hours**

## **Electives**

Choose two:

- ENVS 5340 - Equity & Culture in Science Education: Local/Global
- ENVS 5470 - Sustainable Urban Agriculture Field Study II
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing

- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5235 - GIS Applications in the Health Sciences
- GEOG 5640 - Urban Geography: Denver and the U.S.
- GEOG 5680 - Urban Sustainability: Perspectives and Practice

**Total: 6 Hours**

**Option Total: 12 Hours**

### **WATER SYSTEMS OPTION\***

**Option Advisor:** Anne Chin

**E-mail:** anne.chin@ucdenver.edu

### **Required Courses**

- ENVS 5280 - Environmental Hydrology
- and
- CVEN 5334 - Groundwater Hydrology OR
  - CVEN 5335 - Vadose Zone Hydrology

**Total: 6 Hours**

### **Electives**

Choose two:

- BIOL 5416 - Aquatic Ecology
- ENVS 5410 - Aquatic Chemistry
- CVEN 5333 - Surface Water Hydrology
- CVEN 5336 - Urban Runoff Quality and Quantity Modeling
- CVEN 5393 - Water Resources Development and Management

**Total: 6 Hours**

**Option Total: 12 Hours**

\*CHEM 5700, Environmental Chemistry, or appropriate chemistry background is required as a prerequisite of the water quality option.

**Notes:**

1. Many of the elective courses have prerequisites; student must have met these requirements in order to take the course.
2. One course may not be used for more than one option, even if it is listed in several options. Other courses may be offered that will be acceptable as electives with approval of the option advisor and the director of the program.
3. Courses applied to either a certificate\* or an MS degree may later be applied toward the other if all pertinent coursework is completed within a five- year time period.
4. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
5. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.
6. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
7. Students may transfer up to 9 hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses
8. Students may count up to 6-credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
9. Students may count up to 6-credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)
10. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.
11. Students may take a maximum of 2 online courses, or petition to the GES Graduate Committee beyond two.
12. Students may enroll in thesis preparation and writing hours only after submission of signed committee form, which requires approval of the thesis proposal.
13. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.
14. Students must follow the graduate school deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.
15. Work submitted for the environmental sciences options must have a grade of B (3.0) or better.

\* The Geospatial, Environmental Education, and Urban Agriculture options of the program lead towards independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the

Geographic Information Science Graduate Certificate , Sustainable Urban Agriculture Graduate Certificate, and Environmental Science Education Graduate Certificate descriptions.)

# HEALTH AND BEHAVIORAL SCIENCES

Jorge Ivan Ramirez, PhD, Michigan State University

### Professors Emerita:

Debbi Main, PhD, University of Colorado

### Research and Clinical Faculty:

Sharon Devine, PhD, University of Colorado

Jean Scandlyn, PhD, Columbia University

The mission of the health and behavioral sciences (HBSC) program is to apply social science theory and innovative research methods to critically address emerging issues in health. The program trains students to confront issues affecting the health of communities and populations by focusing on social determinants of health and diseases. These determinants can be more influential on population health than the health care system.

The program's overarching framework integrates social, cultural and biomedical perspectives to understand the underpinnings of health and the conditions essential for its creation and maintenance. Students and faculty conduct interdisciplinary research on topics including emerging diseases, maternal/child health, substance abuse, health disparities and global health. Graduates are innovative researchers, effective educators and leaders directly engaged in the practice of population health.

Population health is working to protect the environment, identifying sources of illness in population groups, controlling disease outbreaks, evaluating the economic impacts of changing demographics, developing interventions to promote healthy behavior, and producing health policy legislation. Population health draws from a broad array of disciplines, such as the social and behavioral sciences, sociology, anthropology, psychology, medicine, economics, statistics, epidemiology, law and biology, and each provides unique insights for the diverse set of activities involved in population health practice.

## PhD Program in Health and Behavioral Sciences

The doctor of philosophy degree in health and behavioral sciences is rooted in the realization that our ability as a global society to overcome some of the most significant and intractable public health problems today rests on the willingness of biomedical and social science researchers to innovate across traditional disciplinary boundaries. Students are trained in theory from multiple disciplines and in both quantitative and qualitative research methods.

A master's degree is not provided by the health and behavioral sciences department.

A student's particular research focus constitutes a key part of his or her doctoral program. A range of possible foci exists, given the particular student's interest and faculty expertise. Examples of HBSC research foci include:

- *Social determinants of health.* Such research interests include studies on the health-related influences of socioeconomic position, social and economic inequality, discrimination, social networks and support, social capital, work conditions and psychological states including stress.
- *Community health.* This area of research involves community health assessment; program design and evaluation; translation of evidence-based interventions to diverse populations and communities; participatory research and community mobilization; policy analysis and advocacy for health-related problems.
- *Biosocial ecology.* Within this area are studies of the interplay of biological (including physiological, genetic or others of the biomedical health sciences), social, cultural and

environmental characteristics influencing maternal/infant health, exercise performance or susceptibility to disease.

- *Global health* topics include social, cultural and biomedical factors influencing transmission of disease and health disparities on an international (as well as national) scale.

Recent student research exemplifying such foci includes:

- perinatal stressors and fetal and child health in New Zealand
- gender differences in access to effective HIV care in sub-Saharan Africa
- the factors that shape whether minority owned businesses offer employee sponsored health insurance
- decision making around healthy food choices among school-aged children
- community representation in health organizations in Colorado
- race/ethnic and socioeconomic disparities in exercise, sleep, and nutrition behaviors among U.S. adults

Graduates of the HBSC program acquire skills that situate them for academic careers and leadership roles in population health. Depending upon a student's concentration, the successful graduate will gain expertise in research design and methods; social, cultural and biobehavioral determinants of health and disease; the structure and organization of health care systems; the contribution of individual, social and cultural factors for deciding health behaviors; and how guided change in health care systems may enhance quality, efficacy and access. The significance of these skills in addressing current complex health issues ensures that graduates will be in demand in a number of employment sectors ranging from community and public health organizations, to academic institutions, to nonprofit research organizations and to private health care settings.

## **Programs**

### **Doctor of Philosophy**

# **HEALTH AND BEHAVIORAL SCIENCES PHD**

► Graduate School Policies and Procedures apply to this program

## **Requirements for Admission**

A master's or equivalent graduate degree, or substantial research experience, is recommended for admission to the PhD program. Students applying without prerequisites may be admitted, but will be required to complete appropriate courses before being permitted to complete the core curriculum.

In addition to the general admission requirements of the Graduate School, the specific admission requirements for the PhD in health and behavioral sciences are as follows:

1. Knowledge from prior course work or vocational experience in Epidemiology (3 semester hours or the equivalent work experience). The applicant should have an understanding of the basic concepts and methods of epidemiology, including measures of risk, mortality, the distribution of disease, the role of bias and confounders, and study design.
2. Demonstrated academic excellence as evidenced by strong undergraduate and graduate GPAs. Admission to the program is highly competitive.

The applicability of a student's prior course work will be decided by the program executive committee after reviewing the student's transcript and additional materials. If the student does not have the requisite educational background or GPA, the student may be admitted on a conditional or provisional basis and additional course work required in accordance with Graduate School Policies and Procedures.

Prospective students should not be dissuaded from applying to the program if they do not meet all of the requirements for admission. In some cases, employment experience may be counted toward meeting a requirement. In other cases, students may be admitted conditionally upon their completion of a list of prerequisite courses that will be established at the time of admission. Students should be sure to address this issue in completing the graduate application by specifying the academic and vocational experience they possess that meets, in part or full, the admission requirements described above.

## **MASTER'S LEVEL PREPARATION FOR THE DOCTORAL PROGRAM IN HEALTH AND BEHAVIORAL SCIENCES**

The program does not currently offer master's-level training in HBSC.

## **TO APPLY FOR ADMISSION**

At the Denver campus, all graduate applications are now submitted electronically. To begin the application process, go to the online admissions website. If you have any difficulties, call the administrative assistant at 303-315-7157. The program admits students only for the fall semester, which typically begins in mid- to late August. The deadline for the receipt of all application materials is **January 1** for admission the following August.

Applicants should invest considerable thought and effort in preparing their application. For instance, in the essay, applicants should provide information on: (a) their research interests and plans for graduate study; (b) how they see their research interests fitting into our program; (c) academic or professional research experiences including publications, theses, and research in progress; (d) academic and professional experiences in their proposed or related fields, including non-course education, teaching or other relevant employment, or other scholarly activities.

Applicants should also submit a brief writing sample that showcases their current skills in writing and analytical thinking. It is more important that the writing sample reflect their best work than that the topic match their planned area of study in our PhD program. Examples could include a class paper, a selection from a thesis, a lead or sole authored paper, an op-ed style essay, a policy brief, or other sample.

Applicants should provide a current resume or CV to support their application.

In addition to the required recommendation form, letters of recommendation are required from at least three individuals in a position to judge the applicant's ability to complete the program. Recommenders may be employers, colleagues or professors; however, the applicant should be sure that the letters address the quality of, and aptitude for academic work as well as personal characteristics and qualities.

The program does not require GRE scores, but applicants may submit their scores if they believe it will strengthen their application.

## **Financial Aid**

There are five kinds of financial aid available: graduate student stipends/fellowships; tuition assistance; teaching assistantships; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office.

Newly admitted, out-of-state, and students demonstrating outstanding scholastic achievement receive priority when assigning departmental sources of funding. Students interested in research assistantships should contact the individual faculty member with whom they wish to work regarding potential assistantship positions.

All other aid should be requested through the CU Denver Financial Aid Office.

## **Program Requirements**

There are three dimensions to the required curriculum:

- a) A core curriculum that focuses on problem-oriented, interdisciplinary approaches to theory and method

- b) Elective course work intended to provide the student with a solid base from which to launch the dissertation research
- c) Dissertation research and writing

The curriculum is subject to change. What appears below is intended to give students a general idea of the extent, shape and content of the curriculum. Students should check with the program office for up-to-date information on specific course requirements and scheduling.

## **The Core Curriculum**

The core curriculum should be completed by students by the end of their second year of full-time study. It consists of the following series of courses which, together, constitute 26 semester hours:

### **I. Health and Behavioral Sciences Colloquium**

Each fall, the HBSC program will organize a series of presentations by scholars working in the health and behavioral sciences. The presentations provide students with the most current science and theory in the field. Required of all first- and second-year students, who must take at least two times.

- HBSC 7001 - Colloquium Series in the Health and Behavioral Sciences

**Total: 2 Hours**

### **II. Theoretical Perspectives in the Health and Behavioral Sciences**

This series is designed to give students a thorough background in how the principles of the social and behavioral sciences have been applied to health issues. Topics include: the interplay between structure and agency in creating and maintaining health; social epidemiology; critical theory and social determinants of health; issues affecting Western biomedicine and public health systems; diffusion of healthy behavioral change among populations; social construction of health and illness; health policy and bioethics; social networks; and stress.

- HBSC 7011 - Theoretical Perspectives
- HBSC 7071 - Social and Behavioral Determinants of Health and Disease

**Total: 6 Hours**

### **III. Human Ecology and Environmental Adaptation**

This course will emphasize the biological/physiological dimensions of human health and disease.

- HBSC 7031 - Human Ecology and Environmental Adaptation

**Total: 3 Hours**

#### **IV. Research Design and Methods in the Health and Behavioral Sciences**

Three HBSC core research design and methods courses, plus one additional advanced methods course of student's choosing. This series covers the philosophy of science and the structure of scientific inquiry, procedures for hypothesis-testing, quantitative and qualitative methodological strategies commonly employed in the field, epidemiology and program evaluation.

- HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I
- HBSC 7051 - Qualitative Research Design and Methods
- HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences
- HBSC 7161 - Quantitative Methods in Health&Behavioral Sciences II

**Total: 12 Hours**

#### **V. Applications of the Health and Behavioral Sciences**

This course offers students the opportunity to focus on individual research interests with guidance from faculty and input from peers.

- HBSC 7111 - Applications of the Health and Behavioral Sciences

**Total: 3 Hours**

**TOTAL CORE: 26 Hours**

#### **Elective Courses**

Elective course work together constitutes 6 semester hours, which can be drawn from the large number of offerings in the health and behavioral sciences at CU Denver. Students will be expected to fulfill the necessary prerequisites for taking these courses, and final authority as to whether a student may enroll in the course will rest with the department in which the course is offered.

**TOTAL ELECTIVES: 6 Hours**

#### **Doctoral Dissertation Research**

The doctoral dissertation research topic is chosen by the student. The student is expected to define a research question in health and behavioral science, identify the research strategy to be used for answering the question, conduct the research required and document the project in the form of a doctoral dissertation. The student will be guided in this process by a doctoral dissertation advisor and the additional members who comprise the student's doctoral dissertation committee (see below). A minimum of 30 semester hours of dissertation work is required. Students must register for a minimum of 5 dissertation credits each semester of their dissertation work. Students may not take more than a year's leave of absence or fail to enroll for semester hours more than three semesters before they are dropped from the program.

## **Advisors**

Upon admission to the program, each student will be assigned a first-year advisor. The student or the faculty will then choose the faculty advisor who will guide the student through the core and elective course work. This faculty advisor may or may not be the student's dissertation advisor. The student selects his or her dissertation advisor and a minimum of three additional committee members who oversee the student's comprehensive examination and dissertation research.

## **Formal Review**

A formal review of each student's progress will be undertaken at the end of each year of study. Students who are deemed not to be making satisfactory progress will be informed in writing as to the nature and final result of the review before the end of June.

## **The Dissertation Prospectus and the Comprehensive Examination**

Before a student advances to candidacy, they must complete a dissertation prospectus and defend it successfully in the context of an oral comprehensive examination. The dissertation prospectus is a complete description of the question or hypothesis that the student wishes to research for the dissertation project, the research design and study techniques and an assessment of the proposed project's contribution to the field. It will include a comprehensive review of the relevant literature. If the student chooses to undertake research in a particular ethnic or cultural community, they must also demonstrate sufficient understanding of that setting including adequate knowledge of the language. This prospectus must be approved by the student's advisor prior to scheduling the comprehensive examination.

The comprehensive examination will be an oral format based in part on, but not restricted to, the material presented in the dissertation prospectus. This exam must take place before the student's advancement to candidacy and will typically occur by the end of the third year of study. A committee comprising the advisor and a minimum of three faculty members will supervise the completion of the dissertation prospectus. This committee will conduct the oral examination and will recommend to the faculty by a majority vote whether or not the student should be advanced to candidacy.

## The Doctoral Dissertation and Final Exam

After advancement to candidacy, the student in consultation with his or her advisor will appoint a dissertation committee comprising the chair and a minimum of three faculty members. The dissertation advisor and composition of the committee will be subject to approval by the faculty. The dissertation advisor will be responsible for overseeing the research and writing of the doctoral dissertation. The committee will review drafts of the dissertation and, when the dissertation is completed to its satisfaction, will conduct the final exam, which will be based on the doctoral dissertation and related materials. The final examination will be open to the public.

**Dissertation Total: 30 Hours minimum**

# HISTORY

**Chair:** Christopher L. Agee

## Faculty

### Professors:

Marjorie Levine-Clark, PhD, University of Iowa

### Associate Professors:

Christopher Agee, PhD, University of California, Berkeley

Ryan Crewe, PhD, Yale University

Gabriel Finkelstein, PhD, Princeton University

Peter Kopp, PhD, University of Nevada, Reno

Kariann A. Yokota, PhD, Yale University

### Assistant Professors:

Xiaofei Gao, PhD, University of California, Santa Cruz

Rachel Gross, PhD, University of Wisconsin, Madison

Dale Stahl, PhD, Columbia University

William E. Wagner, PhD, University of California, Berkeley

### Senior Instructors:

James E. Fell, PhD, University of Colorado Boulder

Richard D. Smith, PhD, University of Colorado Boulder

**Instructors:**

Brandon Mills PhD, University of Illinois at Urbana-Champaign  
Christine Sundberg, MA, University of Colorado Denver

**Associate Professors Clinical Teaching Track:**

Cameron Blevins, PhD, Stanford University

**Assistant Professors Clinical Teaching Track:**

John G. Whitesides, PhD, University of California, Santa Barbara

**Emeritus Professors:**

Frederick S. Allen, PhD, Harvard University  
Mary S. Conroy, PhD, Indiana University  
Rebecca Hunt, PhD, University of Colorado Boulder  
Pamela W. Laird, PhD, Boston University  
Thomas J. Noel, PhD, University of Colorado Boulder  
Carl E. Pletsch, PhD, University of Chicago  
Myra L. Rich, PhD, Yale University  
James B. Whiteside, PhD, University of Colorado  
James B. Wolf, PhD, University of California, Los Angeles

## Introduction

The special responsibility of historical studies is understanding the past. History courses integrate many branches of knowledge, cutting across the lines of the social sciences and the humanities, and even the natural sciences. Identifying forces of stability and processes of change, history students develop their research, writing and analytical skills, which serve them well beyond their university years.

## Programs

### Certificates

# GLOBAL HISTORY GRADUATE CERTIFICATE

## Introduction

The Global History Graduate Certificate provides CU Denver graduate students and the wider community the opportunity to explore topics in Global History while simultaneously learning professional skills in historical research and historical dissemination. This Certificate is designed for students interested in pursuing a graduate-level education in Global History and for professionals seeking accreditation and/or promotion in the fields of education, museums, historic preservation, government, law, and the arts.

The certificate can stand on its own or it can serve as a stepping stone to a Master's Degree in History.

Upon successful completion of the certificate, students will:

- Be able to pursue independent historical research projects
- Be able to analyze debates among historians
- Be able to analyze historical documents and develop arguments from them

## Program Delivery

This program has one on-campus requirement and the remainder of the certificate can be completed on campus or online.

## Declaring This Certificate

Applicants must have a B.A. or B.S. degree.

Interested students must register their intent to complete the certificate with the History Department Graduate Advisor, Ryan Crewe (Ryan.Crewe@ucdenver.edu). Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

## General Requirements

[Click here](#) for information about Academic Policies.

## Program Requirements

1. Students must complete a minimum of 12 HIST credit hours.
2. Students must complete all HIST credit hours at the graduate level (5000 and above).
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA.
4. All credits for the certificate must be completed with CU Denver faculty.

## Required Courses

Complete the following required course:

- HIST 6013 - Introduction to the Professional Study of History

Complete **one** of the following:

- HIST 6931 - Readings: Special Subjects in History
- HIST 6989 - Seminar: Special Subjects in History

Complete **two** of the following approved elective courses:

- HIST 5027 - Enlightenment and Revolution
- HIST 5028 - Nations and Classes: 19th Century Europe
- HIST 5029 - Age of Anxiety in Europe
- HIST 5030 - Europe During the World Wars
- HIST 5031 - Contemporary Europe
- HIST 5032 - Globalization in World History Since 1945
- HIST 5035 - Crisis and Transformation: Europe's 20th Century
- HIST 5046 - Victorians and Victorianism
- HIST 5051 - Britain and The Empire
- HIST 5055 - The Atlantic Slave Trade: Africa, Caribbean and U.S.
- HIST 5062 - Modern France: 1789 to the Present
- HIST 5071 - Modern Germany
- HIST 5074 - Post-War Germany
- HIST 5075 - Travel Stories and Origins of Cultural Anthropology
- HIST 5076 - History of Modern Science
- HIST 5083 - Russia Since 1917
- HIST 5260 - Digital Studies and Strategies
- HIST 5303 - Sex and Gender in Modern Britain
- HIST 5347 - History of Biology
- HIST 5348 - Mind and Malady: A History of Mental Illness
- HIST 5411 - Modern Mexico

- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5414 - Nationalism and State Building in Latin America, 1750-1850
- HIST 5415 - Social Revolutions in Latin America
- HIST 5417 - Commodities and Globalization
- HIST 5420 - Traditional China: China to 1600
- HIST 5421 - Modern China
- HIST 5422 - Lving thr Mao's China: Life, Mat. Cult, Movies, 1949-76
- HIST 5431 - Modern Japan
- HIST 5451 - Southern Africa
- HIST 5455 - African Struggle for Independence
- HIST 5461 - The Modern Middle East
- HIST 5462 - Islam in Modern History
- HIST 5471 - The Second World War
- HIST 5472 - The 1950s: Korean War, the Cold War and Social Transformation
- HIST 5475 - The Vietnam War
- HIST 5490 - Weapons of Mass Destruction
- HIST 5621 - Explorers and Exploration
- HIST 5622 - Oceans In History

# HISTORIC PRESERVATION GRADUATE CERTIFICATE

## Graduate Certificate in Historic Preservation

The University of Colorado Denver Graduate Certificate in Historic Preservation is an interdisciplinary collaboration between the College of Architecture and Planning and the History Department. The certificate program is open to any qualified graduate student or non-degree seeking student with a bachelor's degree.

The certificate provides CU Denver students and the wider community with foundational knowledge and skills in Historic Preservation, a field that enhances studies and professional work in areas such as architecture, heritage tourism, historic preservation, national park interpretation, planning, public history, urban studies and related fields.

The certificate can stand on its own, can complement a graduate program in Architecture, History, or Urban Planning; or can serve as a beginning to graduate studies. It can also be a stepping stone to further work in Historic Preservation with the College of Architecture and Planning's Masters of Science in Historic Preservation.

**Applicants must have a B.A. or B.S. degree.**

Interested students must register their intent to complete the certificate with the Director of the Public History & Preservation Program, CU Denver History Department. Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

Those students already admitted to a degree program in the College of Architecture and Planning should begin the process by contacting program co-director, Professor Christopher Koziol (Christopher.koziol@ucdenver.edu). All others should contact the Department of History Director of the Public History & Preservation Program, Professors Tom Noel (tom.noel@ucdenver.edu) and Peter Kopp (peter.kopp@ucdenver.edu).

All courses in the certificate program must be taken in residency with CU Denver faculty. Students must maintain a 3.0 GPA, and no course below B- will count towards the certificate.

Graduate students in the History Department can count courses for both their major or minor fields and the requirements for the certificate. Graduate students in the College of Architecture and Planning should discuss credit distributions with their academic advisor.

## Admissions Requirements

- Applicant must have a B.A. or B.S. Degree.
- Applicant applies to the above designated co-director.
- Applicants must provide a transcript, statement of purpose, and two letters of recommendation.

## Program Requirements

1. Students must complete a minimum of 18 credits from approved courses.
2. Students must complete all courses at the graduate (500 and above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.

## Required Courses

Complete **two** of the following courses:

- HIST 5232 - Historic Preservation      **OR**
- HIST 6989 - Seminar: Special Subjects in History

*One of these courses is offered once a year by the History Department.*

- HIPR 6010 - Preservation Theory and Practice

*This course is offered every fall by the College of Architecture and Planning.*

**Total 6 credits**

## **Electives**

These remaining 12 credit hours should be distributed so that at least 3 hours are from each of the two participating colleges, CLAS(HIST) and CAP(ARCH and HIPR), and hence, no more than 9 hours from the other. Be sure to consult your preservation advisor (Profs. Koziol or Noel) on your course selection.

- HIST 5228 - Western Art and Architecture
- HIST 5229 - Colorado Historic Places
- HIST 5240 - National Parks History
- HIST 5245 - Heritage Tourism
- HIST 5939 - Internship

OR

- HIPR 6930 - Internship
- HIST 6950 - Master's Thesis

OR

- HIST 6952 - Master's Project: Public History
- HIPR 6110 - Regionalisms & the Vernacular
- HIPR 6210 - Historic Buildings in Context
- HIPR 6220 - Adaptive Reuse: Business and Practice
- HIPR 6310 - Documentation, Analysis, Representation
- HIPR 6410 - Urban Conservation: Context for Reuse
- HIPR 6510 - Building Conservation
- HIPR 6610 - Reading the City
- ARCH 6210 - History of American Architecture
- ARCH 6212 - History of Modern Architecture

# **U.S. HISTORY GRADUATE CERTIFICATE**

## Introduction

The U.S. History Graduate Certificate provides CU Denver graduate students and the wider community the opportunity to explore topics in United States History while simultaneously learning professional skills in historical research and historical dissemination. This Certificate is designed for students interested in pursuing a graduate-level education in United States History and for professionals seeking accreditation and/or promotion in the fields of education, museums, historic preservation, government, law, and the arts.

The certificate can stand on its own or it can serve as a stepping stone to a Master's Degree in History.

Upon successful completion of the certificate, students will:

- Be able to pursue independent historical research projects
- Be able to analyze debates among historians
- Be able to analyze historical documents and develop arguments from them

## Program Delivery

This program has one on-campus requirement and the remainder of the certificate can be completed on campus or online.

## Declaring This Certificate

Applicants must have a B.A. or B.S. degree.

Interested students must register their intent to complete the certificate with the History Department Graduate Advisor, Ryan Crewe (Ryan.Crewe@ucdenver.edu). Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

## General Requirements

[Click here for information about Academic Policies.](#)

## Program Requirements

- Students must complete a minimum of 12 HIST credit hours.
- Students must complete all HIST credits for the certificate at the graduate (5000 or above) level.

- Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA.
- Students must complete all HIST credits for the certificate with CU Denver faculty.

## Required Courses

Complete the following required course:

- HIST 6013 - Introduction to the Professional Study of History

Complete **one** of the following 6000-level courses:

- HIST 6931 - Readings: Special Subjects in History (may be taken as an elective, if not taken in this category)
- HIST 6989 - Seminar: Special Subjects in History (may be taken as an elective, if not taken in this category)

Complete **two** of the following approved elective courses:

- HIST 5201 - Core Themes in U.S. History
- HIST 5209 - Race, Religion, and Belonging
- HIST 5210 - The American Revolution
- HIST 5212 - Civil War and Reconstruction
- HIST 5216 - History of American Popular Culture
- HIST 5217 - Consumer Culture
- HIST 5220 - U.S. Foreign Policy Since 1912
- HIST 5225 - Urban America: Colonial Times to the Present
- HIST 5226 - Capitalism in America
- HIST 5227 - American West
- HIST 5228 - Western Art and Architecture
- HIST 5229 - Colorado Historic Places
- HIST 5230 - Women in the West
- HIST 5234 - Introduction to Public History
- HIST 5236 - Colorado Mining and Railroads
- HIST 5238 - U.S. History Through Fiction
- HIST 5240 - National Parks History
- HIST 5242 - Oral History
- HIST 5243 - Public History Administration
- HIST 5244 - Interpretation of History in Museums: Exhibits and Education
- HIST 5245 - Heritage Tourism
- HIST 5260 - Digital Studies and Strategies

- HIST 5306 - Survey of Feminist Thought
- HIST 5307 - History of Sexuality
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5343 - Women & Gender in US History
- HIST 5491 - United States History, 1865-1919
- HIST 5492 - United States History, 1919-1945
- HIST 5493 - United States History, 1945-1973
- HIST 5494 - Red and Blue America: U.S. History, 1973-Present

## Master of Arts

# HISTORY MA

- ▶ Graduate School Policies and Procedures apply to this program

The master of arts in history requires 36 semester hours (12 courses). Students applying for admission to the program should have some background in history, though not necessarily a BA in the subject. The department encourages applications from individuals of any age interested in continuing or resuming their education. Graduate students in history develop skills in critical thinking, writing and independent research. Our program prepares students for a wide variety of professions, including teaching, government service, museum and archive management, and historic preservation, as well as further degree work in history, law, librarianship and business. The department expects that students graduating with an MA in history will master the following general skills for their degrees:

- The ability to pursue independent historical research projects
- The ability to analyze historiographical arguments
- The ability to analyze primary documents and develop arguments from them
- The ability to create bibliographies using archival, library, and Internet resources
- The ability to write in a variety of formats, including historiographical essays, book reviews, and research papers

Students will also master knowledge of the basic historical content of both their major and minor fields, and an understanding of the historiographies and historical methods in their major and minor fields.

## Admission Requirements

- In addition to the general admission requirements of the Graduate School, the Department of History requires an undergraduate GPA of at least 3.25.
- Applicants are required to submit a sample of written work, usually a term paper or project of similar length.

- All applications must include three letters of recommendation, preferably from college or university faculty.
- Applicants should address any gaps, weaknesses, or special circumstances in their academic records in the statement of purpose portion of the application. In special circumstances, the department may modify its admission standards.

## **APPLICATION DEADLINES**

**March 15**            **Fall admission**

**October 15**        **Spring admission**

Admission decisions are made by a graduate committee composed of the graduate advisor and faculty representing fields in U.S., European, global, and public history.

## **Graduate School Policies**

All history MA students are subject to Graduate School policies related to graduate study, as well as to all relevant university policies. These policies cover such topics as time limits on degree completion, changing degree programs, incomplete grades, and more. Further information on these policies can be found in the Graduate School section of this online catalog.

## **Transfer Credits**

With approval from the graduate advisor and the appropriate faculty, students may transfer up to nine graduate-level credits accrued before enrollment in the CU Denver MA history degree program, provided that they earned a grade of B+ or better in these courses. Students must submit a syllabus for each course they wish to transfer, and faculty may require students to complete additional assignments to meet the expectations of the department. The department will not accept transfer of courses comparable to HIST 6013, Introduction to the Professional Study of History.

## **Grade Requirements**

The history department requires that graduate students maintain a cumulative GPA of 3.0 and will not accept grades lower than B- (2.7) toward the completion of course work for the master's degree. Students who earn less than a B- in HIST 6013 must retake the class.

## **Residency Requirements**

The history department requires a residency of at least one academic year for the degree.

## **Graduate Advising**

Early in their first semester, students should contact the history department graduate advisor to discuss their path through the program and to receive advice regarding the selection of major and minor fields.

## **Degree Tracking Responsibility**

Although faculty will provide reasonable guidance, it is up to students to monitor their own progress through the program in consultation with the graduate advisor and their major and minor advisors; this includes knowledge and understanding of application and graduate deadlines, degree requirements, comprehensive exam expectations and processes, thesis guidelines, etc.

## **Choosing Advisors and Fields of Study**

All history MA candidates choose a major field and a minor field. Students will take courses in these fields and will be tested in these fields. After consulting with the graduate advisor, students are responsible for securing two field advisors, one to oversee their progress in the major field, the other to oversee their minor field. All students should have chosen their fields and advisors by the end of the semester in which they have complete 12 credit hours. Students will also need a third advisor for the comprehensive examinations. This third advisor is typically in their major field and students should always consult with them during preparation for the examinations.

## **Major Fields, Minor Fields, and Concentrations**

The MA in history seeks to provide students with a balance of breadth and depth in the study of history. Major fields are broad areas of study within which students gain a general picture of historical processes. Concentrations provide focus for developing expertise within the major, either regionally or thematically. Minor fields provide a complementary or comparative area and must sit outside the major field.

Advisors and students together will work out Plans of Study, which indicate the courses students intend to take to meet their requirements, based on their selection of major and minor fields. *Students should make every effort to enroll in courses that best fit their major field, major concentration and minor field.*

The department has core readings for the Public History and US History fields. Students will draw on these readings for their comprehensive exams. Students working in all fields will coordinate their readings with their major and minor advisors.

### **Major Field Concentrations**

Students work with advisors to select one of the major field concentrations listed below. Concentrations provide thematic or regional focus to a broad geographical or methodological major (e.g. for the global history major, students could concentrate on trade, borders, imperialism, etc.. or any of the areas of regional expertise of our faculty). Readings for the major field concentration are in addition to the core reading list. Note that students may select their concentrations and the options for minors from the same lists, below.

## **Minor Fields**

Students can define their minor field as a specialization within one of the four major fields or as topics from the list of concentrations. Note that students may select their concentrations and the options for minors from the same lists, below.

**Students must select their major and minor fields from any two of the following three groups. (Students may not select their major and minor fields from the same group).**

### **Group 1: Geographical Concentrations**

- East Asia
- Latin America
  - Mexico
  - South America
- Middle East
- Europe
  - Germany
  - France
  - Britain
  - The Mediterranean
- United States
  - Colonial and Early Republic
  - Nineteenth Century
  - U.S. West
  - Twentieth Century
  - U.S. Foreign Policy
  - Colorado
- Global
  - Atlantic World

- Pacific World

## **Group 2: Thematic Concentrations**

- Colonialism and Imperialism
- Cultural History
- Social History
- Foreign Policy
- Economic and Business History
- Environmental History
- Gender and Sexuality
- Citizenship and National Identity
- War, Revolution and Genocide
- Globalization
- Urban History
- Frontiers and Borderlands
- Race and Ethnicity
- Science, Medicine, and Society
- Intellectual History
- Material Culture
- Migration and Immigration
- Policing and Legal History
- Indigenous Histories

## **Group 3: Public History**

- Memory and Community
- Museum Studies
- Historic Preservation

*Note: Majors in Public History must follow the Plan of Study for Public History.*

## **Degree Requirements**

All history MA students must have a major field and a minor field, and they must complete half of their course work at the 6000 level.

## **Required Introductory Course**

- HIST 6013 - Introduction to the Professional Study of History

**Total: 3 Hours**

## **Major Field**

### **Core Course in Major Field (3-6 semester hours)**

Public history and U.S. history major fields require core courses covering major approaches and themes. The core courses familiarize students with the field in a broad sense.

### **Research Seminars (3-6 semester hours)**

Research seminars focus on students' development of an original, primary research paper. One 3-semester-hour research seminar is required of all students. A second research seminar is required for students not in public history; the second 3 semester hours can be taken within the major or minor field.

### **Major Electives (9-12 semester hours)**

Major electives are made up of courses in the major and concentration, including readings courses, that address specific field historiographies, and optional extended research credits. Students who choose to do a thesis may apply 6 thesis semester hours (HIST 6950) toward the major electives requirement.

**Total: 18 Hours**

## **Minor Field**

### **Minor Electives**

Minor electives are made up of courses in the minor field, including readings courses, which address specific field historiographies, or research seminars.

**Total: 12 Semester Hours**

## **Open Elective**

Students may use the open elective to explore a course outside their major or minor or to do extra course work in one of their fields.

**Total: 3 Hours**

## **Degree Total: 36 Hours**

### **INDEPENDENT STUDY AND/OR INTERNSHIP**

Candidates may register for up to 6 hours of internships or independent study, only one of which may be at the 6000-level. Students will not be allowed to fulfill the research seminar requirement with an independent study or internship. Any independent study or internship at the 6000-level needs the permission of the graduate advisor. Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

- HIST 5840 - Independent Study: History
- HIST 6840 - Independent Study: HIST
- HIST 6939 - Internship

## **COMPREHENSIVE EXAMINATIONS**

All history MA candidates must pass a comprehensive examination in the major and minor fields after the completion of course work and generally before embarking on a thesis, curriculum project or public history project. The comprehensive exam evaluates students' knowledge of their course work and their reading lists for their major, minor and concentration. The exam consists of a take-home written section, with broad essay questions in both the major and minor fields; this is followed by an oral exam with the student's faculty committee. In answering their exam questions, students are expected to construct arguments and to show mastery of the historiographies, narratives and historical content in their fields. The comprehensive exam is administered and evaluated by a committee of the major advisor, the minor advisor and an outside reader from the history faculty. Students should expect to read 80-100 books combined, as well as significant articles, in their major and minor fields. When appropriate, students may enroll in HIST 6940, Comprehensive Examination, a one-credit requirement connected to faculty commitment to preparing students for their examination.

- HIST 6940 - Comprehensive Exam

## **Master's Degree Extended Research Options**

The MA program in history offers a set of courses in which students can develop extended research interests. Students must select an advisor and develop a proposal for a specific research agenda in the semester before beginning work on a project.

### **REQUIRED PUBLIC HISTORY THESIS (HIST 6950) OR PROJECT (HIST 6952)**

Students majoring in public history must complete either a thesis (6 semester hours) or a project (usually 3 semester hours).

### **OPTIONAL THESIS FOR STUDENTS IN U.S., GLOBAL AND EUROPEAN HISTORY (HIST 6950)**

Students majoring in U.S., Global, or European history can choose to write a thesis (6 semester hours in their major field).

### **OPTIONAL ADVANCED HISTORY CURRICULUM DEVELOPMENT (HIST 6951)**

Students who undertake their master's program when they are already teachers or who intend to become teachers can choose to construct curriculum projects relevant to their teaching practice. See the separate section below on "Opportunities for Teachers and Teachers-in-Training."

- HIST 6950 - Master's Thesis
- HIST 6951 - Masters Project: Advanced History Curriculum Development
- HIST 6952 - Master's Project: Public History

## **Thesis Requirements**

Students writing theses are expected to develop an original research agenda resulting in an extended paper. Students work with their major field advisor, who will help guide them through the process of research and writing. Students will enroll for six credit hours in HIST 6950 over one or more semesters to complete their theses. Before registering for HIST 6950, students should have a thesis proposal and initial bibliography approved by their major advisor.

A thesis is evaluated by a committee of three faculty, including the major advisor and two other faculty members chosen by the student in consultation with the major advisor. Upon completion of the thesis, the student meets with the committee members, who ask questions about the research and conclusions which the student must defend. In most instances, the committee will require further revisions, sometimes major in scope, before the thesis is accepted and cleared for submission to the Graduate School in fulfillment of degree requirements.

## **Project Requirements**

In lieu of a thesis, public history majors may choose to enroll in three credit hours of HIST 6952 to complete a public history project. Projects, which are usually conducted in collaboration with a public history organization, can entail creating an exhibit, developing a museum master plan or organizing an archival collection, conducting a preservation survey, or other activities as approved by their advisor. Students are required to prepare an analytical paper describing the process and results of their project.

## **Opportunities for Teachers and Teachers-in-Training**

### **Curriculum Projects**

Licensed teachers and students who intend to become teachers may choose to complete a curriculum development project. Students arrange curriculum development projects with a sponsoring faculty member. Generally, students are expected to develop and submit a complete course curriculum plan for each 3-semester-hour project. Projects need to show evidence of familiarity with the relevant historiographies and primary sources. Students may apply the hours from HIST 6951 to either the major field or the minor field, depending on the project subjects. Curriculum plans must meet minimum criteria established by the history department in the document Advanced History Curriculum Development Projects.

- HIST 6951 - Masters Project: Advanced History Curriculum Development  
(3 or 6 semester hours in their major field, or 3 semester hours in their major and possibly 3 semester hours in their minor, if a student elects to do a second project)

## **Secondary Teacher Licensure**

Students interested in secondary teacher licensure should consult with the School of Education and Human Development. See the Urban Community Teacher Education Program for information.

# **PUBLIC HISTORY, MA IN HISTORY**

►Graduate School Policies and Procedures apply to this program.

The MA program in history offers graduate-level major and minor fields in public history. Public history is a field of study that applies historical methods to the public sphere. This graduate major requires a concentration, in either museum studies or historic preservation. Public history majors can minor in any subspecialty the department currently offers. Students majoring in U.S., European or Global history can also minor in public history.

Admission Requirements-See History MA

## **Degree Requirements**

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete all courses at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete all credits with CU Denver faculty.

## **Required Introductory Course**

- HIST 6013 - Introduction to the Professional Study of History

**Total: 3 Hours**

## **Major Courses**

- HIST 5234 - Introduction to Public History

Students who choose to concentrate in museum studies or historic preservation must take either

- HIST 5231 - History in Museums (for museum studies majors)  
-OR-
- HIST 5232 - Historic Preservation (for historic preservation majors)

## **Research Seminar (3 hours)**

Research seminars focus on students' development of an original, primary research paper.

## **Major Electives (9-12 hours)**

Electives are made up of courses in public history, which focus on methodology and practice and thesis or project credits. These courses include:

- HIST 5133 - Management of Material Culture and Museum Collections
- HIST 5228 - Western Art and Architecture
- HIST 5229 - Colorado Historic Places
- HIST 5240 - National Parks History
- HIST 5242 - Oral History
- HIST 5243 - Public History Administration
- HIST 5244 - Interpretation of History in Museums: Exhibits and Education
- HIST 5245 - Heritage Tourism
- HIST 6992 - Seminar: Colorado Studies

**Total: 18 Hours**

## **Minor Electives**

Electives are made up of courses in the minor field, including readings courses, which address specific field historiographies, or research seminars.

**Total: 12 Hours**

## **Open Elective**

Students may use the open elective to explore a course outside their major or minor or to do extra course work in one of their fields.

**Total: 3 Hours**

**Total: 36 Hours**

### **Independent Studies and/or Internships**

Candidates may register for up to 6 hours of internships or independent study, only one of which may be at the 6000-level. Students will not be allowed to satisfy the research seminar requirement via independent study. Any independent study or internship at the 6000-level needs the permission of the graduate advisor. Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

- HIST 5840 - Independent Study: History
- HIST 6840 - Independent Study: HIST
- HIST 6939 - Internship

### **Comprehensive Examinations**

All history MA candidates must pass a comprehensive examination in the major and minor fields after the completion of course work and before embarking on a thesis, curriculum project or public history project. The comprehensive exam evaluates students' knowledge of their course work and their reading lists for their major, minor and concentration. In answering their exam questions, students are expected to construct arguments and to show mastery of the historiographies, narratives and historical content in their fields. The comprehensive exam is administered and evaluated by a committee of the major advisor, the minor advisor and an outside reader from the history faculty.

### **Master's Degree Extended Research Options**

The MA program in history offers a set of courses in which students can develop extended research interests. Students must select an advisor and develop a proposal for a specific research agenda in the semester before beginning work on a project.

#### **REQUIRED PUBLIC HISTORY THESIS (HIST 6950) OR PROJECT (HIST 6952)**

Students majoring in public history must complete either a thesis (6 semester hours) or a project (3 semester hours).

#### **OPTIONAL ADVANCED HISTORY CURRICULUM DEVELOPMENT (HIST 6951)**

Students who undertake their master's program when they are already teachers can choose to construct curriculum projects relevant to their teaching practice. See the separate section below on "Opportunities for Teachers and Teachers-in-Training."

- HIST 6950 - Master's Thesis
- HIST 6951 - Masters Project: Advanced History Curriculum Development
- HIST 6952 - Master's Project: Public History

## **Thesis Requirements**

Students writing theses are expected to develop an original research agenda resulting in an extended paper. Students work with their major field advisor, who will help guide them through the process of research and writing. Students enroll for six credit hours in HIST 6950 to complete their theses. Before registering for HIST 6950, students must have a thesis proposal and initial bibliography approved by their advisor.

A thesis is evaluated by a committee of three, including the major advisor and two other faculty members chosen by the student in consultation with the major advisor. Upon completion of the thesis, the student meets with the committee members, who ask questions about the research and conclusions which the student must defend. In many instances, the committee will require further revisions, sometimes major in scope, before the thesis is accepted and cleared for submission to the Graduate School in fulfillment of degree requirements.

## **Project Requirements**

In lieu of a thesis, public history majors may choose to enroll in one semester of HIST 6952 to complete a public history project. Projects, which are usually conducted in collaboration with a public history organization, can entail creating an exhibit, developing a museum master plan, education program or collection management plan/project, or organizing an archival collection, conducting a preservation survey or similar projects as worked out with their advisor. Students are required to prepare a paper describing the process and results of their project.

- HIST 6952 - Master's Project: Public History

## **Opportunities for Teachers and Teachers-in-Training**

### **Curriculum Projects**

Licensed teachers and teachers-in-training enrolled in the history graduate program may choose to complete a curriculum development project. Students arrange curriculum development projects with a sponsoring faculty member. Generally, students are expected to develop and submit a complete course curriculum plan for this 3-semester-hour project. Projects need to show evidence of familiarity with the relevant historiographies and primary sources. Students may apply the credits from HIST 6951 to either the major field or the minor field, depending on the project subjects. Curriculum plans must meet minimum criteria established by the history department in the document Advanced History Curriculum Development Projects.

- HIST 6951 - Masters Project: Advanced History Curriculum Development (3 semester hours in their major field or minor field)

## Secondary Teacher Licensure

Students interested in secondary teacher licensure should consult with the School of Education and Human Development. See the Urban Teacher Education Program for information.

## Faculty

### Assistant Professor:

Margaret L. Woodhull, PhD, University of Texas, Austin

### Associate Professor:

Omar Swartz, PhD, Purdue University, JD, Duke University

### Instructors:

Lorna Hutchison, PhD, McGill University

The Master of Humanities degree program offers graduate interdisciplinary studies designed for recent university graduates or those who have graduated less recently and are now seeking intellectual enrichment, career change or preparation for a PhD or professional school. Some students are teachers or other professionals seeking additional training to expand their expertise. Many enroll in the program for the sheer satisfaction of intellectual enrichment. It is ideal for students whose professional and personal obligations require flexibility and accessibility. Whether they are part-time or full-time students, students are able to pursue their interests across disciplinary boundaries and enroll in courses from a number of departments. Students who pursue the Master of Humanities will take courses from disciplines traditionally included in the category of liberal arts, such as literature, philosophy, history, communication, fine arts, art history, theatre and music. But they may also include appropriate coursework from the social sciences or other areas. Each student's program is supervised by an MH faculty advisor.

## Programs

## Master of Humanities

# HUMANITIES MH

► Graduate School Policies and Procedures apply to this program

## Requirements for Admission

General rules for admission into the Graduate School, as well as the following apply to admission into the MH program:

- evidence of a bachelor's degree
- an official copy of transcripts from all community colleges, colleges, and universities attended
- overall GPA of at least 3.2 out of 4.0
- a writing sample
- three letters of recommendation (at least two from academic sources)
- appropriate undergraduate training or professional background, or experience that provide evidence of ability to pursue the MH degree
- a typed statement specifying the goal of advanced study in the humanities expressed in clear, correct, and effective English. Applicants should provide a statement of their background (education and experience) and its relevance to their proposed interdisciplinary graduate work, and why this graduate program is relevant to their interests.
- standardized test scores are not required, but will be considered if submitted

After meeting all other requirements for admission, applicants may be required to have an interview to discuss their interest in the program and their plans for study. For out-of-state applicants, an appropriate substitute for the interview may be determined by the directors.

## Provisional Admission:

Applicants may be admitted as provisional-status graduate students if their GPA is low and their complete record indicates a high probability of success.

## Non-degree Students:

Potential applicants may take CU Denver graduate-level courses as non-degree seeking students (unclassified student with a bachelor's degree) if they:

1. wish to strengthen their record in order to demonstrate their potential to successfully complete courses in the program

-or-

2. wish to start coursework in the program prior to completing their application, with the understanding that taking courses does not guarantee admission

Up to 12 semester hours of CU Denver graduate-level work taken as a non-degree student or taken from another university may be accepted by the program once a student has been admitted to the program. For further information on non-degree graduate student status, see the Information for Graduate Students section of this catalog. In the case of CU Denver graduate students transferring to the MH program, previous coursework may be accepted as appropriate to the MH plan of study.

## **International Students:**

International students must also meet CU Denver requirements for international admission. See the Information for International Students section of this catalog or call 303-315-2230 for further information.

## **Degree Requirements**

The Master of Humanities (MH) program is a 36 credit hour program, of which 30 hours must meet all specifications of the Graduate School. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. A grade below B- in any given course will not be counted toward the degree. All graded attempts in required and elective courses are calculated in the major GPA. Courses credited toward the MH degree must typically be taken at CU Denver (a maximum of 12 graduate credit hours may be transferred from other institutions after matriculating into the MH program, subject to the MH director's approval). Students wishing to pursue study abroad options must seek advisor approval in advance.

Students may pursue a general MSS degree or concentrate their studies and coursework on an approved track.

Each student's program is supervised by MHMSS faculty. All independent study, project, and thesis contracts must be approved in advance by the program director. A total of two independent study courses and one internship may count toward the degree. Only one graduate-level online course (up to 3 hours) may be taken toward the degree, with prior approval. A maximum of two 4000-level undergraduate courses may apply, with faculty approval. Remaining coursework must be 5000-level or higher and must be completed with CU Denver faculty or approved study away programs. All students must complete and pass a final project or thesis and an oral comprehensive defense of that work, in order to graduate.

## **Three Required Core Seminar Courses**

Take ***all*** of the following courses:

- HUMN 5025 - Foundations and Theories of Interdisciplinary Humanities  
Must be taken during the first year, offered in the fall only.
- HUMN 5013 - Methods and Practices of Graduate Interdisciplinary Humanities  
Must be taken during the first year, offered in the spring only.
- HUMN 5924 - Directed Research and Reading in Interdisciplinary Humanities

Students should take this course after they have completed 21-24 credit hours and are ready to write a proposal for their thesis or project. This course is always offered in the spring and occasionally in the fall, as needed.

**Total: 9 Credit Hours**

## **Electives**

Students must complete a total of 21-24 credit hours. Students completing a project rather than a thesis take 24 hours of electives, while thesis students complete 21 hours of electives. Students may choose to create their own curriculum from at least two disciplines addressing their specific research interest. Alternatively, students may choose to follow an approved specialized track. Prior to taking electives, students must meet with a MHMSS program faculty advisor and establish their course of study. If students decide to change their course of study or want to substitute approved coursework, they must meet with a MHMSS program advisor in advance and gain pre-approval.

**Study Abroad:** Students wishing to count credits accrued from a study abroad program while pursuing the MH must follow the rules of the Graduate School and must have approval of the program director in advance of studying abroad.

**Total: 21-24 Credit Hours**

## **Thesis or Project**

In order to proceed with a project or thesis, all students must submit a proposal and gain approval from three faculty members and the program directors.

- HUMN 5950 - Master's Thesis
- HUMN 5960 - Master's Project

**Total: 3 or 6 Credit Hours**

## Oral Exam

An oral exam defending the project or thesis before a committee of three faculty members must be passed in order to graduate.

## Degree Total: 33-36 Credit Hours

## MH Elective Pathways:

### General MH Track

Students pursuing the general MH degree track create a course of study based on their individual interests and goals. In consultation with a faculty advisor, students choose two or three academic disciplines as areas of concentration. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

### Specialized MH Tracks

Students may also focus in one of the tracks in the Master of Humanities program: **Ethnic Studies, Health Humanities, Philosophy and Theory, Social Justice, Visual Studies or Women and Gender Studies.** Tracks allow students to concentrate their studies in a defined field designed by faculty. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

### Ethnic Studies Track

Students pursuing the Ethnic Studies track explore the construction of race and ethnicity by governments and communities through the intersection of popular culture and public policy in both the historical and contemporary contexts.

*In addition to the MH Core requirements, students must:*

***Complete at least one ethnic studies methods/theory course from the list below:***

- ETST 5000 - Research Methods in Ethnic Studies
- EDFN 5001 - Problematizing Whiteness: Educating for Racial Justice

***Complete a minimum of 12 credit hours of approved ethnic studies related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- ANTH 5350 - Anthropology of Globalization
- COMM 5270 - Intercultural Communication

- EDFN 5050 - Critical Issues in American Education
- ENGL 5220 - African-American Literature
- ENGL 5460 - Contemporary World Literature
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5415 - Social Revolutions in Latin America
- HIST 5455 - African Struggle for Independence
- HIST 5462 - Islam in Modern History
- HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- SSCI 5540 - Law, Diversity and Community in United States History
- PSCI 5094 - Seminar: Urban Politics
- PSCI 5145 - Indigenous Politics
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5256 - Seminar: National Question and Self-Determination
- PSCI 5446 - Advanced Indigenous Peoples' Politics
- PSCI 5545 - Immigration Politics
- PSCI 5914 - Community Organizing and Community Development
- SOCY 5050 - Health Disparities
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SOCY 5690 - Crime and Inequality Over the Life Course
- SPAN 5020 - Spanish Sociolinguistics
- SPAN 5060 - Dialects of the Spanish-Speaking World
- SPAN 5076 - Spanish in Colorado
- SPAN 5080 - Spanish in the United States
- SPAN 5521 - Mexican Literature I: pre-Columbian and Colonial
- SPAN 5522 - Mexican Literature II: 19th to 21st Centuries

***Complete a project or thesis on an approved ethnic studies related topic.***

## **Health Humanities Track**

Health Humanities teaches students to the ways in which humanities disciplines interrogate relationships among health, medicine and society and what those disciplines reveal about biomedical knowledge as well as healthcare policies and practices.

*In addition to the MSS Core requirements, students must:*

***Complete all required foundations courses from the list below:***

- HEHE 5000 Foundations of Health Humanities (offered at the Anschutz Medical Campus)

- HEHE 5001 Foundations of Health Care Ethics (offered at the Anschutz Medical Campus)

***Complete a minimum of 12 credit hours of approved health humanities related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 5290 - Anthropology and Public Health
- COMM 5500 - Health Communication
- COMM 5550 - Rhetorics of Medicine & Health
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- GEOG 5235 - GIS Applications in the Health Sciences
- GEOG 5710 - Disasters, Climate Change, and Health
- HEHE 5250 Media, Medicine and Society (on the Anschutz Campus)
- HEHE 5350 Narrative Principles and Practices in Healthcare (on the Anschutz Campus)
- HEHE 5750 Pain Seminar (on the Anschutz Campus)
- HEHE 5800 Ethics Medicine and the Holocaust (on the Anschutz Campus)
- HIST 5347 - History of Biology
- HIST 5348 - Mind and Malady: A History of Mental Illness
- HLTH 6070 - International Health Policy and Management
- PHIL 5242 - Bioethics
- PSCI 5354 - Seminar: Environmental Politics and Policy

***Complete a project or thesis on an approved health humanities related topic.***

## **Philosophy and Theory Track**

The Philosophy and Theory Track in the Master of Humanities Program offers students an interdisciplinary approach to studying philosophy, critical theory, and related theories of criticism and analysis in various Humanities disciplines.

*In addition to the MH Core requirements, students must:*

***Complete a 3 credit philosophy/theory course approved by program director.***

***Complete a minimum of 15 credit hours of approved philosophy/theory related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 6103 - Current Theory in Ethnography
- ENGL 5420 - Film Theory and Criticism
- HIST 5306 - Survey of Feminist Thought
- HUMN 5013 - Methods and Practices of Graduate Interdisciplinary Humanities
- HUMN 5020 - Foundations and Theories of Interdisciplinary Social Science

- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- HUMN 5750 - Philosophical Psychology
- HUMN 5984 - Topics: Interdisciplinary Humanities
- PHIL 5101 - Pragmatism: Classical American Philosophy
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PHIL 5220 - Aesthetics and the Philosophy of Art
- PHIL 5242 - Bioethics
- PHIL 5260 - Philosophy of Law
- PHIL 5300 - Philosophy of Mind
- PHIL 5550 - Paris 1910: Art, Philosophy and Psychology
- PHIL 5600 - Philosophy of Religion
- PHIL 5730 - Philosophy and Literature
- PHIL 5750 - Introduction to Phenomenology
- PHIL 5780 - Heidegger
- PHIL 5790 - Nietzsche
- PHIL 5795 - Marx and Marxism
- PHIL 5800 - Plato
- PHIL 5810 - Aristotle
- PHIL 5833 - Existentialism
- PHIL 5900 - John Dewey
- PHIL 5920 - Philosophy of Media and Technology
- PSCI 5457 - Seminar: American Political Thought
- RLST 5060 - Philosophy of Religion
- SOCY 5016 - Social Theory
- WGST 5306 - Survey of Feminist Thought
- WGST 6010 - Methods and Theories of Feminism and Gender Studies

***Complete a project or thesis on an approved philosophy/theory related topic.***

## **Social Justice Track**

The Social Justice Track encourages graduate students to broaden and deepen their intellectual tools as well as their practical knowledge as to how democracy, education, consumerism, media, race, class, gender, policy, and law intersect.

In addition to the MH Core requirements, students must:

***Complete a minimum of 12 credit hours of approved social justice related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- BUSN 6540 - Legal and Ethical Environment of Business
- COMM 5040 - Communication, Prisons, and Social Justice
- ENGL 5190 - Advanced Topics in Writing & Digital Studies (depending on topic)

- ENGL 5306 - Survey of Feminist Thought
- HIST 5032 - Globalization in World History Since 1945
- HIST 5225 - Urban America: Colonial Times to the Present
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5415 - Social Revolutions in Latin America
- HIST 5455 - African Struggle for Independence
- HUMN 5650 - Reflections on Modernity
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- PSCI 5025 - Local Governance and Globalization
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5225 - Democracy and Democratization
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5286 - International Relations: War or Peace?
- PSCI 5414 - Non-Profits and Social Change
- PSCI 5545 - Immigration Politics
- PSCI 5555 - International Women's Resistance
- PSCI 5837 - Contemporary Issues in Civil Liberties
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present

***Complete a project or thesis on an approved social justice related topic.***

It is **HIGHLY RECOMMENDED** that students in this track take at least one quantitative and/or one qualitative research methods course as part of their plan of study. There are quantitative and qualitative methods courses offered in Anthropology, Environmental Science, Political Science, Sociology, and Research, Evaluation, and Statistical Methodology (RESM), which can be approved by students MHMSS program faculty.

## **Visual Studies Track**

The Visual Studies Track provides students focused studies in disciplines that apply critical analysis to our visual world, such as art history, museum studies, film studies, new media studies, and cultural studies. In a world whose work forces and creative citizenry are focused on the growth and use of visual technologies, visual literacy with sophisticated analytic skills is critical.

*In addition to the MH Core requirements, students must:*

**Complete 3 credit hours of a methods/theory course below:**

- ENGL 5420 - Film Theory and Criticism
- FINE 5790 - Methods in Art History
- HUMN 5660 - Visual Arts: Interpretations and Contexts

**Complete a minimum of 18 credit hours of approved visual arts related elective coursework from the list below, substitutions may be approved by the student's advisor:**

- ARCH 5210 - Introduction to Architecture
- ARCH 5220 - History and Theory Architecture I
- ARCH 5230 - History and Theory Architecture II
- ARCH 6210 - History of American Architecture
- ARCH 6212 - History of Modern Architecture
- ARCH 6220 - History of Architectural Theory
- COMM 5621 - Visual Communication
- ENGL 5770 - Topics in English: Film and Literature
- ENGL 6001 - Critical Theory in Literature and Film
- FINE 4990 - Contemporary Art: 1960 to Present
- FINE 5524 - Topics in Art History II: Modern and Contemporary
- FINE 5610 - Pre-Columbian Art
- FINE 5620 - American Art
- FINE 5632 - History of Digital Media
- FINE 5680 - Art of the Middle Ages
- FINE 5700 - Italian Renaissance Art
- FINE 5705 - Northern Renaissance Art
- FINE 5710 - Baroque and Rococo Art
- FINE 5730 - Arts of Japan
- FINE 5750 - Arts of China
- FINE 5770 - Art of India and Southeast Asia
- FINE 5990 - Contemporary Art:1960-Present
- HIST 5216 - History of American Popular Culture
- HIST 5228 - Western Art and Architecture
- HIST 5231 - History in Museums
- HIST 5232 - Historic Preservation
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- HUMN 5550 - Paris 1910: Art, Philosophy and Psychology
- PHIL 5220 - Aesthetics and the Philosophy of Art
- PHIL 5550 - Paris 1910: Art, Philosophy and Psychology
- PHIL 5920 - Philosophy of Media and Technology

**Complete a project or thesis on an approved visual arts related topic.**

## **Women's and Gender Studies Track**

Students pursuing the WGST track, focus on issues of sex and gender as they manifest in societies through culture, language, politics, visual representation, and history.

*In addition to the MH Core requirements, students must:*

***Complete at least one WGST theory course from the list below:***

- SSCI/WGST/ HUMN 6010 - Methods and Theories of Feminism and Gender
- WGST/ PHIL 5500 - Feminist Philosophy
- HIST/WGST/ ENGL 5306 - Survey of Feminist Thought
- ENGL/WGST/ HIST 5306 - Survey of Feminist Thought

***Complete a minimum of 12 credit hours of approved women's and gender studies related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- ENGL 5000 - Studies of Major Authors (when the author is a female)
- ETST/ PSCI 4827 - Women and the Law
- WGST/SSCI/ HUMN 5720 - Sexuality, Gender and Their Visual Representation
- SSCI/ HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- PSCI 4215 - Women's Rights, Human Rights: Global Perspectives
- PSCI 5555 - International Women's Resistance
- PSCI 5245 - Gender, Globalization and Development
- CRJU 5910 - Nature and Scope of Interpersonal Violence
- CRJU 5930 - Interpersonal Violence Law and Public Policy
- PHIL 5308 - Contemporary Feminist Thought
- PHIL/ WGST 5500 - Feminist Philosophy
- SOCY 5550 - Seminar: Sociology of the Family
- WGST 5230 - Women in the West
- WGST 5248 - Gender, Globalization and Development
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5306 - Survey of Feminist Thought
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present
- WGST 5420 - Goddess Traditions
- WGST 5510 - Whores and Saints: Medieval Women
- WGST 5511 - French Women Writers

***Complete a project or thesis on an approved women's and gender studies related topic.***

## Program Description

The Master's program in Integrated Sciences (MIS) is designed to provide a broad-based, content-rich curriculum that integrates knowledge and methods from natural and physical sciences, mathematics, and computer science disciplines. MIS is a 30 semester-hour interdisciplinary program in which students take courses from two or three disciplines, identify a faculty mentor, and complete a Master's project or thesis. The signature aspect of the program is that the capstone experience must truly integrate the interdisciplinary content into a unified program of research.

Specifically, students are required to complete a coherent selection of classes in a minimum of two areas and a maximum of three areas within the disciplines of biology, chemistry, computer science, environmental sciences, geology, mathematics or physics. Each student must meet with the Program Director within the first semester of study to develop a program goal statement, which is used to guide his or her individualized curriculum. All classes applied toward the degree must be related to the student's stated program goal and receive prior approval for inclusion in the program of study by the Program Director.

With sufficient justification and with approval from the Program Director, students may take a maximum of six semester-hours outside of the program's areas of concentration. In addition, a maximum of six semester-hours of MINS independent study/internship coursework may be applied to the degree. All such contracts must be approved by the Program Director.

In accordance with Graduate School Rules, a minimum of 24 semester hours must be at the graduate level (5000+). Under exceptional circumstances, up to six semester hours may be taken at the 4000 level, with prior approval from the Program Director.

The student is responsible for ensuring that all prerequisite requirements for the classes they take have been met, even if the prerequisite courses do not count toward the degree.

## **Application Deadline**

Students are admitted for the spring and fall semesters. The deadline for a complete application is April 15 for fall admission and October 15 for spring admission.

Click [here](#) to learn about the **Integrated Sciences MIS** admission and degree requirements.

## **Programs**

### **Master of Science**

# **INTEGRATED SCIENCES MIS**

► Graduate School Policies and Procedures apply to this program

## **Program Description**

Students in the Integrated Sciences program have the opportunity to take courses from a variety of areas in mathematics, the natural and physical sciences (biology, chemistry, environmental sciences, geology, and physics), and computer science in an interdisciplinary STEM program designed for professional growth in their area of interest. These areas are further explored through a required project or thesis that includes focused independent research on a topic that integrates two or three of the disciplines mentioned above.

The length of time it takes to complete the degree is determined by the student's own schedule flexibility; many finish within two years of full-time work. In accordance with Graduate School Rules, the degree must be completed within seven years of matriculation.

## **Admission Requirements**

Admission into the Integrated Sciences program is competitively based. Minimum requirements for an application to be considered are:

- the graduate application form for the University of Colorado Denver, including all application fees
- a statement of purpose specifying why the applicant wishes to be admitted to the program, the applicant's primary and secondary disciplines of interest, and their academic and professional goals
- three letters of recommendation from individuals who can speak to the applicant's academic qualifications, of which at least two must be from academic sources
- transcripts from all institutions of higher learning attended by the applicant
- a bachelor's degree from an accredited college or university
- a minimum cumulative undergraduate GPA of 3.0 on a 4.0 scale; however, applicants with an undergraduate GPA below 3.0 may be considered if they have taken the Graduate Record Examination (GRE) and if the scores are forwarded to the program office
- 40 semester hours of undergraduate courses in biology, chemistry, computer science, environmental sciences, geology, mathematics, and/or physics

Possessing the minimum requirements will guarantee that the application is considered. It does not, however, guarantee admission. The admissions committee will select students competitively to create a high-quality and balanced cohort of participants entering the program each year.

## **Application Deadline**

Students are admitted for the spring and fall semesters. The deadline for a complete application is April 15 for fall admission and October 15 for spring admission.

## **Core Requirement**

Students are required to enroll in MINS 5200, Research Methods in Interdisciplinary Science, within their first year of the program. This course serves as an introduction to the program and helps students to develop research skills and to further their professional development. This course is offered in the fall semester only.

- MINS 5200 - Research Methods in Interdisciplinary Science

## **Concentration and Breadth Requirements**

The student must designate one area of concentration (the primary area of study) and one or two breadth areas (the secondary and, if applicable, tertiary areas of study) within the disciplines of biology, chemistry, computer science, environmental sciences, geology, mathematics or physics. An interdisciplinary area of study (including but not limited to fields such as biochemistry, biophysics, or computational biology) may also be considered. The

student must complete a minimum of nine semester hours in the chosen area of concentration and a minimum of six semester hours in each depth area.

## **Project or Thesis Requirement**

The program provides students with two options as their capstone experience, either a project or a thesis, depending on their academic and professional goals. All students must conduct independent research integrating coursework from the disciplines in their program of study. The research is conducted as either a project (requiring 3-4 semester-hours of MINS 5960) or a thesis (requiring 4-6 semester-hours of MINS 5950), and is presented to their examination committee in both written and oral forms. The student must successfully defend their project/thesis in an oral examination (defense) in order to graduate. Prior to enrolling in Project or Thesis hours, all students must submit a proposal approved by three faculty members (one of whom is their graduate faculty advisor) and the Program Director.

- MINS 5950 - Master's Thesis
- MINS 5960 - Master's Project

## **Graduate Advisor and Examination Committee**

All candidates for the MIS degree must select a faculty advisor and arrange for two other faculty members to serve with the advisor as the candidate's graduate examination committee. The committee members must have graduate standing at the University of Colorado Denver and be approved by the Program Director. The name of the faculty advisor must be submitted to the Program Director at the start of the third semester following matriculation to the program.

Bradley J. Stith, PhD, Washington State University  
John G. Swallow PhD, University of Wisconsin Madison  
Diana F. Tomback, PhD, University of California, Santa Barbara

### **Associate Professors:**

Christopher J. Phiel, PhD, Thomas Jefferson University  
Amanda Charlesworth, PhD, University College, London  
Greg Cronin, PhD, University of North Carolina at Chapel Hill  
Michael J. Greene, PhD, Oregon State University  
Laurel Hartley, PhD, Colorado State University  
Timberley M. Roane, PhD, University of Arizona  
Michael Wunder, PhD, Colorado State University  
Alan Vajda, PhD, University of Colorado Boulder

### **Assistant Professors:**

Brian Buma, PhD, University of Colorado Boulder  
Carlos Infante, PhD, Harvard University  
Christopher S. Miller, PhD, University of California Los Angeles  
Annika Mosier, PhD, Stanford University  
Gregory Ragland, PhD, University of North Carolina Chapel Hill

### **Senior Instructors:**

Hannah Anchordoquy, PhD, University of Colorado  
Laurel Beck, PhD, Michigan State University  
Cheri A. Jones, PhD, University of Florida  
David Knochel, PhD, University of Colorado Boulder  
Kimberly F. Regier, EdD, University of Colorado Denver  
Gene Brooks, DDS, University of Missouri  
Lisa Johansen, PhD, University of Alabama  
Molly Nepokroeff, PhD, University of Wisconsin Madison

### **Clinical Assistant Professor:**

Tod Duncan, PhD, University of College London

### **Emeritus Faculty:**

Gerald Audesirk, PhD, California Institute of Technology  
Teresa E. Audesirk, PhD, University of Southern California  
Linda K. Dixon, PhD, University of Illinois

John H. Freed PhD, Stanford University

Leo P. Bruederle, PhD, Rutgers, the State University of New Jersey

## Graduate Program

### MS in Biology

The MS in Biology program offers students the opportunity to receive advanced training and research experience in an area of specialization of one of our nationally and internationally recognized faculty members. The master's program is designed to prepare graduate students for careers in research and teaching; for employment in business, industry and government; for existing career advancement; and for continuing post-baccalaureate work in PhD and professional programs. Students in the program specialize in fields ranging from cell and molecular biology to ecology and evolution.

The master's program is a research-based program. Applicants to the program must have a declared area of specialization that aligns with the research focus of a biology graduate faculty member. Faculty expertise can be found undergraduate faculty profiles on the Department of Integrative Biology website ([clas.ucdenver.edu/biology/](http://clas.ucdenver.edu/biology/)). Students must contact prospective faculty advisors to determine if openings are available within the faculty member's research group.

Click here to learn about the **Biology MS** requirements.

### PhD in Integrative and Systems Biology

The PhD program in Integrative and Systems Biology at the University of Colorado Denver is a multidisciplinary, dual campus program that offers students opportunities to address complex questions in biology using computational, laboratory and field approaches. The more than 40 program faculty members allow students to participate on a diversity of projects at all levels of biological organization, ranging from ecology and environmental microbiology to biochemistry, developmental biology and neuroscience. Depending on the track an incoming student chooses, the approach will either be to explore the problem at multiple levels of biological organization (integrative biology) or to explore the multi-component nature of a biological system (systems biology).

The PhD program is research-based. Applicants to the program must have a declared area of specialization that aligns with the research focus of a program graduate faculty member. Faculty expertise can be found undergraduate faculty profiles on the Department of Integrative Biology website ([clas.ucdenver.edu/biology/](http://clas.ucdenver.edu/biology/)). Students must contact prospective faculty advisors to determine if openings are available within the faculty member's research group.

Click here to learn about the **Integrative and Systems Biology PhD** requirements.

## Programs

**Doctor of Philosophy**

# INTEGRATIVE AND SYSTEMS BIOLOGY, PHD

► Graduate School Rules apply to this program.

**Director for PhD Program:** Alan Vajda

**Office:** Science, 4104

**Telephone:** 303-315-7640

**E-mail:** Alan.Vajda@ucdenver.edu

**Website:** <https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs>

## Requirements for Admission

- A BA/BS or MS from an accredited institution awarded within the last 10 years (validation of current content may be required).-Minimum undergraduate GPA: 3.0
- TOEFL: required for international applicants from countries in which English is not the official language
- 3 letters of recommendation
- Official transcripts from all attended institutions
- Students are required to contact faculty in advance. Prior to application, applicants must have identified and contacted an available Faculty Advisor to ensure availability of a position and appropriate research interests

### ***Prerequisite courses required:***

- One year of General Biology is preferred. Where needed, supplementary courses or reading programs may be designed to provide background information of sufficient depth for the Program curriculum
- One course in applied or biological statistics (through regression and ANOVA)
- Additional prerequisite requirements may be set by individual faculty

Applications will be considered annually starting December 1 for both domestic US students and international students. Application to the PhD program is through CU Denver Admissions.

## **Degree Requirements**

The PhD degree requirements comprise six phases. First, students must complete a minimum of 60 credits, including 30 dissertation credits. Up to 30 hours of graduate level courses from other programs may be transferred and counted toward the degree. Students must also pass the Preliminary Exam, form an Advisory Committee and an Examination Committee, meet the academic residency requirement, pass the comprehensive exam, and write and orally defend a dissertation.

Research-based PhD degree program **requires**

1. Completing 60 credits including 30 of dissertation (BIOL 8990)
2. Meeting minimum academic residency requirements
3. Passing the Preliminary Exam
4. Forming Advisory and Examination committees
5. Writing and defending research proposal
6. Passing the Comprehensive Exam
7. Writing and defending dissertation (including >1 publishable paper)

## **Required Courses**

- BIOL 6764 - Biological Data Analysis (4 credits taken in the first year)
- BIOL 6705 - Biological Research Workshop (4 credits total, taken two different times in the student's career)
- BIOL 6655 - Seminar (2 credits total, taken two different times in the student's career)
- BIOL 7010 - Integrative and Systems Biology (3 credits taken in the first year))
- BIOL 7050 - Special Topics (a minimum of 3 credits must be completed, but students may take up to 9 credits)
- BIOL 8990 - Doctoral Dissertation (30 credits must be completed after passing the Comprehensive Exam)
- BIOL 6002 - Biology Skills Sets - Pedagogy (2 credits taken in the first year; only required for students supported by a Graduate Teaching Assistantship)

**Master of Science**

# **BIOLOGY MS**

► Graduate School Rules apply to this program.

**Graduate MS Program Director:** Alan Vajda

**Office:** Science, 4104

**Telephone:** 303-315-7640

**E-mail:** Alan.Vajda@ucdenver.edu

**Website:** <https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs>

## Requirements for Admission

- A BA/BS from an accredited institution awarded within the last 10 years (validation of current content may be required)
- Minimum undergraduate GPA: 3.0
- TOEFL: required for international applicants from countries in which English is not the official language
- 3 letters of recommendation
- Official transcripts from all attended institutions
- Students are required to contact faculty in advance. Prior to application, applicants must have identified and contacted an available Faculty Advisor to ensure the availability of a position and appropriate research interests

### Prerequisite courses required:

- One year of general biology (lecture and laboratory)
- One year of any combination of chemistry, physics or mathematics
- One course in applied or biological statistics (through regression and ANOVA)
- Additional prerequisite requirements may be set by individual faculty

**Application deadline is December 1 for both domestic U.S. and international students.** Application to the master's in biology program is through CU Denver Admissions.

## Degree Requirements

Students matriculate into the research-based MS degree program. Under unusual circumstances, students and/or advisors may petition for a student to switch into the coursework-based MS degree program. The research-based MS program requires a minimum of 30 credits, and the coursework-based MS program requires a minimum of 32 credits. No double-counted courses will be applied to the degree. A maximum of 12 hours of graduate level courses may be transferred and counted toward the degree in either program. Both programs additionally require the student to meet minimum academic residency requirements, to form an advisory committee and to deliver and orally defend written work before the advisory committee, which constitutes the final exam for both programs as required by the Graduate School.

Research-based MS degree program **requires**

1. Completing 30 credits including 3-6 thesis (BIOL 6950)
2. Meeting minimum academic residency requirements
3. Forming and meeting regularly with an advisory committee
4. Writing and defending research proposal
5. Writing and defending research thesis (including a publishable paper)

#### Coursework-based MS degree program **requires**

1. Approved petition to transfer into coursework-based program
2. Completing a minimum of 32 credits
3. Meeting minimum academic residency requirements
4. Writing and defending publication-quality review paper (before advisory committee)

#### **Required Courses:**

- BIOL 6705 - Biological Research Workshop (4 credits total-take in 2 different years)
- BIOL 6655 - Seminar (2 credits total-take in 2 different years)
- BIOL 6764 - Biological Data Analysis (4 credits total-take in year 1)
- BIOL 6002 - Biology Skills Sets - Pedagogy (required only for students supported by a Graduate Teaching Assistantship)

#### ***Additional minimum requirements for research-based MS program***

- BIOL 6950 - Master's Thesis (1-2 credits in first spring/summer to write proposal and 2-4 credits in final semester to write thesis)

#### ***Additional minimum requirements for the coursework-based MS program***

- BIOL 5840 - Independent Study: BIOL (3 credits: advisor--guided review paper)

# INTERDISCIPLINARY PROGRAMS

Interdisciplinary programs encourage students to synthesize the theories, methods and analytical perspectives of diverse disciplines to bring new ways of understanding to particular themes or problems. Interdisciplinary studies foster research and teaching collaboration among faculty and students, who cross traditional academic specialties. Interdisciplinary programs also place a high value on reaching beyond the university into our local, national and global communities, providing students with real-world experiences through internships and experiential learning.

The college also has several established interdisciplinary programs leading to graduate degrees. A brief description of each program follows, with a link to its respective program section.

## Graduate Programs

- The MS IN ENVIRONMENTAL SCIENCES combines environmental courses from the social sciences, physical sciences, engineering, humanities and statistics. A graduate certificate is also available.
- PhD IN HEALTH AND BEHAVIORAL SCIENCES students integrate social, cultural and biomedical perspectives to understand the underpinnings of health and the conditions essential for its creation and maintenance.
- The MASTER OF INTEGRATED SCIENCES (MIS) degree is designed to offer students a flexible program that combines courses in mathematics, the natural and physical sciences(biology, chemistry, geology, physics) and computer science. The MIS fosters professional growth targeted to students' particular interests, which are further developed through a required project or thesis that includes independent research.
- The MASTER OF HUMANITIES (MH) / MASTER OF SOCIAL SCIENCE (MSS) programs welcome students whose interests are diverse and who want to look at ideas in varied modes. Both the MH and the MSS programs offer students the opportunity to take courses from multiple disciplines and craft a study plan that bridges the traditional boundaries of a university's departments. Through this interdisciplinary curriculum, students learn to think innovatively with critical and analytical skills that prepare them for a rapidly changing world.
- The GRADUATE CERTIFICATE IN WOMEN'S AND GENDER STUDIES provides CU Denver students and the public with specialized knowledge related to women's and gender concerns. It is available to any qualified graduate student or non-degree seeking, post-BA student.

**Emeritus Faculty:**

William Briggs, PhD, Harvard University

William E. Cherowitzo, PhD, Columbia University

Kathryn L. Fraughnaugh, PhD, University of Houston

Andrew Knyazev, PhD, Russian Academy of Sciences

J. Richard Lundgren, PhD, Ohio State University

Stanley E. Payne, PhD, Florida State University

The Department of Mathematical and Statistical Sciences at the University of Colorado Denver offers degrees and certificates at the undergraduate and graduate levels in mathematics, applied mathematics, data science, and statistics through coursework, research and industrial collaboration. Traditional courses such as calculus, linear algebra, probability, statistics and discrete mathematics are offered regularly by the department. In addition, contemporary subjects such as high-performance computing; numerical analysis, optimization, statistical methods, and operations research are also well represented by course offerings and faculty interests. In all of its activities, the department embodies the outlook that mathematics, statistics, computing and data science are powerful tool that can be used to solve problems of immediate and practical importance.

Apart from the specialized mathematical and statistical skills acquired through course work, the degrees and certificates also provide general skills that are valued by many employers. These skills include problem solving, critical thinking, analysis, facility with data, the ability to process quantitative information, and perhaps most important of all, the ability to learn new skills and concepts quickly

## **Center for Computational & Mathematical Biology**

**Director:** Weldon Lodwick

**Telephone:** 303-315-1733

**Website:** <http://ccmb.ucdenver.edu/>

The Center for Computational Biology (CCMB) is a multidisciplinary center focused on computational and mathematical biology research and education.

## **Center for Computational Mathematics**

**Director:** Jan Mandel

**Telephone:** 303-315-1703

**Website:** <http://ccm.ucdenver.edu>

The Center for Computational Mathematics is composed of faculty members who have an interest in computational mathematics, the study of solving mathematical problems with computers. The center resides in the Department of Mathematical and Statistical Sciences and includes faculty members from various other departments. The primary goal of the center is to foster research in computational mathematics and to maintain a

strong educational program at all levels. It has extensive ties with industry along the Front Range and with government laboratories throughout the nation. It offers students an excellent opportunity to receive training and experience in this exciting new field. The center operates several supercomputing clusters.

## **Math Clinic**

**Website:** <https://clas.ucdenver.edu/mathematical-and-statistical-sciences/math-clinic>

Each semester, the Department of Mathematical and Statistical Sciences conducts math clinics that are open to both undergraduate and graduate students. Each clinic is sponsored by a business, government agency or research organization. The clinic sponsor provides a specific project on which students work with the supervision of a faculty member and a sponsor representative. Every clinic results in a final report to the sponsor and provides participating students with an opportunity to apply mathematics to relevant problems. Recent math clinic sponsors include Raytheon, Lockheed Martin, Xenometrix, Budget Truck Rental and United Launch Alliance.

## **Statistical Consulting Service**

The Department of Mathematical and Statistical Sciences regularly offers a graduate course in statistical consulting in which students work on problems provided by researchers and clients at CU Denver and in the Denver metropolitan area. Potential clients should contact the department at 303-315-1700.

## **Graduate Program**

**Directors:** Stephanie Santorico

**Telephone:** 303-315-1705

The Department of Mathematical and Statistical Sciences offers the MS degrees in Applied Mathematics and Statistics and the PhD degree in Applied Mathematics. Each of these degree programs conforms to the rules and policies of the Graduate School Policies and Procedures.

Detailed descriptions of the requirements for the MS and PhD degrees are maintained at [www.math.ucdenver.edu](http://www.math.ucdenver.edu). The following is an abbreviated summary of these requirements.

### **Requirements for Admission**

To begin graduate work toward the MS or PhD degrees in Applied Mathematics, a student should have at least the following preparation: 30 semester hours of mathematics with each course grade at B- or better and *an overall GPA of 3.0 or better*, at least 24 of which are upper-division courses. These courses should include a full year of advanced calculus or introduction to analysis, one semester of linear algebra and one

semester of either differential equations, abstract algebra, discrete mathematics or probability. Additionally, students should take the GRE exam.

To begin graduate work toward the MS in Statistics, a student should have at least the following preparation: a baccalaureate (not necessarily in mathematics or statistics) from an accredited college or university with a grade point average (GPA) of 3.0 or above. Students must have taken three semesters of calculus (through multivariate calculus), linear algebra, and a calculus-based statistics course that covers basic probability and statistical distributions. Admitted students are generally expected to have completed several additional upper-division mathematics courses on top of the minimum requirements, though students from non-mathematics backgrounds who meet minimum requirements and have exceptional track records will be considered on a case-by-case basis. Additionally, students should take the GRE exam.

Students who do not have all the prerequisites may be admitted with prerequisite deficiencies with the understanding that those deficiencies must be removed after admission. Students who have a cumulative undergraduate GPA that is less than 3.0 may be eligible for provisional admission to the master's program (see also the Graduate School admission requirements).

#### **Application Deadlines**

Applications to the MS or PhD programs should be submitted by the following target dates to be guaranteed full consideration. International students should submit their applications one month prior to these target dates.

<b>Target Dates for PhD Program</b>	<b>Target Dates for MS Programs</b>
<b>January 15:</b> fall semester	<b>Apr 1:</b> fall semester
No summer applications of admissions for the PhD program	<b>March 1:</b> Summer semester
<b>Oct 1:</b> spring semester	<b>Nov 1:</b> spring semester

Applications received after the target dates may still be considered for admission, depending on space availability.

#### **Financial Support**

PhD students are encouraged to apply for teaching assistantships. A variety of other opportunities for financial support are also available.

Click here to learn about the **requirements for the MS in Applied Mathematics**.

Click here to learn about the **requirements for the MS in Applied Statistics**.

Click here to learn about the **requirements for the PhD in Applied Mathematics**.

## **Applied Statistics Certificate**

**Director:** Joshua French

**Telephone:** 303-315-1709

**Website:** <https://clas.ucdenver.edu/mathematical-and-statistical-sciences/graduate-certificate-applied-statistics>

Click here to learn about the **requirements for the Graduate Certificate in Applied Statistics**.

### **Programs**

**Bachelor of Science/Master of Science**

# **5 YEAR MATHEMATICS BS/STATISTICS MS**

### **Introduction**

This is a unique program where a student can obtain both a B.S. in Mathematics and M.S. in Statistics in five years through a specialized course sequence. The program requires 12 fewer credits than if both degrees were earned separately.

### **Program Delivery**

- This is an on-campus program.

### **Declaring This Major**

- Work with your advisor to declare this major.

### **General Requirements**

To earn a bachelor's degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

### **Program Requirements for Mathematics BS**

1. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.25. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
2. Students must declare their intent to complete this program during their junior or senior year, after completing MATH 1401, 2411, 2421, 3000, 3191, and 3382.
3. The semester you graduate, you must:
  - Complete the MFAT Exam and participate in an exit interview. These requirements will be scheduled through the department Administrative Assistant
  - Complete a senior survey.
4. To graduate as a Mathematics major, must have a minimum of 30 hours of resident credit and at least 15 upper-division mathematics credits must be taken at CU Denver.
5. Students with at least a 3.5 major grade point average, at least 3.2 overall grade point average, and who have done an honors project are eligible to graduate with honors. See an advisor (or the honors advising sheet) for details.

Take **all** of the following Mathematics courses:

- MATH 1401 - Calculus I
- MATH 2411 - Calculus II
- MATH 2421 - Calculus III
- MATH 3000 - Introduction to Abstract Mathematics
- MATH 3191 - Applied Linear Algebra
- MATH 3382 - Statistical Theory
- MATH 4310 - Introduction to Real Analysis I
- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis
- MATH 6330 - Workshop in Statistical Consulting

Take **one** of the following programming courses:

- MATH 1376 - Programming for Data Science or CSCI 1410 - Fundamentals of Computing
- CSCI 1411 - Fundamentals of Computing Laboratory

Take **two** additional MATH classes (and at least 6 credits) above 3000 excluding 3040, 3195, 3511, 3800, 4012, 4013, 4014, 4015 and 4830.

## **Program Requirements for Statistics MS**

1. In the semester in which the student intends to complete their BS, students must apply for admission into MS in Statistics Program. They should have declared their intent to complete this program to the Director of the Program in Statistics after completing MATH 1401, 2411, 2421, 3000, 3191, and 3382.
2. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0, for all courses that will apply to the MS. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
3. Students must present 30 hours of course work (which are broken into 4 components as detailed below) for the M.S. degree.
4. At least 24 of these hours must consist of graduate level (numbered 5000 or higher) courses with the MATH prefix.
5. The remaining 6 hours must be either MATH courses numbered 5000 or above or pre-approved courses outside the department numbered 4000 or above.
6. Students must complete a written project and pass a final oral exam.

Note that the MATH 5310, MATH 5320, MATH 5387, and MATH 6330 courses used for the B.S. portion of the degree apply to the 30 hours of course work and satisfy the core requirement discussed below.

Up to 9 semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward a prior degree (graduate or undergraduate) cannot be used toward the M.S. degree in Statistics. Additionally, the following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250, and 5830.

Following completion of course work, all students must complete a written project and pass a final oral exam. The project is developed as a student-centered independent research component within MATH 5960 unless the student has chosen the thesis option. For students choosing the thesis option, 4 to 6 hours (of the 30 required hours) may be devoted to the writing of a thesis through MATH 5950. According to Graduate School policies, Masters students, whether enrolled full-time or part-time, must complete all degree requirements within 7 years of matriculating into the graduate program.

The MS degree in Statistics consists of 4 components: 1) core courses, 2) statistics electives, 3) other electives, and 4) MATH 5960 (Master's project) or MATH 5950 (Master's thesis).

The **4 core courses** include:

- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis

- MATH 6330 - Workshop in Statistical Consulting

and are satisfied during the completion of the B.S. portion of the degree.

Students must take **at least three** additional statistics electives courses from the list below:

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6101 - Uncertainty Quantification
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7393 - Bayesian Statistics
- MATH 7384 - Mathematical Probability
- MATH 7386 - Monte Carlo Methods
- MATH 7826 - Topics in Probability and Statistics

Additional courses given prior approval by the student's advisor and the Director of the Program in Statistics

Students must take **two** Other Electives: Any MATH prefix course that can be used for an M.S. or Ph.D. degree in Applied Mathematics can be used as another Elective. While these courses could be additional statistics-focused courses, the added flexibility allows students to direct their coursework into other areas of mathematics and/or science. The following courses will not count toward the M.S. in Statistics: MATH 5000-5010, MATH 5012-5015, MATH 5017, MATH 5198, MATH 5250 and MATH 5830.

Students must take either MATH 5950 or MATH 5960 as part of completing their written project.

### **Certificate**

# **APPLIED STATISTICS GRADUATE CERTIFICATE**

► Graduate School Policies and Procedures apply to this program.

**Coordinator:** Joshua French Ph.D.

**Telephone:** 303-315-1709

**E-mail:** Joshua.French@ucdenver.edu

**Web site:** <https://clas.ucdenver.edu/mathematical-and-statistical-sciences/graduate-certificate-applied-statistics>

There is a growing need for qualified statistical analysts of the ever-increasing amounts of data collected in business, industry, and government. The Certificate in Applied Statistics program is designed to give students a strong background in statistical methodology and data analysis in preparation for opportunities in the workforce or for graduate studies.

Students will gain competence in such topics as descriptive statistics, estimation, confidence intervals, probability and inferential techniques, simple and multiple regression, analysis of variance, and more advanced topics. Students can focus on a particular application area such as economics, psychology, sociology, geology, or environmental science through the choice of an elective course and the data analysis project.

## **Admissions Requirements**

The minimum admission requirements for students applying for the Graduate Certificate in Applied Statistics are:

- A bachelor's degree (not necessarily in mathematics or statistics) from an accredited college or university
- A grade point average (GPA) of 3.0 or above during their bachelor's degree.
- Students must have taken three semesters of calculus (through multivariate calculus), linear algebra, and a calculus-based statistics course that covers basic probability and statistical distributions.

Subject to approval by the Director of the Statistical Programs and the Graduate Committee, students with prerequisite deficiencies may be admitted with the understanding that those deficiencies must be removed after admission. Courses taken to fulfill admission deficiencies may not be counted toward the certificate.

## **Certificate Requirements**

Four courses and a 1 hour independent study are required as detailed below.

### **Two Fundamental Courses in Statistics**

- MATH 5320 - Introduction to Mathematical Statistics

Offered: SPRING

- MATH 5387 - Applied Regression Analysis

Offered: FALL, SPRING, SUMMER

## **One Advanced Applications Course**

Topics vary from year to year. Course must be pre-approved by certificate coordinator and cannot be MATH 5830. Representative courses include:

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6101 - Uncertainty Quantification
- MATH 6376 - Statistical Computing
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7386 - Monte Carlo Methods
- MATH 7393 - Bayesian Statistics
- MATH 7826 - Topics in Probability and Statistics

An additional course given prior approval by the student's advisor and the Director of Statistical Programs.

## **One Elective**

Any statistics course in the Department of Mathematical and Statistical Sciences at the 5000 level or higher (must be pre-approved by the Certificate Coordinator). MATH 5830 cannot apply towards the certificate.

- ECON 5150 - Economic Forecasting
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ENVS 5600 - Applied Statistics for the Natural Sciences
- SOCY 5183 - Seminar: Quantitative Data Analysis

## **Project Requirement**

An independent data analysis project with a report and presentation to demonstrate proficiency with data analysis techniques and a statistical computing software package. Enroll for one hour of MATH 5840, Independent Study, or in an equivalent course pre-approved by the Certificate Coordinator.

## **Additional Requirements**

Students must maintain a 3.0 GPA or above in these courses with no credit given for courses with grades below B-. Since a certificate is a University of Colorado Denver certification of a student's specialized knowledge in an advanced subject area, all courses in the certificate program must be taken in residency at University of Colorado Denver. Students must be enrolled in one course per year to maintain their status in the certificate program.

Certificates must be completed within 3 years from matriculation.

## Doctor of Philosophy

# APPLIED MATHEMATICS PHD

► Graduate School Policies and Procedures apply to this program.

The Department of Mathematical and Statistical Sciences offers a PhD in Applied Mathematics. The degree is designed to give candidates a contemporary, comprehensive education in applied mathematics and to provide research opportunities in the special fields of computational mathematics, discrete mathematics, mathematics of science and engineering, operations research, optimization, probability, and statistics.

## Program Requirements

There are six phases of the PhD program. A candidate must fulfill course requirements, pass the preliminary examinations, establish a PhD committee, meet the academic residency requirement, pass the comprehensive examination and write and defend a dissertation.

- Students must complete 42 semester hours of non-thesis course work at the graduate level (up to 30 hours of this course work may be transferred in, including courses taken as part of a master's degree). In addition, 30 hours of dissertation credit must be taken. The following courses are required as part of the formal course work: MATH 5779-Math Clinic and three readings courses (1 semester hour each). Students must also satisfy a breadth requirement by completing a total of six graduate math courses from among several areas of mathematics, with no more than three of these courses from any one area.
- Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.25. All graded attempts in required and elective courses are calculated in the major GPA. [The following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250 and 5830.]
- The preliminary examinations are designed to determine that students who intend to pursue the PhD program are qualified to do so. These four-hour written

examinations are in the areas of applied analysis and applied linear algebra. Students must pass these exams by the start of their fourth semester.

- Six semesters of full-time scholarly work are required, as specified in the rules of the Graduate School. All students are strongly advised to spend at least one year doing full-time course work or research with no outside employment.
- The comprehensive examination is taken after completion of the preliminary exams, completion of at least three semesters of residency, and upon completion of essentially all non-thesis coursework. The exam is designed to determine mastery of graduate-level mathematics and the ability to embark on dissertation research. It consists of a six-hour written examination and an oral follow-up examination. Students must pass the comprehensive exam by the beginning of the 4th year. Within six months after passing the comprehensive examination, the candidate must present a dissertation proposal to their dissertation committee.
- Each student must write and defend a dissertation containing original contributions and evidence of significant scholarship. The dissertation defense is public and must be given before an examining committee approved by the Graduate School.

For more detailed information about the Applied Mathematics PhD, see [www.math.ucdenver.edu/phd](http://www.math.ucdenver.edu/phd).

## **Master of Science**

# APPLIED MATHEMATICS MS

► Graduate School Policies and Procedures apply to this program.

## **Program Requirements**

Students must present 30 hours of course work for the MS degree. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. At least 24 of these hours must consist of graduate-level (numbered 5000 or higher) mathematics courses. The remaining 6 hours must be either mathematics courses numbered 5000 or above or approved courses outside the department numbered 4000 or above.

Up to 9 semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward another degree (graduate or undergraduate) cannot be used toward the MS degree in applied mathematics. Additionally, the following MATH courses will NOT

count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250, and 5830.

A student may devote from 4 to 6 hours (of the 30 required hours) to the writing of a thesis. Following completion of course work, all candidates must make a one-hour oral presentation of a project or a thesis before a committee consisting of three graduate faculty members.

## Course Requirements

The following course requirements must be satisfied by all students in the MS in Applied Mathematics Program:

1. (Analysis Core Requirement) One of: MATH 5070 (Applied Analysis) or MATH 6131 (Real Analysis),
2. (Linear Algebra Core Requirement) MATH 5718 (Applied Linear Algebra), and
3. At least 24 additional semester hours of coursework, subject to the rule about 4000-level courses in disciplines outside of mathematics outlined above

Additionally, a student must either satisfy the course requirements for the MS degree without a concentration area or satisfy the requirements in one of the concentration areas listed below. Unless noted elsewhere, one course cannot be used to fulfill two requirements. Substitutions or changes to the requirements may be made with the written approval of a student's academic advisor and the Graduate Committee.

The following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250 and 5830.

- MATH 5070 - Applied Analysis
- MATH 5718 - Applied Linear Algebra
- MATH 6131 - Real Analysis

## MS Degree without a Concentration Area

Students must complete at least three courses chosen from the following list. Note that MATH 6131 (Real Analysis) can be used to satisfy both the analysis core requirement and may also count as one of the three courses satisfying this requirement.

- Any MATH course at the 6000 level or above
- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5490 - Network Flows
- MATH 5593 - Linear Programming

Additional course options may be added later at the discretion of the Department of Mathematical and Statistical Sciences, e.g., as new courses are introduced to the graduate program.

## **Applied Statistics Concentration**

**Take all of the following courses:**

- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis
- MATH 6330 - Workshop in Statistical Consulting

**And, take one of the following courses:**

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6376 - Statistical Computing
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7393 - Bayesian Statistics
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods
- MATH 7826 - Topics in Probability and Statistics

Any additional course given prior approval by the student's advisor and the Director of the Program in Statistics.

## **Applied Probability Concentration**

**Take all of the following courses:**

- MATH 5310 - Probability
- MATH 5792 - Probabilistic Modeling
- MATH 6380 - Stochastic Processes

**And, take one of the following courses:**

- MATH 6131 - Real Analysis
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods

## **Discrete Mathematics Concentration**

**Four of the following courses:**

- MATH 5410 - Modern Cryptology
- MATH 5490 - Network Flows
- MATH 5793 - Discrete Math Modeling
- MATH 6404 - Applied Graph Theory
- MATH 7405 - Advanced Graph Theory
- MATH 7409 - Applied Combinatorics
- MATH 7410 - Combinatorial Structures
- MATH 7413 - Modern Algebra I
- MATH 7419 - Mathematical Coding Theory
- MATH 7421 - Projective Geometry
- MATH 7821 - Topics in Projective Geometry
- MATH 7823 - Topics in Discrete Math

## **Mathematics of Engineering and Science Concentration**

**Three of the following courses:**

- MATH 5387 - Applied Regression Analysis
- MATH 5779 - Math Clinic
- MATH 5791 - Continuous Modeling
- MATH 5792 - Probabilistic Modeling
- MATH 5793 - Discrete Math Modeling
- MATH 5794 - Optimization Modeling
- MATH 6735 - Continuum Mechanics

**And, take two of the following courses:**

- MATH 5660 - Numerical Analysis I
- MATH 5661 - Numerical Analysis II
- MATH 5733 - Partial Differential Equations
- MATH 6653 - Introduction to Finite Element Methods
- MATH 7663 - Finite Difference Methods for Partial Differential Equations
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods
- MATH 7665 - Numerical Linear Algebra

## **Numerical Analysis Concentration**

**Take all of the following courses:**

- MATH 5660 - Numerical Analysis I
- MATH 5661 - Numerical Analysis II

**And, take three of the following courses:**

- MATH 5593 - Linear Programming
- MATH 5733 - Partial Differential Equations
- MATH 6595 - Computational Methods in Nonlinear Programming
- MATH 6653 - Introduction to Finite Element Methods
- MATH 6735 - Continuum Mechanics
- MATH 7665 - Numerical Linear Algebra
- MATH 8660 - Mathematical Foundations of Finite Element Methods
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods

## **Operations Research Concentration**

**Take all of the following courses:**

- MATH 5593 - Linear Programming
- MATH 5792 - Probabilistic Modeling

OR

- MATH 6380 - Stochastic Processes

**And, take two of the following courses:**

- MATH 5390 - Game Theory
- MATH 5490 - Network Flows
- MATH 5794 - Optimization Modeling
- MATH 6595 - Computational Methods in Nonlinear Programming
- MATH 7593 - Advanced Linear Programming
- MATH 7594 - Integer Programming
- MATH 7595 - Advanced Nonlinear Programming
- MATH 7825 - Topics in Optimization
- MATH 5779 - Math Clinic

# **STATISTICS MS**

## **Program Requirements**

Students must present 30 hours of course work (which are broken into 4 components as detailed below) and maintain a 3.0 GPA or above for the MS degree. At least 24 of these hours must consist of graduate level (numbered 5000 or higher) courses with the MATH prefix. The remaining 6 hours must be either MATH courses numbered 5000 or above or approved courses outside the department numbered 4000 or above.

Up to 9 semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward another degree (graduate or undergraduate) cannot be used toward the MS degree in Statistics. Additionally, the following MATH courses will NOT count toward a graduate degree: MATH 5010, 5012-5015, 5017, 5198, 5250, and 5830.

All students must complete a written project and pass a final oral exam. The project is developed as a student-centered independent research component within MATH 5960 unless the student has chosen the thesis option. For students choosing the thesis option, 4 to 6 hours (of the 30 required hours) may be devoted to the writing of a thesis through MATH 5950. By graduate school rules, Master's students, whether enrolled full-time or part-time, must complete all degree requirements within 7 years of matriculation.

## Course Requirements for the MS Degree in Statistics

The MS degree in Statistics consists of 4 components: 1) core courses, 2) statistics electives, 3) other electives, and 4) MATH5960 (Master's project) or MATH5950 (Master's thesis).

**Core Courses:** The core courses include:

- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis
- MATH 6330 - Workshop in Statistical Consulting

**Statistics Electives:** Nine hours of statistics electives are required. A running list is given below. Additional courses can be substituted given prior approval by the student's advisor and the Director of the Program in Statistics.

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6101 - Uncertainty Quantification
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7386 - Monte Carlo Methods
- MATH 7393 - Bayesian Statistics

- MATH 7826 - Topics in Probability and Statistics

Additional courses may be taken but students must seek prior approval from their advisor and the Director of the Program in Statistics.

**Other Electives:** Six hours of other electives are required. Any MATH prefix course that can be used for an MS or Ph.D. degree in Applied Mathematics can be used as an Other Elective. While these courses could be additional statistics-focused courses, the added flexibility allows students to direct their coursework into other areas of mathematics and/or science. The following courses will not count toward the M.S. in Statistics: MATH 5010, MATH 5012-5015, MATH 5017, MATH 5198, MATH 5250 and MATH 5830.

# MODERN LANGUAGES

**Chair:** Devin Jenkins  
**Program Assistant:** Niki Mott  
**Office:** Plaza Building, Room 118  
**Mailing Address:**  
Campus Box 178  
P.O. Box 173364  
Denver, CO 80217-3364  
**Telephone:** 303-315-7234  
**Fax:** 303-315-7233

## General Information

The Department of Modern Languages teaches Arabic, Chinese, French, German, Latin and Spanish. The department offers undergraduate majors in French and Spanish, minors in Chinese, French, Spanish, and Linguistics, a certificate in Spanish for International Business, and an MA in Spanish.

## Relevance to Other Programs

Our courses can be applied toward fulfilling major and minor requirements. Additionally, study in the Department of Modern Languages prepares students in the languages, literatures and civilizations of the people who speak those languages. Certain courses may apply to the fulfillment of core curriculum requirements in the College of Liberal Arts and Sciences. Other courses may lead to a secondary-school teaching certificate, or the Master of Arts degrees in Spanish or Education at CU Denver, or to the Master of Arts degree in French or Spanish at CU Boulder. Only courses numbered 5000 and above may apply to a master's degree; students enrolled in any master's program should consult with their advisor before enrolling in courses at CU Denver.

## Spanish Faculty

**Associate Professors:**

Michael Abeyta, PhD, University of California-Davis  
Kathleen Bollard, PhD, University of California-Berkeley  
María Luisa Fernández Martínez, PhD, University of California, Irvine  
Devin Jenkins, PhD, University of New Mexico  
Andrés Lema-Hincapié, PhD, Cornell University and PhD, University of Ottawa

**Assistant Professor:**

Alyssa Martoccio, PhD, University of Illinois

**Instructors:**

Ileana Gross, MA, University of Georgia  
Amanda Ritchie, MA, University of Akron  
Gabriela de Robles, PhD, Georgetown University

**Graduate Advisor:**

Michael Abeyta

**Study Abroad Advisor:**

Devin Jenkins

**Internship Director:**

Andrés Lema-Hincapié

Mary De Forest, PhD, University of Colorado

Alan Sumler, PhD, CUNY

## **Programs**

### **Master of Arts**

# **SPANISH MA**

- ▶ Graduate School Policies and Procedures apply to this program

The faculty of the CU Denver Modern Languages Department offer a Spanish Master's degree program that is an alternative to the exclusively literary studies that traditionally lead to doctoral programs. By integrating language, literature and cultural studies with ancillary work in other disciplines, the degree provides a broader expertise that will lead to or enhance careers in teaching, government, social services, business and international trade. Students will tailor the program to their specific interests and needs by developing a topical focus and including courses from outside the Department of Modern Languages, through which they may develop a secondary emphasis that can be incorporated in a thesis project.

## **Requirements for Admission**

In addition to the general admission requirements of the Graduate School, the Spanish MA program requires:

- an undergraduate GPA of at least 3.0, with a GPA of at least 3.0 in Spanish courses
- a bachelor's degree in Spanish is not required, although all candidates must demonstrate Spanish oral and written proficiency at the advanced level, as defined by the American Council on the Teaching of Foreign Languages
- two copies of all college transcripts
- three letters of recommendation
- a statement of the applicant's purpose in pursuing the degree, in Spanish; any gaps, weaknesses or special circumstances affecting an applicant's academic record should be addressed in the statement of purpose portion of the application
- a TOEFL score higher than 550 for students whose previous academic degree was completed in a non-English-speaking country

In special circumstances, the department may modify its admission standards.

## Program Requirements

1. Students must complete a minimum of 27 SPAN credit hours.
2. Students must complete a minimum of 30 graduate level (5000 or above) credit hours.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Candidates in Spanish must satisfy the general requirements of the Graduate School as outlined in this catalog and will be required to complete 33 hours of course work distributed with respect to one of the following two options:

### Thesis option (course work + thesis):

- **3 hours** SPAN 5000 - Introduction to Graduate Studies in Spanish
- **24 hours** Literature/Culture and Linguistics coursework, including at least 6 semester hours in Literature/Culture and 6 in Linguistics. Students may include up to two courses (3-6 credits) from outside the Modern Languages Department, as approved by their advisor.
- **6 hours** SPAN 5950 - Master's Thesis preparation and writing

**Thesis Option Total: 33 Hours**

## **Nonthesis option (course work):**

- **3 hours** SPAN 5000 - Introduction to Graduate Studies in Spanish
- **30 hours** Literature/Culture and Linguistics coursework, including at least 6 hours in Literature/Culture and 6 in Linguistics. Students may include up to two courses (3-6 credits) from outside the Modern Languages Department, as approved by their advisor.

## **Nonthesis Option Total: 33 Hours**

### **Notes:**

1. No more than one undergraduate course (3 semester hours) may be applied toward the MA degree, and that course must have been taken at the 4000 level or above and in an ancillary field outside the Department of Modern Languages.
2. Students choosing the nonthesis option may elect to take three courses (9 semester hours) outside the department.

## **Financial Aid**

The department offers a limited number of teaching assistantships for graduate students on a semester-by-semester basis. Appointment is competitive and is typically based on a student's academic credentials. Contact the department for details. For information on grants, federal work-study programs, scholarships and loans, contact the Office of Financial Aid (303-556-2886).

For further information concerning the master's degree in Spanish at CU Denver, direct inquiries to the graduate advisor.

Martin M. Maltempo, PhD, Columbia University  
Clyde S. Zaidins, PhD, California Institute of Technology

Physics, as the most fundamental of the sciences, is the foundation upon which many other disciplines are built. Therefore, other programs often require knowledge of the fundamentals of physics, and a physics degree is an outstanding platform for employment and advanced study in many technical disciplines. The department offers both a course of study fulfilling the bachelor of science degree and a wide range of service courses for students majoring in disciplines other than physics.

The Department of Physics offers two programs of study, or tracks. Students should consult with a departmental advisor prior to choosing a track. *Track 1-Pure and Applied Physics* is intended for students preparing for graduate school, teaching careers, or careers in industry or government labs. *Track 2-Biophysics and Medical Physics* is seen as a bridge to an advanced degree in the health sciences for those interested in medical research, admission to medical school, preparation for work in a hospital or clinical situation, or industrial jobs in biomedical instrumentation. For either track, students preparing for employment in an interdisciplinary area (such as environmental, geophysical or energy study) can choose to add an appropriate minor or arrange a specific major program on an individual basis.

The department now also offers an online certificate in the Scientific Foundations of Technical Innovation at both undergraduate and graduate levels. This 12-semester-hour program is intended to foster careers in the practical application of physics and the potential commercialization of new technologies.

To enhance the employment and postgraduate study options of physics majors, the department is committed to providing students with opportunities for experimental, computational and theoretical research. On-campus opportunities are available through the faculty research programs. Questions regarding physics courses or the physics curriculum should be directed to a departmental advisor. Appointments should be made through the physics office.

## **Certificate Program**

Click here to learn more about the requirements for the **Scientific Foundations of Technical Innovation Certificate**.

## **Programs**

### **Certificate**

# **SCIENTIFIC FOUNDATIONS OF TECHNICAL INNOVATION CERTIFICATE**

The goal of this certificate is to give students and working professionals an opportunity to broaden their technical knowledge while contributing to regional economic development. Two real-world projects—one for a client and one for the student’s own pursuits—are combined with a series of six short courses to provide both context and substance for gaining the knowledge needed to create technical prototypes. The model is based on the method by which most physical science graduate students learn technical domains on a “just-in-time” basis. It is also a method by which many corporations quickly bring new project team members up to speed on project knowledge. Entry into the certificate program requires prior completion of two semesters of calculus-based physics and two semesters of calculus or permission of the certificate advisor.

## Program Requirements

- Students must complete a minimum of 12 credit hours from approved coursework.
- Students must complete all credits for the certificate at the graduate (5000 or above) level.
- Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA.
- Students must complete all credits for the certificate with CU Denver faculty.

Graduate versions of the courses (5000-level) require an undergraduate degree and additional work on technical analysis or connection to professional practice.

### Complete all of the following courses:

- PHYS 5850 - Physics for Design and Innovation I
- PHYS 5400 - Scientific Instrumentation

Choose six 1-semester-hour short courses out of a larger list of offered topics; the specific sequence must be approved by the certificate advisor.

- PHYS 5852 - Physics for Design and Innovation II

**Total: 12 Hours**

Mike Cummings, PhD, Stanford University

Jana Everett, PhD, University of Michigan

Political science is the study of people, power and the public good. Looking at a variety of societies, institutions and interpersonal situations, the discipline asks who has power, where this power comes from, how it is used, how it promotes or impairs the public good and how the public good is defined. Political science draws from other fields, such as psychology, philosophy, economics, sociology and world literature. Finally, it explores the relationship between idealism and realism, between theory and practice, between political thought and personal action.

Opportunities for students with a degree in political science include careers in business, teaching, journalism, community organizing and government service. A political science degree also serves as good preparation for professional training in law and public administration. Students' internship experiences increase their job opportunities. Students with an MA in political science may find careers in such areas as business, government research and administration and teaching at the community-college level.

The CU Denver Political Science Masters Program provides many opportunities for professional development through political internships, for community-based learning through a focused community organizing and development curriculum (including many teaching, research and service partnerships with local community organizations), and for international engagement through a robust international politics curriculum, study abroad opportunities, and partnerships with international organizations.

Please visit the political science department website for detailed information on programs, faculty, students, courses and syllabi, community involvement and service learning, internships and photographs.

## **Fourth World Center for the Study of Indigenous Law and Politics**

**Executive Director:** Glenn T. Morris

**Telephone:** 303-315-1762

This center provides a research clearinghouse to students and faculty at CU Denver on legal and political issues that affect indigenous peoples (the Fourth World). In addition to supporting a modest library of rare books and periodicals on indigenous issues, the center also stocks video and audio resources on subjects of indigenous politics and a substantial news file archive on current developments in the Fourth World. The center has produced curricular materials, including the *Fourth World Bulletin*, for use in international relations and area-studies courses.

## **Center for NEW DIRECTIONS in Politics and Public Policy**

**Director:** Minsun Ji

**Website:** <https://clas.ucdenver.edu/newdirections/>

This center provides academic programs, courses and research focused in the areas of politics and public policy with the purpose of developing the leadership capacities necessary to address changing public priorities for the 21st century within neighborhoods, communities, governmental jurisdictions, labor organizations, and nonprofit entities. Students in the Center's academic programs include working professionals in public and non-profit sectors; elected officials; community activists; interest-group stakeholders; educators from a wide range of demographic, occupational,

and personal backgrounds; and simply concerned citizens. The New Directions program offers professional internships with a wide variety of political jurisdictions, community-based groups, and labor organizations across Colorado, including several funded internships.

The center offers both undergraduate and graduate degrees in political science with emphases in public policy and administration.

### Certificate

# LABOR LEADERSHIP CERTIFICATE

## Introduction

Please click here to see Political Science department information.

The Labor Leadership certificate is meant to develop the next generation of leaders in labor unions and civic organizations focused on labor and related issues of race, class and gender equity. The certificate is particularly relevant to labor union leaders, rank and file members, and community-based organizational staff who desire to receive continuing education regarding labor leadership. The labor leadership certificate will combine academic instruction with field learning and community-based research projects. The program features active partnerships with local labor organizations, such as unions and community-based groups focused on relevant labor, class and race issues (such as immigrant rights groups, workplace gender equity groups, etc.). Certificate students will join a diverse group of graduate students pursuing their full Master's degree in the Department's community leadership program (including students focused on governmental/public leadership, and students focused on non-profit leadership) which will enhance synergetic learning in the classroom, and enlarge networking opportunities among all students.

The certificate is open to non-degree seeking as well as students formally admitted to the MA in Political Science program. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Master's Degree in Political Science.

The certificate can be earned either through our traditional on-campus graduate seminars, or entirely through classes offered in a weekend-intensive format in our New Directions graduate program. Students may take classes in either format desired.

## **Admissions and Declaring this Certificate**

Any current or potential student wishing to declare this certificate should schedule a certificate advising appointment with either the Director of the New Directions graduate program (Dr. Minsun Ji) or with the Director of the On-campus Graduate Program (Dr. Michael Berry), in order to register their intent to pursue the Labor Leadership Certificate and to develop a curriculum plan.

## **Grade Requirements**

Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

## **Curriculum and Credit Requirements**

The graduate certificate requires five Labor Leadership courses (15 credits)

## **Required Labor Leadership Courses**

Take **all** of the following courses

- PSCI 5535 - Labor and Working Class Politics
- PSCI 5548 - Labor Law and Collective Bargaining
- PSCI 5550 - Labor, Trade Unions and the Global Economy

## **Elective Labor Leadership Courses**

Take **two** of the following courses

- PSCI 5326 - Advanced International Political Economy: Globalization
- PSCI 5424 - The Social Economy and Sustainable Development

- PSCI 5434 - The Cooperative Movement: Politics and Policy
- PSCI 5914 - Community Organizing and Community Development

# PUBLIC, NONPROFIT AND COMMUNITY LEADERSHIP GRADUATE CERTIFICATE

## Introduction

Please click [here](#) to see Political Science department information.

The Public, Non-Profit and Community Leadership Graduate Certificate is offered in two different formats: the traditional, on-campus format, and the New Directions weekend classes format, with classes offered in CU Denver facilities south of Denver (currently at the Liniger Building in Parker). Students can choose classes in either of these two formats to complete the certificate.

The CU Denver Political Science Department's Public, Non-Profit and Community Leadership Certificate engages students in a focused curriculum in the local public leadership, and in the community organizing and development field, including field placements in internships with local community partners. The certificate is tailored to meet the needs of individuals in public and non-profit positions that require development of their leadership competencies and for individuals in informal community leadership positions who want to build their knowledge, skills, and effectiveness.

The program curriculum is anchored around the study and practice of local civic engagement, especially in traditionally marginalized communities. Students will be connected to meaningful work and networking opportunities in local government or in community settings, through community-based coursework, professional internships and service-learning opportunities. The certificate program provides critical education and effective skills-based training for students seeking careers in local government, in non-profit organizations, or in community organizing and development work. Students will be prepared to become change agents in their communities, while developing possible career paths in community-based advocacy/service organizations, public agencies, or international development work.

The certificate is open to non-degree seeking students (with or without an undergraduate degree) as well as students formally admitted to the MA in Political Science and to upper division undergraduates seeking to get a head start on their graduate studies. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students

who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Master's Degree in Political Science.

The certificate can be earned either through our traditional on-campus graduate seminars, or entirely through classes offered in a weekend-intensive format in our New Directions graduate program. Students may take classes in either format desired.

## **Admissions and Declaring This Certificate**

Any current or potential student wishing to declare this certificate should schedule a certificate advising appointment with either the Director of the New Directions graduate program (Dr. Minsun Ji) or with the Director of the On-campus Graduate Program (Dr. Michael Berry), in order to register their intent to pursue the Community Leadership Certificate and to develop a curriculum plan.

## **Grade Requirements**

Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

## **Curriculum and Credit Requirements**

The graduate certificate requires four "public and community leadership" courses (12 credits), which must include PSCI 5914 - Community Development and an appropriate field study course (most usually an internship with a local government jurisdiction or community based organization).

## **Required Public and Community Leadership Courses**

- PSCI 5914 - Community Organizing and Community Development

Field Placement Requirement, fulfilled by one of the following courses

- PSCI 5939 - Internship
- PSCI 5944 - CU in the City

## **Elective Public and Community Leadership Courses (6 credits)**

- PSCI 5840 - Independent Study: PSCI (when relevant and approved by Program Advisor)
- PSCI 5548 - Labor Law and Collective Bargaining
- PSCI 5555 - International Women's Resistance
- PSCI 5414 - Non-Profits and Social Change
- PSCI 5424 - The Social Economy and Sustainable Development
- PSCI 5434 - The Cooperative Movement: Politics and Policy
- PSCI 5265 - Social Justice And Globalization
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5094 - Seminar: Urban Politics
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5024 - State Politics: Focus on Colorado
- PSCI 5025 - Local Governance and Globalization
- PSCI 5075 - Gentrification and Social Equity
- PSCI 5084 - Local Government and Administration
- PSCI 5008 - Graduate Topics in Political Science (when relevant and approved by Program Advisor)

Public Leadership Course credits may also be earned through study abroad in the Semester in Berlin program or the Development in East Africa program.

### **Dual Degree**

# **4+1 INTERNATIONAL STUDIES BA TO POLITICAL SCIENCE MA**

► Graduate School Policies and Procedures apply to this program.

## **Introduction**

Please click [here](#) to see Political Science department information.

Students will follow the undergraduate curriculum for International Studies and work closely with their faculty advisor to begin taking Political Science graduate level coursework as they complete their undergraduate degree. They will complete no more than 15 credits as an undergraduate that will apply to both their undergraduate and graduate degrees. Students may officially declare their intent to complete this program in either their junior or senior year, and may apply to the graduate program during their senior year. Application requirements may differ from the traditional 2 year MA, which is

why students need to work closely with faculty advisors and the political science graduate program director for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements.

## **Program Delivery**

- This is an on-campus program.

## **Declaring This Program**

- Click here to go to information about declaring a major.
- Application process: Interested students would submit a short application to the Department any time after the first semester of their junior year. The application will include:
  - A Letter of interest that describes the student's reasons for applying into the program.
  - Undergraduate transcripts.
  - The names of at least two faculty members in the CU Denver Political Science Department who can attest to applicant's advanced levels of reading, writing and analytical skills, and to their outstanding intellectual curiosity and work ethic.
  - Following review and admission by the faculty, students would begin their 4+1 curriculum during the second semester of their junior year, or in a subsequent semester.

## **General Requirements**

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements

[Click here](#) for information about Academic Policies

## **Program Requirements**

1. A minimum of 48 undergraduate credit hours in the International Studies program and 33 graduate credits hours in Political Science must be completed to earn both an undergraduate and a graduate degree through this 4+1 program.
2. Up to 15 graduate level credit hours in Political Science may be taken by International Studies undergraduates accepted to the 4+1 program, and these

credits will count both towards completion of the International Studies undergraduate degree, and the graduate degree in political science, if the student is later accepted into the graduate program.

3. A minimum of 21 semester hours must be taken from CU Denver faculty.
4. Complete all International Studies undergraduate major requirements. Refer to the undergraduate International Studies catalog page.
5. To secure admission to the Political Science graduate program, submit formal graduate application during the senior year.
6. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5.
7. Students must earn a minimum grade of B- (2.7) in any graduate level course for it to later be counted towards graduate degree requirements.
8. All graded attempts in required and elective courses are calculated in the major GPA. No course taken as pass/fail may be counted.

## **Program Allowances and Restrictions**

In the pathway below no more than 15 undergraduate credit hours may “double-count” for the M.A.. Elective courses must be in accordance with Graduate School Policies. Therefore, meeting with an advisor regularly is recommended. Apply into 4+1 Program any time after the first semester of junior year standing as an undergraduate.

### **Master of Arts**

# **NEW DIRECTIONS IN PUBLIC, NON-PROFIT AND COMMUNITY LEADERSHIP, POLITICAL SCIENCE MA**

► Graduate School Policies and Procedures apply to this program.

**Director:** Minsun Ji

**E-mail:** minsun.ji@ucdenver.edu

The Public, Non-profit and Community Leadership track of the political science MA program is offered off-campus through the Center for New Directions at CU Denver South in Parker, CO. The Center for New Directions offers an MA program focused on public leadership, community labor organizing, and social economy innovations, in collaboration with community and labor organizations and local government jurisdictions across Colorado. The program seeks to develop the public leadership & community

organizing capacities necessary to address challenges and leadership & community organizing capacities necessary to address challenges and opportunities within neighborhoods, communities, government jurisdictions, and non-profit entities.

In addition to their standard coursework, students in this Masters program are encouraged to be involved in experiential learning through professional internships, community-based action research opportunities, and other practicums made available to students through the program's many university-community partnerships, including the possibility of full-time, salaried internships with rural and small jurisdictions across Colorado. Through partnerships with government jurisdictions across the state, and with non-profits and community-based organizations, New Directions seeks to build community power and identify policy solutions to local challenges.

This program presents courses in an intensive weekend format, allowing students to complete their masters entirely through weekend or online courses.

## **Degree Requirements**

1. Students must complete a total of 33 PSCI graduate credit hours to complete the MA degree.
2. Students must earn a minimum grade of B- (2.7) in all masters courses taken at CU Denver and must achieve a minimum cumulative masters GPA of 3.0. All graded attempts in required and elective courses are calculated in the masters GPA. Students cannot complete the masters or ancillary course requirements as pass/fail.

## **Required Core Courses**

- PSCI 5914 - Community Organizing and Community Development
- PSCI 5468 - Research Methods in Political Science
- PSCI 5960 - Master's Project

**Total: 9 Hours**

## **Electives**

In addition to the required core courses, students must take 24 credit hours of political science electives.

**[Note:** Previously earned graduate credit may be submitted for approval to satisfy up to nine hours of the supportive elective requirement. The elective courses offered may change from time to time based on needs, interests and other factors.]

Elective courses in the New Directions program are offered in three different "tracks" of study, allowing students to choose their particular interest and focus their studies on

that subject. The three tracks are: Local Governance, Community and Labor Organizing, and The Social Economy and Sustainable Development.

Students are encouraged to focus their studies by taking courses within a chosen track, but it is *not* required that students only take courses within a single track (and some courses fit in more than one track).

1. **Local Governance:** Curriculum focuses on educating students who are interested in working in local and state government sectors, or with public policy research and advocacy organizations. Curriculum and community partnerships in this area focus on local government and administration, the politics of government finance, state politics and public policy challenges.
2. **Community and Labor Organizing:** Curriculum focuses on developing diverse theoretical and practical courses in labor and community organizing politics, history and strategies. Courses focus on social movement theories, labor union politics, and community organizing strategies to help students develop theoretical foundations and practical strategies for more effective community and labor leadership.
3. **The Social Economy and Sustainable Development:** Curriculum focuses on developing an understanding of the current political-economic systems, and on exploring alternative and diverse economic strategies that might work to the benefit of less privileged communities. Courses and community partnerships allow students to explore democratic financial systems, land trusts, and worker cooperatives, and other such innovative “social economy” practices, at the local, national and global levels. In this track, students will learn of diverse economies theory, innovative economic development strategies in both rural and urban areas, the worker cooperative movement, and innovative financial strategies that work for less privileged communities.

Below is a list of some regularly offered elective courses in the New Directions program. All courses in our graduate catalog are available to be offered as electives in the New Directions program.

- PSCI 5545 - Immigration Politics
- PSCI 5548 - Labor Law and Collective Bargaining
- PSCI 5354 - Seminar: Environmental Politics and Policy
- PSCI 5424 - The Social Economy and Sustainable Development
- PSCI 5434 - The Cooperative Movement: Politics and Policy
- PSCI 5457 - Seminar: American Political Thought
- PSCI 5265 - Social Justice And Globalization
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5014 - Seminar: American Politics
- PSCI 5024 - State Politics: Focus on Colorado
- PSCI 5075 - Gentrification and Social Equity
- PSCI 5084 - Local Government and Administration

- PSCI 5085 - Comparative Governance: Environment and Society
- PSCI 5009 - Politics of the Budgetary Process
- PSCI 5414 - Non-Profits and Social Change

**Total: 24 Hours**

## **Project Requirement**

All students are required to complete a 3-credit master's project under the direction of a faculty advisor. Registration is done using the Special Processing form, rather than online.

- PSCI 5960 - Master's Project

**Total: 3 Hours**

## **Course Format**

All courses are offered in a weekend format that consists of three weekend sessions for a given course, spread out over a two or three month period. Weekend classes are held from 9:00 am to 4:00 pm on both Saturday and Sunday of each weekend session. In most cases, a student will complete all of the weekend sessions of one course before starting the weekend sessions for the next course. There is typically a two to three week break between each weekend of class-time in a given course.

**Major Total: 33 Hours**

## **Certificate Program**

The Center for New Directions MA program offers two certificate programs:

- Public, Non-Profit and Community Leadership
- Labor Leadership Certificate

These certificate programs allow students to focus their studies in a particular direction and to note that particular focus on their transcript. Students do not have to be seeking a full Master's degree to earn a certificate of completion through the certificate program.

For more information on these graduate certificates, click the links above.

# POLITICAL SCIENCE MA

► Graduate School Policies and Procedures apply to this program

**Director:** Michael Berry

**E-mail:** michael.berry@ucdenver.edu

## Introduction

The Political Science Department offers a Master of Arts (MA) degree in Political Science with an emphasis on building academic and practical skills in key areas of the discipline. Research and teaching in the department centers on the major fields of American politics, comparative politics, international relations, political theory and public policy. The department also offers more specialized training in community organizing, human rights, legal studies, gender politics, race and ethnic politics, European studies, indigenous politics and urban politics. Students pursuing the MA have the option of completing the traditional track or an “alternative” track centered on public, non-profit and community leadership. Students completing the alternative “public, non-profit and community leadership” track take most courses on weekend, off-campus locations. Students completing either track have gone on to PhD programs across the country and work in a variety of areas, including: state and local elected office, government service, community organizing and development work, nongovernmental organizations, legislative analysts, UN affiliates, lobbyists, teachers, media analysis and political consulting.

## Requirements for Admission

Students applying for admission to the MA program in political science should present at least 18 semester hours of previous academic work in political science, at least 9 hours of which should be at the upper-division or graduate level. The department may make exceptions to these requirements in unusual cases (for instance, if course work in related fields such as psychology, economics and history compensates for the deficiencies in political science). Applicants should present an undergraduate GPA of at least 3.0 to be considered. In their applications, students must submit transcripts and letters of recommendation (from academic sources) as specified by the Graduate School. In addition, applicants must submit a statement of academic objectives and an academic writing sample. Standardized test scores are not required of applicants, but will be considered if submitted. Program applicants who face difficulties in meeting these requirements should reach out for individual discussion with our Graduate Program director (for example, if an undergraduate GPA is below 3.0, or if letters of recommendation from professors taken years ago are hard to obtain).

In order to take graduate courses in political science, students must either be admitted to the MA program or secure permission to take courses as a non-degree student. Non-degree students interested in our certificate programs or in taking graduate courses for any reason should reach out to the Department Graduate Advisor to secure admission to courses as a non-degree seeking student.

## **Program Requirement Overview**

1. Students must complete 33 credit hours.
2. Students must earn a minimum grade of B-(2.7) in all masters courses taken at CU Denver and must achieve a minimum cumulative masters GPA of 3.0. All graded attempts in required and elective courses are calculated in the masters GPA. Students cannot complete masters or ancillary course requirements as pass/fail.
3. Students must complete a minimum of 16 credits with CU Denver Political Science faculty.
4. Students who are on probation must meet regularly with the graduate advisor and must secure approval from the advisor for all course work while on probation.

## **Degree Requirements**

In addition to the requirements for admission and details of the program spelled out here, graduate students in political science must also abide by department rules and procedures specified in the Graduate School Policies and Procedures. Failure to meet these policies may result in a student being dropped from the program.

Under the On-Campus MA program in political science, two degree plans are available:

- Plan I requires the completion of nine graduate courses (27 semester hours) and a 6-credit thesis
- Plan II requires the completion of ten graduate courses (30 semester hours) and a 3-credit project or portfolio.

## **Required Core Classes**

Course work in both plans completed under the traditional track offered on the Downtown Campus must include the following two courses

- PSCI 5000 - State of the Discipline
- PSCI 5468 - Research Methods in Political Science

## **Elective Courses**

Students will complete between 12 and 15 elective semester hours, depending on whether they are working under Plan I or II. Elective courses must include at least one graduate seminar in each of the following three areas: 1) American politics, 2) Comparative politics/International Relations, and 3) Political Theory. Please see the Department graduate director, if you have questions as to which category a course might fit under.

In addition to taking regularly offered graduate seminars in the program, students may meet their elective requirements by taking independent study, internships, or graduate courses in related disciplines. These courses all require approval from the Graduate program director, or from a sponsoring faculty member in the Department. The total combination of independent study, graduate course work in related disciplines and internships cannot exceed 9 semester hours.

## **Alternative Political Science Masters Program: The New Directions Program**

In addition to its traditional, on-campus Masters degree, the Political Science Department offers a Public, Non-Profit and Community Leadership MA program through the Center for New Directions at CU Denver South in Parker, CO. The Center for New Directions offers an MA program focused on public leadership, community labor organizing, and social economy innovations, in collaboration with community and labor organizations and local government jurisdictions across Colorado. The program seeks to develop the public leadership & community organizing capacities necessary to address challenges and leadership & community organizing capacities necessary to address challenges and opportunities within neighborhoods, communities, government jurisdictions, and non-profit entities.

Plan II is available both under the traditional MA track offered on the Denver campus, as well as through an alternative track offered off-campus through the Center for New Directions in Politics and Public Policy. For details about this off-campus track in politics and public policy, see New Directions, MA in Political Science.

The Political Science graduate program offers three transcribed certificates, allowing students to focus their studies in a particular direction and to note that particular focus on their transcript. Students do not have to be seeking a full Master's degree to earn a certificate of completion through the certificate program.

- Public, Non-Profit and Community Leadership
- Labor Leadership

For more information on these graduate certificates, click the links above.

# POLITICAL SCIENCE MA / MASTER OF BUSINESS ADMINISTRATION (MBA) DUAL DEGREE

► Graduate School Policies and Procedures apply to this program.

In the 21st century, the fields of business administration and political science intersect, in that sustainable business development requires an understanding of the political environment, while political theory and practice must address the role of the business community in economic development. Providing students with both the business foundation and political knowledge enhances their ability to succeed in our ever-changing political world.

The CU Denver Master of Arts in Political Science (MA) degree offers an in-depth understanding of the political environment, locally, nationally and globally, emphasizing the development of academic and practical skills in key areas of the discipline, and centering on the major fields of American politics, comparative politics, international relations, political theory and public policy. The CU Denver Master of Business Administration (MBA) degree provides a strong foundation in business knowledge in such areas as organizing teams, developing marketing plans, using data analysis and technology in decision making, economics, financial management and strategic planning. The MBA develops skills required for competent and responsible administration of an enterprise viewed in its entirety, within its social, political and economic environment.

The Dual Master's Degree in Political Science (MA) and Business Administration (MBA) is designed for students whose interests overlap business and politics or business and international affairs. This program is jointly sponsored by the Department of Political Science of the College of Liberal Arts and Sciences and the Business School. This program enables students to simultaneously earn an MA in Political Science with an MBA.

The dual degree program provides a more comprehensive education to the next generation of professionals in the non-profit sector, corporate arena and governmental organizations. Dual degree students are able to complete both degree programs in less time, and with fewer total credit hours (66 for both), than if both degrees were pursued separately (48+33 = 81). The program keeps the core of each program intact, including some electives from both programs, and enables students to choose two additional electives from either business or political science to best suit their career and personal

goals. Furthermore, the interactions between the students enrich the students in both programs, as well as the organizations that employ them.

## **Admission Requirements**

Students must apply separately to, meet the admission requirements of, and be accepted by each program. It is possible for students currently admitted to one program to learn about the dual degree and choose to apply after admission to the other program.

## **GPA Requirements**

Students must maintain a cumulative GPA of 3.0 or higher across all courses that are applied to the dual degree. Any political science course in which a student receives a final grade lower than B- cannot be counted toward the total credits for the dual degree. Any business course in which a student receives a final grade lower than C cannot be counted toward the total credits for the dual degree. All graduate courses will be included in the cumulative GPA.

## **Transfer Credits**

No more than 9 semester hours of business credits from an AACSB Business School with a grade of B or better and no more than 6 semester hours of political science credits may be transferred into this dual degree program. The Business School will evaluate transfer hours in business and the Political Science Department will evaluate transfer hours in political science.

## **Graduation**

Students must complete all the requirements for both programs before they apply to graduate, and must apply to graduate in the same term for both programs.

## **Degree Requirements**

### **MBA Core (30 Hours)**

- BUSN 6520 - Leading Individuals and Teams
- BUSN 6530 - Data Analytics for Managers
- BUSN 6540 - Legal and Ethical Environment of Business
- BUSN 6550 - Analyzing and Interpreting Accounting Information
- BUSN 6560 - Marketing Dynamics in the 21st Century
- BUSN 6610 - Information Systems Strategy
- BUSN 6620 - Applied Economics for Managers
- BUSN 6630 - Management of Operations

- BUSN 6640 - Financial Management
- BUSN 6710 - Strategic Management

## **International Elective (3 Hours)**

Any course numbered 6000 or higher with the INTB prefix

or

ENTP 6826 - International Entrepreneurship

or any graduate-level business course that is cross-listed with an INTB prefix. Travel study offered by the Business School will also apply.

## **Political Science Core (18-21 Hours)**

- PSCI 5000 - State of the Discipline
- PSCI 5468 - Research Methods in Political Science

Graduate Seminar in American Politics subfield

Graduate Seminar in Comparative or International Politics subfield

Graduate Seminar in Political Theory subfield

PSCI 5950 - Master's Thesis (6 credits)

OR

PSCI 5960 - Master's Project (3 credits)

## **Political Science Electives (6-9 Hours)**

PSCI graduate seminars [must complete 6 hours if thesis, or 9 hours if project (from Political Science Core)]

## **Free Electives (6 Hours)**

Courses must be from either the Business School or Political Science department, meeting the descriptions below. A combination of both is also acceptable.

**Business Free Electives:** Any course numbered 6800 or higher with a BUSN prefix or any course numbered 6000 or higher with a prefix of ACCT, DSCI, ENTP, FNCE, HLTH, INTB, ISMG, MGMT OR MKTG.

**Political Science Electives:** Any course numbered 5000 or higher with a PSCI prefix.

Sneha Thamocharan, PhD, Texas A&M University

### Associate Professor, Clinical Teaching Track:

Joan Bihun, PhD, Wayne State University

Kevin Everhart, PhD, University of South Carolina

**Assistant Professor, Clinical Teaching Track:**  
Vivian Shyu, PhD, University of Denver

**Senior Instructors:**  
Bethann Bierer, PhD, University of Denver

**Emeritus Professors:**  
Rick M. Gardner, PhD, University of Nevada  
Barbara Walker, PhD, The Ohio State University

Psychology is the scientific study of behavior, consisting of the following major areas of study: experimental psychology, biopsychology, animal behavior, developmental psychology, social psychology, cognitive psychology, personality, industrial/organizational psychology and abnormal psychology.

## **Graduate Program**

The Psychology department offers a Master of Arts (MA) degree in Psychology with an emphasis in clinical psychology that is earned en route to the doctor of philosophy (PhD) degree in Clinical Health Psychology. Our program trains students within the context of the scientist-practitioner model. That is, we value an integrated approach to both the science and practice of clinical psychology. Our training emphasizes the contribution of research to the understanding, treatment and prevention of human problems, and the application of knowledge that is grounded in scientific evidence.

Click [here](#) to learn about the **requirements for the PhD in Clinical Health Psychology**.

# **PSYCHOLOGY, CLINICAL HEALTH PSYCHOLOGY PHD**

► Graduate School Policies and Procedures apply to this program

## **Objectives of the Program**

Clinical health psychology focuses on the interaction between psychological, physiological, and environmental factors as they influence health and well-being. This emphasis includes focus on: 1) the development of effective disease prevention behavioral interventions for individuals and populations at high risk for medical problems; and 2) the development of strategies to help individuals who are already ill to manage their disease and to increase their ability to collaborate with medical professionals and improve their coping skills. A clinical health psychologist combines expertise in research on health psychology with training in clinical psychology. Students

in this program are trained to work within the community to use clinical psychological skills and techniques to diagnose and treat mental health conditions, promote health and prevent illness, apply behavioral interventions in the treatment of illness, and improve the health care system. In addition to course work, students acquire expertise in research by completing both a master's thesis and doctoral dissertation. They demonstrate competence in clinical assessment and intervention through several applied practicum experiences, successful passage of the Comprehensive Clinical Competency Examination and successfully completing a pre-doctoral psychology internship. Students can complete the program in five years and have up to eight years to complete the program according to Graduate School Policies and Procedures.

## **Admissions**

The application deadline for receipt of all student information is November 15 for the following fall. You are responsible for making sure all materials are in on time. International students should be sure to submit all materials at least two weeks before this deadline (by November 1) so that they arrive at our department on time.

### **Admission Requirements:**

- BA or BS from an accredited college or university, with a minimum GPA of 3.5 based on all college course work.
- Undergraduate courses in: introductory psychology, psychological statistics, research methods and abnormal psychology. Additional courses in psychology are highly desirable; our admissions committee will also look favorably upon courses in the biological and physical sciences.
- Two official transcripts from each college and university attended.
- Graduate Record Exam (GRE): The GRE General Test (verbal, quantitative, analytical writing) is required. Most students in the program had a combined verbal and quantitative score of at least 1100 on the old GRE scoring system. The GRE should be taken at least six weeks before the November 15 deadline so that the scores arrive on time.
- Three letters of recommendation, at least two of which must be academic references. Applicants provide contact information for their references in the online application. Those individuals are automatically contacted electronically and asked to upload their recommendations directly to your application file.
- The online Graduate Application, including your resume/vita and personal statement.
- Application fee of \$50 (\$75 for international students).

## **Financial Information**

The University of Colorado Denver administers various forms of financial aid for graduate students: fellowships, scholarships and a number of awards from outside agencies. See the Office of Financial Aid for further information. Additionally, the psychology department offers teaching assistantships each year in such courses as introductory psychology, statistics, research methods and human development. Although we do not guarantee TA positions, we have been able to offer positions to our interested students.

Contingent upon the availability of grant money, faculty may also offer part-time research assistantships to qualified students. The typical RA position involves data collection and analysis, library research, etc. Some computer and statistical skills are usually required. RA positions are less available than TA positions, and they may arise on very short notice.

In-state tuition waivers and additional stipend monies may be available for doctoral students. We do guarantee to pay a full stipend, usually in the form of an assistantship, plus tuition for the first year. We will make every effort to do so for four years.

**Note:** Neither teaching nor research assistantships confer in-state tuition status.

## **Degree Requirements**

### **Course Work:**

The program requires approximately eight semesters of full-time course work and clinical practica, followed by a year-long internship. Students must maintain a 3.0 grade point average, and no grade below a B will count toward the requirements. Students must successfully complete their doctoral dissertation proposal prior to applying for their internship in the 5th year and are strongly encouraged to defend their dissertation prior to beginning their internship. Students can complete the program in five years and have up to eight years to complete the program, according to Graduate School Policies and Procedures.

### **Master's Thesis:**

The program has a provision for achieving a master's degree en route to obtaining the PhD. In addition to taking PSYC 8200, Teaching Skills Seminar, a master's degree is required for students to independently teach a course. During their time in the program, students' funding will likely require them to independently teach a course. Students must complete a master's thesis, an empirical research project that makes a significant contribution to the field. Although the thesis must address the student's own original question, the use of archival data and pilot studies is encouraged for this project.

### **Clinical Practica:**

A minimum of 500 face-to-face intervention and assessment hours and 1200 total practicum hours [face-to-face intervention and assessment hours, plus supervision, plus support hours as defined by the Association of Psychology Postdoctoral and Internship Centers (APPIC)] are expected in preparation for application to pre-doctoral internships. Approximately 50% of required practica are typically conducted in medical settings. Sites for practica training, include the department's own Psychology Clinic and external facilities such as outpatient diabetes clinics, cancer clinics, OB/GYN, HIV/AIDS, end-stage renal disease, pain, and cardiovascular clinics, and in-patient psychiatric facilities. Students are able to select practica based on their personal and professional interests. All field placements are approved in advance by the Coordinator of Clinical Training.

### **Demonstration of Clinical Competency:**

During the first semester of their third year in the program students must demonstrate their clinical competency by completing the Comprehensive Clinical Competency Examination (CCCE). The CCCE is designed to facilitate student demonstration of clinical competence at the developmental level of readiness for application to clinical internship. This evaluation is designed to assess the developmentally appropriate broad and general clinical competencies in clinical psychology, and does not necessarily evaluate clinical health psychology competencies per se. The CCCE comprises three sequential components conducted in phases:

1. Applied clinical diagnosis and assessment planning for a standardized patient.
2. Case conceptualization and treatment planning for a standardized patient. .
3. Intervention therapy session with a standardized patient and oral defense with a faculty committee.

### **Dissertation:**

Students must complete a dissertation that involves original empirical work and is distinct from other research projects and publications. The dissertation proposal must be completed and defended prior to making application for the pre-doctoral internship. Students must have a dissertation committee composed of four members of the graduate faculty. When the dissertation is completed to the satisfaction of the primary advisor, the student must orally defend the dissertation to the committee.

### **Internship:**

Students must complete a 12-month, full-time pre-doctoral clinical internship, preferably at an APA-accredited site. This internship is required of all clinical psychologists and is the capstone of clinical training in the doctoral program.

### **Courses**

- PSYC 6950 - Master's Thesis
- PSYC 7144 - Advanced Cognition and Emotion

- PSYC 7205 - Advanced Developmental Psychology
- PSYC 7220 - Advanced Biological Bases of Behavior
- PSYC 7262 - Health Psychology I
- PSYC 7350 - Psychotherapy I
- PSYC 7360 - Psychotherapy II
- PSYC 7410 - Assessment I: Personality
- PSYC 7420 - Assessment I: Intellectual and Cognitive Assessment
- PSYC 7485 - Diversity in Clinical Psychology
- PSYC 7490 - Topics in Health Psychology Summer Lecture Series
- PSYC 7500 - Advanced Psychopathology
- PSYC 7511 - Historical and Philosophical Foundations of Psychology
- PSYC 7700 - Clinical Research Methods
- PSYC 7710 - Multivariate Statistics
- PSYC 7713 - Advanced Statistics
- PSYC 7730 - Ethics and Professional Issues in Psychology
- PSYC 7910 - Clinical Practicum

Class Notes: Students should enroll in 1 credit hour during year one (spring and summer semesters only), 1 credit hour during year two (fall, spring, and summer semesters), and 3 credit hours during year three (fall, spring, and summer semesters). A total of 14 credit hours of PSYC 7910 are required.

- PSYC 7911 - Clinical Practicum II

Class Notes: Students should enroll in 2 credit hours during year two (fall, spring, and summer semesters). A total of 6 credit hours of PSYC 7911 are required.

- PSYC 8100 - Clinical Behavioral Medicine
- PSYC 8200 - Teaching Skills Workshop
- PSYC 8262 - Health Psychology II
- PSYC 8501 - Primary Care Psychology
- PSYC 8502 - Cardiovascular Health Psychology
- PSYC 8503 - Group Interventions in Health Psychology
- PSYC 8550 - Advanced Social Psychology
- PSYC 8910 - Advanced Clinical Practicum

Class Notes: Students should enroll in 3 credit hours during year four (fall and spring semesters only). A total of 6 credit hours of PSYC 8910 are required.

- PSYC 8938 - Pre-Doctoral Internship
- PSYC 8990 - Doctoral Dissertation

# SOCIAL SCIENCE, MASTER OF

## **Faculty**

**Associate Professor:**  
Omar Swartz, JD, Duke University; PhD, Purdue University

**Assistant Professor:**  
Margaret L. Woodhull, PhD, University of Texas, Austin

**Visiting Assistant Professor:**  
Lorna Hutchison, PhD, McGill University

The Master of Social Science (MSS) program is designed to meet the needs of students who prefer flexibility in constructing an individualized course of study in social science. Emphasis is placed on the integration of knowledge across and beyond traditional disciplinary boundaries. This is accomplished through three required seminars, electives from a variety of disciplines chosen with the approval of advisors and program directors, and a project or thesis. Courses can be chosen from the social science disciplines: anthropology, communication, economics, geography, history, law, political science, psychology and sociology, as well as from select other disciplines and programs. The MSS program is intended for students interested in developing their own interdisciplinary perspectives in such areas as social thought, public policy, women's studies, educational reform, social justice and cross-cultural studies or politics. The program can provide: training for advancement in the professions of education, business, social service and government; a basis for further graduate studies in a specific social science discipline or professional field; a means for teachers and other working students to tailor degree programs to fit their personal career development needs; and a nontraditional approach for recent university graduates or adults re-entering the university to pursue liberal educational goals in the social sciences.

Click here to learn about the **requirements for the Master of Social Science** degree.

## **Programs**

**Master of Social Science**

# **SOCIAL SCIENCE MSS**

- ▶ Graduate School Rules apply to this program

## Requirements for Admission

General rules for admission into the Graduate School, as well as the following apply:

- evidence of a bachelor's degree
- an official copy of transcripts from all community colleges, colleges, and universities attended
- overall GPA of at least 3.2 out of 4.0
- a writing sample
- three letters of recommendation (at least two from academic sources)
- appropriate undergraduate training or professional background, or experience that provide evidence of ability to pursue the MSS degree
- a typed statement specifying the goal of advanced study in the social sciences expressed in clear, correct and effective English. Applicants should provide a statement of their background (education and experience) and its relevance to their proposed interdisciplinary graduate work, and why this graduate program is relevant to their interests.
- standardized test scores are not required, but will be considered if submitted

After meeting all other requirements for admission, applicants may be required to have an interview to discuss their interest in the program and their plans for study. For out-of-state applicants, an appropriate substitute for the interview may be determined by the directors.

### Provisional Admission:

Applicants may be admitted as provisional-status graduate students if their GPA is low and their complete record indicates a high probability of success.

### Non-degree Students:

Potential applicants may take CU Denver graduate-level courses as non-degree students (unclassified student with a bachelor's degree) if they:

1. wish to strengthen their record in order to demonstrate their potential to successfully complete courses in the program
- or-
2. wish to start coursework in the program prior to completing their application, with the understanding that taking courses does not guarantee admission.

Up to 12 semester hours of CU Denver graduate-level work taken as a non-degree student or taken from another university may be accepted by the program once a student has been admitted to the program. For further information on non-degree graduate student status, see the Information for Graduate Students section of this catalog. In the case of CU Denver graduate students transferring to the MSS program, previous coursework may be accepted as appropriate to the MSS plan of study.

## **International Students:**

International students must also meet CU Denver requirements for international admission. See the Information for International Students section of this catalog or call 303-315-2230 for further information.

## **Degree Requirements**

The Master of Social Science (MSS) is a 36 credit hour program, of which 30 hours must meet all specifications of the Graduate School . Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. A grade below B- in any given course will not be counted toward the degree. All graded attempts in required and elective courses are calculated in the major GPA. Courses credited toward the MSS degree must typically be taken at CU Denver (a maximum of 12 graduate semester hours may be transferred from other institutions after matriculating into the MSS program, subject to the MSS director's approval). Students wishing to pursue study abroad options must seek advisor approval in advance.

Students may pursue a general MSS degree or concentrate their studies and coursework on an approved track.

Each student's program is supervised by MHMSS faculty. All independent study, project, and thesis contracts must be approved in advance by the program director. A total of two independent study courses and one internship may count toward the degree. Only one graduate-level online course (up to 3 hours) may be taken toward the degree, with prior approval. A maximum of two 4000-level undergraduate courses may apply, with faculty approval. Remaining coursework must be 5000-level or higher and must be completed with CU Denver faculty or approved study away programs. All students must complete and pass a final project or thesis and an oral comprehensive defense of that work, in order to graduate.

## **Three Required Core Seminar Courses**

Take ***all*** of the following courses:

- SSCI 5020 - Foundations and Theories of Interdisciplinary Social Science

Must be taken during the first year, offered in the fall only.

- SSCI 5013 - Methods and Practices of Graduate Interdisciplinary Humanities

Must be taken during the first year, offered in the spring only.

- SSCI 5023 - Research Perspectives in Social Science

Students should take this course after they have completed 21-24 credit hours and are ready to write a proposal for their thesis or project. This course is always offered in the spring and occasionally in the fall, as needed.

### **Total: 9 Credit Hours**

### **Electives**

Students must complete a total of 21-24 credit hours. Students completing a project rather than a thesis take 24 hours of electives, while thesis students complete 21 hours of electives. Students may choose to create their own curriculum from at least two disciplines addressing their specific research interest. Alternatively, students may choose to follow an approved specialized track. Prior to taking electives, students must meet with a MHMSS program faculty advisor and establish their course of study. If students decide to change their course of study or want to substitute approved coursework, they must meet with a MHMSS program advisor in advance and gain pre-approval.

**Study Abroad:** Students wishing to count credits accrued from a study abroad program while pursuing the MSS must follow the rules of the Graduate School and must have approval of the program director in advance of studying abroad.

### **Total: 21-24 Credit Hours**

### **Thesis or Project**

In order to proceed with a project or thesis, all students must submit a proposal and gain approval from three faculty members and the program directors.

- SSCI 6950 - Master's Thesis
- SSCI 6960 - Master's Project or Report

### **Total: 3 or 6 Credit Hours**

### **Oral Exam**

An oral exam defending the project or thesis before a committee of three faculty members must be passed in order to graduate.

**Degree Total: 33-36 Credit Hours**

## **MSS Elective Pathways:**

### **General MSS Track**

Students pursuing the general MSS degree track create a course of study based on their individual interests and goals. In consultation with a faculty advisor, students choose two or three academic disciplines as areas of concentration. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

### **Specialized MSS Tracks**

Students may also focus in one of the tracks in the Master of Social Science program: ***Community Health, Ethnic Studies, International Studies, Social Justice, Society and the Environment, or Women and Gender Studies***. Tracks allow students to concentrate their studies in a defined field designed by faculty. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

### **Community Health Track**

The Community Health track focuses coursework on social and communication theory, demographics and ethnic dimensions to public health, basic research methods, and statistics, in order to facilitate development of problem solving and critical thinking skills in the areas of epidemiology, public health and public health education, and health planning.

*In addition to the MSS Core requirements, students must:*

***Complete 9 credit hours of approved methods courses from the following list- some of these courses have prerequisites that must be met:***

- HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I
- ANTH 6063 - Qualitative Research Design and Methods
- HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences
- HBSC 7071 - Social and Behavioral Determinants of Health and Disease

**Complete a minimum of 6 credit hours of approved community health related elective coursework from the list below-substitutes may be approved by the student's advisor:**

- ANTH 5600 - Medical Anthropology
- ANTH 5290 - Anthropology and Public Health
- ANTH 5300 - Migrant Health
- COMM 5500 - Health Communication
- COMM 5550 - Rhetorics of Medicine & Health
- COMM 5620 - Health Risk Communication
- ECON 6210 - Public Finance
- ENV5 6230 - Environmental Epidemiology
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- GEOG 5235 - GIS Applications in the Health Sciences
- GEOG 5710 - Disasters, Climate Change, and Health
- HLTH 6010 - Health Care Systems
- HLTH 6070 - International Health Policy and Management
- PHIL 5242 - Bioethics
- PSCI 5354 - Seminar: Environmental Politics and Policy
- PUAD 5615 - Health Policy
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present

**Complete a project or thesis on an approved community health related topic.**

### **Ethnic Studies Track**

The Ethnic Studies track explores the construction of race and ethnicity by governments and communities through the intersection of popular culture and public policy in both the historical and contemporary contexts.

*In addition to the MSS Core requirements, students must:*

**Complete at least one ethnic studies methods/theory course from the list below:**

- ETST 5000 - Research Methods in Ethnic Studies
- EDFN 5001 - Problematizing Whiteness: Educating for Racial Justice

**Complete a minimum of 12 credit hours of approved ethnic studies related elective coursework from the list below, substitutions may be approved by the student's advisor :**

- ANTH 5350 - Anthropology of Globalization
- COMM 5270 - Intercultural Communication
- EDFN 5050 - Critical Issues in American Education
- ENGL 5220 - African-American Literature

- ENGL 5460 - Contemporary World Literature
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5415 - Social Revolutions in Latin America
- HIST 5455 - African Struggle for Independence
- HIST 5462 - Islam in Modern History
- HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- SSCI 5540 - Law, Diversity and Community in United States History
- PSCI 5094 - Seminar: Urban Politics
- PSCI 5145 - Indigenous Politics
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5256 - Seminar: National Question and Self-Determination
- PSCI 5446 - Advanced Indigenous Peoples' Politics
- PSCI 5545 - Immigration Politics
- PSCI 5914 - Community Organizing and Community Development
- SOCY 5050 - Health Disparities
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SOCY 5690 - Crime and Inequality Over the Life Course
- SPAN 5020 - Spanish Sociolinguistics
- SPAN 5060 - Dialects of the Spanish-Speaking World
- SPAN 5076 - Spanish in Colorado
- SPAN 5080 - Spanish in the United States
- SPAN 5521 - Mexican Literature I: pre-Columbian and Colonial
- SPAN 5522 - Mexican Literature II: 19th to 21st Centuries

***Complete a project or thesis on an approved ethnic studies related topic.***

### **International Studies Track**

Through humanistic and social science methodologies and hands-on experiences both in Denver and abroad, students learn to identify patterns and trends in the multifaceted discipline of international studies.

*In addition to the MSS Core requirements, students must:*

***Complete the methodology course listed below or one approved by the MSS program advisor:***

- PSCI 5216 - Seminar: International Relations

***Complete a minimum of 15 credit hours of approved international studies related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 5350 - Anthropology of Globalization
- COMM 5270 - Intercultural Communication
- COMM 5720 - Dynamics of Global Communication
- HIST 5032 - Globalization in World History Since 1945
- HIST 5220 - U.S. Foreign Policy Since 1912
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- PHIL 5220 - Aesthetics and the Philosophy of Art
- PSCI 5236 - Seminar: American Foreign Policy
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5286 - International Relations: War or Peace?
- PSCI 5326 - Advanced International Political Economy: Globalization
- PSCI 5545 - Immigration Politics
- PSCI 5555 - International Women's Resistance
- SOCY 5460 - Hate Groups and Group Violence
- SOCY 5610 - Sociology of Religion

***Complete a project or thesis on an approved international studies related topic.***

### **Social Justice Track**

The Social Justice track expands students' recognition of the many ways that they are already engaged as citizens and highlights their power to effect change through theoretical and moral education, critical thinking, and community engagement.

*In addition to the MSS Core requirements, students must:*

***Complete a minimum of 12 credit hours of approved social justice related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- BUSN 6540 - Legal and Ethical Environment of Business
- COMM 5040 - Communication, Prisons, and Social Justice
- ENGL 5190 - Advanced Topics in Writing & Digital Studies (depending on topic)
- HIST 5455 - African Struggle for Independence
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5415 - Social Revolutions in Latin America
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5225 - Urban America: Colonial Times to the Present
- HIST 5032 - Globalization in World History Since 1945
- HUMN 5650 - Reflections on Modernity
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- PSCI 5025 - Local Governance and Globalization
- PSCI 5206 - Social Movements, Democracy and Global Politics

- PSCI 5225 - Democracy and Democratization
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5286 - International Relations: War or Peace?
- PSCI 5414 - Non-Profits and Social Change
- PSCI 5545 - Immigration Politics
- PSCI 5555 - International Women's Resistance
- PSCI 5837 - Contemporary Issues in Civil Liberties
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present

***Complete a project or thesis on an approved social justice related topic.***

It is **HIGHLY RECOMMENDED** that students in this track take at least one quantitative and/or one qualitative research methods course as part of their plan of study. There are quantitative and qualitative methods courses offered in Anthropology, Environmental Science, Political Science, Sociology, and Research, Evaluation, and Statistical Methodology (RESM), which can be approved by the student's MHMSS faculty.

### **Society and the Environment Track**

Society and the Environment is an interdisciplinary track challenges students to apply knowledge from the social and biological sciences to environmental problems across a broad spectrum of institutional sectors and geographic locations.

*In addition to the MSS Core requirements, students must:*

***Complete all required methods courses from the list below:***

- ANTH 5053 - Quantitative Methods in Anthropology
- ANTH 6063 - Qualitative Research Design and Methods

***Complete one technical course from the list below:***

- ANTH 5450 - Development and Conservation: Contemporary Issues
- ANTH 5460 - Development and Conservation: Theory and Practice
- ENVS 6200 - Risk Assessment
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5080 - Introduction to GIS
- GEOG 5235 - GIS Applications in the Health Sciences

**Complete a minimum of 12 credit hours of approved society and environment related elective coursework from the list below, substitutions may be approved by the student's advisor :**

- COMM 5282 - Environmental Communication
- GEOG 5090 - Environmental Modeling with Geographic Information Systems
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- GEOG 5265 - Sustainability in Resources Management
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5350 - Environment and Society in the American Past
- GEOG 5420 - The Politics of Nature
- GEOG 5440 - Science, Policy and the Environment
- GEOG 5680 - Urban Sustainability: Perspectives and Practice
- GEOG 5710 - Disasters, Climate Change, and Health
- PSCI 5135 - Seminar: Political Economy of Latin America
- PSCI 5145 - Indigenous Politics
- PSCI 5217 - Human Rights in Theory and Practice
- PSCI 5236 - Seminar: American Foreign Policy
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5354 - Seminar: Environmental Politics and Policy
- PSCI 5555 - International Women's Resistance
- ENVS 5010 - Landscape Biogeochemistry
- ENVS 5020 - Earth Environments and Human Impacts
- ENVS 5280 - Environmental Hydrology

**Complete a project or thesis on an approved society and environment related topic.**

## **Women's and Gender Studies Track**

Women's and Gender Studies are based in feminist theory, queer theory, post-colonial and ethnic studies, and a variety of social sciences and cultural studies.

*In addition to the MSS Core requirements, students must:*

**Complete at least one WGST theory course from the list below:**

- SSCI/WGST/ HUMN 6010 - Methods and Theories of Feminism and Gender
- PHIL/ WGST 5500 - Feminist Philosophy
- HIST/WGST/ ENGL 5306 - Survey of Feminist Thought

**Complete a minimum of 12 credit hours of approved women's and gender studies related elective coursework from the list below, substitutions may be approved by the student's advisor:**

- ENGL 5000 - Studies of Major Authors (when the author is a female)
- ETST/ PSCI 4827 - Women and the Law
- ENGL/WGST/ HIST 5306 - Survey of Feminist Thought
- SSCI/WGST/ HUMN 5720 - Sexuality, Gender and Their Visual Representation
- HUMN/ SSCI 5770 - Imperialism, Post-Colonial Theory, Visual Discourse
- PSCI 4215 - Women's Rights, Human Rights: Global Perspectives
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5555 - International Women's Resistance
- PSCI 4564 - Gender and Politics
- CRJU 5930 - Interpersonal Violence Law and Public Policy
- CRJU 5910 - Nature and Scope of Interpersonal Violence
- WGST/ PHIL 5500 - Feminist Philosophy
- PHIL 5308 - Contemporary Feminist Thought
- SOCY 5550 - Seminar: Sociology of the Family
- WGST 5510 - Whores and Saints: Medieval Women
- WGST 5511 - French Women Writers
- WGST 5230 - Women in the West
- WGST 5248 - Gender, Globalization and Development
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present
- WGST 5420 - Goddess Traditions

***Complete a project or thesis on an approved women's and gender studies related topic.***

# SOCIOLOGY

**Chair:** Teresa M. Cooney

**Program Assistant:** Rachel M. Gallegos

**Office:** Lawrence Street Center, Suite 420

**Telephone:** 303-315-2148

**Fax:** 303-315-2149

**Website:** [clas.ucdenver.edu/sociology/](http://clas.ucdenver.edu/sociology/)

## Faculty

**Professors:**

Teresa M. Cooney, PhD, The Pennsylvania State University

Jennifer A. Reich, PhD, University of California, Davis

**Associate Professors:**

Candan Duran-Aydintug, PhD, Washington State University

Keith Guzik, PhD, University of Illinois at Urbana-Champaign

**Assistant Professors:**

Brenden Beck, PhD, City University of New York - Graduate Center

Edelina Burciaga, PhD, University of California-Irvine

Adam M. Lippert, PhD, The Pennsylvania State University

Esther Sullivan, PhD, University of Texas at Austin

**Assistant Professor, Clinical Teaching Track:**

Maren T. Scull, PhD, Indiana University

**Senior Instructor:**

Kari Alexander, PhD, University of Colorado Boulder

Jenny Vermilya, PhD, University of Colorado Boulder

**Instructor:**

Carlos Reali, MA, University of Colorado Denver

**Graduate**

The MA Program in Sociology at CU Denver provides a coherent, progressive, educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. The program requires completion of 33 total credit hours, 27 which are obtained through coursework and 6 that comprise the student's comprehensive paper. The MA Program emphasizes training in research methods and offers concentrations in Crime, Law and Deviance; Health and Society; and Family, Social Services and Community.

**Admission Requirements**

Application to the MA program is open to all students holding a BA, BS or higher degree in any field. Students without prior training in sociology, but with otherwise exemplary records, may be admitted but may be required to make up undergraduate deficiencies without graduate credit in the areas of theory, methods and statistics.

### **Recommended Academic Standards**

- A combined GPA of at least 3.3 for all courses taken at the undergraduate or graduate level prior to admission
- A combined GPA of at least 3.5 for all **sociology** courses taken at the undergraduate or graduate level prior to admission

### **Application Materials**

- Complete application form
- Three letters of recommendation (at least two must be from academic/professional sources)
- One copy of official transcripts sent directly to the Department of Sociology from all schools where BA credit hours were taken
- A statement of purpose and goals of graduate study
- Writing sample
- GRE score may be optionally submitted to aid application file
- International Students: You must complete an International Student Application. Minimum TOEFL score of 525 required.
- Out-of-state students from 13 Western states qualify for in-state tuition as part of the WRGP Program.

### **Application Deadlines**

Applications are accepted for **fall** admission only. All application materials are due on February 15th.

Click here to learn about the **requirements for the MA in Sociology**.

### **Programs**

Dual Degree

# 4+1 SOCIOLOGY BA TO MA

### **Introduction**

The Combined BA/MA (4+1) program in Sociology provides a coherent, progressive educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. The BA/MA application process is competitive, as the program is designed for highly-qualified students who are capable of an expedited program. Students choose from two options for their Comprehensive Paper that completes the master's degree: either a 6-credit thesis, or a 3-credit applied experience plus a 3-credit paper. The program also offers 3 concentration areas (Crime, Law & Deviance; Health & Society; Family, Social Services & Community) for students seeking specialization in high-demand career areas.

## **Program Delivery**

- This is an on-campus program.

## **Declaring This Major**

- Consult your advisor about declaring this major

## **General Requirements**

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

## **Program Requirements**

### **Tier 1 Knowledge**

Take **all** of the following required undergraduate courses:

- SOCY 1001 - Understanding the Social World
- SOCY 2001 - Inequalities in Social World
- SOCY 3115 - Quantitative Methods & Analysis
- SOCY 3119 - Qualitative Methods
- SOCY 3140 - Sociological Theory

Take **all** of the following required graduate courses:

SOCY 5000 must be the first graduate course taken (may be taken concurrently with other graduate courses); SOCY 5024 must be taken before SOCY 5183 and SOCY 5193. Students must earn a B or better in all graduate core courses.

- SOCY 5000 - Professional Seminar: Sociological Inquiry
- SOCY 5016 - Social Theory
- SOCY 5024 - Seminar: Research Methods I
- SOCY 5183 - Seminar: Quantitative Data Analysis
- SOCY 5193 - Seminar: Qualitative Data Analysis

### **Tier 2 Knowledge Applied to Substantive Areas**

Five elective courses, one of which may be taken at the undergraduate level. Graduate credit requirements are fulfilled only for those courses earning a minimum grade of B-.

### **Tier 3 Comprehensive Paper**

Take one of the following Comprehensive Paper options:

- SOCY 5955 - Master's Thesis or
- SOCY 5939 - Internship or
- SOCY 5840 - Independent Study: SOCY

**and**

- SOCY 5964 - Master's Report

### **Plans of Study**

#### **THESIS OPTION REQUIREMENTS**

Core course requirements 15 Credits

Four substantive area courses 12 Credits

Master's Thesis 6 Credits

- SOCY 5955 - Master's Thesis

BA/MA Thesis Option Total: 53 Credits

#### **APPLIED PROJECT REQUIREMENTS**

Core course requirements 15 Credits

Four substantive area courses 12 Credits

Applied Experience (internship or independent study) 3 Credits

Master's Paper 3 Credits

- SOCY 5939 - Internship
- SOCY 5840 - Independent Study: SOCY
- SOCY 5964 - Master's Report

BA/MA Applied Project Total: 53 Credits

### **Substantive Area Requirements (12 credits for both options)**

Students can take an unlimited number of sociology graduate (5000-level) seminars to fulfill their 15 elective credits requirement, or a combination of the following:

- Independent study: maximum 6 semester hours
- Graduate level courses in other departments: maximum 6 semester hours
- Internship: maximum 3 semester hours

For further information about the Department of Sociology or the MA program, visit the Sociology website.

### **Master of Arts**

# SOCIOLOGY MA

► Graduate School Policies and Procedures apply to this program

## **Program Requirements**

The MA program in Sociology provides a coherent, progressive educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. Students choose from two options for their Comprehensive Paper that completes the master's degree: either a 6-credit thesis, or a 3-credit applied experience plus a 3-credit paper. The program also offers 3 concentration areas (Crime, Law & Deviance; Health & Society; Family, Social Services & Community) for students seeking specialization in high-demand career areas.

## **Required Courses**

### **Tier 1 Knowledge**

This includes 5 courses required for all graduate students. SOCY 5000 must be taken in the first fall semester. SOCY 5024 must be taken before SOCY 5183 and SOCY 5193. Students must earn a B or better in all core courses.

- SOCY 5000 - Professional Seminar: Sociological Inquiry (3 credits)
- SOCY 5016 - Social Theory (3 credits)
- SOCY 5024 - Seminar: Research Methods I (3 credits)
- SOCY 5183 - Seminar: Quantitative Data Analysis (3 credits)
- SOCY 5193 - Seminar: Qualitative Data Analysis (3 credits)

**Tier 1 total: 15 Credits**

## **Tier 2 Knowledge Applied to Substantive Areas**

- 12 elective credits. Credit requirements are fulfilled only for those courses earning a minimum grade of B-.

**Tier 2 total: 12 Credits**

## **Tier 3 Comprehensive Paper**

- SOCY 5955 - Master's Thesis (6 credits)
- OR
- SOCY 5939 - Internship (3 credits)
- OR
- SOCY 5840 - Independent Study: SOCY
- AND
- SOCY 5964 - Master's Report (3 credits)

**Tier 3 total: 6 Credits**

## **Plans of Study**

Students must choose one of the following Comprehensive Paper options:

### **Thesis Option Requirements**

Core course requirements

15 Credits

Four substantive area courses	12 Credits
Master's Thesis	6 Credits

- SOCY 5955 - Master's Thesis

### **Thesis Option Total: 33 Credits**

### **Applied Project Requirements**

Core course requirements	15 Credits
Four substantive area courses	12 Credits
Applied Experience (internship or independent study)	3 Credits
Master's Paper	3 Credits

- SOCY 5939 - Internship
- SOCY 5840 - Independent Study: SOCY
- SOCY 5964 - Master's Report

### **Applied Project Total: 33 Credits**

### **Substantive Area Requirements (12 credits for both options)**

Students can take an unlimited number of sociology graduate (5000-level) seminars to fulfill their 12 elective credits requirement, or a combination of the following:

- Independent study: maximum 6 semester hours
- Graduate level courses in other departments: maximum 6 semester hours
- Internship: maximum 3 semester hours

For further information about the Department of Sociology or the MA program, visit the Sociology website.

Candice Shelby (Philosophy)  
Sarah Tyson (Philosophy)  
Cate Wiley (English)

Women's and Gender Studies (WGST) is an interdisciplinary program that focuses on the centrality of gender and sexuality to understanding our past and present worlds. Students and faculty probe assumptions about men and women and question structures of inequality as they play out in local and global contexts. Through a study of gender and sexuality, we expand our thinking about other relations of power, such as race, class, ethnicity, nationality and physical ability. WGST fosters connections with the local community and promotes advocacy of human rights and social justice.

## **Graduate Studies**

At the graduate level, students may pursue Women's and Gender Studies as a track in the Master of Social Science degree program. Students learn to think critically about the condition of women and the role of gender in both historical and contemporary

experience. Course work focuses on conceptual models for understanding women and gender, such as feminist, queer, post-colonial and race theories as they operate through culture, language, politics, visual representation and history. For more information, contact Margaret Woodhull.

The WGST program also offers a Graduate Certificate in Women's and Gender Studies for students pursuing master's degrees in departments in the College of Liberal Arts and Sciences as well as non-degree seeking students.

Click [here](#) to learn about the **requirements for the Graduate Certificate in Women's and Gender Studies**.

# WOMEN'S AND GENDER STUDIES GRADUATE CERTIFICATE

►Graduate School Policies and Procedures apply to this program.

The Women's and Gender Studies Graduate Certificate is administered through the Women's and Gender Studies program in the College of Liberal Arts and Sciences at the University of Colorado Denver. It is designed to provide members of the CU Denver population and public with specialized knowledge of the history, politics, literature and social practices related to women's and gender concerns. Acceptance into the certificate program is subject to CU Denver Graduate School Policies and Procedures.

The WGST certificate is available to any qualified graduate student or non-degree seeking graduate-level student at CU Denver. Students begin with a required, graduate-level methodology or foundational course before pursuing a combination of WGST-related course work. Upon completion of the certificate, students will have foundational and theoretical knowledge of the major concerns of women's and gender studies.

All prospective students must complete and submit an application to the program which can be obtained from the graduate advisor. Upon admission to the certificate program, students are eligible for the certificate.

## Program Requirements

1. Students must complete a minimum of 12 credit hours from approved coursework.
2. Students must complete a minimum of 9 credit hours for the certificate at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All

graded attempts in required and elective courses are calculated in the certificate GPA.

4. Students must complete all credits for the certificate with CU Denver faculty.

## **Courses**

Note: Some of the following courses may have prerequisites that must be met. Please see course descriptions.

### **Required Course**

Choose one of the following:

- ENGL 5306 - Survey of Feminist Thought
- HIST 5306 - Survey of Feminist Thought
- WGST 5306 - Survey of Feminist Thought
- HUMN 6010 - Methods and Theories of Feminism and Gender
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- WGST 6010 - Methods and Theories of Feminism and Gender Studies

**Total: 3 Hours**

### **Elective Courses (choose three)**

These courses must be explicitly women's and/or gender and/or identity-based courses. They can be taken through any CU Denver department or program with the approval of an advisor. Only one 4000-level elective may be counted toward the certificate. All other course work must be 5000-level or above.

The following is a representative listing of WGST-related courses that may be taken toward the certificate; it is not comprehensive. Please note that some of these courses may be taught sporadically. Students should meet with their advisor to plan their course of study.

- ANTH 5200 - Gender in Cross-Cultural Perspective
- COMM 5020 - Feminist Perspectives on Communication
- COMM 5265 - Gender and Communication
- CRJU 5553 - Women, Crime, and Justice
- ENGL 4510 - Whores and Saints: Medieval Women
- -OR- ENGL 5510 - Whores and Saints: Medieval Women
- ENGL 5000 - Studies of Major Authors

(depending on author being studied; e.g., Virginia Woolf, George Sand, etc.)

- ENGL 5306 - Survey of Feminist Thought
- HIST 5306 - Survey of Feminist Thought
- -OR- WGST 5306 - Survey of Feminist Thought
- ENGL 5308 - Contemporary Feminist Thought
- -OR- WGST 5308 - Contemporary Feminist Thought
- HIST 5303 - Sex and Gender in Modern Britain
- -OR- WGST 5303 - Sex and Gender in Modern Britain
- HIST 5307 - History of Sexuality
- -OR- WGST 5307 - History of Sexuality
- HIST 5345 - Gender, Science, and Medicine: 1600 to the Present
- -OR- WGST 5345 - Gender, Science and Medicine: 1600 to the Present
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- -OR- SSCI 5720 - Sexuality, Gender and Their Visual Representation
- PSCI 5245 - Gender, Globalization and Development
- -OR- WGST 5248 - Gender, Globalization and Development
- PSCI 5555 - International Women's Resistance
- -OR- WGST 5555 - International Women's Resistance
- PUAD 5910 - Nature and Scope of Interpersonal Violence
- PUAD 5920 - The Psychology of Interpersonal Violence
- PUAD 5930 - Interpersonal Violence Law and Policy
- SOCY 5550 - Seminar: Sociology of the Family
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- -OR- WGST 6010 - Methods and Theories of Feminism and Gender Studies

**Total: 9 Hours**

For more information about this certificate program, contact the Women's and Gender Studies Director, Gillian Silverman, 303-556-4529.

# SCHOOL OF PUBLIC AFFAIRS

## CU Denver School of Public Affairs

**Dean:** Paul Teske

**Associate Dean for Faculty Affairs:** Tanya Heikkila

**Associate Dean for Student Affairs:** Kelly Hupfeld

**Assistant Dean of Administration and Finance:** Kathy Kilpatrick

*Lead. Solve. Change.*

### About the School of Public Affairs

The nationally-ranked School of Public Affairs at the University of Colorado Denver prepares leaders for government, nonprofit and criminal justice professions. Driven by a

public service mission, our students are committed to solving pressing public problems and improving their communities for the better. School of Public Affairs graduates work as legislators, policy analysts, nonprofit leaders, law enforcement professionals, local government managers, community advocates, university faculty and administrators, and in many other fields and professions, linked by the common goal of contributing to the greater good.

The School of Public Affairs offers degree programs with optional concentrations, as well as minors and undergraduate and graduate certificate programs. All of our programs are committed to developing the rigorous and ethical thinking necessary for public service professionals. Courses integrate theoretical knowledge with the real-world application of important skills, and students frequently have the opportunity to work on behalf of government agencies and nonprofit organizations. Programs are offered in a variety of formats to accommodate both full-time students and working professionals, all taught by the same highly-regarded faculty. The size of the school means that all students can receive individualized advising and attention, and students and alumni benefit from in-house career and alumni services.

- Public Administration/Public Health, MPA/MPH
- Public Administration/Urban and Regional Planning, MPA/MURP

# HEALTH PROFESSIONS

Unlike most chapters in this catalog that focus on all programs for a particular school, this chapter provides information about programs within the schools and colleges that prepare students for a career in the health professions. Three schools on the Denver Campus offer health-related graduate programs. Denver Campus students may choose to stay and complete a master's or PhD degree on this campus or apply to programs on the Anschutz Medical Campus. The new state-of-the-art clinical and research facilities on the Anschutz Medical Campus offer students unparalleled training in the health professions. Admission to these programs is very selective, and admission to the Denver Campus does not assure admission to Anschutz Medical Campus programs. All programs on the Anschutz Medical Campus require incoming students to have either a bachelor's degree or a minimum of 60 semester hours of undergraduate work completed before applying.

## Programs on the Anschutz Medical Campus

Information about Anschutz Medical Campus programs are in this chapter is for reference only. Contact individual schools and program directors for details.

### School of Dental Medicine

**Contact:** Dental Admissions, Student Life and Inclusion  
**Telephone:** 303-724-7122  
**Website:** [www.ucdenver.edu/dentalmedicine](http://www.ucdenver.edu/dentalmedicine)

**Degree Programs:** Doctorate of Dental Surgery, International Student Program, Orthodontics, Periodontics, General Practice Residency programs

The University of Colorado School of Dental Medicine trains over 400 students annually. The four-year Doctor of Dental Surgery (DDS) program enrolls 80 new dental students each year. In addition to classroom curriculum and on-campus clinic requirements, DDS students provide dental care to underserved populations throughout the state of Colorado. Consistent with our mission to increase access to education and care, the school's International Student Program, begun in 2005, offers qualified graduates of foreign dental programs the opportunity to earn a Doctor of Dental Surgery degree. The school also offers post-doctoral orthodontics, periodontics, and general practice residency programs. Additionally, the school pioneers research in oral cancer, salivary gland disease, neurobiology and pain control.

## **School of Medicine**

**Contact:** Office of Admissions

**Telephone:** 303-724-8025

**Website:** <http://medschool.ucdenver.edu>

**Degree Program:** Doctor of medicine

The University of Colorado School of Medicine is nationally and internationally respected for its education, research, patient care and community service programs. Faculty members teach and care for patients at the University of Colorado Hospital, Children's Hospital Colorado, Denver Health, National Jewish Health and the Denver V.A. Medical Center, working side by side with nearly 1,000 graduate doctors training at the university. In addition to providing exceptional education and patient care, the medical school attracts gifted faculty and students. The school's physicians and research scientists have pioneered medical breakthroughs that have become national and world models.

## **Child Health Associate/Physician Assistant**

**Contact:** Office of Admissions

**Telephone:** 303-724-7963

**E-mail:** [chapa-info@ucdenver.edu](mailto:chapa-info@ucdenver.edu)

**Website:** [www.ucdenver.edu/academics/colleges/medicalschool/education/degree\\_programs/PAPProgram/Pages/Home.aspx](http://www.ucdenver.edu/academics/colleges/medicalschool/education/degree_programs/PAPProgram/Pages/Home.aspx)

**Degree Program:** Master of Physician Assistant Studies (MPAS)

Ranked among top programs in the nation, the Child Health Associate/Physician Assistant Program offers a three-year, post-baccalaureate professional program awarding a master's in Physician Assistant Studies. The program has been a national leader in innovative curriculum development in the areas of behavioral health, evidence-based practice, family-centered care, oral health and interprofessional practice. Graduates excel in patient care across the life span, receiving extensive didactic and clinical training in primary care adult medicine as well as the care of infants, children and adolescents. They are employed in a variety of settings including managed care organizations, community health centers, physician's offices, public health agencies, hospitals and emergency departments as well as across rural, suburban and inner city health care delivery systems.

## **Physical Therapy**

**Contact:** Physical Therapy Program

**Telephone:** 303-724-9144

**E-Mail:** [PT.Admissions@ucdenver.edu](mailto:PT.Admissions@ucdenver.edu)

**Website:** [www.cuphysicaltherapy.org](http://www.cuphysicaltherapy.org)

**Degree Program:** Doctor of Physical Therapy (DPT)

The University of Colorado Physical Therapy Program offers a post-baccalaureate professional education program of didactic learning and extensive clinical experiences that culminates in a Doctor of Physical Therapy degree (DPT).

Eight consecutive semesters of coursework include classroom, laboratory and clinical education. In year three, students participate in a full-time, 16-week clinical experience as they enter the initial phase of the year-long internship. Graduates are prepared to excel in the physical therapy profession and adapt to the ever-evolving health care environment. As part of the School of Medicine, our entry-level program has been continuously accredited for more than 65 years. Foundational elements of our curriculum include: patient-centered care; clinical reasoning and evidence-based practice; movement for participation; teamwork and collaboration; and, quality improvement and safety.

## **Graduate Medical Education (Residency and Fellowship Programs)**

**Telephone:** 303-724-6031

**Website:** [www.ucdenver.edu/ACADEMICS/COLLEGES/MEDICALSCHOOL/EDUCATION/GRADUATEMEDICALEducation/Pages/graduatemedicaleducation.aspx](http://www.ucdenver.edu/ACADEMICS/COLLEGES/MEDICALSCHOOL/EDUCATION/GRADUATEMEDICALEducation/Pages/graduatemedicaleducation.aspx)

The University of Colorado School of Medicine and affiliated hospitals provide graduate medical education (training of residents and fellows) in more than 60 specialties and subspecialties.

## **Continuing Medical Education**

**Telephone:** 303-724-3552

**Website:** [ucdenver.edu/academics/colleges/medicalschoo/education/continuingmedical/education](http://ucdenver.edu/academics/colleges/medicalschoo/education/continuingmedical/education)

The School of Medicine provides continuing education opportunities for physicians and other health care professionals worldwide. The mission is to enhance the knowledge, skills and performance of physicians and other health care professionals and, in the process, to improve the health care of the populations they serve.

## **College of Nursing**

**Contact:** Office of Student Affairs and Diversity

**Telephone:** 303-724-1812

**Website:** [www.nursing.ucdenver.edu](http://www.nursing.ucdenver.edu)

**Degree Programs:** BS in nursing, MS in nursing, doctor of nursing practice (DNP), dual doctor of nursing practice/master's in public health (DNP/MPH), PhD in nursing

Founded in 1898, the CU College of Nursing has a history of innovation that continues today. The nurse practitioner movement, school nurse program, and caring science theory, all began at CU. The innovation continues today with one of the nation's first interdisciplinary DNP/MPH programs with the Colorado School of Public Health and two

new acute care nurse practitioner post-master's certificate programs beginning in 2014. US News and World Report continue to rank the College of Nursing among the best in the nation, and in 2014, the college's online graduate programs in nursing leadership and informatics were ranked within the top 10 in the U.S.

## **Skaggs School of Pharmacy and Pharmaceutical Sciences**

**Contact:** Office of Student Services

**Director:** Beverly Brunson

**PharmD Telephone:** 303-724-2882

**PhD Telephone:** 303-724-7263

**Fax:** 303-724-7330

**Website:** [www.ucdenver.edu/pharmacy](http://www.ucdenver.edu/pharmacy)

**Degree Programs:** Doctor of pharmacy (PharmD), PhD in toxicology, PhD in pharmaceutical sciences

As drug products become more potent, more complex and more numerous, the need for pharmacists to assume a more active role in patient and medication safety has increased remarkably. The University of Colorado Skaggs School of Pharmacy and Pharmaceutical Sciences is one of the nation's top-ranked pharmacy schools and is committed to pharmaceutical education, research and patient care. The school's more than 900 professional and graduate students learn about the chemical and physical properties of medicinal agents, the biology of disease and the actions of drugs on the human body, while pursuing either a doctor of pharmacy or PhD degree. The school also provides continuing education programs to pharmacists and other health practitioners throughout the state.

## **Colorado School of Public Health**

**Contact:** Colorado School of Public Health

**Telephone:** 303-724-4613

**Website:** <http://publichealth.ucdenver.edu>

**Degree Programs:** Master of Public Health (MPH) professional degree; Doctor of Public Health (DrPH) professional degree; Master of Science (MS) in Biostatistics, Epidemiology or Health Services Research; Doctor of Philosophy (PhD) in Biostatistics, Epidemiology, or Health Services Research; Certificate in Global Public Health or Public Health Sciences.

**Additional and Specialty Programs:** Joint Degrees (DVM/MPH, DNP/MPH, MD/MPH, MPA/MPH, or MURP/MPH); Residency Programs in Occupational & Environmental Medicine or Preventive Medicine.

The CEPH accredited Colorado School of Public Health is the first and only school of public health in the Rocky Mountain region. Collaboratively formed by the University of Colorado, Colorado State University and the University of Northern Colorado, the school

supports students, practitioners and communities, with access to educational programs, innovative research and community services.

The school offers professional, graduate, residency and certificate programs. Each program provides the training that students need to succeed in general and specialized public health careers. Programs of study focus on a variety of professional interests including applied biostatistics; animals, people and the environment; community and behavioral health; community health education; environmental and occupational health; epidemiology; global health and health disparities; global health plus; health communication; health services research; health systems, management and policy; occupational medicine; physical activity and healthy lifestyles; preventive medicine; and public health nutrition. Students entering the public health programs have access to the collective resources and expertise offered by the collaborating universities and multiple community and government partnerships.

## Programs

### Graduate Degree Programs

## Accounting MS

**Program Director:** Mary Malina and Katherine Gunny

**Telephone:** 303-315-8464/303-315-8431

**E-mail:** [Mary.Malina@ucdenver.edu](mailto:Mary.Malina@ucdenver.edu) or [Katherine.Gunny@ucdenver.edu](mailto:Katherine.Gunny@ucdenver.edu)

Whether you are considering CPA licensure or just looking to accelerate your accounting career, a master of science in accounting will help you achieve your goals. The coursework gives students the technical accounting competencies and critical thinking skills necessary to support a successful career in all accounting areas including public or private accounting, nonprofit, government, or tax.

We offer a 4+1 program that allows our current undergraduate accounting students to pursue the master of science degree, if they achieve a cumulative GPA of 3.00 or higher in the Intermediate series (ACCT 3220, 3230, and 3320), without taking the GMAT test. Students are also allowed to replace two undergraduate required accounting courses with two graduate accounting courses. Interested students, please contact the Business School advising team.

The MS accounting degree consists of 30 required hours + 12 hours of prerequisites that may be waived based on prior coursework:

### Accounting Prerequisites: (12 hours)

The MS in accounting requires completion of the following accounting prerequisites.

Required Prerequisite Courses (advisor will evaluate transcript for possible waivers, grades must be a C or better to be considered for possible waiver):

- ACCT 6031 - Intermediate Financial Accounting I  
(Equivalent undergraduate course: ACCT 3220: Intermediate Financial Accounting I)
- ACCT 6032 - Intermediate Financial Accounting II  
(Equivalent undergraduate course: ACCT 3230 Intermediate Financial Accounting II)
- ACCT 6070 - Intermediate Cost Accounting  
(Equivalent undergraduate course: ACCT 3320 Intermediate Cost Accounting)
- ACCT 6140 - Fundamentals of Federal Income Tax  
(Equivalent undergraduate course: ACCT 4410 Fundamentals of Federal Income Tax)

## **Accounting Core: (24 hours)**

Students may not receive graduate credit for undergraduate coursework and may not retake any course successfully completed at the undergraduate level with a grade of "C" or better. An advisor will evaluate prior coursework to determine possible substitutions.

- ACCT 6020 - Auditing Theory
- ACCT 6024 - Advanced Financial Accounting
- ACCT 6054 - Accounting Information Systems
- ACCT 6150 - Taxation of Business Entities
- ACCT 6250 - Seminar: Financial Accounting
- ACCT 6260 - Seminar: Managerial Accounting
- ACCT 6280 - Accounting Ethics
- ACCT 6620 - Seminar: Auditing and Other Assurance Services

## **Accounting Electives: (6 hours)**

Choose two from the following courses (unless otherwise noted, all courses are 3 credit hours):

- ACCT 6080 - Accounting for Government and Nonprofit Organizations
- ACCT 6285 - Accounting and Finance for Sustainability
- ACCT 6330 - Fraud Auditing
- ACCT 6340 - Financial Statement Analysis
- ACCT 6370 - International Accounting
- ACCT 6520 - Issues in Oil and Gas Accounting
- ACCT 6939 - Internship/Cooperative Education
- ACCT 6400 Taxation of C Corporations and Shareholders

- ACCT 6410 Advanced Tax for Individuals
- ACCT 6450 Tax Research
- ACCT 6480 Partnership Taxation

**Total: 30 hours**

## **Anthropology MA**

► Graduate School Policies and Procedures apply to this program.

### **Plans of Study**

The unique intellectual challenge of anthropology is to integrate knowledge from many disciplines for a global understanding of cultural and biological diversity in the past and the present. Individual courses in cultural anthropology, biological anthropology and archaeology cut across lines of the humanities, social sciences and natural sciences. Because of this integrative perspective on the human condition, and the training provided in objectively assessing cultural patterning and social interaction, an advanced degree in anthropology provides a versatile base for career development.

Students in our terminal Master's program have the benefit of receiving the faculty's full attention. Our program is unique in several respects. First, for students wishing to find employment after their MA, the department offers a mentorship program that pairs them with alumni who have forged careers in students' fields of interest. Second, our program also offers students a range of opportunities for professional development that are unusual in programs that focus on PhD students. For students considering the possibility of doctoral-level work in anthropology, the department has an excellent record in placing students in top-tier graduate programs. Students with residency in 14 states are eligible for in-state tuition, and funding opportunities in the form of Teaching Assistantships and graduate fellowships are available to students on a competitive basis.

The University of Colorado Denver Department of Anthropology provides outstanding graduate education in anthropology, giving students a broad yet thorough grounding in the four subfields of anthropology as well as specialized instruction in one or more of a number of research orientations and/or geographic area concentrations. These orientations encompass the areas of research and application in which department faculty have substantial expertise.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

MA students may pursue the thesis or non-thesis option.

- **Thesis Option:** A thesis is characterized by three factors: 1) it is based in a research question or problem; 2) it involves original research; 3) there is a fully developed research proposal. A thesis can also encompass a range of format alternatives to the traditional thesis (e.g. article submitted for publication to a peer-reviewed journal, or a video production, internship or museum exhibit, each generally accompanied by a companion paper developing a theoretical or problem-oriented question). The thesis option requires 30 semester hours, including 4-6 hours of thesis.
- **Non-Thesis Option:** This track is defined by additional course work in lieu of a thesis. The non-thesis option requires 36 semester hours of course work.

## Thesis Option

The thesis is a major requirement for those in the MA in anthropology thesis track. The thesis should demonstrate the student's ability to apply knowledge and skills gained from the anthropology department's curriculum. A desirable goal for an excellent thesis would be a work of sufficient rigor and quality that it could be considered for publication. Original data collection ("fieldwork") is recommended but not required for the thesis. Analysis of secondary data—whether quantitative, qualitative, visual or other formats—is perfectly acceptable as long as the research is informed by a clearly articulated research question and under-girded by a research proposal.

The traditional thesis is a single document that often incorporates a literature review, definition of a problem, discussion of methods to address the problem, the subsequent research activity and results. However, the student may design a thesis with different emphases, in consultation with their advisor. For example, the goal may instead be a more compact paper submitted to a peer-reviewed journal. Other thesis plans may combine some research activity such as a video production, museum exhibit or an internship, with an accompanying paper. Students pursuing the thesis option must develop a topic and research proposal that specifies their plans in the semester after their completion of 18 credit hours.

The thesis must be defended before a committee of three faculty, at least two of whom need to be on the Department of Anthropology faculty (which includes senior instructors and research faculty). The structure of the thesis is largely determined by the Graduate School Policies and Procedures ; i.e., a thesis must conform to the rules.

1. For the thesis, students must prepare a full research proposal which must be approved by their thesis chair before beginning their research. This proposal must be completed by the semester after the student has completed 18 credit hours. Sections of the proposal should include, at a minimum:
  - a. Introduction and statement of the problem: Should include a one sentence statement of the problem on the first page, and a discussion of its significance (i.e., why is it important that this topic be researched).

- b. Literature review covering theoretical and topical material.
- c. Research design and methods including a data analysis plan.

*Note:* Wenner-Gren and National Science Foundation both provide good models and templates for the research proposal. Those in the medical anthropology track might want to consider following the NIH model, depending the nature of their research questions and career goals.

- 2. All students proposing to work with humans or data on modern humans must apply for and receive approval from the Human Subjects Research Committee before they begin their research. Note: most of the material for the application will be drawn from the research proposal.
- 3. The draft thesis must be reviewed and approved as "defensible" by the student's thesis committee faculty chair before a thesis defense date can be set. Defensible means the chair has reviewed the draft and suggested changes have been made.
  - a. The draft sent to the student's committee must be substantively complete: All references must be in the text and properly formatted in a references cited section; there should be no "track changes" comments in the text; the text should be formatted according to Graduate School requirements.
  - b. Given the complexity of faculty and student schedules, consultation on a defense date should be done as far in advance as possible.
  - c. There must be a minimum of three weeks between the agreed-upon date for the defense and distribution of the draft thesis defined as defensible by the student's chair. If you would like feedback from your committee members before the defense, you should plan to distribute the thesis at least 4 weeks before the defense date.

*Note:* If you intend to graduate the same semester you defend your thesis, you must schedule, successfully defend, and complete all recommended changes in accordance with CU Denver thesis and dissertation guidelines. This effectively translates to having the thesis completed and "defensible" before the middle of the semester.

## **Non-Thesis Option**

The non-thesis option allows students to pursue their own educational goals through the selection of additional courses that fit their interests. We strongly encourage students who choose this option to consider an internship position arranged around an area of expertise or the development of a skill-set. The internship may be in a governmental agency or non-governmental organization in Colorado, the U.S. or internationally. Successful completion of an

internship will be acknowledged on the transcript of the MA program. The decision to pursue the non-thesis option should be made by the semester following the completion of 18 credit hours.

### **Additional Information**

Students must maintain an overall GPA of 3.0 to remain in good standing and receive a grade of *B-* or better in a course to have it count toward graduation. The Graduate School on the Downtown Campus allows up to five years to complete a master's degree, but students are strongly discouraged from spending more than four years. While it is possible to finish the MA in two years, most of our students work part-time, which limits the time they can dedicate to the program; most finish within three years. Four semesters must be taken in residence at CU Denver. All students are required to pass a written comprehensive examination, taken after core course work has been completed.

Some students may benefit from adding a specific skills-based certificate program onto their graduate program. For example: archeology students may wish to gain expertise in Geographic Information Systems through the GIS certificate offered through the Department of Geography and Environmental Sciences, while medical anthropology students may benefit from the certificate in public health offered through the School of Public Health. Graduate-level courses in certificate programs can often fulfill elective requirements in the anthropology program.

One doctoral program at the CU Denver campus that may be of particular interest to graduates of the anthropology MA program is the PhD in Health and Behavioral Sciences . It is highly interdisciplinary and a natural extension of a master's degree in medical anthropology.

## **Course Requirements**

Your graduate anthropology education begins by taking ANTH 5810, Integrating Anthropology, plus two core courses each from two subdisciplines of Anthropology. After completing this core, you will select from among the specialized elective courses in the research concentrations described in more detail below. You will work closely with an advisor in selecting the range of courses appropriate both to a problem orientation and to your career objectives.

### **Required core courses (18 semester hours)**

#### **Required in fall of first year:**

- ANTH 5810 - Integrating Anthropology

#### **All students must complete or demonstrate competence in the following:**

- ANTH 5053 - Quantitative Methods in Anthropology

**Choose two of the following three sets of core courses (Students are not required to take these courses sequentially)**

### **Archaeology**

- ANTH 6307 - Contemporary Perspectives in Archaeology
- ANTH 6317 - Archaeological Research Design and Analysis

### **Biological**

- ANTH 6503 - Biological Anthropology Core: The Fossil Record
- ANTH 6513 - Biological Anthropology Core: Modern Human Variation

### **Cultural**

- ANTH 6063 - Qualitative Research Design and Methods
- ANTH 6103 - Current Theory in Ethnography

### **Research Concentrations (8-18 semester hours)**

You will round out your program by selecting from the diverse range of courses offered in the department according to your particular interests in anthropology, your career goals and your plans for future graduate study. You may take courses in one or more concentrations. The courses listed are suggestions only; you must work closely with your advisor in constructing your particular program of study.

### **MEDICAL ANTHROPOLOGY**

Our MA program in cultural anthropology offers a unique focus on Medical Anthropology. Medical anthropology is a subdiscipline of anthropology that includes the study of all aspects of health, illness and disease in human communities and populations. It draws on all of the perspectives that distinguish anthropology as a unique discipline: the analysis of human evolution and adaptation; cultural development, expressions, and variability; and historical change and continuity. Medical anthropology takes as its subject a broad range of specific topics, including the study of health care systems, factors that affect the distribution and determinants of disease in populations, maternal and child health, nutrition and food habits, human development, political ecology, health policy, health disparities, community-driven wellness practices, visual storytelling, social media designed to promote health equities, and language and communication in health care contexts.

Faculty members take a variety of theoretical approaches to the topic, but our program is distinguished by its applied and engaged perspectives. A particular strength of our program is its integration of theoretical knowledge with community- and field-based training opportunities and challenges. We prepare students for careers in nonprofit and community groups, non-governmental organizations, advocacy, public health, health care institutions, and health sciences research; our graduates also attend doctoral programs at selective institutions. Courses in the department are complemented by electives in other departments (sociology, biology, psychology, history, geography, political science) and programs on the CU Denver

campus (public affairs, education, health administration) and at the Anschutz Medical Campus (Schools of Medicine, Public Health, Pharmacy and Nursing).

## **Courses**

As part of the MA degree, students may take between 6 and 18 credits of electives in this track, choosing from:

- ANTH 5000 - Special Topics in Anthropology
- ANTH 5014 - Medical Anthropology: Global Health
- ANTH 5040 - Anthropology of Food and Nutrition
- ANTH 5060 - Evolutionary Medicine
- ANTH 5080 - Global Health Practice
- ANTH 5090 - Drug Syndemic
- ANTH 5150 - Human Biocultural Adaptability
- ANTH 5180 - The Nature of Power
- ANTH 5290 - Anthropology and Public Health
- ANTH 5300 - Migrant Health
- ANTH 5350 - Anthropology of Globalization
- ANTH 5450 - Development and Conservation: Contemporary Issues
- ANTH 5460 - Development and Conservation: Theory and Practice
- ANTH 5600 - Medical Anthropology
- ANTH 5800 - Special Topics in Medical Anthropology
- ANTH 5200 - Gender in Cross-Cultural Perspective

Note: Students are encouraged to take elective courses in GIS mapping (geography), ecology (biology/anthropology), public policy, public health, epidemiology and biostatistics as it is relevant to their course of study.

## **ARCHAEOLOGY**

The archaeological studies program concentrates on the study of past human societies using archaeological data collected in field and museum settings. While a quantitative and scientific approach is emphasized, the theoretical perspectives employed draw heavily from political economy and cultural ecology. The department offers a variety of theoretical, methodological and area courses, which may be supplemented by others in the geography and environmental

sciences and history departments. Internships are available in local museums and historic preservation offices in the Denver metropolitan area.

## **Courses**

- ANTH 5320 - Archaeology of Mexico and Central America
- ANTH 5330 - Lithic Analysis
- ANTH 5380 - Archaeology of Hunters-Gatherers
- ANTH 5400 - Archaeology of Power and Inequality
- ANTH 5570 - Landscape Archaeology
- ANTH 5580 - Neanderthals and the Origin of Modern Humans
- ANTH 5910 - Field Experience in Archaeology
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5080 - Introduction to GIS
- GEOG 5220 - Environmental Impact Assessment
- HIST 5231 - History in Museums
- HIST 5232 - Historic Preservation
- HIST 5234 - Introduction to Public History

## **BIOLOGICAL ANTHROPOLOGY**

The biological anthropology concentration is concerned with modern human biological diversity and the past evolutionary history that has led to such diversity. Students in this concentration develop a firm understanding of the evolutionary processes that lead to physical and behavioral variation in humans and nonhuman primates. The concentration also emphasizes the theoretical and quantitative methods used to explore and explain this variation. Students may take courses in diverse areas including evolutionary biology, genetics, ecology, ethnobiology, epidemiology, nutrition, medical anthropology, paleoanthropology, paleontology and primatology. Because biological anthropology is multidisciplinary in nature, students are encouraged to consider courses offered outside the department.

## **Courses**

- ANTH 5014 - Medical Anthropology: Global Health
- ANTH 5030 - Ethnobiology
- ANTH 5040 - Anthropology of Food and Nutrition
- ANTH 5060 - Evolutionary Medicine
- ANTH 5150 - Human Biocultural Adaptability
- ANTH 5500 - Advanced Issues in Human Evolution
- ANTH 5530 - Anthropological Genetics

- ANTH 5550 - Primate Comparative Anatomy
- ANTH 5560 - Human Ecology
- ANTH 5580 - Neanderthals and the Origin of Modern Humans
- ANTH 5640 - Darwinian Approach to Human Behavior
- BIOL 5074 - Human Reproductive Biology
- BIOL 5134 - Human Genetics
- BIOL 5494 - Population and Evolutionary Genetics
- HBSC 7031 - Human Ecology and Environmental Adaptation
- HBSC 7310 - Environmental Epidemiology

## **DEGREE TOTAL HOURS**

**Thesis Option: 30 Hours (including 4-6 hours of thesis)**

**Non-Thesis Option: 36 Hours**

# **Applied Geography & Geospatial Science MA**

►Graduate School Policies and Procedures apply to this program

**Program Director:** Gregory Simon

**Office:** North Classroom

**Fax:** 303.315-7526

**E-mail:** [gregory.simon@ucdenver.edu](mailto:gregory.simon@ucdenver.edu)

**Web site:** Applied Geography & Geospatial Science MA

## **Introduction**

In the United States and around the world, balancing the preservation of the natural environment with the imperatives of economic development along with concerns for social well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions. Graduates of the M.A program in Applied Geography and Geospatial Science will have the knowledge, training, and tools to become leaders in this rapidly growing field.

The program's research focus is human-environment interaction, a longstanding hallmark of the discipline of Geography. Within this area of critical geographic inquiry, the program emphasizes geospatial science, a federally recognized STEM subject area that includes geographic

information systems (GIS) as well as computer cartography, remotely sensed image analysis, and spatial statistics. Students apply their geospatial research skills in the context of hands-on, faculty-led research projects that stress professional development through community engagement and interactive service learning.

## Requirements for Admission

Applicants must hold a Bachelor's degree from an accredited institution.

The University of Colorado Denver has a minimum requirement of 3.0 undergraduate grade point average (GPA) for applicants to the Graduate School. The number of applicants admitted to the MA in Applied Geography & Geospatial Science in any year depends, in part, on space availability. The program is competitive, and we generally discourage applicants whose undergraduate GPA is below 3.0. Notification of acceptance or refusal for admission into the program is mailed to the applicant approximately six weeks after the deadline for submission of applications.

### Application Process

We accept applications once per year, **before or on February 1st**, for admission in the following fall. As part of the admission review process, applicants are required to submit: a graduate application, statement of purpose that articulates the goals of pursuing a graduate degree in this program, a writing sample, a minimum of three letters of recommendation (academic references are preferred), and official transcripts from all institutions previously attended. The GRE is **not** required. However, applicants with less than a 3.0 GPA are welcome to submit GRE scores as further evidence of their qualifications.

## Financial Aid

There are three types of financial aid available: teaching assistant student hourly positions; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available aid and positions. All other aid should be requested through the CU Denver Financial Aid Office, Student Commons Building, 5th floor, Campus Box 125, P.O. Box 173364, Denver, CO 80217-3364. Telephone: 303-315-1850.

## Internships

Students in the Applied Geography & Geospatial Science MA program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to geographical sciences. The Experiential Learning Center is located in the Tivoli Student Union,

Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

## **Degree Requirements**

The program is offered by the faculty of the Department of Geography and Environmental Sciences in the College of Liberal Arts and Sciences. Students undertake 36 credit hours over a two-year period. These 36 hours include required core classes (6-9 credit hours), a required service learning studio (3 credit hours), and required geo-spatial science coursework (12 credit hours). Students can elect to undertake either of two tracks: the first "coursework" track involves a further 15 hours of elective courses, whereas the second "thesis" track involves 9 hours of electives, and preparation of a written thesis (3 credits).

### **Thesis Option**

Take **all** of the following:

- GEOG 5050 - Applied Spatial Statistics
- GEOG 6300 - Foundations Seminar in Human-Environmental Interaction (3 hours)
- GEOG 6750 - Research Design (3 hours)
- GEOG 6800 - Community-Based Research Practicum (3 hours)

Take 12 additional hours of Geospatial Science courses

Take 9 hours of Elective courses (up to 6 hours can be taken outside the Department of Geography & Environmental Sciences, as approved by advisor)

- GEOG 6950 - Master's Thesis (3 hours)

33 hours of coursework and 3 thesis hours

### **Non-thesis Option**

- GEOG 6300 - Foundations Seminar in Human-Environmental Interaction (3 hours)

Take **all** of the following:

- GEOG 5050 - Applied Spatial Statistics
- GEOG 6800 - Community-Based Research Practicum (3 hours)

Take 12 hours of Geospatial Science courses

Take 15 hours of Elective courses (up to 6 hours can be taken outside the Department of Geography & Environmental Sciences, as approved by advisor)

36 hours of coursework

## Notes

1. Many of the electives have prerequisites; students must have met these requirements in order to take the course.
2. Courses applied to either a certificate\* or an MA degree may later be applied toward the other if all pertinent coursework is completed within a five year time period.
3. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
4. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.
5. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
6. Students may transfer up to 9 hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses.
7. Students may count up to 6-credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
8. Students may count up to 6-credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)
9. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.
10. Students may take a maximum of 2 online courses, or petition to the GES Graduate Committee beyond two.
11. Students may enroll in thesis preparation and writing hours only after submission of signed committee form, which requires approval of the thesis proposal.
12. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.

13. Students must follow the graduate school deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.

14. Work submitted for the environmental sciences options must have a grade of *B* (3.0) or better.

\* GES offers Geospatial, Environmental Education, and Urban Agriculture independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the Geographic Information Science Graduate Certificate , Sustainable Urban Agriculture Graduate Certificate , and Environmental Science Education Graduate Certificate descriptions.)

## Applied Mathematics MS

► Graduate School Policies and Procedures apply to this program.

### Program Requirements

Students must present 30 hours of course work for the MS degree. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. At least 24 of these hours must consist of graduate-level (numbered 5000 or higher) mathematics courses. The remaining 6 hours must be either mathematics courses numbered 5000 or above or approved courses outside the department numbered 4000 or above.

Up to 9 semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a *B-* or better grade. Courses already applied toward another degree (graduate or undergraduate) cannot be used toward the MS degree in applied mathematics. Additionally, the following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250, and 5830.

A student may devote from 4 to 6 hours (of the 30 required hours) to the writing of a thesis. Following completion of course work, all candidates must make a one-hour oral presentation of a project or a thesis before a committee consisting of three graduate faculty members.

### Course Requirements

The following course requirements must be satisfied by all students in the MS in Applied Mathematics Program:

1. (Analysis Core Requirement) One of: MATH 5070 (Applied Analysis) or MATH 6131 (Real Analysis),
2. (Linear Algebra Core Requirement) MATH 5718 (Applied Linear Algebra), and
3. At least 24 additional semester hours of coursework, subject to the rule about 4000-level courses in disciplines outside of mathematics outlined above

Additionally, a student must either satisfy the course requirements for the MS degree without a concentration area or satisfy the requirements in one of the concentration areas listed below. Unless noted elsewhere, one course cannot be used to fulfill two requirements. Substitutions or changes to the requirements may be made with the written approval of a student's academic advisor and the Graduate Committee.

The following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250 and 5830.

- MATH 5070 - Applied Analysis
- MATH 5718 - Applied Linear Algebra
- MATH 6131 - Real Analysis

## **MS Degree without a Concentration Area**

Students must complete at least three courses chosen from the following list. Note that MATH 6131 (Real Analysis) can be used to satisfy both the analysis core requirement and may also count as one of the three courses satisfying this requirement.

- Any MATH course at the 6000 level or above
- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5490 - Network Flows
- MATH 5593 - Linear Programming

Additional course options may be added later at the discretion of the Department of Mathematical and Statistical Sciences, e.g., as new courses are introduced to the graduate program.

## **Applied Statistics Concentration**

**Take all of the following courses:**

- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis
- MATH 6330 - Workshop in Statistical Consulting

**And, take one of the following courses:**

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6376 - Statistical Computing
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7393 - Bayesian Statistics
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods
- MATH 7826 - Topics in Probability and Statistics

Any additional course given prior approval by the student's advisor and the Director of the Program in Statistics.

## **Applied Probability Concentration**

**Take all of the following courses:**

- MATH 5310 - Probability
- MATH 5792 - Probabilistic Modeling
- MATH 6380 - Stochastic Processes

**And, take one of the following courses:**

- MATH 6131 - Real Analysis
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods

## **Discrete Mathematics Concentration**

**Four of the following courses:**

- MATH 5410 - Modern Cryptology
- MATH 5490 - Network Flows
- MATH 5793 - Discrete Math Modeling
- MATH 6404 - Applied Graph Theory
- MATH 7405 - Advanced Graph Theory
- MATH 7409 - Applied Combinatorics
- MATH 7410 - Combinatorial Structures
- MATH 7413 - Modern Algebra I
- MATH 7419 - Mathematical Coding Theory

- MATH 7421 - Projective Geometry
- MATH 7821 - Topics in Projective Geometry
- MATH 7823 - Topics in Discrete Math

## **Mathematics of Engineering and Science Concentration**

### **Three of the following courses:**

- MATH 5387 - Applied Regression Analysis
- MATH 5779 - Math Clinic
- MATH 5791 - Continuous Modeling
- MATH 5792 - Probabilistic Modeling
- MATH 5793 - Discrete Math Modeling
- MATH 5794 - Optimization Modeling
- MATH 6735 - Continuum Mechanics

### **And, take two of the following courses:**

- MATH 5660 - Numerical Analysis I
- MATH 5661 - Numerical Analysis II
- MATH 5733 - Partial Differential Equations
- MATH 6653 - Introduction to Finite Element Methods
- MATH 7663 - Finite Difference Methods for Partial Differential Equations
- MATH 6101 - Uncertainty Quantification
- MATH 7386 - Monte Carlo Methods
- MATH 7665 - Numerical Linear Algebra

## **Numerical Analysis Concentration**

### **Take all of the following courses:**

- MATH 5660 - Numerical Analysis I
- MATH 5661 - Numerical Analysis II

### **And, take three of the following courses:**

- MATH 5593 - Linear Programming
- MATH 5733 - Partial Differential Equations
- MATH 6595 - Computational Methods in Nonlinear Programming
- MATH 6653 - Introduction to Finite Element Methods
- MATH 6735 - Continuum Mechanics
- MATH 7665 - Numerical Linear Algebra
- MATH 8660 - Mathematical Foundations of Finite Element Methods
- MATH 6101 - Uncertainty Quantification

- MATH 7386 - Monte Carlo Methods

## Operations Research Concentration

### Take all of the following courses:

- MATH 5593 - Linear Programming
  - MATH 5792 - Probabilistic Modeling
- OR**
- MATH 6380 - Stochastic Processes

### And, take two of the following courses:

- MATH 5390 - Game Theory
- MATH 5490 - Network Flows
- MATH 5794 - Optimization Modeling
- MATH 6595 - Computational Methods in Nonlinear Programming
- MATH 7593 - Advanced Linear Programming
- MATH 7594 - Integer Programming
- MATH 7595 - Advanced Nonlinear Programming
- MATH 7825 - Topics in Optimization
- MATH 5779 - Math Clinic

# Architecture MArch

## Faculty

### Professors:

Amir Ameri, PhD, Cornell University  
Julee Herdt, MArch, Southern California Institute of Architecture  
Michael K. Jenson, PhD, University of Edinburgh  
Laurence K. Loftin III, MArch, University of Virginia

Marc Swackhamer, MArch, Rice University  
Ekaterini Vlahos, MArch, University of Colorado Denver

### Associate Professors:

Osman Attmann, PhD, Georgia Institute of Technology  
Robert H. Flanagan, MArch, University of Colorado Denver  
Christopher Koziol, PhD, University of Colorado Denver  
Taisto H. Mäkelä, PhD, Princeton University

### Assistant Professors:

Erik Sommerfeld, MArch, University of Colorado Denver  
Kevin Hirth, MArch, Harvard Graduate School of Design

Matthew Shea, MArch, University of Colorado Denver

**Associate Professor (Clinical Teaching Track):**

Barbara Ambach, MArch, Southern California Institute of Architecture

**Assistant Professors (Clinical Teaching Track):**

Amir Alrubaiy, MArch, University of Colorado Denver

**Senior Instructor:**

Ranko Ruzic, MArch, University of Colorado Denver

**Instructor:**

Jo VandenBurg, MArch, University of Colorado Denver

Additional information about faculty in this department is available on the college's website.

## **Degrees**

The College of Architecture and Planning offers a pre-professional Bachelor of Science in Architecture (BSArch) degree and the professional Master of Architecture (MArch) degree which is fully accredited by the National Architectural Accrediting Board (NAAB).

# **ARCHITECTURE MARCH**

The Master of Architecture is offered to students who have completed a pre-professional architecture degree, as well as to students who have completed an unrelated undergraduate or graduate degree. Students holding a pre-professional degree from another institution will be evaluated individually for advanced standing in the MArch program, commensurate with their previous educational experiences.

Our program prepares students for entry into the architecture profession and licensure. Our mission is to lead in the discovery, communication and application of knowledge in the discipline of architecture by integrating theory and practice. In this collaborative educational model, environmental, economic, social, cultural, aesthetic and ethical concerns are fundamental.

The curriculum responds to and aligns with the evolving nature of professional practice including collaborative work environments, critical thinkers, problem-solving team players, builders and leaders with excellent communication skills. Recognizing that the practice of

architecture is global, we provide students with international perspectives and experiences giving them a competitive edge when they enter the profession.

Students whose undergraduate degree was not a design related degree will take a minimum of three years to complete the Master of Architecture. Students who have an undergraduate design related degree may receive credit for courses previously taken and can typically complete the program in two years depending on advanced standing given. The program provides the skills and bodies of knowledge nationally specified for graduate study in architecture and is fully accredited by the National Architectural Accrediting Board (NAAB).

## **Prerequisites**

Students must complete the prerequisites of college-level trigonometry and physics before enrolling in the MArch program or must complete ARCH 5000 Math and Physics for Architects. This course is offered during the summer on a pass/fail basis and meets the prerequisite requirements. This class does not count toward the number of credits required for the MArch degree.

The architecture skills workshop is highly recommended for students who do not have a background in architectural drawing, model making or digital graphics work. This class is offered each year before the beginning of the fall semester.

Students are expected to have achieved a basic level of computer literacy and should be familiar with PC or Mac operating systems.

## **Program Tracks**

There are two curriculum tracks leading to the MArch degree.

### **Four Studio Track - 60 Semester Hours**

This course of study allows those students with a pre-professional degree to pursue a professional Master of Architecture degree in a minimum of two years, the total duration of the program will vary. The curriculum follows a prescribed sequence of core courses and four design studios. Applicants must hold a Bachelor of Science in Architecture, Bachelor of Art in Architecture or Bachelor of Environmental Design to be considered for this track.

### **Six Studio Track - 105 Semester Hours**

This course of study allows students without a pre-professional degree to pursue a professional Master of Architecture degree in a minimum of three years. The curriculum follows a prescribed course of fundamental core courses and six design studios. Applicants must hold a baccalaureate degree from an accredited university in any field.

All degrees awarded by universities outside the United States will be reviewed on a case-by-case basis and the admissions committee will determine the appropriate track.

# Four Studio Track

## Curriculum Overview

The Four Studio Track curriculum for the Master of Architecture (MArch) program is divided into six major components, totaling a minimum of 60 semester hours in residence at the University of Colorado Denver:

Design Studios and Seminars	27 semester hours
Representational Studies (required elective)	3 semester hours
Historical/Cultural Studies (required elective)	3 semester hours
Technological Studies (required elective)	3 semester hours
Professional Studies	9 semester hours
Open Electives	15 semester hours

A wide array of electives in these areas allows students to tailor their graduate studies to their own interests. Of 15 general elective semester hours, nine must be fulfilled with courses taken in the Architecture Department. Students may choose to take elective courses in the summer session. It is highly suggested that students use the summers to study abroad or participate in a professional internship.

In order for a student to complete the course of study within the 60 semester hours (two years of study) a student must have completed the following courses with a grade of B or better:

- 4 design studios (six credits each)
- 2-3 course sequence covering the history of architecture
- 1 course introduction to the theory of architecture
- 2 course sequence on sustainable environmental control systems
- 2 course sequence on structures addressing statics, material mechanics, structural analysis, and design of simple structural elements and systems
- 2 course sequence on building materials and construction
- 1 course on architectural visualization and representation
- 1 course on Building Information Modeling

Above courses not completed by the time the student enrolls in the program will be added onto the 60 semester hours and will need to be completed at the University of Colorado Denver prior to graduation. An official review of the student's previous course work will be conducted in the spring following admissions and will be sent to the student upon the receipt of the student's intent to attend.

## Course Sequence

This schedule shows the recommended sequence of courses. To modify this schedule, students should consult their CAP academic advisor.

### First Year

#### Fall

- ARCH 5130 - Design Studio III
- ARCH 5430 - Social Context of Design
- Required or Open Elective
- Required or Open Elective

**Total: 15 Hours**

#### Spring

- ARCH 5140 - Design Studio IV
- ARCH 5450 - Sustainable Design Practices
- Required or Open Elective
- Required or Open Elective

**Total: 15 Hours**

### Summer (optional)

### Second Year

#### Fall

- ARCH 6150 - Design Studio V
- ARCH 5410 - Professional Practice
- Required or Open Elective
- Required or Open Elective

**Total: 15 Hours**

#### Spring

- ARCH 6170 - Design Studio VI
- ARCH 6171 - Integration Seminar
- Required or Open Elective
- Required or Open Elective

**Total: 15 Hours**

**Summer (optional)**

**Six Studio Track**

**Curriculum Overview**

The curriculum for the Master of Architecture (MArch) program is divided into six major areas of study, totaling 105 semester hours:

Design Studios and Seminars	39 semester hours
Representational Studies (required elective)	6 semester hours
Historical/Cultural Studies (required elective)	12 semester hours
Technological Studies (required elective)	21 semester hours
Professional Studies	12 semester hours
Open Electives	15 semester hours

A wide array of electives in these areas allows students to tailor their graduate studies to their own interests. Of the 15 general elective semester hours, nine must be fulfilled with courses taken in the Architecture Department. Advanced standing in core course work can be given for prior architectural studies. Students may choose to take elective courses in the summer session. It is highly suggested that students use the summers to study abroad or participate in a professional internship.

**Course Sequence**

This schedule shows the recommended sequence of courses. To modify this schedule, students should consult their CAP academic advisor.

**First Year**

**Fall**

- ARCH 5110 - Design Studio I

- ARCH 5210 - Introduction to Architecture
- ARCH 5350 - Structures I
- ARCH 5510 - Architectural Graphics
- Professional Studies or Elective Requirement

**Total: 18 Hours**

## **Spring**

- ARCH 5120 - Design Studio II
- ARCH 5220 - History and Theory Architecture I
- ARCH 5360 - Structures II
- Professional Studies or Elective Requirement
- Professional Studies or Elective Requirement

**Total: 18 Hours**

## **Second Year**

### **Fall**

- ARCH 5130 - Design Studio III
- ARCH 5230 - History and Theory Architecture II
- ARCH 5310 - Building Construction I
- Professional Studies or Elective Requirement
- Professional Studies or Elective Requirement

**Total: 18 Hours**

### **Spring**

- ARCH 5140 - Design Studio IV
- ARCH 5320 - Building Construction II
- ARCH 5330 - Sustainable Systems I
- Professional Studies or Elective Requirement
- Professional Studies or Elective Requirement

**Total: 18 Hours**

## **Third Year**

## Fall

- ARCH 6150 - Design Studio V
- ARCH 5340 - Sustainable Systems II
- Professional Studies or Elective Requirement
- Professional Studies or Elective Requirement
- Professional Studies or Elective Requirement

**Total: 18 Hours**

## Spring

- ARCH 6170 - Design Studio VI
- ARCH 6171 - Integration Seminar
- Professional Studies or Elective Requirement
- Professional Studies or Elective Requirement

**Total: 15 Hours**

# Bioengineering MS

► Graduate School Policies and Procedures apply to this program.

## Master of Science (MS) Degree Program

The master of science degree is offered to students with an undergraduate degree in the life sciences or engineering. Students complete the degree in 18 months to two years with the choice of a project or thesis, either of which may be completed in academia or industry. Program details are available on the Department of Bioengineering website at [ucdenver.edu/bioengineering](http://ucdenver.edu/bioengineering).

# Biology MS

► Graduate School Rules apply to this program.

**Graduate MS Program Director:** Alan Vajda

**Office:** Science, 4104

**Telephone:** 303-315-7640

**E-mail:** [Alan.Vajda@ucdenver.edu](mailto:Alan.Vajda@ucdenver.edu)

**Website:** <https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs>

## Requirements for Admission

- A BA/BS from an accredited institution awarded within the last 10 years (validation of current content may be required)
- Minimum undergraduate GPA: 3.0
- TOEFL: required for international applicants from countries in which English is not the official language
- 3 letters of recommendation
- Official transcripts from all attended institutions
- Students are required to contact faculty in advance. Prior to application, applicants must have identified and contacted an available Faculty Advisor to ensure the availability of a position and appropriate research interests

### **Prerequisite courses required:**

- One year of general biology (lecture and laboratory)
- One year of any combination of chemistry, physics or mathematics
- One course in applied or biological statistics (through regression and ANOVA)
- Additional prerequisite requirements may be set by individual faculty

**Application deadline is December 1 for both domestic U.S. and international students.** Application to the master's in biology program is through CU Denver Admissions.

## Degree Requirements

Students matriculate into the research-based MS degree program. Under unusual circumstances, students and/or advisors may petition for a student to switch into the coursework-based MS degree program. The research-based MS program requires a minimum of 30 credits, and the coursework-based MS program requires a minimum of 32 credits. No double-counted courses will be applied to the degree. A maximum of 12 hours of graduate level courses may be transferred and counted toward the degree in either program. Both programs additionally require the student to meet minimum academic residency requirements, to form an advisory committee and to deliver and orally defend written work before the advisory committee, which constitutes the final exam for both programs as required by the Graduate School.

### Research-based MS degree program **requires**

1. Completing 30 credits including 3-6 thesis (BIOL 6950)
2. Meeting minimum academic residency requirements
3. Forming and meeting regularly with an advisory committee
4. Writing and defending research proposal
5. Writing and defending research thesis (including a publishable paper)

### Coursework-based MS degree program **requires**

1. Approved petition to transfer into coursework-based program
2. Completing a minimum of 32 credits
3. Meeting minimum academic residency requirements
4. Writing and defending publication-quality review paper (before advisory committee)

## Required Courses:

- BIOL 6705 - Biological Research Workshop (4 credits total-take in 2 different years)
- BIOL 6655 - Seminar (2 credits total-take in 2 different years)
- BIOL 6764 - Biological Data Analysis (4 credits total-take in year 1)
- BIOL 6002 - Biology Skills Sets - Pedagogy (required only for students supported by a Graduate Teaching Assistantship)

### *Additional minimum requirements for research-based MS program*

- BIOL 6950 - Master's Thesis (1-2 credits in first spring/summer to write proposal and 2-4 credits in final semester to write thesis)

### *Additional minimum requirements for the coursework-based MS program*

- BIOL 5840 - Independent Study: BIOL (3 credits: advisor-guided review paper)

# Business Administration -- Health Administration MBA

**Program Director:** Rulon Stacey

**Telephone:** 303-315-8851

**E-mail:** Rulon.Stacey@ucdenver.edu

The graduate program in health administration is consistently ranked as a top program in the United States and attracts students with a variety of backgrounds and experience levels, which further enriches the classroom experience. The HA program is accredited by the Commission on Accreditation of Healthcare Management Education. Full-time faculty with distinguished research records and a select group of practicing managers provide students with the latest thinking on the most important health issues.

## Degree Requirements

The curriculum of the MBA in Health Administration is a synthesis of management concepts and techniques that are applicable to any economic organization and tools that can be specifically applied to health services systems. The program emphasizes skills that strengthen basic analytic

and decision-making processes used by top-level managers in selecting broad strategies and by junior managers in administering sub-units in healthcare organizations.

Students enrolled in the Master of Business Administration in Health Administration must complete a minimum of 45 semester hours of graduate-level course work to receive their degree. The curriculum is based on a series of structured learning sequences. All of the courses are available in the evening to enable working students to pursue the degree on a part-time basis. The specific course requirements are as follows:

### **MBA Core: (27 hours)**

- BUSN 6521 - Leading Individuals and Teams
- BUSN 6530 - Data Analytics for Managers
- BUSN 6541 - Legal and Ethical Environment of Business (Health Section)
- BUSN 6550 - Analyzing and Interpreting Accounting Information
- BUSN 6561 - Marketing Management (Health Section) This course has a new title: Marketing Dynamics in the 21st Century (Health Section).
- BUSN 6621 - Applied Economics for Managers (Health Section)
- BUSN 6630 - Management of Operations
- BUSN 6640 - Financial Management
- BUSN 6711 - Strategic Management (Health Section) \*This course is intended to be taken in your last Spring semester.

### **Health Administration Core: (12 hours)**

- HLTH 6010 - Health Care Systems
- HLTH 6070 - International Health Policy and Management
- HLTH 6770 - Healthcare Quality and Outcomes
- HLTH 6911 - Health Field Studies \*This course is intended to be taken in your last Spring semester. Prereq: HLTH 6010 or consent of instructor, minimum 3.0 cumulative GPA.

### **Health Administration Information Technology Elective: (3 hours)**

Select 1 of the following courses:

- HLTH 6071 - Introduction To Health Information Technology
- HLTH 6072 - Management of Healthcare Information Technology

The 2nd Health Administration Information Technology Elective may be used as Health Administration Elective.

## Health Administration Electives: (3 hours)

Select 1 of the following courses:

- ENTP 6801 - Building Biotechnology
- ENTP 6848 - Leadership in New Ventures
- HLTH 6075 - International Health Travel Study
- HLTH 6740 - Profiles in Health Care

\*HLTH 6071 or HLTH 6072 can be selected if not used as Health Administration Information Technology Elective.

A new Health course, HLTH 6730 - Healthcare Operations Management, was added in Spring of 2020 and is also a possible selection.

- ISMG 6810 - Business Intelligence in Healthcare

## Specialized Tracks within the MBA in Health Administration

Each track carries its own specific course requirements. To provide a variety of perspectives and experiences within a specific area of health administration, each track includes courses that span various departments within the Business School, other schools at CU Denver, and other University of Colorado campuses.

- International Health Management and Policy Track
- Financial Management Track
- Health Information Technology Management Track

## Notes and Restrictions

*Administrative Residency or Fellowship.* An administrative residency or fellowship is optional but recommended for students with limited healthcare experience. The program faculty provide guidance to students applying for residencies or fellowships. Information on the full range of local, regional, and national residencies or fellowships is available from the program director.

*Length of program.* A maximum of five years and one semester is allowed to complete the Health Administration program.

# Business Administration MBA

**Program Director:** Ronald Ramirez

**Telephone:** 303-315-8000

**E-mail:** Ronald.Ramirez@ucdenver.edu

The Master of Business Administration (MBA) program provides a general background in management and administration. This background enables the student to have the breadth and depth of knowledge required for an advanced-level management career. The program is designed to develop the concepts, analytical tools and communication skills required for competent and responsible administration of an enterprise viewed in its entirety, within its social, political and economic environment.

The professional MBA program allows the scheduling of classes with maximum flexibility so students can progress through the program at their own pace, by taking as little as one class per semester or as many as five classes per semester, at times that accommodate work schedules. Students may combine on-campus courses at our Denver campus or take courses at our South Denver location in Parker, Colorado. For students planning to combine courses at both locations, it is important to work with the advising team for planning purposes. The program can be completed in as little as 16 months or as long as five years plus one semester.

Online courses add additional flexibility. Students may complete all degree requirements online, or combine online and campus courses to broaden the choice of electives or to fit a business travel schedule or personal learning style. Choice of online electives is limited.

The MBA program is also available in different configurations: One Year MBA (full time, see relevant section), Health Administration and the Executive MBA (see relevant section). All MBAs have similar curriculum requirements; they differ principally in focus, the flexibility of course scheduling, and the time required to complete the program. The One Year and Executive MBAs are lockstep programs, where students form a cohort and complete all program requirements together. No course transfers, waivers or substitutions are permitted.

## Program Requirements

### Core Requirements: (30 hours)

- BUSN 6520 - Leading Individuals and Teams
- BUSN 6530 - Data Analytics for Managers
- BUSN 6540 - Legal and Ethical Environment of Business
- BUSN 6550 - Analyzing and Interpreting Accounting Information
- BUSN 6560 - Marketing Dynamics in the 21st Century
- BUSN 6610 - Information Systems Strategy
- BUSN 6620 - Applied Economics for Managers
- BUSN 6630 - Management of Operations
- BUSN 6640 - Financial Management
- BUSN 6710 - Strategic Management

*Core Substitution:* Students with extensive and comparable course work in a particular core subject area may petition to substitute a higher-level graduate course on the basis of prior undergraduate or graduate course work taken at a

regionally accredited college or university for the corresponding core class. This does not waive the 48-hour requirement. If a core course is substituted, another graduate level course in the same functional area must be used as a substitute so that the student completes a total of 48 semester hours.

### **International Elective: (3 hours)**

Any course numbered 6000 or higher with INTB prefix or any graduate level business course that is cross-listed with an INTB prefix. May also include the following: ENTP 6826 International Entrepreneurship, MTAX 6431 Inbound International Taxation, or RISK 6209 Cyber Risk Management. Travel studies offered by the Business School will also apply.

### **Free Electives: (12 hours)**

Any course numbered 6800 or higher with BUSN prefix or any course numbered 6000 or higher with prefix of ACCT, BANA, CMDT, ENTP, FNCE, INTB, ISMG, MGMT, MKTG, MTAX, or RISK. Students may also select a MBA Specialization.

### **Total: 45 Hours**

## **MBA Specializations**

Graduate students will have an opportunity to take specialized tracks within the professional MBA program by completing a pre-specified program of elective courses. The following 15 specializations are available:

- Accounting
- Bioinnovation and Entrepreneurship
- Business Analytics
- Business Intelligence
- Business Strategy
- Commodities
- Enterprise Technology Management
- Entrepreneurship
- Finance
- Information Systems
- International Business
  
- Management
- Managing for Sustainability
- Marketing
- Risk Management and Insurance

## Accounting

Students need to complete the required courses for a total of 4 courses for the specialization. Students who have completed equivalent courses to the ones listed below can substitute any ACCT course numbered 6000 or higher for courses in which they have been waived. Please contact an advisor for course waivers.

### **Required courses:**

- ACCT 6031 - Intermediate Financial Accounting I
- ACCT 6032 - Intermediate Financial Accounting II
- ACCT 6070 - Intermediate Cost Accounting
- ACCT 6140 - Fundamentals of Federal Income Tax

## Bio-innovation and Entrepreneurship

The Jake Jobs Center for Entrepreneurship is pleased to offer a specialization in Bio-innovation and Entrepreneurship, which is the first of its kind in the country to be offered by an AACSB accredited graduate business school. Taking advantage of the Colorado's bio-cluster, in collaboration with faculty at Anschutz Medical Campus, this specialization is one-of-a-kind, and is geared to helping bio-entrepreneurs achieve commercial success. Additionally, you have opportunities to participate in a number of Jake Jobs Center programs; including the annual business plan competition, internships in area businesses, speaker programs with local entrepreneurs, and connections to many new Colorado ventures.

### **Select 1 of the following courses:**

- ENTP 6801 - Building Biotechnology
- ENTP 6802 - Regulatory Environment of Life Science Innovation

### **Select 1 of the following courses:**

- ENTP 6020 - Business Model Development & Planning
- ENTP 6022 - Digital Strategy for Entrepreneurs

**Finally, select two other ENTP courses numbered 6000 or higher, excluding ENTP 6801 or ENTP 6802.**

## Business Analytics

Business analytics merges data, technology, and mathematical models to produce evidence-based information relevant for today's business and government decision-making.

This specialization in business analytics trains you to construct and interpret models of big data, forecasting, optimization, and simulation. Analytics touch every aspect of business, driving the

way businesses understand not only their own processes, but also the way their customers behave.

**Required courses:**

- BANA 6610 - Statistics for Business Analytics  
**Note:** To enroll in BANA 6610 you must submit a petition that demonstrates your quantitative ability with either a GMAT quantitative score or other quantitative skills. Contact your advisor for the petition form.
- BANA 6620 - Computing for Business Analytics
- BANA 6670 - Prescriptive Analytics with Optimization

**Complete 1 additional BANA 6000 level course or 1 of the following:**

- ECON 5030 - Data Analysis with SAS
- ISMG 6080 - Database Management Systems
- ISMG 6470 - Text Data Analytics

## **Business Intelligence**

Modern business runs on information. Success may depend on the quality of the collection and analysis. Business Intelligence (BI) systems combine operational data with analytical tools to present complex and competitive information for planning and decision making, and improves the timeliness and quality of inputs to the planning and decision process.

**Select 4 of the following courses:**

- ISMG 6080 - Database Management Systems
- ISMG 6220 - Business Intelligence Systems and Analytics
- ISMG 6430 - Information Systems Security and Privacy
- ISMG 6470 - Text Data Analytics
- ISMG 6480 - Data Warehouse and Administration
- ISMG 6810 - Business Intelligence in Healthcare
- ISMG 6820 - Business Intelligence and Financial Modeling

## **Business Strategy**

Business Strategy examines the development of firm strategic plans and implementation including careful resource allocation and leadership skills essential for organizations to effectively meet their objectives. With this specialization, you get the necessary skills and knowledge used to develop and implement business strategy.

**Select 4 of the following courses: (NOTE: if you want additional flexibility, you may select 2 from this list (rather than 4) and 2 from the additional elective list below)**

- MGMT 6610 - Business Strategy Lab
- MGMT 6730 - Human Resources Management: Performance Management

- MGMT 6803 - Visionary Leadership
- MGMT 6804 - Bargaining and Negotiation
- MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good

**If you wish additional flexibility, you may select two from the list above and select up to 2 of the following CMDT, ENTP, FNCE, INTB, MKTG or RISK courses:**

- CMDT 6682 - Commodity Valuation and Investment
- ENTP 6022 - Digital Strategy for Entrepreneurs
- ENTP 6826 - International Entrepreneurship
- FNCE 6310 - Financial Decisions and Policies
- FNCE 6340 - Business Firm Valuation
- FNCE 6382 - Survey of Financial Derivatives
- FNCE 6411 - International Corporate Governance
- FNCE 6420 - Mergers and Acquisitions
- FNCE 6480 - Financial Modeling
- INTB 6022 - International Business Negotiations

**OR**

- INTB 6500 - International Business Consulting
- MKTG 6010 - Marketing Strategy
- RISK 6309 - Strategic Risk Management
- RISK 6909 - Corporate Risk Management

## **Commodities**

The specialization is a new offering from the J.P. Morgan Center for Commodities. MBA candidates and business professionals should take this specialization for a better understanding of the commodities market in its entirety, from both the physical and financial perspective, including trading operations, investment management, commodities and investment banking. With strong industry support, courses in this specialization are catered to, and designed around, actual business problems in the commodities sector. Students will have an edge in competing for jobs in the commodity rich sectors of this state.

### **Required courses:**

- CMDT 6582 - Commodity Supply Chain Management
  - CMDT 6682 - Commodity Valuation and Investment
  - CMDT 6802 - Foundations of Commodities
- Complete one of the following courses:
- CMDT 6782 - Commodity Data Analysis
  - FNCE 6382 - Survey of Financial Derivatives

## Entrepreneurship

The Entrepreneurship specialization provides a range of focused courses geared towards individuals looking to start their own business. Courses are taught at the Jake Jobs Center for Entrepreneurship located in the heart of downtown Denver or at the new South Denver location near I25 and Lincoln Avenue. Complete four entrepreneurship courses to receive a specialization in Entrepreneurship. Additionally, you have opportunities to participate in a number of Jake Jobs Center programs; including the annual business plan competition, internships in area businesses, speaker programs with local entrepreneurs, and connection with new ventures.

**Complete four courses total.**

**Complete 3 courses with an ENTP 6000 or higher number, excluding ENTP 6801 and ENTP 6802.**

**Then select one of the following capstone courses:**

- ENTP 6020 - Business Model Development & Planning
- ENTP 6022 - Digital Strategy for Entrepreneurs

## Finance

Adding the finance specialization to your degree gives you skills relevant to different financial functional areas including corporate, investments, and financial institutions. You get the tools and skill sets you need for finance decision making and investment.

**Required course:**

- FNCE 6330 - Investment Management Analysis

**Select 3 FNCE or CMDT or RISK 6000 level or higher courses.**

## Information Systems

Complete any four ISMG 6000 or higher courses.

## International Business

International Business is quickly becoming simply business. Adding a specialization in International Business to your degree will help you to work internationally, and with international companies. From cross cultural management to legal aspects to marketing internationally. Prepare yourself for how business works today.

**Required course:**

- INTB 6000 - Introduction to International Business  
**OR**
- ENTP 6826 - International Entrepreneurship

**Complete 3 of the following courses:**

Any INTB 6\*\*\* course excluding INTB 6000. May include the following courses that are not INTB courses: MGMT 6827(Global Climate Change); ENTP 6826 (International Entrepreneurship) -- if not chosen as the required course above; MTAX 6431 (Inbound International Taxation); MTAX 6432 (Outbound International Taxation); RISK 6209 (Cyber Risk Management); or any travel study course offered by the Business School.

## Management

Complete the two following required courses:

- MGMT 6320 - Leading Organizational Change
  - MGMT 6360 - Designing Effective Organizations
- Select two additional courses from the list below:
- MGMT 6610 - Business Strategy Lab
  - MGMT 6821 - Managing for Sustainability
  - MGMT 6380 - Managing People for Competitive Advantage
  - MGMT 6803 - Visionary Leadership
  - MGMT 6804 - Bargaining and Negotiation

## Managing for Sustainability

More than ever before, major companies and entrepreneurial ventures are seeking competitive advantage and success by embracing sustainability — social and environmental responsibility — as a core business strategy. Farsighted leaders recognize that this new way of doing business requires skills in sustainable management including social entrepreneurialism, eco-efficiency, inter-disciplinary problem solving and a triple bottom line approach of economics, environment and society. Make your degree a green MBA by adding the Managing for Sustainability specialization and learn what businesses are facing in a world where resources are scarce, social safety nets are declining, and customers and commentators are concerned about a company's investment in corporate responsibility.

**Complete 4 of the following courses:**

- ACCT 6285 - Accounting and Finance for Sustainability
- BANA 6730 - Supply Chain Analytics
- ENTP 6030 - Entrepreneurship in Emerging Industries
- MGMT 6821 - Managing for Sustainability
- MGMT 6822 - Business Ethics and Corporate Social Responsibility

- MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good
  - MGMT 6826 - Business and the Natural Environment
  - MGMT 6827 - Global Climate Change
  - MKTG 6830 - Marketing & Global Sustainability
  - MGMT 6840 - Independent Study **(by petition only)**
  - MGMT 5939 - Internship **(by petition only)**
- OR**
- MKTG 5939 - Internship **(by petition only)**

## **Marketing**

Marketing is about building long-term relationships between your firm and those who buy its offerings. Just how important is marketing to a firm's success? Well without it there would be no way to communicate with current or potential customers and no revenues. The Marketing specialization will give you the skills and confidence needed to effectively manage a firm and in particular those aspects associated with building profitable, long-term, business relationships.

**To complete the specialization select 4 MKTG 6000 level or higher courses.**

**You may also petition to have a marketing internship count toward the specialization. (MKTG 5939)**

## **Risk Management and Insurance**

The specialization in Risk Management and Insurance is designed for students who are interested in pursuing or advancing a career in the insurance industry, or other areas of risk management.

### **Required courses:**

- RISK 6809 - Principles of Risk Management & Insurance
- RISK 6909 - Corporate Risk Management

### **Complete one of the following courses:**

- CMDT 6682 - Commodity Valuation and Investment
- FNCE 6330 - Investment Management Analysis
- FNCE 6350 - Financial Innovations
- FNCE 6360 - Management of Financial Institutions
- FNCE 6382 - Survey of Financial Derivatives
- FNCE 6480 - Financial Modeling
- RISK 6129 - Practical Enterprise Risk Management
- RISK 6309 - Strategic Risk Management

**Complete one of the following courses:**

- BANA 6650 - Project Management
- CMDT 6582 - Commodity Supply Chain Management
- CMDT 6802 - Foundations of Commodities
- ENTP 6824 - Entrepreneurial Financial Management
- ISMG 6430 - Information Systems Security and Privacy
- ISMG 6450 - IT Project Management
- MGMT 6826 - Business and the Natural Environment
- MGMT 6827 - Global Climate Change
- RISK 6209 - Cyber Risk Management
- RISK 6409 - Employee Benefits and Workforce Risk Management
- RISK 6509 - Global Risk Management

## **Sports and Entertainment Business**

The Sports industry is the sixth largest industry in the United States and the Sports and Entertainment industries are converging. To become a professional in these industries, you need special skills. Through this specialization, you gain the tools to get ahead in both the sports and entertainment industries.

**Complete 4 of the following courses:**

- MKTG 6040 - Services Marketing for Traditional and Creative Industries
- MKTG 6820 - Sports & Entertainment Marketing
- MKTG 6822 - "Fan"tastical Consumers of American Sports and Entertainment
- MKTG 6824 - Sales and Negotiation for Consumer, Services, Sports, and Entertainment Industries
- MKTG 6826 - The Sports and Entertainment Industry
- MKTG 6834 - Global Sports & Entertainment Management

Students may also petition to take a marketing internship (MKTG 5939).

# **Business Administration: One Year MBA**

**Program Director:** Mary Malina

**Director of Operations:** Andrea Szabo

**E-mail:** [oneyearmba@ucdenver.edu](mailto:oneyearmba@ucdenver.edu)

**Telephone:** 303-315-8800

**Website:**

<http://www.ucdenver.edu/academics/colleges/business/degrees/mba/1yearMBA/Pages/default.aspx>

The One Year MBA is the fastest way to earn your MBA and gain valuable work experience at the same time. The program includes a fast-paced curriculum based on today's business world

with time for innovative electives that offer relevant specialized content. Competitive paid internships, or consulting coursework with the possibility of a paid graduate assistantship, add experience to your degree. Classes are held in person, which provides valuable interactions with faculty and classmates.

The program consists of 8 five-week terms and an international course abroad. There are occasional breaks between terms. You should expect approximately 10 hours a week in class, with another 25 hours as an estimate for homework, studying, and group projects outside of class. Please note that these estimates do not include the possible time spent at an internship/assistantship or time needed for consulting coursework, which generally will add another 20-25 hours a week to your time commitment. These numbers are estimates only and may vary for each student.

## **Admission and Application Process**

The admissions committee considers each candidate's entire record of achievement demonstrated through academic transcripts, GMAT scores, essays, required letters of recommendation, work experience and/or extracurricular and community activities. Interviews are by invitation only and may be completed in-person or through a virtual platform.

## **Previous Education**

Applicants' complete academic records, including GPAs and previous course work, are considered. Undergraduate degrees do not have to be in business, but they must be from regionally accredited colleges or universities.

## **Testing**

The GMAT or GRE is a requirement for application to the One Year MBA Program. Both verbal and quantitative scores on the GMAT/GRE are important indicators of potential for academic success. The GMAT website is [www.mba.com](http://www.mba.com).

International applicants whose first language is not English must take the TOEFL or IELTS exam and earn a minimum score 90 (IBT) or 575 (PBT) TOEFL or 6.5 IELTS to be considered for admission to the One Year MBA Program. Information on taking the TOEFL or IELTS can be obtained by visiting [www.ets.org](http://www.ets.org) and [www.ielts.org](http://www.ielts.org).

## **Work Experience**

The admissions committee does not require work experience to apply. Professional experience strengthens the application, as it adds relevance and depth to the learning process and enables candidates to contribute to and benefit from the knowledge of fellow classmates in the accelerated time frame of the program.

## Applications

The following are required for consideration of admission to the program.

- Application fee (domestic or international as appropriate)
- Online application for graduate admission
- Two (2) letters of recommendation from professional or academic acquaintances who are familiar with the applicant's academic/professional competence
- GMAT or GRE scores taken in the last five years sent directly from the Educational Testing Service. When registering for the GMAT, use code MPB-OG-65; for the GRE use code 4875.
- Official transcripts from each school, college or university previously attended past high school, sent directly to the Business School admissions office. A minimum baccalaureate degree is required
- Include answers to the four essay questions demonstrating a commitment to an accelerated MBA program
- A resumé outlining work experience
- For international students, a minimum official score of 90 (IBT) or 575 (PBT) TOEFL (TOEFL school code: 4875) or 6.5 IELTS is required to apply - test scores are valid for two years after test date
- If invited, a personal interview (in-person or through a virtual platform)

Applications are available at: <http://www.ucdenver.edu/academics/colleges/business/apply-now/Pages/MBA-MS-Admissions.aspx>

The One Year MBA uses a rolling admission system. The committee reviews applications when they are complete in all respects, including transcripts, GMAT/GRE scores and letters of recommendation.

Candidates are encouraged to submit their application as early in the process as possible. The priority deadline is April 15 with a final deadline of May 30. International applicants final deadline is May 15, to allow sufficient time for visa and travel arrangements.

All of the required admission materials should be sent to:

University of Colorado Denver  
The Business School  
Graduate Admissions  
Campus Box 165, P.O. Box 173364  
Denver, CO 80127-3364

For further information, contact the One Year MBA Program at: [oneyearmba@ucdenver.edu](mailto:oneyearmba@ucdenver.edu).

## Financial Aid/Scholarships

General financial aid is available for qualified students. Students should apply directly through the CU Denver Office of Financial Aid.

The One Year MBA program offers scholarships only for students enrolled in the program. You will be automatically considered for the following scholarships with the submission of your application.

### One Year MBA Scholarship

**From \$1,000-\$8,000 based on GPA, GMAT, and professional or personal leadership experience.** If you are awarded this scholarship, the award amount will be included in your admission letter. These scholarships are first come first serve. The earlier you apply to the program, the better chance of a scholarship. In previous years, these scholarships were allocated by April, so apply to the program as early as possible to be considered.

If you commit to the One Year MBA program, you will be able to apply for the following additional scholarships. These scholarships are limited in number, but each category could have more than one recipient. These scholarship awards are up to \$5,000.

- **One Year MBA Leadership Scholarship**
- **One Year MBA CU Denver Alumni Scholarship**
- **One Year MBA STEM Scholarship**
- **One Year MBA Global Citizen Scholarship**

These scholarship deadlines are in mid-May, so you must submit your application for the One Year MBA no later than April in order to apply for these scholarships.

## **Degree Requirements**

The 45 credit hour program consists of core courses, international business courses (conducted in Denver and abroad), career and professional development coursework, electives and either consulting coursework or competitive internships for credit.

**No courses may be waived, substituted or transferred into the program.** If a student finds it necessary to leave the accelerated program, credits already earned may be transferred to the Professional MBA program.

### **One Year MBA Core/Required Classes (34.5 credit hours)**

- AMBA 6201 - Leading in Organizations
- AMBA 6202 - Workforce Management
- AMBA 6210 - Data Analytics I
- AMBA 6211 - Data Analytics II
- AMBA 6220 - Business Law and Ethics
- AMBA 6230 - Financial Accounting
- AMBA 6231 - Management Accounting

- AMBA 6260 - Applied Microeconomics
- AMBA 6261 - Applied Macroeconomics
- AMBA 6280 - Finance Management I
- AMBA 6281 - Finance Management II
- AMBA 6270 - Operations Management
- AMBA 6271 - Supply Chain Management
- AMBA 6301 - Global Business
- AMBA 6240 - Marketing Principles
- AMBA 6241 - Marketing Strategy
- AMBA 6251 - Data Management Strategy
- AMBA 6250 - Digital Leadership and Governance
- AMBA 6290 - Strategy Foundations
- AMBA 6291 - Strategy in Practice
- AMBA 6310 - International Business Abroad

### **Experiential Learning Component (3 or 6 credit hours)**

The experiential learning component is fulfilled through the internship path or the consulting path.

- AMBA 5939 - Internship for MBAs
- AMBA 6330 - Introduction to Business Consulting for MBAs

### **OneYear MBA Electives (4.5-7.5 credit hours)**

Students in the Internship path will select a total of three out of six electives offered in the program. Students in the consulting path will select a total of five out of the six electives offered in the program. Each elective is 1.5 credits. These electives are subject to change each year.

Examples of electives have included such courses as:

Negotiations

Investments

Conflict Management

Personal Branding

Visual Analytics for Big Data

Digital Marketing Strategy

Digital Marketing Analytics

# Business Analytics MS

**Program Director:** Deborah Kellogg and Gary Kochenberger

**Telephone:** 303-315-8435

**E-mail for Preferred Contact:** Deborah.Kellogg@ucdenver.edu

The MS in Business Analytics focuses on modeling and applications which prepares you for a career as a business analyst in industry or government. Today, companies in every conceivable industry are reaping the benefits of using formal mathematical models to assist them in addressing complex business problems. Business Analytics graduates hold positions that bridge the gap between operations research/statistics specialists and management.

Learn to apply quantitative methods to real-world problems using modern methodologies adopted from statistics, operations research, and management science. The MS in Business Analytics focuses on applications of mathematical models in the workplace rather than the development of new research techniques. The managerial emphasis of our degree is accomplished through a comprehensive set of elective and required coursework such as data analysis, forecasting, project management, simulation, predictive analytics, prescriptive analytics, and supply chain management. Students have the opportunity to learn current analytics tools such as R, Python, database tools, and Tableau.

This degree is designed to be completed in 18 to 24 months. However, with careful planning, in consultation with an academic advisor, full-time students may be able to complete the degree in 12 months.

Requirements for the MS degree in Business Analytics are met by the following courses and options:

## Business Analytics Core I: (9 hours)

- BANA 6610 - Statistics for Business Analytics
- BANA 6620 - Computing for Business Analytics
- BANA 6670 - Prescriptive Analytics with Optimization

## Business Analytics Core II: (9 hours)

Complete three of the following courses:

- BANA 6630 - Time-Series Forecasting
- BANA 6640 - Decision Analysis
- BANA 6660 - Predictive Analytics
- BANA 6720 - Simulation Modeling
- BANA 6680 - Optimization for Machine Learning

## Business Analytics Electives: (12 hours)

Select any four courses which must include BANA courses numbered 6000 or higher, ISMG 6080, ISMG 6470, or ECON 5030.

## Notes and Restrictions

Students are not required to take a comprehensive examination or complete a thesis in the major field.

**Note:** Business School MS degrees typically allow students to transfer in 9 semester hours from another university. However, the MS in Business Analytics (BANA) allows students to petition to have a maximum of 6 semester hours transfer from another university. The transfer of *required* courses must closely reflect the educational objectives of the Master's degree in Business Analytics. The evaluation of substitute courses will include syllabi evaluation and the accreditation of the transferring institution.

**Total: 30 Hours**

## Chemistry MS

► Graduate School Rules apply to this program

**Program Director:** Scott Reed

**Email:** Scott.Reed@ucdenver.edu

**Office:** SI 4131

**Phone:** 303-315-7644

The MS program in chemistry focuses on providing students with the skills and knowledge necessary to conduct specialized research in preparation for careers in chemistry and related disciplines. Completing an MS in Chemistry at CU Denver can provide valuable experience that can help students land a job in the pharmaceutical, biotechnological, or other industry or can serve as a stepping stone for admission to a competitive PhD or health sciences program. Our faculty serve as mentors and advisors and assist students on the path to a more satisfying career in science. Prospective students are encouraged to contact the Graduate Program Director visit the Department of Chemistry website for additional details concerning the chemistry program, admission procedures, financial assistance and faculty research interests.

### Admission Requirements:

Applicants must meet the Downtown Campus Graduate School admission requirements according to Graduate School Policies and Procedures in addition to the following requirements of the Department of Chemistry:

An undergraduate major in Chemistry or a closely related discipline is required, including two semesters of organic chemistry as well as training in analytical chemistry, physical chemistry, and inorganic chemistry. Students missing more than one of these courses may be limited in the tracks that they are eligible to select. Students missing more than one of these courses may be provided a provisional admission. An undergraduate GPA of 3.0 (on a 4 point scale) is desired although each application is considered on its own merits.

- The GRE examination is recommended but not required.
- International students have additional admission requirements concerning immigration status, proof of financial responsibility and acceptable TOEFL or IELTS scores or completion of the CU Denver English as a Second Language Academy.
- Students currently in a BS program at CU Denver or elsewhere may want to consider the Chemistry BS/MS. This option includes the opportunity to enroll in graduate classes before enrolling in the MS program at CU Denver. At least 20 credits must be earned on campus. However, for the remaining courses, enrollment through CU ONLINE or on one of the other CU campuses is possible. Furthermore, the Chemistry Master's Program accepts transfer credits from accredited Universities with approval from the Graduate Program Director.

**In addition to selecting Plan I or Plan II, all MS students must select a track for their degree**

- Students interested in specializing within Chemistry must select from one of the tracks listed below. Each track has separate placement examinations. Therefore switching between tracks requires approval from the graduate program director

**Study Plans:**

<p><b>Plan I:</b></p> <p>Plan I (Thesis) is a research oriented program involving a minimum of 30 semester hours with the following requirements:</p>	<p><b>Plan II:</b></p> <p>Plan II (Course Work) is a coursework oriented program involving a minimum of 30 semester hours with the following requirements:</p>
<p>Students interested in specializing within Chemistry must select from one of the tracks listed below. Each track has separate placement examinations. Therefore switching between tracks requires approval from the Graduate Program Director</p>	
<p><b>Tracks:</b></p> <p>Track 1: Biochemistry</p> <p>Track 2: Synthesis and Measurement</p>	

Track 3: Molecular Modeling

Track 4: Traditional Chemistry

## Completing an MS in Chemistry - Graduation Requirements

### All Chemistry MS students must meet the following requirements for graduation:

- A cumulative GPA of 3.0 or better at the time of graduation
- A grade of *B-* (2.7) or better in all courses to be counted toward the degree.
- Compliance with all Graduate School Policies and Procedures
- Every student must select a thesis or non-thesis plan. As most of the requirements overlap, a student may switch between these plans with permission from the Graduate Program Director.
- Although degrees can be completed in as little as one year, all work must be completed within five years after enrolling in the first graduate class in the department unless an exception is granted by the program director.
- Students are eligible to apply for a research assistantship or a teaching assistantship positions. Students who are interested in improving teaching skills can enroll in CHEM 5655 Teaching Assistant Bootcamp. This course is required for all students who are interested in working as a teaching assistant in the department.
- A minimum of 20 semester hours must be earned in formal lecture courses in the Department of Chemistry. Other credits can be acquired through research, internships, thesis work, independent study, transfer credits, etc.

### Plan I (Thesis) is a research oriented program involving a minimum of 30 semester hours with the following requirements:

- An acceptable formal thesis consistent with the Graduate School Policies and Procedures
- Successful oral defense of the master's thesis before a committee of at least three Regular Graduate Faculty, two of whom must be tenure track faculty members and have an appointment with the Graduate School through the Department of Chemistry.
- Completion of a high quality research project suitable for publication in a peer-reviewed journal.
- 3 semester hours of CHEM 6950 - Master's Thesis
- All thesis students must complete 1 credit of CHEM 5610 - Understanding & Presenting Chemical Research no later than the semester before they defend their thesis.

## **Plan II (Course Work) is a coursework oriented program involving a minimum of 30 semester hours with the following requirements:**

- All Plan II students are required to take a final written examination about primary research articles in their discipline. This exam may be taken any semester after 20 semester hours of graduate course work have been completed. Students may attempt the exam once per semester a maximum of three times and must be registered during the semester that they attempt the final examination.
- All non-thesis students are encouraged to take 1 credit of CHEM 5610 - Understanding & Presenting Chemical Research
- Plan II students may arrange for an internship at a local company that employs Chemists and take up to 6 credits of CHEM 5939 - Internship Students must be in good academic standing and have completed 6 graduate semester hours at CU Denver before starting an internship. Approval of the graduate program director is required prior to selecting an internship and enrolling for credit.

## **Track Options:**

### **Track 1: Biochemistry**

Understanding of biochemical principles governing metabolic diseases, cancer and neurodegenerative diseases.

Take the following required course:

- CHEM 5810 - Graduate Biochemistry I

Take **one** of the following required courses:

- CHEM 5310 - Advanced Organic Chemistry
- CHEM 5530 - Advanced Physical Chemistry

Take **two** of the following elective courses:

- CHEM 5815 - Structural Biology of Neurodegenerative Diseases
- CHEM 5825 - Biochemistry of Metabolic Disease
- CHEM 5830 - Graduate Biochemistry II
- CHEM 5835 - Biochemistry of Gene Regulation and Cancer
- CHEM 5845 - Molecular Modeling and Drug Design
- CHEM 5600 - Graduate Topics in Chemistry (course topic must match to the topic area of the track and be preapproved by the Graduate Program Director)

CHEM 5310 or CHEM 5530 may be taken as electives, if not used as a required course above. Additional courses within the department (a minimum of 20 semester hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department must be approved by the Graduate Program Director.

## Track 2: Synthesis and Measurement

Students in this track will learn how to prepare and characterize molecules and materials and how to measure their properties.

Take **one** of the following required courses:

- CHEM 5010 - Advanced Inorganic Chemistry
- CHEM 5310 - Advanced Organic Chemistry

Take **one** of the following required courses:

- CHEM 5110 - Advanced Analytical Chemistry
- CHEM 5221 Practical Applications for Spectroscopy

Take **two** of the following elective courses:

- CHEM 5510 - Computational Chemistry
- CHEM 5530 - Advanced Physical Chemistry
- CHEM 5421 - Cannabis Chemistry
- CHEM 5845 - Molecular Modeling and Drug Design
- CHEM 5600 - Graduate Topics in Chemistry (course topic must match to the topic area of the track and be preapproved by the Graduate Program Director)
- CHEM 5700 - Environmental Chemistry
- CHEM 5810 - Graduate Biochemistry I
- CHEM 5815 - Structural Biology of Neurodegenerative Diseases
- BIOE 5420 - Special Topics in Bioengineering (course topic must be preapproved by the Graduate Director)

CHEM 5010, CHEM 5110, CHEM 5221 or CHEM 5310 may be taken as electives if not used as a required course above. Additional courses within the department (a minimum of 20 semester hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department must be approved by the Graduate Program Director.

## Track 3: Molecular Modeling

Students in this track will learn fundamental principles and modern techniques in computer modeling and apply the acquired knowledge to solve practical problems in chemistry, biochemistry, biophysics, and material sciences.

Take all of the following required courses:

- CHEM 5510 - Computational Chemistry
- CHEM 5530 - Advanced Physical Chemistry

Take **two** of the following electives:

- CHEM 5010 - Advanced Inorganic Chemistry
- CHEM 5310 - Advanced Organic Chemistry
- CHEM 5845 - Molecular Modeling and Drug Design
- CHEM 5600 - Graduate Topics in Chemistry (course topic must match to the topic area of the track and be preapproved by the Graduate Program Director)
- CHEM 5815 - Structural Biology of Neurodegenerative Diseases
- CHEM 5810 - Graduate Biochemistry I

Additionally, students are recommended to take one or two courses from other departments:

- MATH 3191 - Applied Linear Algebra
- MATH 4387 - Applied Regression Analysis
- MATH 5310 - Probability
- MATH 5387 - Applied Regression Analysis
- MATH 5660 - Numerical Analysis I
- CSCI 1410 - Fundamentals of Computing
- CSCI 2312 - Object Oriented Programming
- CSCI 4650 - Numerical Analysis I
- CSCI 5660 - Numerical Analysis I

Additional courses within the department (a minimum of 20 semester hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department and not on the above elective list must be approved by the Graduate Program Director.

## **Track 4: Traditional Chemistry**

Students that are interested in gaining experience in a broad range of chemistry including the critical sub-disciplines of organic, inorganic, analytical, and physical chemistry are encouraged to consider the traditional track.

Traditional Chemistry MS degree students must complete **the following required courses and a thesis or a final written examination.**

- CHEM 5010 - Advanced Inorganic Chemistry
- CHEM 5110 - Advanced Analytical Chemistry
- CHEM 5310 - Advanced Organic Chemistry
- CHEM 5530 - Advanced Physical Chemistry

Additional courses within the department (a minimum of 20 credit hours must be in Chemistry) and in other departments can be used to complete the total of 30 credits required for the degree. Course selections outside of the department must be approved by the Graduate Program Director.

## Civil Engineering MS and MEng

► Graduate School Policies and Procedures apply to these programs

### Graduate Degree Programs

The civil engineering graduate program is designed for both full-time and part-time students who want to advance their academic and professional skills in civil engineering and related areas. Many students are full time, while many also work full-time jobs and complete evening classes. Depending on a student's pace, the master's program takes 2-4 years to complete (on average). All graduate courses are offered in the afternoons, evenings or on Saturdays. Some courses, including all GIS classes, are offered online.

#### Specialty Areas:

##### Master of Science (MS)

- Construction Engineering and Management
- Environmental and Sustainability Engineering
- Geographic Information Systems (GIS)
- Geotechnical Engineering
- Hydrologic and Hydraulic Engineering
- Structural Engineering
- Transportation Engineering

##### Master of Engineering (MEng)

- Construction Engineering and Management
- Geomatics Engineering and Geographic Information Systems (GIS)
- Sustainable Infrastructure
- Transportation Systems

# Degree Requirements

Two MS degree programs are available.

Plan I - Master's Thesis: This plan requires 24 semester hours of graduate-level course work and 6 semester hours of master's thesis credit.

Plan II - Master's Report: This plan requires 27 semester hours of graduate-level course work and 3 semester hours master's report credits.

Master of engineering students must follow Plan 2 above. Additionally, of those 30 semester hours, at least 15 hours must be completed with CE classes, including the master's report. The remaining hours may be completed in related disciplines that supplement the chosen area of study. Both the MS and MEng degrees require satisfactory completion of a written comprehensive exam and an oral defense of the master's thesis or master's report to a committee of at least three graduate faculty. Every graduate student must also satisfy the degree requirements of the Graduate School on the Denver campus, specified in the Information for Graduate Students chapter of this catalog. Both the MS and the MEng degree programs must be completed within seven years of the date the student begins the degree program.

Courses for both the MS and MEng degree programs are selected by mutual agreement of the student and his/her faculty advisor after admission to the degree program. The advisor may also specify undergraduate courses that must be completed before starting graduate course work, but these will not count toward the semester hour requirements for the degree. The student's thesis or report topic must also be approved by the faculty advisor.

## Requirements for Admission

### **GPA and GRE Scores:**

Applicants must submit evidence of adequate preparation for graduate study by either (a) submitting official GRE scores, or (b) documenting an earned bachelor's degree with a GPA of 3.00 or higher from an institution accredited by a U.S. accreditation body, or an earned master's degree with a GPA of 3.50 or higher from an institution accredited by a U.S. accreditation body.

### **Transfer Credit:**

Master's students may transfer up to 9 semester hours from another institution toward their master's degree, if approved by their advisor.

### **Program Prerequisites:**

Prerequisite classes are in addition to the 30 semester hours needed to complete a master's degree, as they are necessary background information that is usually included in an engineering

bachelor's program. Students must receive a grade of C-minus or better for the prerequisite class to apply to the program.

Students may complete prerequisite classes either before or after being admitted to a degree program. However, applicants with too many prerequisites may not gain admission. For applicants completing prerequisites after admission, all prerequisite courses must be completed before 12 of the 30 master's semester hours are complete.

If prerequisites are taken while admitted to the master's program, students must maintain a 3.0 overall GPA, per Graduate School rules.

Requests for applications for graduate study in civil engineering should be addressed to

CU Denver Department of Civil Engineering  
Campus Box 113  
P.O. Box 173364  
Denver, CO 80217-3364

Applicants who are not citizens or permanent residents of the United States must apply through the Office of International Admissions, Campus Box 185, P.O. Box 173364, Denver, CO 80217-3364. All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials. Learn more in the International Students section of the catalog.

## Communication MA

► Graduate School Policies and Procedures apply to this program

Our vibrant community of scholars and teachers is committed to providing a real world, hands-on, and theoretically robust master's degree that will enrich students' communication knowledge and skills. Our program is a 33-credit generalist degree designed to enhance students' intellectual and professional growth through the understanding, analysis and practice of effective communication. Our faculty members are nationally and internationally recognized leaders in their fields, and our students hail from all over the world.

Some students who complete our program receive offers to top-notch PhD programs while others accept or continue in positions related to communication management, strategic communication, public relations, media relations, human relations, and corporate and non-profit communications.

### Degree Requirements

1. Students must complete a minimum of 33 credits from approved courses.
2. Students must complete a minimum of 27 credits at the graduate level.

3. Students must earn a minimum grade of B (3.0) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. All credits for the degree must be completed with CU Denver faculty.

## **Required Introduction Course**

Students must take COMM 6013 in the first semester it is available.

- COMM 6013 - Introduction to Graduate Work in Communication

**Total: 3 Hours**

## **Required Methods Course**

Students must take COMM 5221 in the first semester it is available.

- COMM 5221 - Research Methods: Qualitative

**Total: 3 Hours**

## **Seminars**

Seminars are Communication courses at the 6000 level and are often special topics classes taught in faculty areas of expertise. Students must take two graduate Communication seminars in addition to the required COMM 6013 course. The optional COMM 6950 Master's Thesis or COMM 6960 Master's Project do not count as seminars.

**Total: 6 Hours**

## **Electives**

Students must complete seven elective courses. All electives must be at the 5000 or 6000 level; however, 1 course (3 credits) is permitted at the 4000 level from outside the Communication department. A total of 6 credits may be outside the Communication department.

Courses that count as electives include:

- Any Communication courses taken at the 5000 or 6000 level that do not fulfill another program requirement.

- Communication internships (max 6 credit hours)
- Communication independent studies (max 6 credit hours)
- Courses from outside the Communication department (max 6 credit hours; more with the approval of the student's advisor and the Director of Graduate Studies).
- Thesis credit, if applicable

**Total: 21 Hours**

## Optional Thesis

Students who choose to complete a thesis must register for between 3-6 semester hours of thesis work, which may substitute for one or two elective courses. Students who complete a thesis still complete a total of 33 credit hours.

**Total: 3-6 Hours**

All students must pass a comprehensive examination at the end of course work.

Students must comply with all Graduate School Policies and Procedures

**Degree Total: 33 Hours**

# Computer Science MS

► Graduate School Policies and Procedures apply to this program

The Department of Computer Science and Engineering requires master's degree candidates to complete a program of study consisting of at least 30 semester hours of graduate level computer science courses while maintaining a grade point average of at least 3.0. According to the Graduate School Rules, graduate courses with grades below B- cannot be applied toward the completion of the graduate degree. With prior approval by the Graduate Committee, a student may substitute up to nine semester hours with graduate mathematics or other engineering courses.

Students need to submit an approved Plan of Study to the department during the first semester of their admission. An academic advisor will consult with students to develop a Plan of Study. Students may choose **Plan I** (Thesis), **Plan II** (MS Project), or **Plan III** (Course Only). Both Plans I and II require successful defense of thesis or project in student's graduating semester.

- **Plan I-Thesis:** Students take 24 hours of graduate course work, and additionally write and defend a thesis, which counts for 6 hours of graduate thesis work. In this plan students will take a minimum of three "category A" courses, a minimum of four "category B" courses, and six hours of MS thesis.

- **Plan II-MS Project:** Students take 27 hours of graduate course work, and additionally write and defend a MS project report, which counts for 3 hours of graduate MS project work. In this plan, students will take four "category A" courses, a minimum of four "category B" courses, and three hours of MS project.
- **Plan III-Course Only:** Students must take 30 hours of graduate course work and, additionally, complete the final assessment during the student's graduating semester. In this plan, students will take four "category A" courses and a minimum of four "category B" courses. One of the "category B" courses must be from a designated list of courses that will satisfy a final MS course project.

Students are allowed a maximum of 3 credit hours of CS Independent Study (except in Plan III, course-only option).

Students may only take graduate engineering or graduate mathematics courses that are offered toward an MS degree in a degree-granting department, while at least 21 hours must be CS. Students must receive prior approval from the CSE graduate committee before taking any such courses. For example, courses offered through Continuing Education are not counted toward an MS degree in Computer Science.

The only exception for a student to take a graduate course from any other department is when

	<i>Minimum</i>	<i>Recommended</i>
<b>Operating system</b>	Windows 10 1809+	Windows 10 1809+
<b>CPU</b>	Intel Core i5 dual core 1.6 GHz or Intel Core i5 quad core 1.4 GHz	Intel Core i5/i7 2.2 GHz or faster
<b>RAM</b>	8GB (upgradable to 16GB)	12 to 16GB
<b>Disk Space</b>	256GB hard disk drive with 100GB free upgradable to 512 solid state drive	512GB Solid state drive with 100GB free
<b>Hard Disk Speed</b>		Install Windows and applications on a solid state drive
<b>Graphic Card</b>	integrated graphics card	dedicated graphics card
<b>Display</b>	1280 x 720 resolution	1920 x 1024 resolution
<b>Network Connectivity</b>	Ethernet + Wifi	Ethernet + Wifi

the course satisfies all of the following conditions:

1. It appears in a graduate program.
2. It is taken instead of 3 hours of CS Independent Study.

3. It is approved by the CSE Graduate Committee.

No more than 6 credit hours may be in the form of online courses.

Students in the CSE department are required to have a personal laptop with the following specifications:

## **Data Science in Biomedicine Track**

The Data Science in Biomedicine Track is offered under the Computer Science Master of Science degree program for students who choose Plan I - Thesis.

With this new track, students will adopt biomedical applications of data science (as a sample data science application domain) to learn data science methodologies and technologies. Upon successful graduation from the Computer Science MS program under the Data Science in Biomedicine track, students will have an official designation of data science training within their degree, which will help with employment and other opportunities.

The Data Science in Biomedicine Track requires master's degree candidates to complete a program of study consisting of at least 36 semester hours of graduate level computer science courses while maintaining a grade point average of at least 3.0. According to the Graduate School Rules, graduate courses with grades below B- cannot be applied toward the completion of the graduate degree. In this plan students will take will take three "category A" courses, a minimum of four "category B" courses, six hours of MS thesis and an additional 3 courses of electives from a list of courses related to Biomedical Computing and Informatics, Bioinformatics, Health Informatics, etc.

## **Adequate Progress toward MS in Computer Science Degree**

Students are expected to finish the MS degree program within five years. Candidates for the MS degree may not get credit for a course taken longer than five years before the date on which the degree is to be granted.

Students who do not enroll for any course work relevant to computer science in a given semester (summer semesters excluded) must supply the Department of Computer Science and Engineering with a written statement describing the reason for the inactivity. Students who are inactive for three consecutive semesters (summer semesters excluded) will be removed from the program, and must re-apply for admission.

## **Certificate Programs**

### **Graduate Certificate in Software Engineering**

This certificate is designed for working professionals, or computer science students beginning careers, in the fields of software engineering and software development. This certificate requires a previous computer science or systems engineering degree. At the start of the

certificate program students are expected to have a strong understanding of software development in terms of software construction, software coding and basic software design.

Students will complete a sequence of three separate graduate-level courses: Software Architecture, Software Project Management Support and Operating Systems or Advanced Computer Architecture.

## **Graduate Certificate in Cyber Security & Defense**

This certificate is designed for working professionals in the field of computer science, network and/or security operations. This certificate will require a previous Computer Science or similar Bachelor Degree. It consists of graduate-level courses in cybersecurity, operating systems, and computer networks or cloud computing. The certificate program in Cyber Security and Defense will prepare Computer Science professionals to identify, analyze, and mitigate technical cybersecurity-related vulnerabilities, exploits and attacks against network and critical cyber infrastructure. The coursework emphasizes practical technical skills, analysis and research focused on current cybersecurity issues.

Students will complete a sequence of four separate graduate-level courses: Cybersecurity Programming and Analysis, Cyber and Infrastructure Defense, and two of the following- Operating Systems, Computer Networks or Cloud Computing.

For up-to-date information, please refer to the current graduate handbook from the CSE department website at [engineering.ucdenver.edu/cse](https://engineering.ucdenver.edu/cse).

# **Counseling MA**

Return to: School of Education & Human Development

- Degree
- Admission Requirements
- Program Requirements

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**E-mail:** [academicservices@ucdenver.edu](mailto:academicservices@ucdenver.edu)

**Website:** <https://education.ucdenver.edu/>

## **Faculty**

Information about faculty in the Counseling program is available online at <https://education.ucdenver.edu/about-us/faculty-directory>

## **Degree**

The Master of Arts degree in Counseling program prepares professionals for community/mental health agencies, private practice, public schools, and institutions of higher education. Students accepted into the Counseling program follow one of the four concentration areas. The clinical mental health counseling track follows state licensure requirements for Licensed Professional Counselor (LPC); the couple and family therapy/counseling track follows state licensure requirements for licensure as a Licensed Marriage and Family Therapist (LMFT) and state licensure requirements for LPC; the school counseling track follows the requirements for both the LPC and Colorado Department of Education license as a school counselor; and the higher education and student affairs track follows the Counsel for the Advancement of Standards in Higher Education standards but does not lead to any counseling license.

The clinical mental health, couple and family therapy, and school counselor tracks consist of 63 semester hours. Core courses that are common to all licensure areas of study are followed by courses specific to concentration area. The clinical mental health, couple and family therapy /counseling, and school counselor tracks require a practicum (150 clock hours) and an internship (600 clock hours). The couple and family therapy/counseling (CFTC) track requires 500 hours of clinical work, 40% of which must be relational (couple and/or family counseling/therapy) clinical hours. The CFTC track does not distinguish between practicum or internship in the collection of these clinical hours. For students in these tracks, the master's degree is a three to three and a half-year program with course work for two-two and a half years followed by a 12-16 months of practicum and internship.

The higher education and student affairs track consists of 39 semester hours. Students in this track are required to complete a 600-hour internship. This master's degree is a two to three year program with course work for one and a half to two years followed by a semester-long internship.

The clinical mental health, couple and family therapy, and school counselor tracks are nationally accredited by CACREP, the Council for the Accreditation of Counseling and Related Educational Programs. The program is currently working on getting the couple and family track accredited by COAMFTE, the Commission on Accreditation for Marriage and Family Therapy Education. The program in higher education and student affairs aligns with the Council for the Accreditation of Standards (CAS).

## **Admission Requirements**

Successful applicants to the Counseling program will have obtained a minimum 2.75 undergraduate GPA. Also, applicants will submit a current resume, a letter of intent, three letters of recommendation, and additional required materials. Applicants meeting these minimum standards may be invited to a half-day group interview that involves program orientation, small group interviews, a writing assignment, and a group exercise.

A prerequisite course in basic statistics (undergraduate or graduate level) is required prior to enrollment in the program or may be completed during the first semester in the program.

Application materials are available at <https://education.ucdenver.edu/academic-services/admissions>. All materials must be submitted online by the appropriate deadline: September 15 for spring semester and January 15 for fall semester.

## **Program Requirements**

Students in the Counseling program are required to maintain at least a B (3.00) grade point average in all coursework attempted while enrolled. Courses in which grades below a B- (2.7) are received may only be counted toward the degree with faculty permission. Students receiving a C or below in any of the clinical skill building courses: COUN 5100, 5110, 5160, 5910, 5930, 6140, or 7100 will be required to repeat the course and follow any remediation plan that may be developed to meet the students' specific needs. Students in clinical mental health, couple and family counseling/therapy, and school counselor tracks must also take a national comprehensive examination, the Counselor Preparation Comprehensive Exam (CPCE), after completing all core courses. Students in the higher education and student affairs track must complete a comprehensive examination in the last semester of study. Students in any track may choose to conduct research and submit a thesis (research conducted under faculty advisement) instead of taking a comprehensive examination.

## **Counseling Core**

COUN 5010 - Counseling Theories  
COUN 5100 - Techniques of Counseling  
COUN 5110 - Group Counseling\*  
COUN 5150 - Family Counseling/Therapy\*  
COUN 5330 - Counseling Issues and Ethics\*  
COUN 5400 - Career Development  
COUN 5810 - Multicultural Counseling Issues for Individuals and Families  
LDFS 6200 - Human Development Over the Life Span  
RSEM 5110 - Introduction to Measurement  
RSEM 5120 - Introduction to Research Methods

CPCE\* to be taken after all Counseling core classes are completed.

\*not required for students in the higher education and student affairs track

**Total: 30 Hours**

## **Additional Requirements for Clinical Mental Health Counseling (MA)**

COUN 5160 - Techniques in Family Therapy  
COUN 5280 - Addictions Counseling  
COUN 5820 - Strategies of Agency Counseling

COUN 6250 - Mental Health Diagnosis  
COUN 7100 - Advanced Theories and Techniques in Psychotherapy  
Two Additional Electives (6 semester hours)  
COUN 5910 - Practicum in COUN  
COUN 5930 - Internship in Counseling

**Total: 33 Hours**

## **Additional Requirements for School Counselor License (MA)\***

COUN 5280 - Addictions Counseling  
COUN 5425 - Developing & Implementing a School Counseling Program: ASCA  
COUN 5815 - Introduction to School Counseling  
COUN 5915 - Practicum in School Counseling  
COUN 6140 - Counseling Children, Adolescents and Their Parents  
COUN 6230 - Developmental Counseling in Schools: Prevention & Intervention  
COUN 6250 - Mental Health Diagnosis  
COUN 5910 - Practicum in COUN  
COUN 5930 - Internship in Counseling

The Professional School Counselor Praxis exam (5421) is required for the Colorado Department of Education license for school counselors.

**Total: 33 Hours**

\*100-hour practicum is required in the schools (COUN 5915). Three hundred of the 600 hours of internship must be in a concentrated environment. Full-time experience consisting of at least a four-hour block of time each day is required. Students may not do their internship in their primary employment (agency or school setting). For school counseling, three hundred (300) hours of internship are needed at the middle and secondary level for a K-12 program. COUN 5150, 6140 and 7100 are necessary for students to work with school-related family issues, individual counseling and children's counseling in practicum and internship.

## **Additional Requirements for Couple and Family Therapy (MA)**

COUN 5160 - Techniques in Family Therapy  
COUN 6170 - Issues In Family Studies  
COUN 5180 - Counseling Couples  
COUN 6000 - Introduction to Sex Therapy  
COUN 6140 - Counseling Children, Adolescents and Their Parents  
COUN 6160 - Advanced Assessment: Theory and Treatment in Family Systems  
COUN 6250 - Mental Health Diagnosis  
COUN 5910 - Practicum in COUN  
COUN 5930 - Internship in Counseling

**Total: 33 Hours**

## **Additional Requirements for Higher Education and Student Affairs\***

COUN 5050 - Foundations of Student Affairs

COUN 5500 - Diversity in Higher Education

COUN 5130 - Student Development Theory

HDFR 5003 - Leadership and Organizations

COUN 5070 - Higher Education Law and Ethics

COUN 5940 - Internship in Higher Education and Student Affairs

Comprehensive Exam

**Total: 21 Hours**

\*Students who have completed higher education and student affairs courses as part of the Human Development and Family Relations undergraduate major or minor at CU Denver, will be allowed to use these courses to satisfy program requirements; but, they will not receive graduate credit for these courses. As such, these students will be required to take elective courses to reach the 39 credit hour requirement.

# **Criminal Justice, MCJ**

## **Introduction**

►Graduate School Policies and Procedures apply to this program

The Master of Criminal Justice (MCJ) program is designed for students interested in comprehensive professional graduate education in criminology and criminal justice. It is intended to provide an in-depth understanding of existing structures, practices, and challenges within this field of study.

Part of an academic and professional field of study, the MCJ program prepares students to administer, analyze, evaluate, and facilitate improvements in the rationality and responsiveness of the criminal and juvenile justice systems. Research design capability is emphasized alongside skills required for analyzing empirical data and innovating in crime control and prevention. Students who advance through the program acquire strategies and skills necessary for promoting individual, organizational, and social change.

To learn more about our renowned faculty, please visit our website to view our faculty bios.

**Program Director:** Lorine Hughes, PhD

## **Program Delivery**

- Courses are offered on campus, online, and in hybrid formats.

## Program Requirements

- Students must successfully complete 36 credit hours of approved coursework.
  - Of these 36 credit hours, students must complete a minimum of 27 credits hours of coursework within Criminal Justice (CRJU).
- Students must maintain at least a 3.00 cumulative GPA in this program.
- Students must earn at least a B- in all coursework to be accepted for graduate credit towards the degree.
- No more than 6 credit hours of Independent Study may be applied toward the degree.
- This program must be completed within 7 years.

Students must complete the following **five** required core courses:

- CRJU 5001 - Criminal Justice Systems, Policies, and Practice
- CRJU 5002 - Criminological Theory
- CRJU 5003 - Research Methods
- CRJU 5004 - Statistics for Criminal Justice
- CRJU 5005 - Law & Society

Students must complete **six** elective courses, from a pre-approved list and/or with approval from the program director.

Internship: Students who have not had one year of criminal justice experience following the awarding of their bachelor's degree will be required to complete CRJU 6910, Internship. A minimum of 240 hours of supervised work is required in order to earn 3 hours of credit. The internship requirement may only be waived with the permission of the MCJ Program Director. If required, the internship will count for 1 of the 6 elective courses. Students must complete 18 credit hours of MCJ coursework with at least a 3.00 cumulative GPA prior to enrolling in the internship course.

- CRJU 6910 - Internship in Criminal Justice

Students must complete **one** of the following:

- CRJU 5361 - Capstone Seminar (during the final semester)
- CRJU 6950 - Master's Thesis (taken for 3 or 6 credits with approval by and in consultation with the program director prior to enrolling in the course)

## Optional Concentrations

Students may select one of the concentrations below or complete the MCJ without a specified concentration. Students completing a concentration take their electives in the area of their concentration, complete the advanced seminar project in the area of their concentration and are advised by faculty from the concentration.

### Crime Analysis Concentration

The Crime Analysis concentration coursework emphasizes criminal justice and criminology related subjects; however, the analytic skills learned in this concentration are not industry-specific and easily can be transferred to non-criminal justice and criminology related fields.

### Required Coursework

The concentration in Crime Analysis requires a total of 15 credit hours. All students will complete the five required courses below:

- CRJU 5003 - Research Methods
- CRJU 5004 - Statistics for Criminal Justice
- CRJU 5325 - Qualitative Methods for Criminal Justice
- CRJU 5331 - Crime Analysis and GIS
- CRJU 5015 - Intelligence Writing and Briefing

**Total: 15 Hours**

### Disaster, Hazards and Emergency Management Concentration

The concentration in Disasters, Hazards and Emergency Management (DHEM) provides advanced education in the management of emergencies, hazards, disasters and community resilience. DHEM is designed for students who work or will work in the field of natural and man-made hazards, community resilience and emergency management.

### Required Coursework

The DHEM concentration requires a total of 12 credit hours.

Students must complete the following course:

- CRJU 5720 - Public Policies for Hazards and Disasters

Students must complete at least **one** of the courses below:

- CRJU 5650 - Public Service in Emergency Management and Homeland Security
- CRJU 5655 - Principles of Emergency Management

- URPL 6645 - Disaster/ClimateChangePlanning

Students must complete **two** pre-approved elective courses. For a list of pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## **Emergency Management and Homeland Security Concentration**

The concentration in Emergency Management and Homeland Security (EMHS) provides advanced education in the management of emergencies, hazards, disasters and homeland security. The EMHS program is designed to meet the needs of students who wish to work, or are currently working, in the field of emergency management and homeland security.

The EMHS program is also offered as a stand-alone Emergency Management and Homeland Security (EMHS), Graduate Certificate program.

### **Required Coursework**

The EMHS concentration requires a total of 12 credit hours.

Students must complete the following course:

- CRJU 5650 - Public Service in Emergency Management and Homeland Security

Students must complete at least **one** of the courses below:

- CRJU 5655 - Principles of Emergency Management
- CRJU 5720 - Public Policies for Hazards and Disasters
- URPL 6645 - Disaster/ClimateChangePlanning

Students must complete **two** pre-approved elective courses. For a list pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## **Gender-Based Violence Concentration**

The concentration in Gender-Based Violence (GBV) focuses on the management and policies surrounding gender-based violence, as well as grass-roots social justice work and best practices in this emerging field. Each fall, 10 to 20 students are accepted into the GBV cohort, allowing the participants to build a strong community of advocates and learners.

This program combines online courses with four intensive campus seminars spaced throughout the two-year program. Nonresident students pursuing the MPA with a concentration in Gender-

Based Violence may also qualify for reduced tuition through the Western Regional Graduate Program which covers 14 western states.

The Gender-Based Violence program is also offered as a stand-alone Gender-Based Violence (GBV) Graduate Certificate program.

## **Required Coursework**

The concentration in GBV requires a total of 12 credit hours. All students will complete the four required courses below.

- CRJU 5910 - Nature and Scope of Interpersonal Violence
- CRJU 5920 - The Psychology of Interpersonal Violence
- CRJU 5930 - Interpersonal Violence Law and Public Policy
- CRJU 5940 - Interpersonal Violence Leadership, Advocacy, and Social Change

**Total: 12 Hours**

## **Nonprofit Management Concentration**

The concentration in Nonprofit Management prepares students to become innovative and critical thinkers in the areas of nonprofit organizational management and public policy, with a unique approach that bridges theoretical knowledge with real-world experience. As students prepare for their careers or advancement in their current positions, they gain insight into the interdependence between the nonprofit, public, and for-profit sectors. Graduates are able to span the boundaries of these three sectors to assess community needs, navigate the realm of public policy, and strategically and effectively manage organizations that ultimately benefit society.

SPA's affiliation with the Nonprofit Leadership Alliance gives students the opportunity to earn the Certified Nonprofit Professional (CNP) credential through completion of the Nonprofit Management concentration coursework, additional required extracurricular activities, and an examination. Contact [cnp@ucdenver.edu](mailto:cnp@ucdenver.edu) for more information about this credential.

The Nonprofit Management program is also offered as a stand-alone Nonprofit Management Graduate Certificate program.

## **Required Coursework**

The Nonprofit Management concentration requires a total of 12 credit hours. Of these 12 credits, all students will complete the required course below as well as three pre-approved electives. For a list of pre-approved electives, please consult your Academic Advisor.

- CRJU 5010 - Seminar Nonprofit Management

**Total: 12 Hours**

# Critical Pedagogy MA

## Program Plan

### Core Courses (12 credits)

- UEDU 5660 - History of Schooling in the United States
- UEDU 5240 - Culture of Education Policy
- UEDU 5070 - Curriculum Theories in Urban Education
- RSEM 5080 - Research In Schools

### Focus Area/Elective Courses (9 credits)

Elective courses are grouped in the following areas:

- Pedagogy for 21<sup>st</sup> Century Learners,
- Teaching for Cultural and Linguistic Diversity
- Math

Students will complete 3 courses from any of these.

### Alternative Licensure Core\* (9 credits)

- EDFN 5010 - Social Foundations and Cultural Diversity in Urban Education
- UEDU 5040 - Planning for Learning
- UEDU 5934 - Extended Internship & Learning Community

### Total Credit Hours 30

\*Students who successfully complete the ASPIRE to Teach alternative licensure program qualify for the 9 credits in the Alternative Licensure Core. All other students are required to take an additional 9.0 elective/focus area credits.

### Cumulative Portfolio

The MA portfolio counts as the comprehensive exam for the master's degree. The portfolio is an accumulation of the performance-based assessment completed during the courses and reflects on the student's development over the degree program.

### Program Requirements and Courses

To complete the Curriculum & Instruction program and earn a master's degree, students must complete the appropriate course work as outlined in the table above. All courses require a grade of B- or better to count towards the MA and a minimum 3.0 GPA is required for graduation.

# Early Childhood Education MA

## Early Childhood Education Program

The Early Childhood Education (ECE) program leads to a master's degree in early childhood education and/or Colorado teacher license/endorsement in early childhood special education (ECSE) specialist. The program prepares leaders who will enrich the life experience of young children (ages birth to 8 years) and their families through a variety of professional roles.

The ECE program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. Our program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. The program draws on university resources and the clinical expertise of various professionals and early childhood partners in the community. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Fieldwork experiences are designed for students to apply knowledge and practice skills in a closely supervised learning environment.

## Curriculum and Program Requirements

### Semester Hour Requirements

Personalized Professional Master's degree in ECE: 30 semester hours

This program allows candidates to work closely with faculty advisors in specific course selection that is most relevant for them and their desired professional path, including courses outside the ECE program area.

The early childhood education program provides potential preparation in:

- language and literacy development,
- child growth and development,
- teaching and learning approaches with young children,
- learning, development and education grounded in culture, context, and identity of young children,
- research methods for education,
- early childhood curriculum and program development for culturally and linguistically diverse inclusive classrooms,
- collaborative program development and supports for children with families and communities,

- leadership of programs and early childhood professionals for practice, advocacy and social change,
- screening and assessment of young children,
- inclusive intervention strategies with infants, preschoolers, and primary aged children,
- social emotional competence and classroom support including for children with severe and persistent challenging behavior,
- working as a participatory member of a transdisciplinary team,
- learning and development of children from diverse sociocultural backgrounds and abilities,
- inclusive services for children diagnosed with low incidence disabilities including autism, developmental delay and chronic illness

Coursework and plans of study are available at <https://education.ucdenver.edu/academic-services/student-resources/graduate/early-childhood-education>

## Capstone Requirement

The Early Childhood Education Capstone fulfills the COMPS requirement for MA students. The intent of the Capstone is to help candidates synthesize learning through a final project that speaks to academic and professional development in the ECE Program. The capstone should tell the story of what was learned, specific areas of interest, address ongoing barriers experienced in the field, and future professional plans. All ECE MA completers must do a Capstone project, and register for the 3 credit Capstone class.

### Program Requirements and Courses

To complete the Early Childhood Education program and earn a master's degree and/or license/endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### Course Scheduling

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

### Planning

For practicing full-time teachers, we recommend taking two courses each fall and spring semester, and up to two courses each summer. If you prefer a less intensive course load, we recommend one course each fall and spring semester. Please review with your faculty advisor your preferred plan.

### Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# Economics MA

► Graduate School Policies and Procedures apply to this program

**Graduate Advisors:** Brian Duncan and Hani Mansour

The MA program in economics is designed to train students in the quantitative and applied economic skills that will best enhance their future employment opportunities in the private and public sectors, or their pursuit of PhD studies in economics or related fields.

Our MA program emphasizes extensive training in mathematical and quantitative analysis, including the provision of substantial exposure to applied econometrics, working with large and diverse data sets, and a wide range of statistical software. The program gives students the applied skills that employers demand, provides those pursuing advanced degrees an edge in gaining admission to top-flight PhD programs-and enhances the likelihood of the student's ultimate success.

## Admission Requirements

- Meet all general admission requirements of the Graduate School (including a 2.50 undergraduate grade-point average).
- Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an additional academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).
- Submit official transcripts from all colleges attended.
- Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and intermediate macroeconomic theory (upper division courses).
- Have completed courses in calculus and statistics (preferably a year of calculus and a course in econometrics or similar upper division statistics course. A course in linear algebra and/or differential equations is recommended).
- Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. Most students admitted to the MA program in economics score 154 or above (690 or above using the prior test scale) on the quantitative section of the GRE. However, this is not a minimum GRE cutoff score, nor is it a score above which

admission is guaranteed. GRE scores are used in conjunction with other indicators of academic success at the Master's level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.

- International students must submit TOEFL scores. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), or 6.5 (IELTS). The institution code for CU Denver is 4875. The minimum TOEFL scores are a requirement of the Graduate School and cannot be waived by the department of economics. The Graduate School may waive the TOEFL requirement for applicants who have attended a college or university in the United States as a full-time student and have completed two semesters of academic work with a "B" average (3.0 GPA or higher). Please contact the International Admissions office if you have questions about this requirement.

### **Application Deadlines:**

**Fall - June 1**

**Spring - December 1**

The Department of Economics accepts late applications after these official deadlines. However, there is no guarantee that a late application will be processed in time for the start of the semester. Students are encouraged to apply well in advance the application deadline.

International students who apply after the June 1 or December 1 deadline may not have time to obtain a student visa. Being admitted to the MA program in economics does not guarantee that a student will receive a student visa in time for the start of the semester. International students who are admitted to the MA program, but fail to obtain a visa in time, may defer admission for up to one year. All questions about student visas should be directed to the Office of International Admissions.

## **Degree Requirements**

1. Students must complete a minimum of 30 credit hours of coursework, of which 21 hours are core requirements. Each student's plan will be worked out in conjunction with the graduate advisor. Students are expected to meet all course prerequisites.
2. Students must complete a minimum of 30 graduate (5000 and above) level credit hours.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail. No course may be taken more than twice and only one attempt will retain the credit.
4. Students must complete all credits for the degree with CU Denver faculty.

## Core Courses

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics **or** ECON 6054 - Seminar In Applied Economics II
- ECON 6073 - Research Seminar

**Total: 21 Credits**

## Electives

Three courses numbered 5000 or higher with an ECON subject code. After completing 6 credit hours of ECON 6053/6054 as part of the economics core, additional ECON 6053/6054 courses may be counted as electives.

**Total: 9 Credits**

**Degree Total: 30 Credits**

## Electrical Engineering MEng

A minimum of 30 credit semester hour of academic work acceptable to the Advisory Committee (within the rules established by the College of Engineering, Design and Computing) will be required for the Master of Engineering degree. In compliance with the Graduate School rules, the minimum grade required for a unit to count toward the 30 semester hours is a B minus (2.7). To couple this degree with electrical engineering, at least 15 of these hours must be 5000-level or above in electrical engineering courses, and must be taken in the CU Denver Department of Electrical Engineering. As many as 15 hours can be taken outside of electrical engineering, including 3 credit hours for the master of engineering project. The project should cover some area of creative investigation performed by the student and may relate directly to his/her professional work. The project must be defended orally before the Advisory Committee.

The student who wishes to enter the master of engineering program should apply to the electrical engineering department in the same manner as a master of science applicant.

## Electrical Engineering MS

To fulfill the requirements for the master of science in electrical engineering (MSEE), the Electrical Engineering Department at CU Denver requires that within a seven-year period, the candidate completes an approved program in one of two options: (a) a **thesis option** consisting of at least 30 semester hours, including 6 credit hours of MS thesis, or (b) a **course-only option** consisting of at least 30 semester hours. It is also required the MSEE candidate maintain a grade point average of 3.0 or higher. In compliance with the Graduate School rules, the *minimum* grade required for a unit to count toward the required semester hours is B minus (2.7).

For both thesis and course-only master of science in electrical engineering options, the student must select a primary area of concentration and a secondary area of concentration, among the six areas listed below. The areas should be chosen with the student's graduate advisor. The student must take at least four 3-hour graduate courses (12 credit hours) in his/her primary area of concentration, and at least two 3-hour graduate courses (6 credit hours) in his/her secondary area. All of these courses must be taken through the CU Denver EE Department. The remaining courses may be taken from any area of concentration. A student may also take one 3-credit independent study course with a graduate faculty member of the CU Denver EE department. At least 21 graduate credit hours must be taken from the CU Denver EE Department. At the discretion of the EE graduate committee, a maximum of nine graduate credits may be transferred from other programs.

The CU Denver EE Department offers six areas of concentration at the master's level:

1. Communications and Signal Processing
2. Computer Engineering and Embedded System Design
3. Controls and Signal Processing
4. Electromagnetic Fields, Waves and Optics
5. Energy and Power Systems
6. Microelectronics and VLSI

## English MA

► Graduate School Policies and Procedures apply to this program

**Program Director:** Nancy Ciccone

**Telephone:** 303-315-7833

**E-mail:** nancy.ciccone@ucdenver.edu

The department offers an English MA degree focused around five core courses with specializations available in literature, rhetoric and the teaching of writing, and applied linguistics.

Contact the graduate program director for more information on these programs.

## Requirements for Admission

The deadline for summer or fall admission is April 1; the deadline for spring is October 1. Complete applications must include the following:

- A completed University of Colorado graduate application
- One copy of all graduate and undergraduate transcripts, and for any nondegree courses previously taken
- Three letters of recommendation in which the recommender specifically addresses the candidate's ability to pursue successfully the program chosen
- Graduate Record Exam scores are optional. You may provide them if you wish, but they are no longer required.
- Evidence of a 3.0 GPA in previous courses
- A one-page statement of purpose
- 10-page critical writing sample

In addition to these requirements, applicants for the program must have successfully completed 24 semester hours in English courses (graduate or undergraduate), excluding courses in composition, creative writing or speech. At least 15 of these semester hours must be at the upper-division level.

## Transfer of Credits from Other CU Campuses

Students admitted to graduate study in English may complete all of their course requirements for the MA degree at CU Denver. Up to 9 semester hours (total) may be transferred from the University of Colorado Boulder, University of Colorado Colorado Springs or other graduate programs; however, such transfer requires the written approval of the graduate advisor. Only 9 semester hours of courses taken at CU Denver before acceptance into the program can be counted toward the degree. Further, work already applied toward a graduate degree received at the University of Colorado or at another institution cannot be transferred toward another graduate degree of the same level at CU Denver. (For other rules concerning transfer of graduate credits, see the Graduate School Policies and Procedures) For more information, contact the graduate program director at 303-315-7847.

## Degree Requirements

### GENERAL REQUIREMENTS

- Satisfactory completion of all required course work
- Demonstrated fourth-semester proficiency in a foreign language. Old English or Latin will also satisfy this requirement
- Compliance with all graduate school policies and requirements

## **COURSE REQUIREMENTS (30 SEMESTER HOURS MINIMUM)**

1. Students must complete a minimum of 30 ENGL credit hours.
2. Students must complete all courses at the graduate (5000 and above) level.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 21 ENGL credits with CU Denver faculty,
5. All courses are 3 credit hours unless otherwise noted.
6. All courses must be completed in the ENGL subject code.

## **REQUIRED COURSES**

- ENGL 5100 - Introduction to Graduate Studies
- ENGL 5135 - English Language Study
- ENGL 5145 - Theory (*Literary and Rhetorical Theory*)
- ENGL 5155 - Genres of Writing
- ENGL 5165 - Literacy and Technology

**Total: 15 Hours**

## **AREA REQUIREMENTS**

Students may choose to concentrate 12 hours of English graduate courses in a particular area of study that meets the student's goals in the program.

**Total: 12 Hours**

## **THESIS OR PORTFOLIO OPTIONS**

- ENGL 6950 - Master's Thesis

*Students must consult with and submit a proposal to the graduate committee for approval. (4-6 credit hours)*

**OR take**

- ENGL 6970 - Portfolio Exam  
(3 hours)

**Total: 3-6 Hours**

## **Additional Information**

**Candidate for Degree:** Graduate students must be registered for at least one credit hour during the semester that they graduate. Those who have completed all required courses and requirements may register for Candidate for Degree: CAND 5940 section 900.

**Teaching Assistantships:** Graduate students who receive a teaching assistantship must take ENGL 5913 - Practicum in Language and Rhetoric in the fall during their first semester as a teaching assistant. ENGL 5913 may also be counted as an elective.

**Independent Study:** Graduate students may only count 6 credit hours of Independent Study toward the English MA degree.

# **Environmental Sciences MS**

► Graduate School Policies and Procedures apply to this program

**Program Director:** Gregory Simon

**Office:** North Classroom

**Fax:** 303-315-7526

**E-mail:** gregory.simon@ucdenver.edu

**Web site:** MS in Environmental Sciences website

## **Core Faculty of the M.S. in Environmental Sciences Program**

### **Professors:**

Anne Chin, Geography and Environmental Science

Pamela Jansma, Geography and Environmental Science

### **Associate Professors:**

Peter Anthamatten, Geography and Environmental Science

Frederick B. Chambers, Geography and Environmental Science

Rafael Moreno-Sanchez, Geography and Environmental Science

Brian Page, Geography and Environmental Science

Gregory Simon, Geography and Environmental Science

Brian S. Wee, Geography and Environmental Science

### **Assistant Professors:**

Christy Briles, Geography and Environmental Science

Benjamin Crawford, Geography and Environmental Science

Katharine Kelsey, Geography and Environmental Science

**Senior Instructors:**

Thomas Duster, Geography and Environmental Science  
Amanda Weaver, Geography and Environmental Science

**Instructors:**

Kirsten Christensen, Geography and Environmental Science  
Matthew Cross, Geography and Environmental Science

**Lecturers:**

Richard DeGrandchamp, Geography and Environmental Science

## **Faculty Affiliates to the M.S. in Environmental Sciences Program**

**Professors:**

N. Y. Chang, Civil Engineering  
Diana F. Tomback, Integrative Biology

**Associate Professors:**

Leo P. Bruederle, Integrative Biology  
Greg Cronin, Integrative Biology  
Michael J. Green, Integrative Biology  
Timberly M. Roane, Integrative Biology  
Michael Wunder, Integrative Biology

**Assistant Professors:**

Annika Mosier, Integrative Biology  
Alan Vajda, Integrative Biology

Environmental Sciences is a multidisciplinary study of the natural/physical environment. Academic fields involved in environmental sciences include chemistry, biology and ecology, physics, geology, geography, anthropology, engineering, political science, law, economics and the health sciences. Students planning to pursue the MS in Environmental Sciences must either have earned a bachelor's degree or have taken significant course work in the natural/physical sciences or engineering and completed several other prerequisites (see the following graduate information).

Environmental careers encompass a broad range of professions, from those with a strong foundation in the natural/physical sciences or engineering to those based in the social sciences and/or humanities. Students interested in environmental issues and careers should investigate the whole field before deciding which path to follow. At CU Denver, the MS in Environmental Sciences emphasizes the natural/physical sciences and engineering with the addition of the social sciences and humanities.

The MS in Environmental Sciences degree is designed to provide training in engineering, natural/physical sciences and social sciences. The goals of the program are (1) to enhance the

interdisciplinary communication and analytical skills of the student, and (2) to provide a multidisciplinary approach for more intensive study of a particular environmental issue. Students will receive instruction in the physical and biological dynamics of various ecosystems, environmental engineering and socioeconomic issues associated with environmental analysis.

Graduates of the MS in Environmental Sciences program are involved in many different areas, such as reviewing environmental impact statements, monitoring groundwater quality and communicating with the public. Many students have found employment in various agencies (U.S. Environmental Protection Agency, U.S. Geological Survey, Colorado State Department of Public Health and Environment) and private-sector environmental and engineering firms.

## Requirements for Admission

The program is for students who either have baccalaureate degrees or have a significant background in one of the natural/physical sciences or engineering. In addition, minimum undergraduate science and math requirements are:

- one semester of calculus and one semester of upper-division statistics (*if applicant is missing the statistics course, he/she can be admitted but must take ENV5 5600, Applied Statistics, or an approved statistics course as an elective before receiving the MS in Environmental Sciences degree*)
- either two semesters of general chemistry with lab or two semesters of general biology with lab
- one semester of physics

If only two semesters of the prerequisite courses are lacking, students may be admitted, but must take them in the first year in the program. Applicants who have fulfilled all prerequisites have a better chance of acceptance. Applicants may be required to take additional prerequisite courses (necessary for completing particular core or elective courses). The prerequisite courses will not count toward the MS in environmental sciences degree. As part of the admission review process, applicants are required to submit a graduate application, a minimum of three letters of recommendation and transcripts from all institutions previously attended. CU Denver has a minimum requirement of a 3.0 undergraduate GPA for applicants to the Graduate School. The program admits new students for the fall semester only, and the number of students admitted to the program depends, in part, on space availability. **Applicants must submit all materials by the February 1st deadline.**

## Financial Aid

There are three types of financial aid available: student hourly teaching assistantship; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available

aid and positions. All other aid should be requested through the CU Denver Financial Aid Office, Student Commons Building 5th floor, Campus Box 125, P.O. Box 173364, Denver, CO 80217-3364. Telephone: 303-315-1850.

## Internships

Students in the MS in Environmental Sciences program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to environmental sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

## Program Requirements

The MS in Environmental Sciences is a 39-hour program that provides students with two alternate plans: Plan I requires a thesis, while Plan II is a non-thesis program. General requirements for the program include a set of core courses (9-12 semester hours) and elective courses (24-27 semester hours minimum). Students choosing to complete the thesis option must also complete 3 hours of thesis credit, while those choosing the non-thesis option must complete 3 hours of additional elective coursework.

The degree is offered through the College of Liberal Arts and Sciences with the cooperation of the College of Engineering, Design and Computing. In addition, some courses offered by the College of Architecture and Planning, the School of Public Affairs and the Business School are relevant and applicable to the program.

## Thesis Option

Take **all** of the following:

- ENVS 6002 - Research Topics in Environmental Sciences (3 hours)
- ENVS 6100 - Research Topics in Environmental Management (3 hours)

**OR**

- GEOG 6750 - Research Design (3 hours)
- ENVS 6800 - Community-Based Research Practicum (3 hours)

Take 24 hours of elective courses

- GEOG 6950 - Master's Thesis (3 hours)

36 hours of coursework and 3 thesis hours

## Non-thesis Option

Take **all** of the following:

- GEOG 5440 - Science, Policy and the Environment
- OR**
- ENVS 6100 - Research Topics in Environmental Management (3 hours)
  - ENVS 6002 - Research Topics in Environmental Sciences (3 hours)
  - ENVS 6800 - Community-Based Research Practicum (3 hours)

Take 30 hours of elective courses

39 hours of coursework

## Elective Courses

(See the MS in Environmental Sciences website for a complete list of elective courses for the MS in Environmental Sciences program.)

Students, with the coordinator and/or an advisor, will complete a program plan that will include 24-30 semester hours of elective requirements that will meet their interests. Students may choose to use four of the electives to fulfill one of the following options offered in environmental sciences: air quality, ecosystems, environmental health, environmental science education, geospatial analysis, hazardous waste or water quality. Students must have the prerequisites for each course and must meet the requirements listed in the notes below. Contact the option advisor for the particular option of interest before starting. Upon graduation, the option will be noted on the student's transcript.

**Following are the requirements for each environmental sciences option:**

### **AIR QUALITY OPTION**

**Option Advisor:** Frederick Chambers

**E-mail:** Frederick.Chambers@ucdenver.edu

### **Required Courses**

- CHEM 5710 - Air Pollution Chemistry
- ENVS 5730 - Air Quality Modeling and Analysis

**Total: 6 Hours**

## **Electives**

Choose two:

- CHEM 5720 - Atmospheric Sampling and Analysis
- CVEN 5800 - Special Topics  
(when Air Pollution Control is the topic)
- URPL 6800 - Special Topics: Urban and Regional Planning  
(when Air Quality Planning and Policy is the topic)

**Total: 6 Hours**

**Option Total: 12 Hours**

## **ECOSYSTEMS OPTION\***

**Option Advisor:** Christy Briles

**E-mail:** Christy.Briles@ucdenver.edu

## **Required Courses**

- BIOL 5415 - Microbial Ecology
- ENVS 5010 - Landscape Biogeochemistry

**Total: 6 Hours**

## **Electives**

Choose two:

- ENVS 5731 - Mountain Biogeography
- ENVS 6220 - Toxicology (see Note 2)
- BIOL 5050 - Advanced Biology Topics  
(when Seminar in Aquatic Ecology is the topic)
- BIOL 5154 - Conservation Biology
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing

**Total: 6 Hours**

**Option Total: 12 Hours**

\* BIOL 5445, Applied Environmental Biology, is required as a prerequisite for the ecosystems option.

## **ENVIRONMENTAL HEALTH OPTION\***

**Option Advisor:** Peter Anthamatten

**E-mail:** Peter.Anthamatten@ucdenver.edu

### **Required Courses**

- ENVS 6220 - Toxicology (See Note 2)  
(fall, even years)
- ENVS 6230 - Environmental Epidemiology  
(spring, even years)

**Total: 6 Hours**

### **Electives**

Choose two:

- ENVS 5500 - Topics in Environmental Sciences (when Ecological Risk Assessment is the topic)  
(See Note 2)
- ENVS 6210 - Human Health and Environmental Pollution  
(spring, odd years)
- GEOG 5710 - Disasters, Climate Change, and Health

**Total: 6 Hours**

**Option Total: 12 Hours**

\* ENVS 6200, Risk Assessment, is required as a prerequisite for the environmental health option.

## **ENVIRONMENTAL SCIENCE EDUCATION OPTION**

**Option Advisor:** Bryan Wee

**E-mail:** bryan.wee@ucdenver.edu

### **Required Courses**

- ENVS 5340 - Equity & Culture in Science Education: Local/Global
- ENVS 5650 - Environmental Education

**Total: 6 Hours**

## **Electives**

Choose two:

- ANTH 5170 - Culture and the Environment
- BIOL 5154 - Conservation Biology
- COMM 5282 - Environmental Communication
- ENVS 5020 - Earth Environments and Human Impacts
- ENVS 5470 - Sustainable Urban Agriculture Field Study II
- GEOG 5265 - Sustainability in Resources Management
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5440 - Science, Policy and the Environment

**Total: 6 Hours**

**Option Total: 12 Hours**

## **GEOSPATIAL ANALYSIS OPTION\***

**Option Advisor:** Rafael Moreno

**E-mail:** Rafael.Moreno@ucdenver.edu

## **Required Courses**

- GEOG 5080 - Introduction to GIS
- GEOG 5090 - Environmental Modeling with Geographic Information Systems

**Total: 6 Hours**

## **Electives**

Choose two:

- GEOG 5050 - Applied Spatial Statistics
- GEOG 5086 - FOSS4G Systems Integration
- GEOG 5091 - Open Source Software for Geospatial Applications
- GEOG 5092 - GIS Programming and Automation

- CVEN 5382 - Geospatial Data Development
- CVEN 5385 - GIS Relational Database Systems

**Total: 6 Hours**

**Option Total: 12 Hours**

\* GEOG 3080, Introduction to Mapping and Map Analysis, is required as a prerequisite of the geospatial analysis option.

## **SUSTAINABLE URBAN AGRICULTURE OPTION**

**Option Advisor:** Amanda Weaver

**E-mail:** [amanda.weaver@ucdenver.edu](mailto:amanda.weaver@ucdenver.edu)

### **Required Courses**

- ENVS 5450 - Urban Food and Agriculture: Perspectives and Research
- ENVS 5460 - Sustainable Urban Agriculture Field Study I

**Total: 6 Hours**

### **Electives**

Choose two:

- ENVS 5340 - Equity & Culture in Science Education: Local/Global
- ENVS 5470 - Sustainable Urban Agriculture Field Study II
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5235 - GIS Applications in the Health Sciences
- GEOG 5640 - Urban Geography: Denver and the U.S.
- GEOG 5680 - Urban Sustainability: Perspectives and Practice

**Total: 6 Hours**

**Option Total: 12 Hours**

## **WATER SYSTEMS OPTION\***

**Option Advisor:** Anne Chin

**E-mail:** [anne.chin@ucdenver.edu](mailto:anne.chin@ucdenver.edu)

## Required Courses

- ENVS 5280 - Environmental Hydrology  
and
- CVEN 5334 - Groundwater Hydrology OR
- CVEN 5335 - Vadose Zone Hydrology

**Total: 6 Hours**

## Electives

Choose two:

- BIOL 5416 - Aquatic Ecology
- ENVS 5410 - Aquatic Chemistry
- CVEN 5333 - Surface Water Hydrology
- CVEN 5336 - Urban Runoff Quality and Quantity Modeling
- CVEN 5393 - Water Resources Development and Management

**Total: 6 Hours**

## Option Total: 12 Hours

\*CHEM 5700, Environmental Chemistry, or appropriate chemistry background is required as a prerequisite of the water quality option.

## Notes:

1. Many of the elective courses have prerequisites; student must have met these requirements in order to take the course.
2. One course may not be used for more than one option, even if it is listed in several options. Other courses may be offered that will be acceptable as electives with approval of the option advisor and the director of the program.
3. Courses applied to either a certificate\* or an MS degree may later be applied toward the other if all pertinent coursework is completed within a five year time period.
4. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
5. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis

option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.

6. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
7. Students may transfer up to 9 hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses
8. Students may count up to 6-credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
9. Students may count up to 6-credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)
10. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.
11. Students may take a maximum of 2 online courses, or petition to the GES Graduate Committee beyond two.
12. Students may enroll in thesis preparation and writing hours only after submission of signed committee form, which requires approval of the thesis proposal.
13. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.
14. Students must follow the graduate school deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.
15. Work submitted for the environmental sciences options must have a grade of *B* (3.0) or better.

\* The Geospatial, Environmental Education, and Urban Agriculture options of the program lead towards independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the Geographic Information Science Graduate Certificate , Sustainable Urban Agriculture Graduate Certificate, and Environmental Science Education Graduate Certificate descriptions.)

## **Executive MBA in Health Administration**

### **Distinctive Features of the Executive Program in Health Administration**

1. Drawing on the expertise represented by the faculties of a consortium of western universities, the program offers high-quality courses taught by instructors that are typically not available from a single university.
2. The executive program facilitates learning for professionals who have continuing career and family responsibilities. The program is especially tailored for working individuals, allowing students to remain on their jobs while completing their educational program.
3. The program employs innovation in the technology of educational delivery. Learning methods include:
  - computer-assisted instruction and self-paced learning packages
  - computer conferencing and electronic case analyses
  - on-campus sessions

**For application and additional information, contact:**

Executive Program in Health Administration  
The Business School  
University of Colorado Denver  
1475 Lawrence Street  
Denver, CO 80202

## Finance and Risk Management MS

**Program Director:** Jian Yang  
**Email:** [Jian.Yang@ucdenver.edu](mailto:Jian.Yang@ucdenver.edu)  
**Telephone:** 303.315.8423

The master of science in finance and risk management provides the necessary depth and specialized expertise to meet the needs of businesses for financial managers, investment analysts and other finance specialists.

The program emphasizes a familiarity with the institutions in our financial system, an understanding of financial markets and instruments, and the analytical skills and tools necessary to make informed decisions about investment and financing.

The program is suited to students from a wide variety of undergraduate backgrounds and is particularly appropriate to students with strong technical and analytical backgrounds. Admission standards for the MS finance and risk management program are unique to the program. Therefore, admission to other graduate business programs does not guarantee admission into the MS finance and risk management program.

The MS in finance and risk management offers flexibility with on-campus and online courses. The MS finance and risk management degree requirements are met by the following courses and options:

## **Prerequisites**

Prerequisites: BUSN 6550, Analyzing and Interpreting Accounting Information, or the equivalent of a financial accounting course taken within the last ten years with a "B-" grade or higher. Students are also expected to be knowledgeable in spreadsheet software.

## **Finance and Risk Management Core: (18 hours)**

- FNCE 6290 - Quantitative Methods for Finance
- BUSN 6620 - Applied Economics for Managers
- BUSN 6640 - Financial Management
- FNCE 6300 - Macroeconomics and Financial Markets
- FNCE 6330 - Investment Management Analysis
- FNCE 6382 - Survey of Financial Derivatives

## **Specializations: (12 hours)**

Students must complete one of the following specializations:

### **Commodities Specialization**

Required Courses:

- CMDT 6582 - Commodity Supply Chain Management
- CMDT 6682 - Commodity Valuation and Investment
- CMDT 6802 - Foundations of Commodities

Complete one of the following courses:

- CMDT 6782 - Commodity Data Analysis
- ECON 5823 - Econometrics II
- FNCE 6360 - Management of Financial Institutions
- FNCE 6370 - International Financial Management
- FNCE 6460 - Emerging Market Finance
- FNCE 6480 - Financial Modeling
- MATH 5792 - Probabilistic Modeling
- RISK 6129 - Practical Enterprise Risk Management
- RISK 6509 - Global Risk Management
- RISK 6809 - Principles of Risk Management & Insurance

- RISK 6909 - Corporate Risk Management

## **Economics Specialization**

### **Finance and Risk Management Core (9 hours)**

- BUSN 6640 - Financial Management
- FNCE 6330 - Investment Management Analysis
- FNCE 6382 - Survey of Financial Derivatives

### **Finance and Risk Management Electives (6 hours)**

Select any two FNCE/RISK/CMDT courses numbered 6000 or higher (excluding FNCE 6290 and FNCE 6300).

### **Economics Core (12 hours)**

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I

### **Quantitative Elective (3 hours)**

Select one of the following courses:

- ECON 5823 - Econometrics II
- ECON 6801 - Advanced Mathematical Economics
- MATH 5351 - Actuarial Models
- MATH 5390 - Game Theory
- MATH 5792 - Probabilistic Modeling

**The Economics Specialization is a stand alone program which requires 30 credit hours**

## **Finance Specialization**

Students must select at least 3 courses with **FNCE/CMDT/RISK** prefix, numbered 6000 or higher. Remaining Finance Elective may be any of the following courses: **FNCE/CMDT/RISK** course numbered 6000 or higher, **ACCT 6140** Tax Planning for Managers, **ACCT 6340** Financial Statement Analysis, **ENTP 6824** Entrepreneurial Financial Management, **ECON 5813** Econometrics I, **ECON 5823** Econometrics II, **MATH 5792** Probabilistic Modeling, or **MATH 5390** Game Theory.

## **Financial Analysis and Management Specialization**

Select three or four of the following courses:

- FNCE 6310 - Financial Decisions and Policies
- FNCE 6340 - Business Firm Valuation
- FNCE 6360 - Management of Financial Institutions
- FNCE 6411 - International Corporate Governance
- FNCE 6420 - Mergers and Acquisitions
- FNCE 6450 - Short-Term Financial Management
- FNCE 6460 - Emerging Market Finance
- FNCE 6480 - Financial Modeling

**If 3 courses completed from list above, select 1 course from the list below:**

- ACCT 6140 - Fundamentals of Federal Income Tax
- ACCT 6340 - Financial Statement Analysis
- CMDT 6582 - Commodity Supply Chain Management
- CMDT 6682 - Commodity Valuation and Investment
- CMDT 6802 - Foundations of Commodities
- ENTP 6824 - Entrepreneurial Financial Management
- MATH 5390 - Game Theory
- RISK 6129 - Practical Enterprise Risk Management
- RISK 6509 - Global Risk Management
- RISK 6809 - Principles of Risk Management & Insurance
- RISK 6909 - Corporate Risk Management
- CMDT 6782 - Commodity Data Analysis

## **Risk Management and Insurance Specialization**

### **Required Courses:**

- RISK 6129 - Practical Enterprise Risk Management
- RISK 6809 - Principles of Risk Management & Insurance
- RISK 6909 - Corporate Risk Management

### **Quantitative Elective**

Select 1 of the following:

- CMDT 6582 - Commodity Supply Chain Management
- CMDT 6682 - Commodity Valuation and Investment
- CMDT 6782 - Commodity Data Analysis
- CMDT 6802 - Foundations of Commodities
- ECON 5823 - Econometrics II
- ENTP 6824 - Entrepreneurial Financial Management
- FNCE 6340 - Business Firm Valuation
- FNCE 6360 - Management of Financial Institutions

- FNCE 6411 - International Corporate Governance
- FNCE 6420 - Mergers and Acquisitions
- FNCE 6480 - Financial Modeling
- MATH 5792 - Probabilistic Modeling
- RISK 6209 - Cyber Risk Management
- RISK 6309 - Strategic Risk Management
- RISK 6409 - Employee Benefits and Workforce Risk Management
- RISK 6509 - Global Risk Management

There may be additional prerequisite courses for the ECON and/or MATH selections. Please check with those departments or the graduate advisors.

**Total 30 credit hours**

The master of science in global energy management (GEM) prepares individuals for leadership careers in the energy industry. This degree is particularly appropriate for individuals seeking to advance their existing careers in the energy field. Prior work experience within the field is preferred, but not required. The program consists of two components: the core curriculum and the more advanced and specialized elective courses. The MS GEM program requires the completion of the following core classes as well as four elective courses from the selection listed below.

## Required Courses

- GEMM 6000 - 21st Century Global Energy Issues and Realities
- GEMM 6100 - Global Energy Economics
- GEMM 6200 - Environmental, Regulatory, Legal & Political Environment in the Energy Industry
- GEMM 6300 - Technical Aspects of Energy Science
- GEMM 6400 - Leadership and Decision Making in the Global Energy Environment
- GEMM 6410 - People Management in the Global Energy Environment
- GEMM 6450 - Strategic Management of the Energy Industry
- GEMM 6500 - Energy Accounting in the Global Markets
- GEMM 6600 - Introduction To Financial Management In The Energy Industry

## Choose three

Choose three of the following courses. These courses are taken during the last two terms of the program and are offered based on enrollment.

- GEMM 6210 - Energy and the Law: Property and Contracts
- GEMM 6230 - Political Risk Management for Global Energy Environmen
- GEMM 6430 - Organizational Behavior in the Energy Industry
- GEMM 6470 - Energy Marketing and Communications
- GEMM 6610 - Advanced Financial Management in the Energy Industry
- GEMM 6620 - Energy Asset & Production Management for the Energy Industry
- GEMM 6630 - Commercialization Management of Renewable Energies

## Notes and Restrictions

The program is a cohort group, hybrid online, 18-month master of science degree program. As a cohort program, all students start together, progress together and graduate together. It is not recommended for students to take time out of the program once it starts, and students should plan on remaining in the program for the full 18 months. If it becomes necessary to take a term off, students need to contact the program advisor to discuss options. As a hybrid online program, professors and students meet in class face to face for four days (Fridays through Mondays) at the start of each 3-month term with the rest of the term completed online. Please note that the GEM degree program runs on a completely separate schedule from the normal semester terms of the Business School. Please check the Business School Website for deadlines and dates of each GEM term. All GEMM courses are restricted to those students who have been admitted to the MS GEM program.

## Dual Degrees

In order to participate in the dual degree options offered by the Business School, students in the GEM program must first complete their entire GEM degree before they can begin their second degree.

# Health Administration MS

**Program Director:** Rulon Stacey

**Telephone:** 303-315-8851

**E-mail:** Rulon.Stacey@ucdenver.edu

The goal of the master of science in health administration degree is to prepare students, who, after appropriate practical experience in responsible managerial positions, are capable of assuming positions as chief executive officers or senior administrators in complex, multi-service healthcare organizations or in organizations' purchasing health services.

The curriculum is a synthesis of management concepts and techniques that are applicable to any economic organization and tools that can be specifically applied to health and health services systems. The program emphasizes skills that heighten basic analytical and decision-making processes used by top-level managers in selecting broad strategies for the institutions and by junior managers in administering subunits of health care organizations. The faculty guide the students in their mastery of theoretical, conceptual and quantitative topics.

The program has enjoyed continuous accreditation by the Commission on Accreditation of Healthcare Management Education since 1970.

## A. Common Body of Knowledge (CBK): (18 hours)

Advisor will evaluate transcript for possible waivers in the CBK.

- BUSN 6521 - Leading Individuals and Teams
- BUSN 6530 - Data Analytics for Managers
- BUSN 6550 - Analyzing and Interpreting Accounting Information
- BUSN 6630 - Management of Operations
- BUSN 6640 - Financial Management

## **B. Health Administration Core: ( 21 hours)**

- BUSN 6541 - Legal and Ethical Environment of Business (Health Section)
- BUSN 6561 - Marketing Management (Health Section) This course has a new title: Marketing Dynamics in the 21st Century (Health Section).
- BUSN 6621 - Applied Economics for Managers (Health Section)
- BUSN 6711 - Strategic Management (Health Section) \*This course is intended to be taken in your last Spring semester.
- HLTH 6010 - Health Care Systems
- HLTH 6770 - Healthcare Quality and Outcomes
- HLTH 6911 - Health Field Studies \*This course is intended to be taken in your last Spring semester. Pre-req: HLTH 6010 or consent of instructor, minimum 3.0 cumulative GPA.

## **C. Health Administration Information Technology Elective: (3 hours)**

Select one of the following courses:

- HLTH 6071 - Introduction To Health Information Technology
  - HLTH 6072 - Management of Healthcare Information Technology
- Please note: 2nd Health Administration Information Technology course may be used as Health Administration elective

## **D. Health Administration Electives: (6 hours)**

Select two of the following courses:

- ENTP 6801 - Building Biotechnology
- ENTP 6848 - Leadership in New Ventures
- HLTH 6740 - Profiles in Health Care
- HLTH 6070 - International Health Policy and Management
- HLTH 6075 - International Health Travel Study

- ISMG 6810 - Business Intelligence in Healthcare
    - \* Students can also select HLTH 6071 or HLTH 6072 if not used as a Health Administration Information Technology Elective.
- A new Health course has been added for spring of 2020 and may also be selected. HLTH 6730, Healthcare Operations Management.

## Notes and Restrictions

*Administrative Residency or Fellowship.* An administrative residency or fellowship is optional but recommended for students with limited healthcare experience. The program faculty provide guidance to students applying for residencies or fellowships. Information on the full range of local, regional, and national residencies or fellowships is available from the program director.

*Length of program.* A maximum of five years and one semester is allowed to complete the Health Administration program.

# Health Economics MS

► Graduate School Policies and Procedures apply to this program

**Program Director:** Brian Duncan, Ph.D.

**Graduate Advisor:** Daniel Rees, Ph.D.

The M.S. program in Health Economics provides graduate-level training in economics, specifically in the economics of the health care industry. Our M.S. program emphasizes extensive training in mathematical and quantitative analysis, including substantial exposure to applied econometrics, working with large and diverse data sets, and a wide range of statistical software. The M.S. in Health Economics builds off the strengths of the Economics Department, which is housed in the College of Liberal Arts and Sciences, and the Department of Health Systems, Management and Policy (HSMP), which is housed in the Colorado School of Public Health, allowing students to take courses on both the downtown Denver and Anschutz Medical campuses. The program gives students the applied skills that employers demand, provides those pursuing advanced degrees an edge in gaining admission to top-flight Ph.D. programs, enhancing the student's career and professional development.

## Admission Requirements

- Meet all general admission requirements of the Graduate School (including a 3.0 undergraduate grade-point average).
- Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an additional

academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).

- Submit official transcripts from all colleges attended.
- Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and econometrics (upper division courses).
- Have completed courses in calculus and statistics (preferably a year of calculus. A course in linear algebra and/or differential equations is recommended).
- Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. GRE scores are used in conjunction with other indicators of academic success at the Master's level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.
- International students must submit TOEFL, IELTS, or PTE Academic scores. The institution code for CU Denver is 4875. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), 6.5 (IELTS), or 51 (PTE). Minimum subscores also apply. More information about TOEFL, IELTS, or PTE waiver requirements can be found on the International Admission's website. Please contact the International Admissions office if you have questions about this requirement.

### **Application Deadlines:**

**Fall: June 1 Spring: December 1**

The Department of Economics accepts late applications after these official deadlines. However, there is no guarantee that a late application will be processed in time for the start of the semester. Students are encouraged to apply well in advance the application deadline.

International students who apply after the June 1 or December 1 deadline may not have time to obtain a student visa. Being admitted to the M.S. program in Health Economics does not guarantee that a student will receive a student visa in time for the start of the semester. International students who are admitted to the MS program, but fail to obtain a visa in time, may defer admission for up to one year. All questions about student visas should be directed to the Office of International Education.

### **Degree Requirements**

1. Students must complete a minimum of 30 credit hours of coursework, of which 21 hours are core requirements. Each student's plan will be worked out in conjunction with the graduate advisor. Students are expected to meet all course prerequisites.
2. Students must complete a minimum of 30 graduate (5000 and above) level credit hours.

3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail. No course may be taken more than twice and only one attempt will retain the credit.
4. Students must complete all credits for the degree with CU Denver/CU Anschutz faculty.

## **Core Courses**

- ECON 5073 - Microeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 7073 - Advanced Microeconomic Theory II
- ECON 7661 - Health Economics I
- ECON 7662 - Health Economics II

**Total: 21 Credits**

## **Electives**

Three courses numbered 5000 or higher with an ECON or HSMP subject code. Courses numbered 6611 or higher with a BIOS subject code may be taken with the graduate advisor's approval.

**Total: 9 Credits**

**Degree Total: 30 Credits**

## **Graduate Examination**

Students must successfully complete a capstone project in which proficiency in the knowledge and skills comprising the MS degree in Health Economics is demonstrated.

# **Historic Preservation MS**

►Graduate School Rules apply to this program

**Program Director:** Steve Turner

**Office:** CU Denver Building, 2<sup>nd</sup> Floor

**Telephone:** 303-315-1000

**E-mail:** [steve.turner@ucdenver.edu](mailto:steve.turner@ucdenver.edu)

The Master of Science in Historic Preservation (MS HP) is a 45 semester-hour program, usually completed in 15 or 18 months (three regular semesters and possibly part or all of one summer). It is designed to accommodate the background and needs of both those students with substantial experience and those new to the field. The course of study is for students seeking training in spatial, technical and design aspects of the broader field; it encompasses architecture, cultural landscapes, preservation, planning, building technology, project management, documentation, interpretation and representation.

In a rapidly changing cultural, economic and professional environment, it is valuable to have an understanding of what is worth saving of the built environment. However, appreciation for the past alone is insufficient for making the informed and creative decisions expected and required of cutting-edge professionals. The practice of historic preservation is very different today than it was when graduate programs first were developing some 40 years ago. The CU Denver MS HP is among a new generation of studies that looks to historical resources as they relate to a more desirable future.

As global economies change fewer resources are available for new buildings and we must adaptively reuse our existing structures. This trend will continue beyond short-term economic conditions, because it will always be a more sustainable practice to reuse existing buildings than to tear them down and harvest or manufacture new materials.

The College of Architecture and Planning, and the professional community that it serves, foresee a significant and permanent shift towards more adaptive reuse of existing buildings. The Master of Science in Historic Preservation is a program designed to prepare students for a true 21st Century career.

Historic preservationists come from a variety of backgrounds. Some are well-educated in the humanities and desire to increase their technical understanding. Those familiar with the social sciences might be seeking "real world" applications for their expertise. Many already with "first professional degrees" in design and planning disciplines, as well as the law and business, seek to deepen their competence in the vibrant and interesting professional niche of historic preservation.

## **Prerequisites**

The Master of Science in Historic Preservation program is fully integrated into a college emphasizing design and graphic excellence. While HP students need not have fully developed skills in advance of matriculation we have found that some students have benefited from some previous exposure to basic graphic skills. Elective courses in the College of Architecture and Planning may also be used to develop these skills.

## **Admissions**

Application to the Master of Science in Historic Preservation program is open to all students holding the bachelor's (undergraduate) degree from an accredited college (or its equivalent from a foreign institution).

## Materials Required

- A brief statement of interest (500 word max.)
- A compact sample of work (max. 15 pages 8.5" X 11") of writing samples, and optionally, graphic work and professional resume is recommended.
- Submission of Graduate Record Exam (GRE) scores is optional. [There is an expedited application procedure for current CU Denver students in another CAP master's program. Please inquire to the MS in Historic Preservation program director.]

## Transfer Credit

Transfer credit of up to 12 semester hours (up to 15 semester hours for those seeking/holding a related master's degree from CU Denver) may be awarded for equivalent graduate (post-bachelor's) course work at the discretion of the program director and in keeping with CU Denver Graduate School rules. Students holding a master's degree in Architecture, Urban Planning or Landscape Architecture are typically awarded 12 to 15 semester hours of advanced standing. Additional advanced standing may be considered in accordance with the rules of the Graduate School.

## Undergraduate Course Work

Undergraduate course work substantively equivalent to a MS HP required course may be accepted as a substitution for that course at the program director's discretion, but such substitution will not reduce the total number of semester hours required for the degree.

## Program Requirements

The course of study is designed to accommodate the background and needs of both those students with substantial experience, and those new to the field. The curriculum is flexible but rigorous, requiring:

- 15 semester hours of core courses in preservation
- 6 semester hours in approved Design History courses
- 15 semester hours of electives
- 9 semester hours capstone requirement

Students enrolling full-time in the 45 semester hour curriculum typically complete the program in three or four semesters, or 18 months. However, course work other than the completion of

the capstone requirement may be accomplished in a period of residency as short as 15 months. Students receiving significant transfer credit and those with a related degree may further reduce the time required for the MS degree in Historic Preservation.

Our program is compliant with National Council of Preservation Education Standards.

## Required Core Courses

Core Preservation courses (choose at least 5):

- HIPR 6010 - Preservation Theory and Practice
- HIPR 6210 - Historic Buildings in Context
- HIPR 6220 - Adaptive Reuse: Business and Practice
- HIPR 6310 - Documentation, Analysis, Representation
- HIPR 6410 - Urban Conservation: Context for Reuse
- HIPR 6510 - Building Conservation
- HIST 5232 - Historic Preservation

Choose at least 2 approved Design History courses (offerings vary). Some examples are:

- HIPR 6110 - Regionalisms & the Vernacular
- HIPR 6610 - Reading the City
- LDAR 5521 - History of Landscape Architecture
- URPL 6350 - Form and Formation of Cities
- Several other CAP and History Department courses may also qualify.

**Total: 21 Hours**

## Electives

Up to 15 elective semester hours.

**Total: 15 Hours**

## Capstone Work

Choose either 1. Professional Project or 2. Thesis.

1. HIPR 6851 - Professional Project (3 semester hours)  
Preceded by 6 credits from the following:
  - HIPR 6930 Internship
  - Pre-approved travel education

- Pre-approved related elective

2. HIPR 6951 - Thesis (6 semester hours)

Preceded by LDAR 6949 - Research Tools & Methods (3 semester hours)

**Total: 9 hours**

## History MA

► Graduate School Policies and Procedures apply to this program

The master of arts in history requires 36 semester hours (12 courses). Students applying for admission to the program should have some background in history, though not necessarily a BA in the subject. The department encourages applications from individuals of any age interested in continuing or resuming their education. Graduate students in history develop skills in critical thinking, writing and independent research. Our program prepares students for a wide variety of professions, including teaching, government service, museum and archive management, and historic preservation, as well as further degree work in history, law, librarianship and business. The department expects that students graduating with an MA in history will master the following general skills for their degrees:

- The ability to pursue independent historical research projects
- The ability to analyze historiographical arguments
- The ability to analyze primary documents and develop arguments from them
- The ability to create bibliographies using archival, library, and Internet resources
- The ability to write in a variety of formats, including historiographical essays, book reviews, and research papers

Students will also master knowledge of the basic historical content of both their major and minor fields, and an understanding of the historiographies and historical methods in their major and minor fields.

### Admission Requirements

- In addition to the general admission requirements of the Graduate School, the Department of History requires an undergraduate GPA of at least 3.25.
- Applicants are required to submit a sample of written work, usually a term paper or project of similar length.
- All applications must include three letters of recommendation, preferably from college or university faculty.

- Applicants should address any gaps, weaknesses, or special circumstances in their academic records in the statement of purpose portion of the application. In special circumstances, the department may modify its admission standards.

## **APPLICATION DEADLINES**

**March 15**                      **Fall admission**  
**October 15**                   **Spring admission**

Admission decisions are made by a graduate committee composed of the graduate advisor and faculty representing fields in U.S., European, global, and public history.

## **Graduate School Policies**

All history MA students are subject to Graduate School policies related to graduate study, as well as to all relevant university policies. These policies cover such topics as time limits on degree completion, changing degree programs, incomplete grades, and more. Further information on these policies can be found in the Graduate School section of this online catalog.

## **Transfer Credits**

With approval from the graduate advisor and the appropriate faculty, students may transfer up to nine graduate-level credits accrued before enrollment in the CU Denver MA history degree program, provided that they earned a grade of *B+* or better in these courses. Students must submit a syllabus for each course they wish to transfer, and faculty may require students to complete additional assignments to meet the expectations of the department. The department will not accept transfer of courses comparable to HIST 6013, Introduction to the Professional Study of History.

## **Grade Requirements**

The history department requires that graduate students maintain a cumulative GPA of 3.0 and will not accept grades lower than *B-* (2.7) toward the completion of course work for the master's degree. Students who earn less than a *B-* in HIST 6013 must retake the class.

## **Residency Requirements**

The history department requires a residency of at least one academic year for the degree.

## **Graduate Advising**

Early in their first semester, students should contact the history department graduate advisor to discuss their path through the program and to receive advice regarding the selection of major and minor fields.

## **Degree Tracking Responsibility**

Although faculty will provide reasonable guidance, it is up to students to monitor their own progress through the program in consultation with the graduate advisor and their major and minor advisors; this includes knowledge and understanding of application and graduate deadlines, degree requirements, comprehensive exam expectations and processes, thesis guidelines, etc.

## **Choosing Advisors and Fields of Study**

All history MA candidates choose a major field and a minor field. Students will take courses in these fields and will be tested in these fields. After consulting with the graduate advisor, students are responsible for securing two field advisors, one to oversee their progress in the major field, the other to oversee their minor field. All students should have chosen their fields and advisors by the end of the semester in which they have complete 12 credit hours. Students will also need a third advisor for the comprehensive examinations. This third advisor is typically in their major field and students should always consult with them during preparation for the examinations.

## **Major Fields, Minor Fields, and Concentrations**

The MA in history seeks to provide students with a balance of breadth and depth in the study of history. Major fields are broad areas of study within which students gain a general picture of historical processes. Concentrations provide focus for developing expertise within the major, either regionally or thematically. Minor fields provide a complementary or comparative area and must sit outside the major field.

Advisors and students together will work out Plans of Study, which indicate the courses students intend to take to meet their requirements, based on their selection of major and minor fields. *Students should make every effort to enroll in courses that best fit their major field, major concentration and minor field.*

The department has core readings for the Public History and US History fields. Students will draw on these readings for their comprehensive exams. Students working in all fields will coordinate their readings with their major and minor advisors.

### **Major Field Concentrations**

Students work with advisors to select one of the major field concentrations listed below. Concentrations provide thematic or regional focus to a broad geographical or methodological major (e.g. for the global history major, students could concentrate on trade, borders,

imperialism, etc.. or any of the areas of regional expertise of our faculty). Readings for the major field concentration are in addition to the core reading list. Note that students may select their concentrations and the options for minors from the same lists, below.

### **Minor Fields**

Students can define their minor field as a specialization within one of the four major fields or as topics from the list of concentrations. Note that students may select their concentrations and the options for minors from the same lists, below.

**Students must select their major and minor fields from any two of the following three groups. (Students may not select their major and minor fields from the same group).**

### **Group 1: Geographical Concentrations**

- East Asia
- Latin America
  - Mexico
  - South America
- Middle East
- Europe
  - Germany
  - France
  - Britain
  - The Mediterranean
- United States
  - Colonial and Early Republic
  - Nineteenth Century
  - U.S. West
  - Twentieth Century
  - U.S. Foreign Policy
  - Colorado
- Global
  - Atlantic World
  - Pacific World

### **Group 2: Thematic Concentrations**

- Colonialism and Imperialism
- Cultural History
- Social History

- Foreign Policy
- Economic and Business History
- Environmental History
- Gender and Sexuality
- Citizenship and National Identity
- War, Revolution and Genocide
- Globalization
- Urban History
- Frontiers and Borderlands
- Race and Ethnicity
- Science, Medicine, and Society
- Intellectual History
- Material Culture
- Migration and Immigration
- Policing and Legal History
- Indigenous Histories

### **Group 3: Public History**

- Memory and Community
- Museum Studies
- Historic Preservation

Note: *Majors in Public History must follow the Plan of Study for Public History.*

## **Degree Requirements**

All history MA students must have a major field and a minor field, and they must complete half of their course work at the 6000 level.

### **Required Introductory Course**

- HIST 6013 - Introduction to the Professional Study of History

**Total: 3 Hours**

### **Major Field**

**Core Course in Major Field (3-6 semester hours)**

Public history and U.S. history major fields require core courses covering major approaches and themes. The core courses familiarize students with the field in a broad sense.

### **Research Seminars (3-6 semester hours)**

Research seminars focus on students' development of an original, primary research paper. One 3-semester-hour research seminar is required of all students. A second research seminar is required for students not in public history; the second 3 semester hours can be taken within the major or minor field.

### **Major Electives (9-12 semester hours)**

Major electives are made up of courses in the major and concentration, including readings courses, that address specific field historiographies, and optional extended research credits. Students who choose to do a thesis may apply 6 thesis semester hours (HIST 6950) toward the major electives requirement.

**Total: 18 Hours**

### **Minor Field**

#### **Minor Electives**

Minor electives are made up of courses in the minor field, including readings courses, which address specific field historiographies, or research seminars.

**Total: 12 Semester Hours**

### **Open Elective**

Students may use the open elective to explore a course outside their major or minor or to do extra course work in one of their fields.

**Total: 3 Hours**

### **Degree Total: 36 Hours**

#### **INDEPENDENT STUDY AND/OR INTERNSHIP**

Candidates may register for up to 6 hours of internships or independent study, only one of which may be at the 6000-level. Students will not be allowed to fulfill the research seminar requirement with an independent study or internship. Any independent study or internship at the 6000-level needs the permission of the graduate advisor. Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

- HIST 5840 - Independent Study: History
- HIST 6840 - Independent Study: HIST
- HIST 6939 - Internship

## **COMPREHENSIVE EXAMINATIONS**

All history MA candidates must pass a comprehensive examination in the major and minor fields after the completion of course work and generally before embarking on a thesis, curriculum project or public history project. The comprehensive exam evaluates students' knowledge of their course work and their reading lists for their major, minor and concentration. The exam consists of a take-home written section, with broad essay questions in both the major and minor fields; this is followed by an oral exam with the student's faculty committee. In answering their exam questions, students are expected to construct arguments and to show mastery of the historiographies, narratives and historical content in their fields. The comprehensive exam is administered and evaluated by a committee of the major advisor, the minor advisor and an outside reader from the history faculty. Students should expect to read 80-100 books combined, as well as significant articles, in their major and minor fields. When appropriate, students may enroll in HIST 6940, Comprehensive Examination, a one-credit requirement connected to faculty commitment to preparing students for their examination.

- HIST 6940 - Comprehensive Exam

## **Master's Degree Extended Research Options**

The MA program in history offers a set of courses in which students can develop extended research interests. Students must select an advisor and develop a proposal for a specific research agenda in the semester before beginning work on a project.

### **REQUIRED PUBLIC HISTORY THESIS (HIST 6950) OR PROJECT (HIST 6952)**

Students majoring in public history must complete either a thesis (6 semester hours) or a project (usually 3 semester hours).

### **OPTIONAL THESIS FOR STUDENTS IN U.S., GLOBAL AND EUROPEAN HISTORY (HIST 6950)**

Students majoring in U.S., Global, or European history can choose to write a thesis (6 semester hours in their major field).

### **OPTIONAL ADVANCED HISTORY CURRICULUM DEVELOPMENT (HIST 6951)**

Students who undertake their master's program when they are already teachers or who intend to become teachers can choose to construct curriculum projects relevant to their teaching practice. See the separate section below on "Opportunities for Teachers and Teachers-in-Training."

- HIST 6950 - Master's Thesis
- HIST 6951 - Masters Project: Advanced History Curriculum Development

- HIST 6952 - Master's Project: Public History

## **Thesis Requirements**

Students writing theses are expected to develop an original research agenda resulting in an extended paper. Students work with their major field advisor, who will help guide them through the process of research and writing. Students will enroll for six credit hours in HIST 6950 over one or more semesters to complete their theses. Before registering for HIST 6950, students should have a thesis proposal and initial bibliography approved by their major advisor.

A thesis is evaluated by a committee of three faculty, including the major advisor and two other faculty members chosen by the student in consultation with the major advisor. Upon completion of the thesis, the student meets with the committee members, who ask questions about the research and conclusions which the student must defend. In most instances, the committee will require further revisions, sometimes major in scope, before the thesis is accepted and cleared for submission to the Graduate School in fulfillment of degree requirements.

## **Project Requirements**

In lieu of a thesis, public history majors may choose to enroll in three credit hours of HIST 6952 to complete a public history project. Projects, which are usually conducted in collaboration with a public history organization, can entail creating an exhibit, developing a museum master plan or organizing an archival collection, conducting a preservation survey, or other activities as approved by their advisor. Students are required to prepare an analytical paper describing the process and results of their project.

## **Opportunities for Teachers and Teachers-in-Training**

### **Curriculum Projects**

Licensed teachers and students who intend to become teachers may choose to complete a curriculum development project. Students arrange curriculum development projects with a sponsoring faculty member. Generally, students are expected to develop and submit a complete course curriculum plan for each 3-semester-hour project. Projects need to show evidence of familiarity with the relevant historiographies and primary sources. Students may apply the hours from HIST 6951 to either the major field or the minor field, depending on the project subjects. Curriculum plans must meet minimum criteria established by the history department in the document Advanced History Curriculum Development Projects.

- HIST 6951 - Masters Project: Advanced History Curriculum Development

(3 or 6 semester hours in their major field, or 3 semester hours in their major and possibly 3 semester hours in their minor, if a student elects to do a second project)

## Secondary Teacher Licensure

Students interested in secondary teacher licensure should consult with the School of Education and Human Development. See the Urban Community Teacher Education Program for information.

# Humanities MH

►Graduate School Policies and Procedures apply to this program

## Requirements for Admission

General rules for admission into the Graduate School, as well as the following apply to admission into the MH program:

- evidence of a bachelor's degree
- an official copy of transcripts from all community colleges, colleges, and universities attended
- overall GPA of at least 3.2 out of 4.0
- a writing sample
- three letters of recommendation (at least two from academic sources)
- appropriate undergraduate training or professional background, or experience that provide evidence of ability to pursue the MH degree
- a typed statement specifying the goal of advanced study in the humanities expressed in clear, correct, and effective English. Applicants should provide a statement of their background (education and experience) and its relevance to their proposed interdisciplinary graduate work, and why this graduate program is relevant to their interests.
- standardized test scores are not required, but will be considered if submitted

After meeting all other requirements for admission, applicants may be required to have an interview to discuss their interest in the program and their plans for study. For out-of-state applicants, an appropriate substitute for the interview may be determined by the directors.

## Provisional Admission:

Applicants may be admitted as provisional-status graduate students if their GPA is low and their complete record indicates a high probability of success.

### **Non-degree Students:**

Potential applicants may take CU Denver graduate-level courses as non-degree seeking students (unclassified student with a bachelor's degree) if they:

1. wish to strengthen their record in order to demonstrate their potential to successfully complete courses in the program
- or-
2. wish to start coursework in the program prior to completing their application, with the understanding that taking courses does not guarantee admission

Up to 12 semester hours of CU Denver graduate-level work taken as a non-degree student or taken from another university may be accepted by the program once a student has been admitted to the program. For further information on non-degree graduate student status, see the Information for Graduate Students section of this catalog. In the case of CU Denver graduate students transferring to the MH program, previous coursework may be accepted as appropriate to the MH plan of study.

### **International Students:**

International students must also meet CU Denver requirements for international admission. See the Information for International Students section of this catalog or call 303-315-2230 for further information.

## **Degree Requirements**

The Master of Humanities (MH) program is a 36 credit hour program, of which 30 hours must meet all specifications of the Graduate School. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. A grade below *B- in any given course* will not be counted toward the degree. All graded attempts in required and elective courses are calculated in the major GPA. Courses credited toward the MH degree must typically be taken at CU Denver (a maximum of 12 graduate credit hours may be transferred from other institutions after matriculating into the MH program, subject to the MH director's approval). Students wishing to pursue study abroad options must seek advisor approval in advance.

Students may pursue a general MSS degree or concentrate their studies and coursework on an approved track.

Each student's program is supervised by MHMSS faculty. All independent study, project, and thesis contracts must be approved in advance by the program director. A total of two independent study courses and one internship may count toward the degree. Only one

graduate-level online course (up to 3 hours) may be taken toward the degree, with prior approval. A maximum of two 4000-level undergraduate courses may apply, with faculty approval. Remaining coursework must be 5000-level or higher and must be completed with CU Denver faculty or approved study away programs. All students must complete and pass a final project or thesis and an oral comprehensive defense of that work, in order to graduate.

## Three Required Core Seminar Courses

Take **all** of the following courses:

- HUMN 5025 - Foundations and Theories of Interdisciplinary Humanities  
Must be taken during the first year, offered in the fall only.
- HUMN 5013 - Methods and Practices of Graduate Interdisciplinary Humanities  
Must be taken during the first year, offered in the spring only.
- HUMN 5924 - Directed Research and Reading in Interdisciplinary Humanities  
Students should take this course after they have completed 21-24 credit hours and are ready to write a proposal for their thesis or project. This course is always offered in the spring and occasionally in the fall, as needed.

**Total: 9 Credit Hours**

## Electives

Students must complete a total of 21-24 credit hours. Students completing a project rather than a thesis take 24 hours of electives, while thesis students complete 21 hours of electives. Students may choose to create their own curriculum from at least two disciplines addressing their specific research interest. Alternatively, students may choose to follow an approved specialized track. Prior to taking electives, students must meet with a MHMSS program faculty advisor and establish their course of study. If students decide to change their course of study or want to substitute approved coursework, they must meet with a MHMSS program advisor in advance and gain pre-approval.

**Study Abroad:** Students wishing to count credits accrued from a study abroad program while pursuing the MH must follow the rules of the Graduate School and must have approval of the program director in advance of studying abroad.

**Total: 21-24 Credit Hours**

## Thesis or Project

In order to proceed with a project or thesis, all students must submit a proposal and gain approval from three faculty members and the program directors.

- HUMN 5950 - Master's Thesis
- HUMN 5960 - Master's Project

**Total: 3 or 6 Credit Hours**

## **Oral Exam**

An oral exam defending the project or thesis before a committee of three faculty members must be passed in order to graduate.

**Degree Total: 33-36 Credit Hours**

## **MH Elective Pathways:**

### **General MH Track**

Students pursuing the general MH degree track create a course of study based on their individual interests and goals. In consultation with a faculty advisor, students choose two or three academic disciplines as areas of concentration. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

### **Specialized MH Tracks**

Students may also focus in one of the tracks in the Master of Humanities program: **Ethnic Studies, Health Humanities, Philosophy and Theory, Social Justice, Visual Studies or Women and Gender Studies**. Tracks allow students to concentrate their studies in a defined field designed by faculty. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

### **Ethnic Studies Track**

Students pursuing the Ethnic Studies track explore the construction of race and ethnicity by governments and communities through the intersection of popular culture and public policy in both the historical and contemporary contexts.

*In addition to the MH Core requirements, students must:*

***Complete at least one ethnic studies methods/theory course from the list below:***

- ETST 5000 - Research Methods in Ethnic Studies

- EDFN 5001 - Problematizing Whiteness: Educating for Racial Justice

***Complete a minimum of 12 credit hours of approved ethnic studies related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- ANTH 5350 - Anthropology of Globalization
- COMM 5270 - Intercultural Communication
- EDFN 5050 - Critical Issues in American Education
- ENGL 5220 - African-American Literature
- ENGL 5460 - Contemporary World Literature
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5415 - Social Revolutions in Latin America
- HIST 5455 - African Struggle for Independence
- HIST 5462 - Islam in Modern History
- HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- SSCI 5540 - Law, Diversity and Community in United States History
- PSCI 5094 - Seminar: Urban Politics
- PSCI 5145 - Indigenous Politics
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5256 - Seminar: National Question and Self-Determination
- PSCI 5446 - Advanced Indigenous Peoples' Politics
- PSCI 5545 - Immigration Politics
- PSCI 5914 - Community Organizing and Community Development
- SOCY 5050 - Health Disparities
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SOCY 5690 - Crime and Inequality Over the Life Course
- SPAN 5020 - Spanish Sociolinguistics
- SPAN 5060 - Dialects of the Spanish-Speaking World
- SPAN 5076 - Spanish in Colorado
- SPAN 5080 - Spanish in the United States
- SPAN 5521 - Mexican Literature I: pre-Columbian and Colonial
- SPAN 5522 - Mexican Literature II: 19th to 21st Centuries

*Complete a project or thesis on an approved ethnic studies related topic.*

## **Health Humanities Track**

Health Humanities teaches students to the ways in which humanities disciplines interrogate relationships among health, medicine and society and what those disciplines reveal about biomedical knowledge as well as healthcare policies and practices.

*In addition to the MSS Core requirements, students must:*

**Complete all required foundations courses from the list below:**

- HEHE 5000 Foundations of Health Humanities (offered at the Anschutz Medical Campus)
- HEHE 5001 Foundations of Health Care Ethics (offered at the Anschutz Medical Campus)

***Complete a minimum of 12 credit hours of approved health humanities related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 5290 - Anthropology and Public Health
- COMM 5500 - Health Communication
- COMM 5550 - Rhetorics of Medicine & Health
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- GEOG 5235 - GIS Applications in the Health Sciences
- GEOG 5710 - Disasters, Climate Change, and Health
- HEHE 5250 Media, Medicine and Society (on the Anschutz Campus)
- HEHE 5350 Narrative Principles and Practices in Healthcare (on the Anschutz Campus)
- HEHE 5750 Pain Seminar (on the Anschutz Campus)
- HEHE 5800 Ethics Medicine and the Holocaust (on the Anschutz Campus)
- HIST 5347 - History of Biology
- HIST 5348 - Mind and Malady: A History of Mental Illness
- HLTH 6070 - International Health Policy and Management
- PHIL 5242 - Bioethics
- PSCI 5354 - Seminar: Environmental Politics and Policy

*Complete a project or thesis on an approved health humanities related topic.*

## **Philosophy and Theory Track**

The Philosophy and Theory Track in the Master of Humanities Program offers students an interdisciplinary approach to studying philosophy, critical theory, and related theories of criticism and analysis in various Humanities disciplines.

*In addition to the MH Core requirements, students must:*

***Complete a 3 credit philosophy/theory course approved by program director.***

***Complete a minimum of 15 credit hours of approved philosophy/theory related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 6103 - Current Theory in Ethnography
- ENGL 5420 - Film Theory and Criticism
- HIST 5306 - Survey of Feminist Thought
- HUMN 5013 - Methods and Practices of Graduate Interdisciplinary Humanities
- HUMN 5020 - Foundations and Theories of Interdisciplinary Social Science
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- HUMN 5750 - Philosophical Psychology
- HUMN 5984 - Topics: Interdisciplinary Humanities
- PHIL 5101 - Pragmatism: Classical American Philosophy
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PHIL 5220 - Aesthetics and the Philosophy of Art
- PHIL 5242 - Bioethics
- PHIL 5260 - Philosophy of Law
- PHIL 5300 - Philosophy of Mind
- PHIL 5550 - Paris 1910: Art, Philosophy and Psychology
- PHIL 5600 - Philosophy of Religion
- PHIL 5730 - Philosophy and Literature
- PHIL 5750 - Introduction to Phenomenology
- PHIL 5780 - Heidegger
- PHIL 5790 - Nietzsche
- PHIL 5795 - Marx and Marxism
- PHIL 5800 - Plato
- PHIL 5810 - Aristotle
- PHIL 5833 - Existentialism
- PHIL 5900 - John Dewey
- PHIL 5920 - Philosophy of Media and Technology
- PSCI 5457 - Seminar: American Political Thought
- RLST 5060 - Philosophy of Religion
- SOCY 5016 - Social Theory
- WGST 5306 - Survey of Feminist Thought
- WGST 6010 - Methods and Theories of Feminism and Gender Studies

*Complete a project or thesis on an approved philosophy/theory related topic.*

## **Social Justice Track**

The Social Justice Track encourages graduate students to broaden and deepen their intellectual tools as well as their practical knowledge as to how democracy, education, consumerism, media, race, class, gender, policy, and law intersect.

In addition to the MH Core requirements, students must:

***Complete a minimum of 12 credit hours of approved social justice related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- BUSN 6540 - Legal and Ethical Environment of Business
- COMM 5040 - Communication, Prisons, and Social Justice
- ENGL 5190 - Advanced Topics in Writing & Digital Studies (depending on topic)
- ENGL 5306 - Survey of Feminist Thought
- HIST 5032 - Globalization in World History Since 1945
- HIST 5225 - Urban America: Colonial Times to the Present
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5415 - Social Revolutions in Latin America
- HIST 5455 - African Struggle for Independence
- HUMN 5650 - Reflections on Modernity
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- PSCI 5025 - Local Governance and Globalization
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5225 - Democracy and Democratization
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5286 - International Relations: War or Peace?
- PSCI 5414 - Non-Profits and Social Change
- PSCI 5545 - Immigration Politics
- PSCI 5555 - International Women's Resistance
- PSCI 5837 - Contemporary Issues in Civil Liberties
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present

*Complete a project or thesis on an approved social justice related topic.*

It is **HIGHLY RECOMMENDED** that students in this track take at least one quantitative and/or one qualitative research methods course as part of their plan of study. There are quantitative and qualitative methods courses offered in Anthropology, Environmental Science, Political Science, Sociology, and Research, Evaluation, and Statistical Methodology (RESM), which can be approved by students MHMSS program faculty.

## **Visual Studies Track**

The Visual Studies Track provides students focused studies in disciplines that apply critical analysis to our visual world, such as art history, museum studies, film studies, new media studies, and cultural studies. In a world whose work forces and creative citizenry are focused on the growth and use of visual technologies, visual literacy with sophisticated analytic skills is critical.

*In addition to the MH Core requirements, students must:*

***Complete 3 credit hours of a methods/theory course below:***

- ENGL 5420 - Film Theory and Criticism
- FINE 5790 - Methods in Art History
- HUMN 5660 - Visual Arts: Interpretations and Contexts

***Complete a minimum of 18 credit hours of approved visual arts related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- ARCH 5210 - Introduction to Architecture
- ARCH 5220 - History and Theory Architecture I
- ARCH 5230 - History and Theory Architecture II
- ARCH 6210 - History of American Architecture
- ARCH 6212 - History of Modern Architecture
- ARCH 6220 - History of Architectural Theory
- COMM 5621 - Visual Communication
- ENGL 5770 - Topics in English: Film and Literature
- ENGL 6001 - Critical Theory in Literature and Film
- FINE 4990 - Contemporary Art: 1960 to Present
- FINE 5524 - Topics in Art History II: Modern and Contemporary
- FINE 5610 - Pre-Columbian Art
- FINE 5620 - American Art

- FINE 5632 - History of Digital Media
- FINE 5680 - Art of the Middle Ages
- FINE 5700 - Italian Renaissance Art
- FINE 5705 - Northern Renaissance Art
- FINE 5710 - Baroque and Rococo Art
- FINE 5730 - Arts of Japan
- FINE 5750 - Arts of China
- FINE 5770 - Art of India and Southeast Asia
- FINE 5990 - Contemporary Art:1960-Present
- HIST 5216 - History of American Popular Culture
- HIST 5228 - Western Art and Architecture
- HIST 5231 - History in Museums
- HIST 5232 - Historic Preservation
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- HUMN 5550 - Paris 1910: Art, Philosophy and Psychology
- PHIL 5220 - Aesthetics and the Philosophy of Art
- PHIL 5550 - Paris 1910: Art, Philosophy and Psychology
- PHIL 5920 - Philosophy of Media and Technology

*Complete a project or thesis on an approved visual arts related topic.*

## **Women's and Gender Studies Track**

Students pursuing the WGST track, focus on issues of sex and gender as they manifest in societies through culture, language, politics, visual representation, and history.

*In addition to the MH Core requirements, students must:*

***Complete at least one WGST theory course from the list below:***

- SSCI/WGST/ HUMN 6010 - Methods and Theories of Feminism and Gender
- WGST/ PHIL 5500 - Feminist Philosophy
- HIST/WGST/ ENGL 5306 - Survey of Feminist Thought
- ENGL/WGST/ HIST 5306 - Survey of Feminist Thought

***Complete a minimum of 12 credit hours of approved women's and gender studies related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- ENGL 5000 - Studies of Major Authors (when the author is a female)
- ETST/ PSCI 4827 - Women and the Law

- WGST/SSCI/ HUMN 5720 - Sexuality, Gender and Their Visual Representation
- SSCI/ HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- PSCI 4215 - Women's Rights, Human Rights: Global Perspectives
- PSCI 5555 - International Women's Resistance
- PSCI 5245 - Gender, Globalization and Development
- CRJU 5910 - Nature and Scope of Interpersonal Violence
- CRJU 5930 - Interpersonal Violence Law and Public Policy
- PHIL 5308 - Contemporary Feminist Thought
- PHIL/ WGST 5500 - Feminist Philosophy
- SOCY 5550 - Seminar: Sociology of the Family
- WGST 5230 - Women in the West
- WGST 5248 - Gender, Globalization and Development
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5306 - Survey of Feminist Thought
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present
- WGST 5420 - Goddess Traditions
- WGST 5510 - Whores and Saints: Medieval Women
- WGST 5511 - French Women Writers

*Complete a project or thesis on an approved women's and gender studies related topic.*

## Information Systems MS

**Program Director:** Dawn Gregg

**Telephone:** 303-315-8045

**E-mail:** Dawn.Gregg@ucdenver.edu

The Master of Science in Information Systems (MSIS) program at the Business School is a 30 semester credit hour STEM (Science, Technology, Engineering, Mathematics) degree program that provides students the fundamental knowledge necessary for a career as an IS professional. The MSIS program layers managerial training with technical concepts to help you become a leader in your chosen career path in information technology. You can choose between industry leading specializations in Business Intelligence or Cybersecurity and Information Assurance or customize your own degree to allow you to focus on topics most relevant to your interests. With hands-on software projects, each class will take you one step closer to understanding how to harness the power of technology for business.

Five core courses serve as the foundation for understanding the complex issues that occur when designing, implementing and managing information systems within an organization. Students choose four elective courses which can correspond to a declared specialization or may

reflect a custom course of study. The program culminates with a capstone course that includes a project or a research paper.

The MSIS includes a 4+1 program that allows our current undergraduate information systems students to pursue the Master of Science degree if they achieve a cumulative GPA of 3.00 or higher without taking the GMAT test. Students are also allowed to replace two undergraduate required information systems courses with two graduate information systems courses. Interested students, please contact the Business School advising team for more information.

## **Course Requirements**

### **MS Information Systems Core Courses (15 credits)**

#### **Required Courses:**

- ISMG 6080 - Database Management Systems
- ISMG 6180 - Information Systems Strategy
- ISMG 6430 - Information Systems Security and Privacy

#### **Plus select two of the following courses:**

- ISMG 6060 - Analysis, Modeling and Design
- ISMG 6220 - Business Intelligence Systems and Analytics  
This course is required for the Business Intelligence Specialization
- ISMG 6450 - IT Project Management
- ISMG 6830 - IT Governance and Service Management
- ISMG 6020 - Programming Fundamentals with Python\*
- ISMG 6120 - Network Design and Analysis\*

\* Both of these courses are required for the Cybersecurity and Information Assurance Specialization

### **Elective Courses (15 credits)**

To fulfill the elective requirements, students may complete the Business Intelligence Specialization or the Cybersecurity and Information Assurance Specialization **OR** create a customized degree using any course numbered 6000 or higher with an ISMG prefix (may include core classes not used to satisfy the Core MS IS requirement). In addition, selected 6000 level Business School courses, CVEN, or CSCI courses may be used to satisfy up to 6 elective credits for a customized degree.

## Information Systems Specializations

Students may select from the following two specializations:

### **Business Intelligence Specialization (15 credits)**

Business Intelligence (BI) systems combine operational data with analytical tools to present complex and competitive information to planners and decision makers. The objective is to improve the timeliness and quality of inputs to the decision process. BI is used to understand the capabilities available in the firm; the state-of-the-art, trends, and future directions in the markets, the technologies, and the regulatory environment in which the firm competes; and the actions of competitors and the implications of these actions. With this specialization, you get the necessary skills and knowledge in real-time data warehousing, data visualization, data mining, online analytical processing, customer relationships management, dashboards and scorecards, corporate performance management, expert and advanced intelligent systems, and hands-on experience with leading BI tools.

#### **Choose 4 of the following courses (12 credits):**

- ISMG 6470 - Text Data Analytics
- ISMG 6480 - Data Warehouse and Administration
- ISMG 6810 - Business Intelligence in Healthcare
- ISMG 6820 - Business Intelligence and Financial Modeling
- BANA 6660 - Predictive Analytics Since BANA 6610 is a prerequisite for BANA 6660, if you select BANA 6660 as one of your choices, you may also use BANA 6610 as a choice to fulfill these 12 credits.

#### **Choose 1 free elective course (3 credits):**

Any course numbered 6000 or higher with an ISMG prefix, any 6000-level Business School, CSCI or CVEN course may be used to satisfy the free elective.

#### **Students must complete the following MS IS core course:**

- ISMG 6220 - Business Intelligence Systems and Analytics

### **Cyber Security and Information Assurance Specialization (15 credits)**

With recent breaches in the security of many large government agencies and private corporations, cybersecurity is an issue of great importance to the global society. The

Cybersecurity and Information Assurance Specialization prepares students for cybersecurity, information security, and IT risk management positions in business and critical infrastructure sectors of the economy identified by the U.S. Department of Homeland Security including enterprises such as banks, governments, retail, health care institutions, law enforcement, construction, insurance agencies, transportation and the military.

## **Students must complete ALL of the following 5 courses:**

- ISMG 6340 - Cloud Computing Concepts, Tools, and Security
- ISMG 6860 - Ethical Hacking Concepts and Methodologies
- ISMG 6890 - IT Risk Management
- ISMG 6865 - Digital Forensic Analysis
- ISMG 6910 - Design Science Practicum -- **OR** an approved Internship with required paper and presentation to be completed during the final 9 credit hours of the program.

## **Students must complete the following MS IS core courses:**

- ISMG 6020 - Programming Fundamentals with Python
- ISMG 6120 - Network Design and Analysis

## **Customized Degree**

Students may choose to customize their degree by taking ISMG graduate courses and related graduate technology courses from across the Business School, Computer Science, or GIS programs. Must see an advisor to create.

# **Integrated Sciences MIS**

► Graduate School Policies and Procedures apply to this program

## **Program Description**

Students in the Integrated Sciences program have the opportunity to take courses from a variety of areas in mathematics, the natural and physical sciences (biology, chemistry, environmental sciences, geology, and physics), and computer science in an interdisciplinary STEM program designed for professional growth in their area of interest. These areas are further explored through a required project or thesis that includes focused independent research on a topic that integrates two or three of the disciplines mentioned above.

The length of time it takes to complete the degree is determined by the student's own schedule flexibility; many finish within two years of full-time work. In accordance with Graduate School Rules, the degree must be completed within seven years of matriculation.

## **Admission Requirements**

Admission into the Integrated Sciences program is competitively based. Minimum requirements for an application to be considered are:

- the graduate application form for the University of Colorado Denver, including all application fees
- a statement of purpose specifying why the applicant wishes to be admitted to the program, the applicant's primary and secondary disciplines of interest, and their academic and professional goals
- three letters of recommendation from individuals who can speak to the applicant's academic qualifications, of which at least two must be from academic sources
- transcripts from all institutions of higher learning attended by the applicant
- a bachelor's degree from an accredited college or university
- a minimum cumulative undergraduate GPA of 3.0 on a 4.0 scale; however, applicants with an undergraduate GPA below 3.0 may be considered if they have taken the Graduate Record Examination (GRE) and if the scores are forwarded to the program office
- 40 semester hours of undergraduate courses in biology, chemistry, computer science, environmental sciences, geology, mathematics, and/or physics

Possessing the minimum requirements will guarantee that the application is considered. It does not, however, guarantee admission. The admissions committee will select students competitively to create a high-quality and balanced cohort of participants entering the program each year.

## **Application Deadline**

Students are admitted for the spring and fall semesters. The deadline for a complete application is April 15 for fall admission and October 15 for spring admission.

## **Core Requirement**

Students are required to enroll in MINS 5200, Research Methods in Interdisciplinary Science, within their first year of the program. This course serves as an introduction to the program and helps students to develop research skills and to further their professional development. This course is offered in the fall semester only.

- MINS 5200 - Research Methods in Interdisciplinary Science

## **Concentration and Breadth Requirements**

The student must designate one area of concentration (the primary area of study) and one or two breadth areas (the secondary and, if applicable, tertiary areas of study) within the disciplines of biology, chemistry, computer science, environmental sciences, geology, mathematics or physics. An interdisciplinary area of study (including but not limited to fields such as biochemistry, biophysics, or computational biology) may also be considered. The student must complete a minimum of nine semester hours in the chosen area of concentration and a minimum of six semester hours in each depth area.

## **Project or Thesis Requirement**

The program provides students with two options as their capstone experience, either a project or a thesis, depending on their academic and professional goals. All students must conduct independent research integrating coursework from the disciplines in their program of study. The research is conducted as either a project (requiring 3-4 semester-hours of MINS 5960) or a thesis (requiring 4-6 semester-hours of MINS 5950), and is presented to their examination committee in both written and oral forms. The student must successfully defend their project/thesis in an oral examination (defense) in order to graduate. Prior to enrolling in Project or Thesis hours, all students must submit a proposal approved by three faculty members (one of whom is their graduate faculty advisor) and the Program Director.

- MINS 5950 - Master's Thesis
- MINS 5960 - Master's Project

## **Graduate Advisor and Examination Committee**

All candidates for the MIS degree must select a faculty advisor and arrange for two other faculty members to serve with the advisor as the candidate's graduate examination committee. The committee members must have graduate standing at the University of Colorado Denver and be approved by the Program Director. The name of the faculty advisor must be submitted to the Program Director at the start of the third semester following matriculation to the program.

## **Degree Total: 30 Hours**

# **International Business MS**

**Program Director:** Manuel G. Serapio, Jr.

**Telephone:** 303-315-8888

**E-mail:** Manuel.Serapio@ucdenver.edu

An MS in International Business (MSIB) from the University of Colorado Denver opens opportunities for dynamic careers in global business. MSIB students gain cutting-edge knowledge and skills to help them conduct business across borders.

Our innovative MSIB curriculum combines solid grounding in business foundations and knowledge of international business environments and operations, from both a multinational corporation and entrepreneurial perspective.

Our degree emphasizes action learning such as live case studies, international consulting projects and internships, and study-abroad trips.

The University of Colorado Denver is the only Colorado university, and one of just 17 universities nationwide, granted the U.S. Department of Education's prestigious designation as a Center for International Business Education Research (CIBER), an honor earned in large part through the excellence of the international business program.

The MS program in International Business requires the completion of the following:

## **Business Prerequisites:**

*Advisors will evaluate transcripts for possible prerequisite waivers.*

Students who choose to take classes for the degree that require prerequisites not previously met, may be required to take additional courses. Completion of prerequisite courses is in addition to the 30 hour MS in International Business degree. One BUSN prerequisite may be counted as a Free Elective. Meeting prerequisites is the responsibility of the student.

### **A. International Business Core I: (3 hours)**

- INTB 6000 - Introduction to International Business

### **B. International Business Core II: (12 hours)**

Complete four of the following courses:

- ENTP 6826 - International Entrepreneurship
- INTB 6022 - International Business Negotiations
- INTB 6026 - Marketing Challenges at the Global Frontier
- INTB 6370 - International Accounting
- INTB 6372 - International Financial Management

- INTB 6500 - International Business Consulting This course is repeatable up to two times with different projects.
- INTB 6800 - Special Topics in International Business Only the following INTB 6800 Special Topics course is acceptable for the International Business Core II: New Global Business Opportunities.
- MTAX 6431 - Inbound International Taxation

## **International Immersion Experience: (3 hours)**

Complete one course from the list below:

- INTB 5939 - Internship  
Work with the Institute for International Business (IIB) or Experiential Learning Center (ELC) for an internship.  
One short-term Global Study program (travel study program offered by the Business School)
- INTB 6500 - International Business Consulting This course may be repeated up to two times with different projects.  
NOTE: Students completing the Global Cross Cultural Studies Specialization must complete INTB 6500 because study abroad coursework is already completed as part of the specialization.

## **D. International Specialization Electives: (9 hours)**

Students must complete one of the following Specializations:

- Digital Globalization
- Global Supply Chain
- Cross Cultural Studies

*Only one specialization may be completed.*

Specific Specialization requirements are listed below.

### **Digital Globalization Specialization**

Complete three of the following courses:

- ENTP 6022 - Digital Strategy for Entrepreneurs
- ENTP 6826 - International Entrepreneurship If not taken to fulfill a core requirement.
- INTB 6024 - International Trade Finance and Management
- INTB 6500 - International Business Consulting This course is repeatable up to two times with different projects.

- INTB 6800 - Special Topics in International Business  
Only the following INTB 6800 Special Topics courses are acceptable for this specialization:
- Transformational Technologies in IB
- Global E-Commerce
- ISMG 6875 - Protecting Information Assets
- RISK 6209 - Cyber Risk Management

## **Global Supply Chain Specialization**

Complete three of the following courses:

- BANA 6730 - Supply Chain Analytics
- INTB 6024 - International Trade Finance and Management
- INTB 6500 - International Business Consulting This course may be repeatable up to two times with different projects.
- INTB 6800 - Special Topics in International Business  
Only the following INTB 6800 Special Topics courses are acceptable for this specialization:
- Global E-Commerce
- Global Sourcing and Procurement
- Transformational Technologies in IB

## **Global Cross Cultural Studies Specialization**

**Complete either Option 1 or Option 2.**

**Option 1:** Approved 9 semester credit abroad program (Work with the International Business Program Director for opportunities).

**Option 2:** One course and two travel study courses for a total of 9 semester hours.

Complete one of the following two courses:

- INTB 6800 - Special Topics in International Business  
Only the following INTB 6800 Special Topics courses are acceptable for this specialization:
  - New Global Business Opportunity
  - Comparative Entrepreneurship

Also complete two Short-term Global Study programs offered by the Business School (Listed as Travel Study on the course schedules) for 6 semester hours.

## **E. Free Elective: (3 hours)**

Complete any graduate business course numbered 6000 or higher with a prefix of ACCT, BANA, BUSN, CMDT, ENTP, FNCE, INTB, ISMG, MGMT, MKTG, MTAX, or RISK. NOTE: some of these courses may have prerequisites of a BUSN course that may not be listed on your degree plan. Check with an academic advisor to see if it is possible to waive the prerequisite based on previous coursework. Students who require additional BUSN courses as prerequisites may count one BUSN prerequisite course as a free elective.

## **Total 30 hours (plus any needed prerequisites)**

A course may not be counted in multiple spaces on the degree plan.

# **Landscape Architecture MLA**

**Interim Chair:** Joern Langhorst

**Email:** joern.langhorst@ucdenver.edu

**Telephone:** 303-315-1023

**Associate Chair:** Leila Tolderlund

**Email:** leila.tolderlund@ucdenver.edu

**Telephone:** 303-315-1028

## **Faculty**

### **Professors:**

Lois A. Brink, MLA, University of Pennsylvania

Ann Komara, MLA, MArch Hist, University of Virginia

### **Associate Professors:**

Joern Langhorst, Dipl. Ing. (MLA), University of Hannover

Jody Beck, MArch, PhD, University of Pennsylvania

### **Assistant Professor: (Clinical Teaching Track):**

Leila Tolderlund, MLA, University of Colorado Denver

### **Instructor:**

Louise Bordelon, PhD, MLA, Louisiana State University

Additional information about faculty in this department can be found on the college's website.

## **Overview**

The Master of Landscape Architecture program balances theory and practice to prepare students to create health, well-being and environmental resilience through design in the public realm. Our fully accredited professional program takes full advantage of our location in the heart of Denver, in the rapidly growing metropolitan area and on the edge between the Great Plains and Rocky Mountains. The program enables students to enter practice and offers distinctive opportunities for students to engage in meaningful projects that impact our communities and our built environment. We educate landscape architects to lead the design and planning process that shape the environment; successful graduates pursue diverse practices and occupations in public and private arenas around the world.

Our students investigate relevant issues through coursework and immersive experiences that challenge them to think critically about the applications and implications for the work we do. While grounded in design and professional skills, the curriculum is structured to fluidly address evolving and urgent concerns for our profession, our communities and our environment through topics such as health and well-being, environmental justice, climate resilience, water in the west, food systems, and emerging sustainable practices.

## **The Degree**

The Master of Landscape Architecture (MLA) curriculum revolves around a sequence of design studios, supported by core content classes and a variety of seminar courses. We deliver a fully accredited Master of Landscape Architecture for first professional degree students and post-professional students (those already holding a Bachelor of Landscape Architecture or Bachelor of Architecture degree).

Our program combines theory and practice, emphasizing design to create health and well-being and environmental resilience through design in the public realm. The curriculum fosters an ethic of responsibility, grounded in natural systems and processes and in an understanding of cultural and community values. Students learn skills working on relevant urban and civic projects in both local and global contexts and at a variety of scales. Studios and other courses engage current issues, define future trends, and explore the role of landscape architecture in a rapidly changing world. Throughout the program, our students learn and apply design and planning skills, approaches and technologies to enhance community, foster equity and environmental balance, conserve and regenerate resources, and create places that hold value for current and future generations.

Denver's vibrant professional design and planning community supports our students through guest lectures and participation in design reviews, internships and mentor programs, and opportunities to visit offices and connect with practitioners and leaders in our fields.

## Program Objectives

The department has developed five broad program objectives in support of our educational mission. These objectives identify what students should know and be able to do by the time they graduate and are linked to a series of measurable student learning outcomes. The five categories are:

- **Design:** Students will be able to formulate questions and arguments about landscape and its role as a significant cultural medium, and determine processes and practices that lead to transformative actions based on ethical, communicative and content knowledge criteria.
- **Communication and Representation:** Students will be able to create and employ appropriate representational media to effectively convey ideas on subject matter contained in the professional curriculum to a variety of audiences, and to articulate and convey ideas orally and in writing.
- **Professional Ethics:** Students will be able to critically evaluate local and global ramifications of social issues, diverse cultures, economic and ecological systems, and professional practice as guiding principles for design thinking and implementation.
- **Content Knowledge:** Students will be able to develop a critical understanding and application of the histories, theories and practices of landscape architecture and its role in reflecting and shaping culture and environments.
- **Research:** Students will be able to develop and apply a diligent, systematic and critical inquiry in support of design and scholarship.

## Central Themes

The MLA program prepares students to address current and future problems and challenges in local, regional and global contexts. An issues-based approach ensures that students will be exposed to and participate in the development of new responses to emergent and ongoing crises and opportunities, emphasizing environmental and social justice as a key element for the design of livable, sustainable and resilient places and landscapes. Examples of this are deep in the department's work over the past twenty-five years, with examples such as working for five years with the local community of the Lower 9th Ward in New Orleans addressing issues around recovery after Hurricane Katrina, and the Learning Landscapes program which successfully redesigned almost 100 schoolyards in Denver, an initiative which is now focused on Philadelphia schools. Recently we have addressed issues of water, food scarcity and urban agriculture in Denver, the redesign and recovery of post-industrial sites and mining landscapes throughout the state, and issues of health and livability in marginalized and underserved communities and neighborhoods. Many of these projects have involved multiple courses over several years, and have made major impacts on the places and communities they have engaged. Students are immersed in opportunities to not just learn, but to make meaningful

change, and interact with community members and professionals from many different backgrounds and disciplines, gaining invaluable experience and skills in working and communicating in interdisciplinary teams.

## **Big Thinking**

We believe that the issues, challenges and opportunities landscape architects face are interrelated, spanning all scales from a small private yard to neighborhood to city to region to the world, and involve a wide range of social, cultural, ecological and economic systems, requiring critical and creative thinking that transcends scales and is cross-, trans- and interdisciplinary.

## **Critical Issues**

We strongly believe that Landscape Architecture is uniquely positioned to make major contributions to the big and urgent questions and issues that affect human and non-human systems. Climate change, resource scarcity, water and food are as critical as the design and building of landscapes and places that are about more than just sustainability and resilience and provide opportunities for people to thrive.

## **Meaningful Change**

While the functioning and performances of human and non-human systems are critical, good design does more than just provide solutions to problems. It provides opportunities for people to interact with places over time, it empowers them to understand the dynamics that affect their environments and to participate in the ongoing processes of changing place and changing communities, thus becoming authors and co-authors of the places they shape and inhabit.

## **LANDSCAPE ARCHITECTURE MLA**

### **Prerequisites**

Students are expected to have achieved a basic level of computer literacy prior to enrolling in the first semester of classes. The department offers a required Introductory Skills Workshop for students before classes begin that is particularly helpful for students who do not have a background in drawing or computer graphics. The workshop is scheduled each year prior to the beginning of fall semester.

### **Program Requirements**

The landscape architecture program offers first professional and post-professional graduate courses leading to the degree Master of Landscape Architecture (MLA). The program is fully

accredited by the Landscape Architecture Accreditation Board (LAAB) and recognized by the Council of Educators in Landscape Architecture (CELA).

- The first-professional degree program requires a six-semester sequence of course work totaling 90 semester hours.
- The post-professional degree program is for qualified students who have already earned a first professional degree in landscape architecture (BLA) or related discipline. It requires a minimum of 60 semester hours. Advanced standing is based on prior academic accomplishment.
- Students completing the College of Architecture and Planning's BSArch degree or an accredited undergraduate design degree at another institution may be given advanced standing in the three-year program. Advanced standing is based on prior academic accomplishment, and is evaluated on an individual basis upon acceptance into the program.

## Course Sequence (First Professional Degree)

**(90-semester-hour MLA for students without a professional degree in landscape architecture or related professional field)**

The curriculum consists of core and elective course work, including the immersive semester.

	<i>Semester hours</i>
Design Studios	33
History and Theory	12
Site Works	12
Media	12
Critical Practice	6
MLA Electives	9
General Electives	6
<i>Total courses</i>	90

**Typical 90-semester-hour sequence of courses for the first professional MLA degree (subject to change)**

### First Year

## Fall

- LDAR 5510 - Graphic Media in Landscape Architecture
- LDAR 5521 - History of Landscape Architecture
- LDAR 5572 - Landscape Ecology
- LDAR 6631 - Landscape Construction Materials and Methods
- LDAR 6641 - Computer Applications in Landscape Architecture

**Total: 15 Hours**

## Spring

- LDAR 5500 - Introductory Landscape Architecture Design Studio
- LDAR 5532 - Landform Manipulation
- LDAR 5540 - Introduction to GIS
- LDAR 6620 - Landscape Architecture Theory and Criticism
- LDAR 6630 - Site, Society and Environment

**Total: 15 Hours**

## Second Year

### Fall

- LDAR 5502 - Landscape Architecture Design Studio 2
- LDAR 6949 - Research Tools & Methods
- LDAR 6670 - Plants in Design
- One elective. **Semester hours: 3**

**Total: 15 Hours**

### Spring

- LDAR 5503 - Landscape Architecture Design Studio 3
- LDAR 6604 - Landscape Architecture Design Studio 4
- LDAR 6605 - Landscape Architecture Design Studio 5
- One elective. **Semester hours: 3**

**Total: 15 Hours**

## Third Year

### Fall - Immersive Semester

- LDAR 6706 - Advanced Landscape Architecture Design Studio Immersive (travel may be required)
- LDAR 6740 - Advanced History/Theory Seminar - Immersive Semester
- LDAR 6745 - Advanced Media/Technology Seminar - Immersive Semester
- LDAR 6750 - Professional Practice

**Total: 15 Hours**

### Spring

- LDAR 6607 - Landscape Architecture Design Studio 7
- LDAR 6608 - Landscape Architecture Design Studio 8
- Studio Alternative: Landscape Architecture Thesis (requires department approval)
- Three Electives. **Semester hours: 9**

**Total: 15 Hours**

## Course Sequence (Advanced Professional Degree)

**(60-semester-hour MLA for students with a professional degree in landscape architecture or related disciplines)**

The curriculum typically requires 60 semester hours and two years of full-time study, with the Immersive Studio and its concurrent courses in the fall of the second year. The core curriculum consists of three groups:

	<i>Semester Hours</i>
Design	24
History and Theory	9-12
Media	3-9
Electives	3-9
<i>Total courses</i>	60

The department chair or associate chair will advise each student engaged in this program of study.

## **Thesis**

The graduate thesis in landscape architecture provides an opportunity for students to conduct independent research and design investigations that demonstrate their capacity for rigorous original thinking. The thesis is not required for graduation and not all students are approved to write a thesis. Choosing to pursue a thesis project constitutes a significant commitment to the endeavor; the topic must be chosen with care and thoughtfully and critically developed. Topics can explore material that has been previously unstudied, reinterpret existing material in a new light, or engage research and design practices in ways that strengthen and define the final project. For all theses, the research and products must meet the highest standards of academic excellence and contribute significantly to the discipline and/or profession.

Pursuing a thesis requires students to enroll in a three-course sequence for a maximum total of 12 semester hours. Students are required to formulate their research proposals two full semesters prior to their enrollment for the 6-semester-hour thesis, typically taken in lieu of the final studio. To proceed through the sequence, students must have completed and passed the research tools and methods class (LDAR 6949) and have secured departmental approval of the thesis proposal. The completion of the thesis is dependent on acceptance of the student's work by the faculty member acting as the thesis chair and by the committee. For work to be accepted it must meet the standards established by the University of Colorado Denver for graduate thesis projects.

## **Dual Degree and Certificate Options**

Students may enroll in a dual degree program with architecture (MArch) or urban and regional planning (MURP).

Students may apply to the concurrent degree option for the one-year (36 credit) Master of Urban Design (MUD) degree, for which up to 12 credits of advanced standing is possible.

Students also may be selected through an application process to participate in our exchange program with Tongji University in Shanghai, China; this is in place for the spring semester of the second year.

A certificate in Geospatial Information Science (GIS) for Landscape Architecture is also available to students interested in pursuing geospatial design.

# Leadership for Educational Organizations (non-licensure): Early Childhood Education Concentration

The Leadership for Educational Organizations MA concentration area in Early Childhood Education was developed for alumni of the Buell Early Childhood Leadership Certificate and serves to prepare leaders for positions in early childhood education. Buell alumni will utilize 15 of the graduate-level ECED credits earned as part of the Buell Early Childhood Leadership Certificate to this master's degree, and will complete an additional 15 credit hours to obtain the LEOS MA: Early Childhood Education degree. The content of this concentration focuses on leadership for equity and social justice.

This 30 credit hour degree is designed to be completed in approximately one year after completion of the one year Buell Early Childhood Leadership Certificate program. Curriculum focuses on leadership for equity and social justice and consists of an additional 15 credit hours of coursework as follows:

## **Leadership Core (12 semester hours):**

EDUC 5651 - Foundations of Leadership

EDUC 5652 - Leadership for Equity/Social Justice

EDUC 5653 - Leadership Practices for Responsive Change

EDUC 5654 - Leadership Practice Capstone

## **Research Methods (Choose one 3 semester hour course from options below):**

RSEM 5100 - Basic Statistics (recommended if you have never taken a statistics course)

RSEM 5110 - Introduction to Measurement

RSEM 5120 - Introduction to Research Methods

# Leadership for Educational Organizations EdS with Principal Licensure

The EdS degree program affords the opportunity for advanced graduate study and is available to those who already hold a master's degree (completed prior to admission into the EdS LEO program.) For the specialist degree, students will complete 9 semester hours of faculty advisor approved graduate-level coursework that constitute an area of focus, in addition to the 32 semester hours required in the Principal Licensure program. The Leadership for Educational Organizations EdS requires a total of 41 semester hours of coursework. Candidates must also successfully complete a comprehensive exam in the final semester. The Comprehensive exam will include one of two options:

1. Academic Paper / Multimedia Product(s) Summarizing Learning Across Courses and the Colorado Principal Quality Standards (CPQS)
2. Performance Assessment Targeting a Focused Subset of the CPQS

The 9 semester hours beyond the 32 semester hour principal licensure program must constitute an area of focus and/or a specific advancement of knowledge and skills for the license. Students can choose 9 semester hours (3 courses) from the following options (or receive faculty approval for other relevant graduate-level coursework):

EDUC 7100 - Leadership in Education

EDUC 7230 - Organizational Performance In Educational Contexts

EDUC 7500 - Strategic Human Capital Development

EDUC 7510 - Strategic Organizational Management

EDUC 7520 - Strategic System Improvement

EDUC 7530 - Strategic Leadership Development

## **Leadership for Educational Organizations MA Principal Licensure**

The MA is designed for those who do not already hold a graduate degree. Master's students will complete 32 semester hours required in the Principal Licensure, for a total of 32 semester hours of coursework. Candidates must also successfully complete a comprehensive exam in the final semester. The Comprehensive Exam will include one of two options:

1. Academic Paper / Multimedia Product(s) Summarizing Learning Across Courses and the Colorado Principal Quality Standards (CPQS)
2. Performance Assessment Targeting a Focused Subset of the CPQS

# Learning Design and Technology: eLearning Design and Implementation MA

The focus of this track is on the planning, design, development, delivery, facilitation and evaluation of digital and online learning resources, experiences, and programs for higher education, K-12, and professional-learning (corporate, healthcare, government, non-profit) audiences. Throughout the program, you will apply learning, instructional and media design, and professional-development theory to the creation of digital and online instructional products and experiences while encouraging innovation and positive change within your organization. You will submit an online portfolio in the final semester, referred to as a base camp. The base camp helps you establish your professional web presence and digital footprint as a thought leader and helps showcase your accomplishments and share your work with your professional communities of practice. The entire program is online, and may be completed in two years.

## eLearning Design and Implementation MA program requirements

**30 semester hours (each course is 3 semester hours):**

**Core, 24 semester hours:**

INTE 5100 - Planning and Designing for Instruction
INTE 5665 - Learning with Social Media and Networking
INTE 5680 - Producing Media for Learning
INTE 5670 - Creating Synchronous eLearning Experiences
INTE 5711 - Creative Designs for Instructional Materials
INTE 6750 - Trends and Issues in Learning Design and Technology
INTE 5660 - Developing Self-Paced Online Modules

INTE 6720 - Research in Learning Design and Technology
--

**Electives, Choose two courses (6 semester hours):**

INTE 5250 - Teaching Strategies for Online and Blended Learning
---

INTE 5200 - Crafting eLearning Experience
---

INTE 5320 - Games and Learning
--------------------------------

INTE 5340 - Learning with Digital Stories
---

INTE 6930 - Internship: Learning Technologies
---

INTE 6999 - Leadership for Technology Innovation
--

INTE 5000 - Design Thinking and Educational Innovation
--

**Comprehensive Examination for all LDT Students**

The comprehensive exam consists of a professional portfolio, referred to as a base camp, wherein students demonstrate program competencies through work products and related accomplishments. The base camp is created throughout the LDT program and submitted for faculty review during the final semester. For more information, see the LDT Current Student Resources website <https://education.ucdenver.edu/academic-services/student-resources/graduate/learning-design-technology>.

# **Learning Design and Technology: Digital Media for Teaching and Learning (K-12) MA**

Students in this track may select a plan with or without an endorsement program in instructional technology. Courses in the endorsement option focus on the practical needs of teachers in their integration of technology and on ways to give leadership and professional development opportunities to your school and district. The plan of study is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and is designed in line with the

International Society for Technology in Education (ISTE) Standards for Educators and the standards of the Colorado Department of Education (CDE.) You will submit an online portfolio in the final semester, referred to as a base camp. The base camp serves as a learning resource for your students, colleagues, and other professionals. The courses in this program are fully online unless specified otherwise, and the program may be completed in two years.

**Digital Media for Teaching and Learning K-12 MA program with Instructional Technology Endorsement requirements**

**30 semester hours (each course is 3 semester hours):**

INTE 5665 - Learning with Social Media and Networking
INTE 5200 - Crafting eLearning Experience
INTE 5340 - Learning with Digital Stories
INTE 5320 - Games and Learning
INTE 5250 - Teaching Strategies for Online and Blended Learning
INTE 6750 - Trends and Issues in Learning Design and Technology
Select one: INTE 5711 - Creative Designs for Instructional Materials <b>or</b> INTE 5680 - Producing Media for Learning
INTE 6720 - Research in Learning Design and Technology
INTE 6999 - Leadership for Technology Innovation
INTE 6930 - Internship: Learning Technologies

**Personalized Professional MA Learning Design and Technology without Endorsement, Digital Media for Teaching and Learning requirements**

For the Digital Media for Teaching and Learning concentration there are 3 required core courses (9 semester hours.) In consultation and with approval from your faculty advisor (mentor), select 5 graduate-level courses (15 semester hours) from Advisor-approved "Thematic Course Categories" to customize your learning. Finally, take the required research

course (3 semester hours) and then complete the Capstone course (3 semester hours) for a total of 30 semester hours. This plan does NOT lead to an endorsement.

**30 semester hours (each course is 3 semester hours):**

**Core, 9 semester hours:**

INTE 5340 - Learning with Digital Stories
INTE 5320 - Games and Learning
INTE 5665 - Learning with Social Media and Networking

**Thematic Course Categories, 15 semester hours (requires Faculty Advisor approval):**

Course 1
Course 2
Course 3
Course 4
Course 5

**Research and Capstone, 6 semester hours:**

INTE 6720 - Research in Learning Design and Technology
INTE 6930 - Internship: Learning Technologies

**Comprehensive Examination for all LDT Students**

The comprehensive exam consists of a professional portfolio, referred to as a base camp, wherein students demonstrate program competencies through work products and related accomplishments. The base camp is created throughout the LDT program and submitted for faculty review during the final semester. For more information, see the LDT Current Student Resources website <https://education.ucdenver.edu/academic-services/student-resources/graduate/learning-design-technology>

# Learning Design and Technology: Instructional Design and Adult Learning MA

This track is designed to help you develop skills for creating quality instructional materials and professional-learning experiences that help adult-learning audiences learn and perform better on the job. Throughout the program, you will apply learning, instructional design (ID), and professional-development principles to the creation of digital and web resources, multimedia presentations, job aids, and online learning modules. These skills are in high demand in corporate, healthcare, government, non-profit, and higher education settings. You will experience interactive learning, hands-on projects, and collaborative teamwork as you develop expertise in core ID skills: creating curriculum, evaluating program quality, encouraging innovation, and leading organizations toward productive change and growth. You will submit an online portfolio in the final semester, referred to as a base camp. The base camp helps you establish your professional web presence and digital footprint as a thought leader and helps showcase your instructional-design accomplishments to employers and other professionals. The courses in this program are fully online unless specified otherwise, and the program may be completed in two years.

## Instructional Design and Adult Learning MA program requirements

**30 semester hours (each course is 3 semester hours):**

**Core, 15 semester hours:**

INTE 5100 - Planning and Designing for Instruction
INTE 5665 - Learning with Social Media and Networking
INTE 6750 - Trends and Issues in Learning Design and Technology
INTE 5711 - Creative Designs for Instructional Materials
INTE 6720 - Research in Learning Design and Technology

**Electives, Choose five courses (15 semester hours):**

INTE 5660 - Developing Self-Paced Online Modules
INTE 5320 - Games and Learning
INTE 5670 - Creating Synchronous eLearning Experiences
INTE 5680 - Producing Media for Learning
INTE 5200 - Crafting eLearning Experience
INTE 5250 - Teaching Strategies for Online and Blended Learning
INTE 5340 - Learning with Digital Stories
INTE 6930 - Internship: Learning Technologies
INTE 6999 - Leadership for Technology Innovation
INTE 5000 - Design Thinking and Educational Innovation

**Comprehensive Examination for all LDT Students**

The comprehensive exam consists of a professional portfolio, referred to as a base camp, wherein students demonstrate program competencies through work products and related accomplishments. The base camp is created throughout the LDT program and submitted for faculty review during the final semester. For more information, see the LDT Current Student Resources website <https://education.ucdenver.edu/academic-services/student-resources/graduate/learning-design-technology>.

**Learning Design and Technology:  
Teacher Library MA**

The Teacher Library program within the LDT master's degree program is a revised and approved teacher librarian education program that leads to the Colorado Department of Education endorsement for teacher librarians. The program integrates 21st Century Learning Standards as approved by the American Association of School Libraries with CDE content standards and

leadership competencies. As a teacher librarian, you will provide collaborative instructional planning, facilitation of professional learning, utilization of information and media literacy, online instructional resources, and leadership through the management of your library program.

Students in this track may select a plan with or without an endorsement program in teacher librarianship. The courses in this program are fully online unless specified otherwise. Once admitted, students begin a plan of study that typically takes about two years to complete. You will create an online portfolio, referred to as a base camp. The base camp serves as a learning resource for your students, colleagues, and other professionals. Consult the program website <https://education.ucdenver.edu/academic-services/student-resources/graduate/learning-design-technology> for more information about specific plans of study, course offerings and expectations of the program.

## Program Requirements

LDT-Teacher Library students also have a choice between a teacher librarian endorsement and a full master's program with a teacher-librarian endorsement. The endorsement only option requires a minimum of 24 graduate semester hours. The master's program requires a minimum of 30 graduate semester hours. Students complete a plan of study consisting of courses and professional field experience. Students must be licensed as a teacher or plan to complete a teacher license prior to seeking the additional endorsement as a Teacher Librarian. This is a Colorado Department of Education requirement. Students may complete the master's program without earning the endorsement.

Courses are offered only in certain semesters and courses should be taken in a particular sequence based on when you start the program. Advising is required prior to enrolling in a course, even as a non-degree student, in order to ensure the most effective course sequencing and availability of courses.

### 30 Credit MA Degree Plan of Study

<b>Prefix: Course Title</b>	<b>Term offered:</b>	<b>Credits</b>
SCHL 5100 - School Libraries in the Digital Age	Fall	3
SCHL 5030 - Information Literacy	Fall	3
SCHL 5160 - Managing School Libraries	Spring	3
INTE 6720 - Research in Learning Design and Technology	Spring	3

SCHL 5200 - Promoting Literature in Schools	Summer	3
SCHL 5913 - School Library Field Experience	Fall	3
INTE 5300 - Media Literacy	Summer	3

## CONCENTRATION

Choose three courses from INTE or from one of SEHD or LDT certificate programs with advisor approval.	9
---	---

## Comprehensive Examination for all LDT Students

The comprehensive exam consists of a professional portfolio, referred to as a base camp, wherein students demonstrate program competencies through work products and related accomplishments. The base camp is created throughout the LDT program and submitted for faculty review during the final semester. For more information, see the LDT-Library Current Student Resources website.

# Learning, Developmental and Family Sciences MA

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**Fax:** 303-315-6311

**E-mail:** academicservices@ucdenver.edu

**Website:** www.ucdenver.edu/education

## Faculty

Faculty information is available online at <https://education.ucdenver.edu/about-us/faculty-directory>

## Master's Degree

The MA program in Learning, Developmental and Family Sciences (LDFS) prepares students to facilitate the teaching/learning process and to lead and work in community-based

environments. Thus, many students pursue the degree to enhance their skills as professional classroom teachers or lead in the community. The degree also provides skills necessary for a variety of roles in educational and teaching settings or community environments where knowledge of learning, development, understanding family and community systems, motivation, and research is essential such as teaching at the community college and teaching-based colleges and universities levels, teaching adults, consulting, developing assessments, community-based leadership, and conducting program development and evaluation. Other students seek the MA as preparation for advanced study in educational psychology, family science and human development, research, or related fields.

## **Areas of Study**

Two major areas of concentration are available- learning and human development and family relations:

- Regardless of the concentration area selected, all students must demonstrate competence in Learning, Developmental and Family Sciences by successfully completing 30 semester hours of relevant course work;
- Students complete a capstone experience, either an applied project or a master's thesis in consultation with their faculty advisor based on the students' professional and academic goals. Please see final capstone section for more details.

## **Learning**

The concentration is committed to the systematic study of psychological, social, and cultural processes of learning and development, and design of environments that support learning and development, drawing upon multidisciplinary nature of work. The concentration examines learning in various formal and informal contexts (e.g., learning in classrooms, schools, centers, communities, homes) from multiple perspectives (e.g., psychological, sociocultural, design-based, neuroscience). Within the networks of professional and academic communities, students will engage in designing adaptive learning environments that facilitate optimal learning and developmental opportunities for participants in diverse educational and community contexts, including our unique urban context. The Learning concentration offers courses such as: Human Learning; Human Development Over the Life Span; Designing Environments for Learning and Development; Cognition and Instruction; Motivation in Contexts; Mind, Brain and Education; Advanced Child Growth and Development; and Social Contexts of Adolescence.

## **Human Development and Family Relations (HDFR)**

Students will engage in developing their skills to work in and lead community-based organizations including, but not limited to secular, faith-based, for profit, nonprofit, school-

based, and local, state, federal and international organizations. The importance of family diversity and social justice is stressed throughout the HDFR curriculum through its courses and experiences. Students can also develop their knowledge in family relations in preparation for doctorate studies in family science and human development or related areas.

The LDFS program does provide a pathway for MA students (HDFR and Learning areas) to pursue their PhD in Education and Human Development with a Family Science and Human Development concentration. For more information, please visit our School of Education and Human Development.

The HDFR area also provides classes to all School of Education and Human Development (SEHD) graduate programs, offering courses in family theories, family dynamics, and diverse family systems, Latino family, school and community systems, family resource management, leadership and organizations, grant writing and fundraising, program development and other family relations based courses.

### **Final Capstone Culminating Applied Project/Thesis**

All LDFS MA students (D1--Downtown Campus) will complete a Capstone Applied Project or Thesis to be able to graduate from the LDFS MA regardless of concentration area. Students who are graduating in the Fall, Spring or Summer of their last year of studies will register for LDFS 6950 Culminating Capstone Experience. LDFS 6950 will only be offered in the Fall semester of each academic year. There will be no Spring or Summer LDFS 6950 sections offered. LDFS 6950 has two focuses, the Applied Project and the second focus the Thesis. The Applied Project is generally completed in one semester during the Fall LDFS 6950 class. However, if a student requires an additional semester that student would have to receive permission from the LDFS 6950 faculty teaching that course section during the Fall semester and their faculty advisor for the additional time. The second focus the Thesis will require 2 semesters to complete or 1 semester and a Summer Session. Please keep in mind the Thesis often requires university approval and IRB approval for Human Subjects research. Students will receive a letter grade upon completion of their Capstone. Students are expected to attend one of the required LDFS MA Capstone Orientation provide by the LDFS faculty during the Fall and Spring semester of each academic year. For more specific details concerning the Capstone please contact your faculty advisor.

## **Literacy Education MA**

For the MA in Literacy Education, there are 3 required core courses (9 credits hours). In consultation and with approval from your faculty advisor, select 5 courses from the SEHD Thematic Course Categories list to customize your learning (15 credit hours). For instance, you may want to focus on courses that would improve your elementary or secondary teaching and leadership abilities. Finally, take a research course (3 credit hours) and then complete the Capstone course (3 credit hours) for a total of 30 credit hours.

**This degree plan does not include a license or an endorsement.**

### **Literacy Core Courses** (9 credit hours)

- LCRT 5720 - Writing Development, Instruction and Assessment
- LCRT 5020 - Reading Development, Instruction and Assessment
- LCRT 5055 - Literacy Assessment & Informed Instruction

### **Thematic Course Categories** (15 credit hours)

In consultation and with approval from your faculty advisor, select five courses from the Thematic Course Categories to customize your learning.

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

### **Concentration Research Course** (3 credit hours)

- RSEM 5050 - Classroom Assessment **or** RSEM 5080 - Research In Schools
- **Or** other RSEM courses with Advisor Approval

### **Concentration Capstone Course** (3 credit hours)

- LCRT 6915 - Seminar and Practicum in Literacy Professional Development

### **Total Credit Hours 30**

### **Cumulative Portfolio**

The MA portfolio counts as the comprehensive exam for the master's degree. The portfolio is an accumulation of the performance based assessments completed during program courses and reflects on the student's development over the course of the degree program.

### **Program Requirements and Courses**

To complete the Literacy Education program and earn a master's degree and/or endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester, and up to two courses each summer. Plan carefully because some courses are only offered once a year.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Literacy Education MA in English Education**

This MA degree prepares licensed Secondary English or Secondary language arts teachers to work with diverse adolescents as they develop an appreciation for literature and composition. Course work includes theory and methods of English education, linking assessment and instruction, and practicum experience. The study of contemporary, ethnic, and classic literature, reading, and writing are woven together, along with speaking, listening, and viewing.

### **Concentration Courses** (9 credit hours)

- LCRT 5200 - Theory and Methods of English Education
- LCRT 5201 - Adolescent Literature
- LCRT 5720 - Writing Development, Instruction and Assessment

### **English and Inventory Courses** (15 credit hours)

- ENGL \_\_\_\_\_ (in Literature, Writing, Film, or Language Study)
- ENGL \_\_\_\_\_ (in Literature, Writing, Film, or Language Study)
- ENGL \_\_\_\_\_ (in Literature Writing, Film, or Language Study) **or** Choice Course from SEHD Thematic Course Categories with Advisor Approval
- \_\_\_\_\_ Choice Course from SEHD Thematic Course Categories with Advisor Approval
- \_\_\_\_\_ Choice Course from SEHD Thematic Course Categories with Advisor Approval

### **Research** (3 credit hours)

- RSEM 5050 - Classroom Assessment **or** RSEM 5080 - Research In Schools
- **Or** other RSEM course with Advisor Approval

### **Capstone** (3 credits)

- LCRT 6915 - Seminar and Practicum in Literacy Professional Development

### **Total Credit Hours 30**

### **Cumulative Portfolio**

The MA portfolio fulfills the comprehensive exam requirement for the master's degree. The portfolio is an accumulation of the performance based assessments completed during program courses and reflects on the student's development over the course of the degree program.

### **Program Requirements and Courses**

To complete the Literacy Education program and earn a master's degree, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester, and up to two courses each summer. Plan carefully because some courses are only offered once a year.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Literacy Education MA with Reading Teacher K-12 Endorsement**

This MA with endorsement is designed for K-6 and 7-12 teachers and is credentialed meeting the Colorado Department of Education requirements for the Reading Teacher endorsement. Recommendations for endorsements are made by the program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (<http://www.cde.state.co>) or another state in which they wish to be endorsed for the most updated endorsement requirements. Please note that the Colorado Department of Education also requires 2 years of post-licensing teaching experience and a passing score on the Reading Teacher PRAXIS exam for the application for the reading teacher endorsement after graduation.

This degree is available on-campus or completely online.

**Literacy Core Courses** (9 credit hours)

- LCRT 5810 - Oral & Written Language & Literacy
- LCRT 5020 - Reading Development, Instruction and Assessment
- LCRT 5055 - Literacy Assessment & Informed Instruction

### **Content Courses** (15 credit hours)

- LCRT 5710 - Primary Literacy for Diverse Learners, Pre K-Grade 3 **or** LCRT 5730 - Language and Literacy Across the Curriculum
- LCRT 5720 - Writing Development, Instruction and Assessment
- LCRT 5795 - Current Children's Literature **or** LCRT 5201 - Adolescent Literature
  - (Or LCRT 5780 , or LCRT 5790 are offered occasionally)
- LCRT 6910 - Seminar & Practicum in Literacy and Language
- Choice from SEHD Thematic Course Categories list with Faculty Advisor Approval

### **Research Course** (3 credit hours)

- RSEM 5050 - Classroom Assessment **or** RSEM 5080 - Research In Schools
- **Or** other RSEM course with Advisor Approval

### **Capstone** (3 credit hours)

- LCRT 6915 - Seminar and Practicum in Literacy Professional Development

Portfolio (Comprehensive Exam)

### **Total Credit Hours 30**

### **Cumulative Portfolio**

The MA portfolio fulfills the comprehensive exam requirement for the master's degree. The portfolio is an accumulation of the performance based assessments completed during program courses and reflects on the student's development over the course of the degree program.

### **Program Requirements and Courses**

To complete the Literacy Education program and earn a master's degree and endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester, and up to two courses each summer. Plan carefully because some courses are only offered once a year.

## **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **MA in Special Education**

The 30 credit hour Personalized Professional MA path provides the opportunity for you to personalize your coursework to your specific professional goals as an educator. This MA does NOT lead to a license or an endorsement. A current teaching license is not required for the Personalized Professional MA.

Students in this MA degree plan will choose 3 courses (9 credits) from the SPED core course options. Then, in consultation and with approval from, your faculty advisor, select 5 courses from the Thematic Course Categories to customize your learning (15 credits). Finally, take the Concentration Courses which includes a research course (3 credits) and the Capstone course (3 credits) for a total of 30 credits.

**This degree plan does not include a license or an endorsement.**

**SPED Core Courses:** Choose 3 (9 credit hours)

- SPED 5000 - Universal Design for Learning (UDL)
- SPED 5010 - Intentional Interventions for Exceptional Learners
- SPED 5140 - Assessment: Inquiry, Instruction, & Intervention
- SPED 5151 - Slashing Stigmas: Promoting Positive Behaviors
- SPED 5300 - Family, Professional, and Community Collaboration
- SPED 5500 - Transition and Secondary Methods in Special Education
- SPED 5740 - Intersections of Literacy, Culture, & Exceptionality
- SPED 5780 - Literacy Intervention for Exceptional Learners

**Thematic Course Categories:** (15 credit hours)

In consultation and with approval from, your faculty advisor, select five courses from the Thematic Course Categories to customize your learning.

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

**Concentration Courses:** (6 credit hours)

- RSEM 5080 - Research In Schools

- SPED 5401 - Advanced Seminar in Special Education (Capstone Course)

## **Total Credit Hours 30**

### **Capstone Requirement**

SPED 5401 is the Special Education Capstone class, which fulfills the COMPS requirement for MA students. The intent of the Capstone is to help candidates synthesize learning through a final project that speaks to academic and professional development in the SPED Program. The capstone should tell the story of what was learned, specific areas of interest, and address ongoing barriers experienced in the field. Your Capstone requirements will be fulfilled by completion of SPED 5401.

### **Program Requirements and Courses**

To complete the SPED Education program and earn a master's degree, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester, and up to two courses each summer. Plan carefully because some courses are only offered once a year. Several courses have case study requirements with a K-12 student population. If you are not working in a school, you will consult with your instructor for an alternative assignment.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0 (B average). Please refer to the Student Handbook for information on Academic Probation. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **MA in Special Education with Special Education Generalist (Ages 5-21) Endorsement**

The MA in Special Education with added Special Education Generalist endorsement is designed for currently licensed teachers seeking career advancement and the expertise needed to work effectively with students with special needs and from diverse backgrounds. The program is fully accredited by the Colorado Department of Education and the Council for Exceptional Children.

### **Special Education (21-24 credit hours)\*\***

- SPED 5030 - Understanding (dis)Ability in Contemporary Classrooms (waived if already completed)
- SPED 5300 - Family, Professional, and Community Collaboration
- SPED 5151 - Slashing Stigmas: Promoting Positive Behaviors
- SPED 5500 - Transition and Secondary Methods in Special Education
- SPED 5740 - Intersections of Literacy, Culture, & Exceptionality
- SPED 5780 - Literacy Intervention for Exceptional Learners
- SPED 5140 - Assessment: Inquiry, Instruction, & Intervention
- SPED 5010 - Intentional Interventions for Exceptional Learners
- Additional Courses as Necessary\*\*

### **Advanced Study (9 credit hours)**

- LDFS 6320 - Mind, Brain, and Education
- RSEM 5080 - Research In Schools **or** RSEM 5050 - Classroom Assessment
- SPED 5401 - Advanced Seminar in Special Education

### **Total Credit Hours 30-33**

\*\* Based on a comprehensive record review (i.e. teaching experience & classroom placements), SPED 5933: Internship & Site Seminar (Approximately 192 Hours or 24 days) may be required at the discretion of SPED program faculty.

### **Capstone Requirement**

SPED 5401 is the Special Education Capstone class, which fulfills the COMPS requirement for MA students. The intent of the Capstone is to help candidates synthesize learning through a final project that speaks to academic and professional development in the SPED Program. The capstone should tell the story of what was learned, specific areas of interest, and address ongoing barriers experienced in the field. Your Capstone requirements will be fulfilled by completion of SPED 5401.

### **Program Requirements and Courses**

To complete the SPED Education program and earn a master's degree and endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in

various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

## **Management and Organization MS**

**Program Director:** Kenneth Bettenhausen, Jeffrey Nystrom

**Telephone:** 303-315-8425, 303-315-8407

**E-mail:** Kenneth.Bettenhausen@ucdenver.edu, Jeffrey.Nystrom@ucdenver.edu

The MS Management program prepares students for significant managerial responsibilities in the private and public sectors. Core course requirements provide students with an advanced understanding of how to manage interpersonal dynamics, effectively design organizations, implement planned change and organizational transformations and develop human resources. Students build on this foundation with any four electives in MGMT with the courses that comprise one of the career-focused specializations.

**The specializations include: business strategy and innovation, leadership and change management, managing for sustainability, and a self-directed option.**

The MS management and organization degree requirements are met by the following:

### **Required Core Courses (12 hours)**

- BUSN 6520 - Leading Individuals and Teams
- MGMT 6320 - Leading Organizational Change
- MGMT 6360 - Designing Effective Organizations
- MGMT 6380 - Managing People for Competitive Advantage

### **Specialization Options (18 hours)**

Business Strategy and Innovation

Leadership and Change Management

Managing for Sustainability

Self-Directed

## **Business Strategy and Innovation**

Select 3 courses from the list below, plus any 3 courses numbered 6000 or higher with a prefix of MGMT.

- MGMT 6610 - Business Strategy Lab **OR**
- MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good
- MGMT 6620 Strategic Management (new course beginning fall 2020)
- MGMT 6804 - Bargaining and Negotiation
- ENTP 6020 - Business Model Development & Planning **OR**
- ENTP 6620 - New Venture Operations and Project Management
- INTB 6000 - Introduction to International Business

## **Leadership and Change Management**

Select 3 courses from the list below, plus any 3 courses numbered 6000 or higher with a prefix of MGMT.

- MGMT 6803 - Visionary Leadership
- MGMT 6804 - Bargaining and Negotiation
- MGMT 6808 - Leadership Development
- MGMT 6822 - Business Ethics and Corporate Social Responsibility
- MGMT 6610 - Business Strategy Lab **OR**
- MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good

## **Managing for Sustainability**

Select 3 courses from the list below, plus any 3 courses numbered 6000 or higher with a prefix of MGMT.

- MGMT 6821 - Managing for Sustainability
- MGMT 6822 - Business Ethics and Corporate Social Responsibility
- MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good
- MGMT 6826 - Business and the Natural Environment

- MGMT 6827 - Global Climate Change

## Self-Directed

If students do not wish to pursue a specific specialization within the Management degree, they may self-direct their course selections by choosing 18 hours (6 courses) from courses numbered 6000 or higher with a prefix of MGMT.

**Total: 30 hours**

# Marketing MS

**Program Director:** Vicki Lane

**Telephone:** 303-315-8468

**E-mail:** Vicki.Lane@ucdenver.edu

The MS in Marketing degree is designed to provide the skill sets necessary for you to succeed in Marketing Management careers. These positions include upper-level positions (e.g., Chief Marketing Officer), middle-level positions (e.g., Brand Manager, Advertising Account Executive) and positions for those who interface with an organization's markets (e.g., Marketing Analysts). Your MS in Marketing degree from the University of Colorado Denver consists of 10 courses as follows:

- Common Core - 7 courses (21 semester hours)
- Elective/Specialization Option - 3 courses (9 semester hours)

Everyone completes the same 7 common core courses and then can choose either three marketing electives with a MKTG prefix) or a Specialization option that consists of 3 courses. For the Specialization, you can choose from four "*Signature*" Specializations, three Cross-Over Specializations, or customize your program with three graduate marketing (MKTG) courses of your choice.

## Required Core Courses (21 hours)

- BUSN 6560 - Marketing Dynamics in the 21st Century
- MKTG 6010 - Marketing Strategy
- MKTG 6020 - Marketing Challenges at the Global Frontier
- MKTG 6040 - Services Marketing for Traditional and Creative Industries
- MKTG 6050 - Market Research Analytics I
- MKTG 6060 - Consumer Intelligence--Psychology and Behavior
- MKTG 6200 - Marketing Intelligence and Metrics

## **Marketing Electives or Specialization: (9 hours)**

Students may select any course numbered 6000 or higher with a **MKTG** prefix **OR** students may choose from the marketing specializations.

The specializations are areas of focus that will appeal to those who have specific interests or are looking to apply their marketing acumen in particular contexts (e.g., interface with engineering or work in a multinational or nonprofit environment).

The Signature Specializations include: Advanced Market Analytics in a Big Data World; Brand Communication in the Digital Era, Marketing Intelligence and Strategy in the 21st Century; and Sports and Entertainment Business( see special degree requirements).

The Cross-Over Specializations include: Global Marketing; High-Tech Entrepreneurial Marketing; and Marketing and Global Sustainability.

Courses required for each of the specializations are listed with the specific specializations below:

### **Advanced Market Analytics in a Big Data World**

Marketing and survey researchers gather information about what people think, measure customer satisfaction and repurchase intentions, help companies decide what goods and services to offer and at what price, and detect up-and-coming trends. Marketing researchers need good quantitative skills, strong analytical skills and a good understanding of marketing and buyer behavior. Many of our alumni got their starts in marketing research positions. According to the U.S. Bureau of Labor Statistics, employment is expected to grow faster than average with the best job opportunities for those with an MS marketing degree (Don't just take our word for it; check out <http://www.bls.gov/oco/ocos013.htm>).

- MKTG 6090 - Big Data Customer Relationship Management
  - MKTG 6051 - Market Research Analytics II
- Complete any one MKTG 6000 or higher course.

### **Brand Communication in the Digital Era**

Are you interested in a career in advertising, promotions or public relations? How about furthering your career in marketing management? Advertising, promotion and public relations managers are creative, highly-motivated individuals who are flexible yet can meet a deadline. They need good verbal and written communication skills and the ability to work well with people. Similar talents are needed by those involved with brand management. This task is central to all marketers, especially those involved with perceptual positioning and the deliverance of positions in a target market (e.g., those working in any phase of market communication and R&D) The U.S. Bureau of Labor Statistics reports that, because of the high

visibility of these positions, these managers are often prime candidates for top C-level positions. The job outlook remains promising but competition will be keen, and the best opportunities will go to those with an MS in marketing or an MS marketing /MBA dual degree. (Don't take our word for it, see <http://www.bls.gov/oco/ocos020.htm>).

**Required:**

- MKTG 6070 - Brand Identity & Marketing Communication Strategy
  - MKTG 6092 - Digital Media Marketing - Tools and Analytics
- Complete one MKTG 6000 or higher course.

## Global Marketing

One of the growing themes of the 21st century economy is the growth of world trade. There is continuing demand for individuals who understand the how to conduct marketing across many different international environments as well as rapidly growing areas such as China and the emerging markets. This specialization prepares you to effectively compete and succeed in this environment.

**Required Course:**

- ENTP 6826 - International Entrepreneurship
- Complete one of the following courses:
- INTB 6020 - Cross-Cultural Management
  - MKTG 6830 - Marketing & Global Sustainability
- Complete either one MKTG 6000 or higher course, one INTB 6000 or higher course, or one ENTP 6000 or higher course with a global focus.

## High-Tech/Entrepreneurial Marketing

The American economy was built on a spirit of innovation, hard work and entrepreneurship, and this is surely going to be the path that assures continued American dominance in the technology and business development fields. Most smart innovators know that, in addition to the financial and managerial aspects of a business, it is the marketing function that often makes the difference between success and failure. Whether your interest is in corporate intrapreneurship and the development of high-technology oriented innovations or individual entrepreneurship and the development of a small business with minimal funds, knowing how to create and implement appropriate marketing strategies is fundamental to achieving your goals. This specialization allows you to focus on the type of new business creation path that best suits your aspirations while greatly enhancing your endeavors probability of success. If you aspire to be the next Bill Gates, this is a "must take" degree path for you.

**Required:**

- ENTP 6842 - New Concept Development  
Complete one of the following courses:
- ENTP 6020 - Business Model Development & Planning
- ENTP 6620 - New Venture Operations and Project Management
- ENTP 6644 - Impactful Social Innovation
- ENTP 6801 - Building Biotechnology
- ENTP 6822 - Legal and Ethical Issues of Entrepreneurship
- ENTP 6826 - International Entrepreneurship  
Complete one MKTG 6000 or higher course.

## Marketing and Global Sustainability

The world has changed. More than ever, companies around the globe need to introduce smart, sustainable brands to lead the way into the future. The strong core of MS marketing courses will give you the skills to become an effective marketing manager, while the specialized set of sustainability courses will give you the knowledge to work toward a better tomorrow. The sustainability courses will focus on the triad of economic, environmental and social sustainable development.

### Required:

- MKTG 6830 - Marketing & Global Sustainability  
Complete one of the following courses:
- MGMT 6821 - Managing for Sustainability
- MGMT 6822 - Business Ethics and Corporate Social Responsibility
- MGMT 6826 - Business and the Natural Environment
- MGMT 6827 - Global Climate Change

## Marketing Intelligence and Strategy in the 21st Century

According to the Bureau of Labor, in 2015 the median salary for Marketing, Advertising, and Promotions Managers was \$124,850. This Specialization is designed to prepare students for these careers across various industries, whether services, products, global, or domestic. It provides a balance across strategy and intelligence. Skills, interests, and capabilities that are relevant include the following:

- Savvy in cultivating and maintaining business relationships
- Capacity to communicate effectively
- Interested in understanding how consumer psychology affects market success
- Fascinated with popular culture and its creation of market opportunities
- Captivated by the integration of branding with media, entertainment, and sports
- Intrigued by the "Internet of things" and how this is changing the relationships between organizations and consumers

- Focused on Creative approaches to business challenges
  - Ability to think "out-of-the-box" and generate new ideas to solve market problems
  - Knack for planning and organization
  - Skill in managing people and resources
- Complete the following required courses:
- MKTG 6070 - Brand Identity & Marketing Communication Strategy
  - MKTG 6090 - Big Data Customer Relationship Management
- Complete one MKTG 6000 or higher course.

## **Sports and Entertainment Business**

The sports business industry is one of the largest and fastest growing in the United States. Add to that the burgeoning music, film, theater, television, cable and other entertainment industries and you've got virtually limitless choices. Every one of those industries needs good marketers. The strong core of marketing courses in the MS marketing program will give you the skills you need to hit the ground running with the specialized courses to teach you how to tailor your skills to the unique needs of the sports and entertainment industries.

**If you pursue this specialization you must follow the course requirements listed below as this specialization has a unique degree plan.**

### **Business Applications in Sports and Entertainment**

#### **Required Course:**

- MKTG 6820 - Sports & Entertainment Marketing
- Complete four courses from the following list:**
- MKTG 5939 - Internship
  - MKTG 6040 - Services Marketing for Traditional and Creative Industries
  - MKTG 6822 - "Fan"tastical Consumers of American Sports and Entertainment
  - MKTG 6824 - Sales and Negotiation for Consumer, Services, Sports, and Entertainment Industries
  - MKTG 6826 - The Sports and Entertainment Industry
  - MKTG 6834 - Global Sports & Entertainment Management

### **Business Skills for Sports and Entertainment Managers**

#### **Required Course:**

- BUSN 6560 - Marketing Dynamics in the 21st Century
- Complete three courses from the following list:**
- MKTG 6010 - Marketing Strategy
  - MKTG 6050 - Market Research Analytics I
  - MKTG 6060 - Consumer Intelligence--Psychology and Behavior
  - MKTG 6070 - Brand Identity & Marketing Communication Strategy
  - MKTG 6090 - Big Data Customer Relationship Management

- MKTG 6092 - Digital Media Marketing - Tools and Analytics
- MKTG 6200 - Marketing Intelligence and Metrics
- MKTG 6800 - Topics in Marketing

#### **Marketing Elective**

**Complete one MKTG 6000 or higher course.**

## **Master in Business Administration for Executives, MBA**

**Program Director:** Nicholas Hamilton-Archer

**Telephone:** 303-623-1888 or 1-800-228-5778

The executive MBA program provides executive-level students with a broad, rigorous 21-month academic experience leading to the master of business administration degree. The program is designed for persons who hold managerial positions in the private and public sectors. It builds upon the knowledge and experience of these executives with a sophisticated, challenging curriculum that can be pursued simultaneously without career interruption.

The executive MBA program emphasizes strategic leadership; the organization in a complex, international environment; and the applied tools of management. Courses are taught through a variety of methods. Case studies, lectures and computer simulation are combined with research projects and other teaching methods to provide students with tools useful in their present positions and applicable to more advanced responsibilities as they progress in their management careers.

Each new session of the executive MBA program begins the last week of August. Classes meet for a full day, once a week, on alternating Fridays and Saturdays, making it possible for those who live outside the Denver area to participate.

Two courses are taken simultaneously throughout the program. The program is supplemented by an intensive orientation at the beginning and a two-day seminar at the conclusion of the first academic year. A second-year seminar is held at an international business center outside of North America.

## **Master of Arts in Culturally and Linguistically Diverse Education**

The MA in CLDE is a 30 credit hour MA path that provides students with the opportunity to personalize your coursework to your specific needs as a professional educator. Students take the required concentration core courses (9 credit hours). Then, in consultation and with

approval from your faculty advisor, students select 5 courses from the Thematic Course Categories list to customize their learning (15 credit hours). Finally, students take the required research course (3 credit hours) and then complete a Capstone course (3 credit hours), for a total of 30 credits. A current teaching license is not required.

**The Customizable degree plan does not include a license or an endorsement.**

**Foundation Courses** (choose 1) 3 credit hours

- CLDE 5010 - Foundations of Language & Culture in Education
- CLDE 5160 - History & Law of Bilingual & Immigrant Education

**Language and Linguistic courses** (choose 1) 3 credit hours

- CLDE 5030 - Language Development of Multilingual Learners: Advanced
- CLDE 5070 - Linguistic Analysis of English

**Pedagogy Courses** (choose 1) 3 credit hours

- CLDE 5820 - Teaching Multilingual Learners, Advanced
- CLDE 5825 - Methods of Content Teaching for Bilingual Learners
- CLDE 5050 - Assessment & Advocacy for Multilingual Learners

**Total Concentration Credits 9**

**Thematic Course Categories Credits** 15 credit hours

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

**Research Course** 3 credit hours

- CLDE 6912 - Teacher Inquiry in Multilingual Classrooms

**Capstone Course** 3 credit hours

- CLDE 5035 - Connecting Multilingual Theories to Practice

**COMPS** Culminating Experience: Final Reflection

**Total Credit Hours 30**

**Culminating Experience: Final Reflection**

The culminating experience project is required for the CLDE endorsement; it fulfills the comprehensive exam requirement for the master's degree and permits you to document your development over the course of your program. Culminating Experience Projects are reviewed by CLDE faculty members. The process is reviewed in every class as each of the Performance Based Assessments is completed in the classes, helping students to update their culminating experience projects throughout the program. For more culminating experience project

guidelines, visit the website at <https://education.ucdenver.edu/academic-services/student-resources/graduate/culturally-linguistically-diverse-education>

### **Program Requirements and Courses**

To complete the CLDE program and earn a master's degree students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including face-to-face, hybrid, or online classes. In the summer semester, eight-week sessions are offered, and courses may be in the morning, afternoon or evening, hybrid, or completely online.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Master of Arts in Culturally and Linguistically Diverse Education with K-12 Endorsement**

Recommendations for endorsements are made by the CLDE program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education <http://www.cde.state.co>. or another state in which they wish to be endorsed for the most updated endorsement requirements.

### **Courses: All Required**

- CLDE 5010 - Foundations of Language & Culture in Education
- CLDE 5160 - History & Law of Bilingual & Immigrant Education
- CLDE 5070 - Linguistic Analysis of English
- CLDE 5030 - Language Development of Multilingual Learners: Advanced

- CLDE 5820 - Teaching Multilingual Learners, Advanced
- CLDE 5050 - Assessment & Advocacy for Multilingual Learners
- CLDE 5825 - Methods of Content Teaching for Bilingual Learners (Some district partnership courses may substitute here. Contact your Faculty Advisor for approval.)
- Elective with Faculty Advisor approval
- CLDE 6912 - Teacher Inquiry in Multilingual Classrooms
- CLDE 5035 - Connecting Multilingual Theories to Practice

Culminating Experience: Final Reflection

## **Total Credit Hours 30**

### **Culminating Experience: Final Reflection**

The culminating experience project is required for the CLDE endorsement; it counts as the comprehensive exam for the master's degree and permits you to document your development over the course of your program. Culminating Experience Projects are reviewed by CLDE faculty members. The process is reviewed in every class as each of the PBAs is completed in the classes, helping students to update their culminating experience projects throughout the program. For more culminating experience project guidelines, visit the website at <https://education.ucdenver.edu/academic-services/student-resources/graduate/culturally-linguistically-diverse-education>

### **Program Requirements and Courses**

To complete the CLDE program and earn a master's degree with endorsement, students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, eight-week sessions are offered, and courses may be in the morning, afternoon or evening, hybrid, or completely online.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# Master of Arts in Teaching

Return to: School of Education & Human Development

Lawrence Street Center, 701  
Campus Box 106  
P.O. Box 173364  
Denver, CO 80217-3364

**Telephone:** 303-315-6300

**Fax:** 303-315-6311

**E-mail:** [education@ucdenver.edu](mailto:education@ucdenver.edu)

**Website:** [www.ucdenver.edu/education](http://www.ucdenver.edu/education)

## Graduate Teacher Education Program Overview

The Graduate Teacher Education program culminates in a Master of Arts in Teaching and an initial teacher license. The program prepares educators who are culturally affirming and responsive, collaborate closely with families and communities, and have the knowledge and skills to create engaging, relevant, and rigorous classroom communities where all students can achieve and grow. We work alongside our P-12 partner educators throughout the CU Denver Professional Development School Network comprised of over 20 urban schools across numerous districts in the Denver metro region. Teacher education students live the life of a teacher for an entire academic year while enrolled in the program through a series of residency internships in a professional development school. Ultimately our goal is that all teacher candidates-whether their emphasis is elementary, secondary, or special education- have the unique knowledge and skills to positively impact urban and diverse schools and act with a sense of urgency to support equity in education for all children. The Graduate Teacher Education Program is a nationally accredited program that exceeds expectations.

## Education Pathways

The graduate teacher education program at CU Denver is designed to allow individuals with a minimum of a bachelor's degree to seek a master's degree along with an initial Colorado teacher's license in the following areas:

- **Elementary Education (K-6)** (54 semester hours)
- **Secondary Education (7-12)** (39 semester hours)
  - English
  - Mathematics
  - Science (General Science, Biology, Earth Science, Physics, Chemistry)
  - Social Studies

- World Language (K-12) (Spanish, French)
- **Middle School Math** (6-8) (39 semester hours)
- **Special Education Generalist** (Ages 5-21) (54 semester hours)
- **Dual General Education/Special Education** (63-72 semester hours)

## **Program Structure**

The program admits teacher candidates in cohort groups that begin either in the summer or fall. The cohort model provides a unique learning community for candidates and engenders significant support for success. The program includes full time 1 - 1.5 year licensure plans for regular education and a 1.5 - 2 year full-time option for initial special education and dual special education. Students enroll in course work at the university and clinical internships in one of CU Denver's professional development schools throughout the program. By enrolling in several courses and internships together, elementary, secondary, and special education teacher candidates are well prepared to support K-12 students with a wide range of diverse needs.

## **Clinical Experience in Professional Development Schools**

While in the program, teacher candidates intern in a professional development school for an entire academic year, gradually beginning with two days a week early on and increasing over time to five days per week by the end of the program. University courses are closely integrated with the sequence of clinical internship experiences providing teacher candidates with multiple opportunities to engage in the authentic work of teachers. Teacher candidates co-teach closely with practicing teachers in the school and gradually assume full responsibility for teaching by the end of the program. Elementary teacher candidates generally spend an entire academic year in a single partner elementary school, whereas secondary teacher candidates spend their internships in one of the partner middle schools and one of the partner high schools. Special education teacher candidates complete internships at multiple levels, P-12 due to the wide-span of their license that enables them to support students with special needs ages 5-21. The schools are located in several Denver metropolitan districts serving large populations of low-income and/or minority students, as well as a sizeable number of students for whom English is a second language as well as students with special needs. Each school is supported by a site professor from the university one day per week and by a master teacher, called a site coordinator, who supports teacher candidates through their academic year of internships.

## **Assessment**

Both the coursework and the internship experiences have been created to align with the Colorado Teacher Quality Standards, as well as frameworks for culturally and linguistically responsive instruction and Universal Design for Learning. Students in all programs engage in a common set of learning opportunities and internship assessments. They also engage in Program Level Assessments at different stages of the program. Colorado mandates that all teacher

education programs be "performance-based" in order to recommend candidates completing the program for licensure; thus all candidates in the Urban Community Teacher Education program must demonstrate proficiency in both the university-based coursework and their internships.

## Programs of Study

Due to the complex nature of teacher preparation that is governed by state and national accreditation and legislative mandates that can change from year to year, please see current programs of study in the teacher education handbook.

## Requirements for Admission

**Admission Deadline:** February 15 for summer and April 1 for fall start dates.

### Graduate Teacher Education Admission Requirements

Competitive undergraduate cumulative GPA of 3.0 (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)

- Completion of any outstanding prerequisite content courses that are needed per a transcript evaluation. Consult with your advisor to create a plan for completing these requirements. Submit your unofficial transcript for an evaluation.
- A complete application which can be obtained online at <http://www.ucdenver.edu/academics/colleges/SchoolOfEducation/Apply/Licenses/Pages/GraduateTeacherEducation.aspx> which includes transcripts, essays, recommendations, and an interview.
- **Attend an admissions interview.** All individuals who submit a COMPLETE application will receive an email with the interview invitation that contains all details approximately one week before the scheduled interview. During this group interview, prospective students participate in highly interactive group discussions and activities to further assess each applicant's readiness as well as aid in internship placement.

## Master of Science in Education in Mathematics Education MEd

The MEd in mathematics education integrates educators' learning of mathematical content, pedagogy, and research. This approach fosters educators' ability to teach effectively at the K-12 level. The program arises from collaboration between the School of Education and Human Development (SEHD) and the Department of Mathematical and Statistical Sciences in the

College of Liberal Arts and Sciences (CLAS). It interweaves both mathematical and educational understandings that lead to a truly interdisciplinary program, including a possibility to conduct one's own research project.

The MEd core courses provide a sound basis in mathematics education, including learning theories and progressions, teaching approaches, and deep appreciation for diversity and philosophical foundations.

### **MEd Core - 15 credit hours**

- MTED 5030 - Theories Of Mathematics Learning
- MTED 5040 - Mathematics Teaching - Theory and Practice
- MTED 5050 - Critique Of Mathematics Education Research
- MTED 5060 - Developmental Pathways In Students' Mathematical Thinking

### **Plus**

RSEM 5080 - Research In Schools or RSEM 5120 - Introduction to Research Methods

### **Mathematics Core - 9 credit hours**

**Required Mathematics Core** - Choose three courses in consultation with faculty advisor. Students may select 5000-level MATH, MCKE, MTED, or RSEM courses relevant to the grade-level with which the teacher works with approval from faculty advisor. (Note: Several mathematical content courses are taught by the mathematics education faculty.)

### **Plus**

### **Optional Course work**

**Thesis Option** (if chosen): SCED 5950 - Master's Thesis. **6 credit hours** required for this option.

or

**Non-Thesis Option: Elective Courses** - Choose two courses relevant to the grade-level with which the teacher works in consultation with a faculty advisor. **6 credit hours**

### **MEd Total: 30 Hours**

### **Program Requirements and Courses**

To complete the MEd program and earn a master's degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# MBA/MS in Bioengineering

The Business School and the Department of Bioengineering offer this degree option for students admitted into the Bioengineering MS program and the MBA program. This dual degree is an excellent opportunity for students who are planning a career in industry or as an entrepreneur. Bioengineering students including those who create medical devices, often launch their own venture upon graduation or thereafter. Business skills, especially in the area of marketing, legal environments, finance and operations are critical to enhance the probability of venture success. A dual degree also opens up new doors with regard to career choice, either in business or in one's core field.

## Mechanical Engineering MEng

► Graduate School Policies and Procedures apply to this program

The master's of engineering (MEng) is an interdisciplinary degree program designed to meet the needs of those practicing engineers who wish to follow an integrated program of studies in engineering and allied subjects related to the individual student's professional work. Students can combine advanced engineering course work with graduate-level non-engineering courses such as business administration, environmental sciences, social sciences, biological sciences or public administration. There are also tracks in biomechanics and sports engineering.

Prospective students are required to present a well-defined objective in order to be admitted to the program. In consultation with faculty advisors, an academic program is developed to meet this objective.

An advisory committee will be appointed for each student by the department. The advisory committee that guides the student is responsible for approving the individual's degree program and admission to candidacy, and approves the student's written report and the awarding of the degree.

The requirements for admission are the same as those for the MS degree awarded through the College of Engineering, Design and Computing. A minimum of 30 semester hours of academic work is required for the MEng degree. At least 15 of these hours must be at the 5000 level or above in mechanical engineering. A maximum of 12 semester hours may be taken outside of engineering. In addition to course work, a written report is required in the MEng program as a final project (3 semester hours). The report may be related to the student's professional work. The report will be of the same general quality as that required for the master of science thesis and must be defended orally. It may be based on work done for credit under independent study.

## Mechanical Engineering MS

► Graduate School Policies and Procedures apply to this program

## Program Plans

For the master of science (MS) degree in mechanical engineering, students may choose between three plans with each plan totaling 30 semester hours.

- Plan I - Students following Plan I (thesis option) take 24 semester hours of formal course work plus 6 semester hours of thesis work.
- Plan II - Students following Plan II (project option) take 27 semester hours of formal course work plus a 3 semester hour final project requiring a report.
- Plan III - Students following Plan III (10-course option) take 30 semester hours of formal course work plus a final comprehensive exam.

Students following Plan I or Plan II must submit a proposal to their examination committee prior to the semester in which they register for their thesis or project semester hours, and the examination committee must approve the proposal for the thesis or project.

## Program Options

Students in each of the plans may choose one of four options. In the first three options, the student may choose to specialize in thermal science, mechanics or biomechanics. The fourth option is the general mechanical engineering option.

- The **thermal science option** requires 12 semester hours of course work in analytical methods, numerical methods, fluid mechanics and thermodynamics. The student then selects 9 semester hours of course work in approved electives from a selection of thermal science electives.
- The **mechanics option** requires 12 semester hours of course work in analytical methods, numerical methods, elasticity and dynamics. The student then selects 9 semester hours of course work in approved electives from a selection of mechanics electives.
- The **biomechanics option** requires 31 credit hours to graduate. Please contact the mechanical engineering department or visit the biomechanics website for more information.
- The **general mechanical engineering option** requires the student to take 18 semester hours of required course work in analytical methods, numerical methods, fluid mechanics, thermodynamics, elasticity and dynamics.

After meeting the course requirements for any of the four options the student may select any mechanical engineering graduate course to complete the credit-hour requirements. The student may also take courses approved by an advisor outside of the mechanical engineering department.

# Media Forensics Emphasis, Recording Arts MS

► Graduate School Policies and Procedures apply to this program.

Please click [here](#) to see general Music & Entertainment Industry Studies information.

## Program Overview

The Master of Science in Recording Arts emphasis in media forensics (MSRA-MF) prepares students from various backgrounds for work in the field of forensic audio, video and image analysis, utilizing state-of-the-art methods and technology necessary to fight crime in the digital age. Housed in the National Center for Media Forensics (NCMF), this program is unique in providing a hybrid format (online and onsite) graduate education in forensic multimedia analysis.

Students from related disciplines (media production, electrical engineering, forensics, computer science, etc.) are encouraged to apply, as this program enhances scientific inquiry while guiding students through a two-year cohort curriculum. The hybrid delivery format affords students the ability to work full-time while completing most of the program online with additional onsite study at the NCMF and its partner institutions. Classes are comprised of online self-guided lectures, interactive learning, discussion boards, reading responses and scheduled video conferencing. Onsite course work provides students with hands-on and practical experiences which augment and enrich the curriculum. Additionally, experiential learning activities include visits to regional crime labs and scientific conferences to understand the application of forensic media technology and laboratory procedures.

Courses lead students through three areas of study: foundational knowledge, core analyses and capstone experiences, which fully prepare students for research in forensic science and expert witness testimony. Digital media evidence acquisition through computer forensics applications is emphasized in an environment that fosters creativity and individual skills. The research thesis on a topic of the student's choosing is conducted under the advisement of the director and associate director of the NCMF with input from forensic professionals from around the world. The thesis is a topic of exploration throughout the program and serves to enhance a graduate's area of specialty as they prepare for work in private forensic practice, corporate research and development, academic research and teaching, or crime labs at the local, state and federal levels.

## Curriculum

The MSRA-MF program comprises 33 semester hours of credit: 29 hours are required courses and 4 hours are thesis. All courses must be completed with a grade of B- (2.7) or better and

students must maintain at least a 3.0 cumulative GPA. Grades of C+ (2.3) or lower, or a cumulative GPA below 3.0, will result in the student's dismissal from the program. Students are admitted to the program in the fall as a cohort and must follow the curriculum in sequence.

## **MSRA Media Forensics Application**

Admission to the MSRA-MF program is competitive. The MSRA-MF program accepts students in the fall only. Admission decisions are made by committee and are based on the entirety of the applicant's submitted materials. Admission to the program is contingent upon:

- Formal documentation of an earned bachelor's degree in a related field. (International students must document an equivalent.) Undergraduate degrees from other disciplines will be considered with proper support from application components.
- Successful completion of the Graduate Record Exam (GRE) General Test.
- For international students, submission of proof of English Language Proficiency. Please contact the Office of International Admissions for more information.
- Strength of application components as they relate to:
  - Scientific competency
  - Writing skills
  - Desire to work in the field of forensic media analysis
  - Strength of academic/professional background
  - Strength of references through letters of recommendation

### *Application Components*

Required application components include:

- Graduate Application for Admission
- Application Fee
- Entrance Examinations: GRE (and TOEFL/IELTS or other evidence of English proficiency, if applicable)
- Official Transcripts
- Cover Letter
- Resume
- Three (3) Letters of Recommendation
- Two (2) Technical Writing Samples

**Applications that do not include all of the requirements or that include partial components are considered incomplete and will not be reviewed.**

International applicants are encouraged to visit the Office of International Admissions website for detailed information.

Application requirements are subject to change. Refer to the National Center for Media Forensics MSRA-MF program website for detailed information and updates regarding the application process and requirements.

## **Program Sequence**

### *Fall - Year 1*

MSRA 5014 - Research Practices in Media Forensics

MSRA 5124 - Forensic Science and Litigation

### *Spring - Year 1*

MSRA 5054 - Experiential Lab

MSRA 5114 - Foundations in Media Forensics

MSRA 5144 - MATLAB Foundations

### *Summer - Year 1*

MSRA 5134 - Computer Forensics

MSRA 5244 - Mobile Phone Forensics

### *Fall - Year 2*

MSRA 5054 - Experiential Lab

MSRA 5214 - Forensic Audio Analysis

MSRA 5254 - MATLAB for Forensic Audio Analysis

### *Spring - Year 2*

MSRA 5054 - Experiential Lab

MSRA 5224 - Forensic Video and Image Analysis

MSRA 5264 - MATLAB for Forensic Video and Image Analysis

### *Summer - Year 2*

MSRA 5314 - Report Writing and Court Testimony

### *Summer - Year 2 (or later)*

MSRA 6954 - Research Thesis in Media Forensics

**Total: 33 Semester Hours**

# **New Directions in Public, Non-Profit and Community Leadership, Political Science MA**

► Graduate School Policies and Procedures apply to this program.

**Director:** Minsun Ji

**E-mail:** minsun.ji@ucdenver.edu

The Public, Non-profit and Community Leadership track of the political science MA program is offered off-campus through the Center for New Directions at CU Denver South in Parker, CO. The Center for New Directions offers an MA program focused on public leadership, community labor organizing, and social economy innovations, in collaboration with community and labor organizations and local government jurisdictions across Colorado. The program seeks to develop the public leadership & community organizing capacities necessary to address challenges and leadership & community organizing capacities necessary to address challenges and opportunities within neighborhoods, communities, government jurisdictions, and non-profit entities.

In addition to their standard coursework, students in this Masters program are encouraged to be involved in experiential learning through professional internships, community-based action research opportunities, and other practicums made available to students through the program's many university-community partnerships, including the possibility of full-time, salaried internships with rural and small jurisdictions across Colorado. Through partnerships with government jurisdictions across the state, and with non-profits and community-based organizations, New Directions seeks to build community power and identify policy solutions to local challenges.

This program presents courses in an intensive weekend format, allowing students to complete their masters entirely through weekend or online courses.

## **Degree Requirements**

1. Students must complete a total of 33 PSCI graduate credit hours to complete the MA degree.
2. Students must earn a minimum grade of B- (2.7) in all masters courses taken at CU Denver and must achieve a minimum cumulative masters GPA of 3.0. All graded

attempts in required and elective courses are calculated in the masters GPA. Students cannot complete the masters or ancillary course requirements as pass/fail.

## Required Core Courses

- PSCI 5914 - Community Organizing and Community Development
- PSCI 5468 - Research Methods in Political Science
- PSCI 5960 - Master's Project

**Total: 9 Hours**

## Electives

In addition to the required core courses, students must take 24 credit hours of political science electives.

[*Note:* Previously earned graduate credit may be submitted for approval to satisfy up to nine hours of the supportive elective requirement. The elective courses offered may change from time to time based on needs, interests and other factors.]

Elective courses in the New Directions program are offered in three different "tracks" of study, allowing students to choose their particular interest and focus their studies on that subject. The three tracks are: Local Governance, Community and Labor Organizing, and The Social Economy and Sustainable Development.

Students are encouraged to focus their studies by taking courses within a chosen track, but it is *not* required that students only take courses within a single track (and some courses fit in more than one track).

1. **Local Governance:** Curriculum focuses on educating students who are interested in working in local and state government sectors, or with public policy research and advocacy organizations. Curriculum and community partnerships in this area focus on local government and administration, the politics of government finance, state politics and public policy challenges.
2. **Community and Labor Organizing:** Curriculum focuses on developing diverse theoretical and practical courses in labor and community organizing politics, history and strategies. Courses focus on social movement theories, labor union politics, and community organizing strategies to help students develop theoretical foundations and practical strategies for more effective community and labor leadership.
3. **The Social Economy and Sustainable Development:** Curriculum focuses on developing an understanding of the current political-economic systems, and on exploring alternative and diverse economic strategies that might work to the benefit of

less privileged communities. Courses and community partnerships allow students to explore democratic financial systems, land trusts, and worker cooperatives, and other such innovative "social economy" practices, at the local, national and global levels. In this track, students will learn of diverse economies theory, innovative economic development strategies in both rural and urban areas, the worker cooperative movement, and innovative financial strategies that work for less privileged communities.

Below is a list of some regularly offered elective courses in the New Directions program. All courses in our graduate catalog are available to be offered as electives in the New Directions program.

- PSCI 5545 - Immigration Politics
- PSCI 5548 - Labor Law and Collective Bargaining
- PSCI 5354 - Seminar: Environmental Politics and Policy
- PSCI 5424 - The Social Economy and Sustainable Development
- PSCI 5434 - The Cooperative Movement: Politics and Policy
- PSCI 5457 - Seminar: American Political Thought
- PSCI 5265 - Social Justice And Globalization
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5014 - Seminar: American Politics
- PSCI 5024 - State Politics: Focus on Colorado
- PSCI 5075 - Gentrification and Social Equity
- PSCI 5084 - Local Government and Administration
- PSCI 5085 - Comparative Governance: Environment and Society
- PSCI 5009 - Politics of the Budgetary Process
- PSCI 5414 - Non-Profits and Social Change

**Total: 24 Hours**

## **Project Requirement**

All students are required to complete a 3-credit master's project under the direction of a faculty advisor. Registration is done using the Special Processing form, rather than online.

- PSCI 5960 - Master's Project

**Total: 3 Hours**

## **Course Format**

All courses are offered in a weekend format that consists of three weekend sessions for a given course, spread out over a two or three month period. Weekend classes are held from 9:00 am to 4:00 pm on both Saturday and Sunday of each weekend session. In most cases, a student will complete all of the weekend sessions of one course before starting the weekend sessions for the next course. There is typically a two to three week break between each weekend of class-time in a given course.

## **Major Total: 33 Hours**

## **Certificate Program**

The Center for New Directions MA program offers two certificate programs:

- Public, Non-Profit and Community Leadership
- Labor Leadership Certificate

These certificate programs allow students to focus their studies in a particular direction and to note that particular focus on their transcript. Students do not have to be seeking a full Master's degree to earn a certificate of completion through the certificate program.

For more information on these graduate certificates, click the links above.

# **Political Science MA**

► Graduate School Policies and Procedures apply to this program

**Director:** Michael Berry

**E-mail:** michael.berry@ucdenver.edu

## **Introduction**

The Political Science Department offers a Master of Arts (MA) degree in Political Science with an emphasis on building academic and practical skills in key areas of the discipline. Research and teaching in the department centers on the major fields of American politics, comparative politics, international relations, political theory and public policy. The department also offers more specialized training in community organizing, human rights, legal studies, gender politics, race and ethnic politics, European studies, indigenous politics and urban politics. Students pursuing the MA have the option of completing the traditional track or an "alternative" track centered on public, non-profit and community leadership. Students completing the alternative "public, non-profit and community leadership" track take most courses on weekend, off-campus locations. Students completing either track have gone on to PhD programs across the country and work in a variety of areas, including: state and local elected office, government

service, community organizing and development work, nongovernmental organizations, legislative analysts, UN affiliates, lobbyists, teachers, media analysis and political consulting.

## Requirements for Admission

Students applying for admission to the MA program in political science should present at least 18 semester hours of previous academic work in political science, at least 9 hours of which should be at the upper-division or graduate level. The department may make exceptions to these requirements in unusual cases (for instance, if course work in related fields such as psychology, economics and history compensates for the deficiencies in political science). Applicants should present an undergraduate GPA of at least 3.0 to be considered. In their applications, students must submit transcripts and letters of recommendation (from academic sources) as specified by the Graduate School. In addition, applicants must submit a statement of academic objectives and an academic writing sample. Standardized test scores are not required of applicants, but will be considered if submitted. Program applicants who face difficulties in meeting these requirements should reach out for individual discussion with our Graduate Program director (for example, if an undergraduate GPA is below 3.0, or if letters of recommendation from professors taken years ago are hard to obtain).

In order to take graduate courses in political science, students must either be admitted to the MA program or secure permission to take courses as a non-degree student. Non-degree students interested in our certificate programs or in taking graduate courses for any reason should reach out to the Department Graduate Advisor to secure admission to courses as a non-degree seeking student.

## Program Requirement Overview

1. Students must complete 33 credit hours.
2. Students must earn a minimum grade of B-(2.7) in all masters courses taken at CU Denver and must achieve a minimum cumulative masters GPA of 3.0. All graded attempts in required and elective courses are calculated in the masters GPA. Students cannot complete masters or ancillary course requirements as pass/fail.
3. Students must complete a minimum of 16 credits with CU Denver Political Science faculty.
4. Students who are on probation must meet regularly with the graduate advisor and must secure approval from the advisor for all course work while on probation.

## Degree Requirements

In addition to the requirements for admission and details of the program spelled out here, graduate students in political science must also abide by department rules and procedures

specified in the Graduate School Policies and Procedures. Failure to meet these policies may result in a student being dropped from the program.

Under the On-Campus MA program in political science, two degree plans are available:

- Plan I requires the completion of nine graduate courses (27 semester hours) and a 6-credit thesis
- Plan II requires the completion of ten graduate courses (30 semester hours) and a 3-credit project or portfolio.

## **Required Core Classes**

Course work in both plans completed under the traditional track offered on the Downtown Campus must include the following two courses

- PSCI 5000 - State of the Discipline
- PSCI 5468 - Research Methods in Political Science

## **Elective Courses**

Students will complete between 12 and 15 elective semester hours, depending on whether they are working under Plan I or II. Elective courses must include at least one graduate seminar in each of the following three areas: 1) American politics, 2) Comparative politics/International Relations, and 3) Political Theory. Please see the Department graduate director, if you have questions as to which category a course might fit under.

In addition to taking regularly offered graduate seminars in the program, students may meet their elective requirements by taking independent study, internships, or graduate courses in related disciplines. These courses all require approval from the Graduate program director, or from a sponsoring faculty member in the Department. The total combination of independent study, graduate course work in related disciplines and internships cannot exceed 9 semester hours.

## **Alternative Political Science Masters Program: The New Directions Program**

In addition to its traditional, on-campus Masters degree, the Political Science Department offers a Public, Non-Profit and Community Leadership MA program through the Center for New Directions at CU Denver South in Parker, CO. The Center for New Directions offers an MA program focused on public leadership, community labor organizing, and social economy innovations, in collaboration with community and labor organizations and local government jurisdictions across Colorado. The program seeks to develop the public leadership & community organizing capacities necessary to address

challenges and leadership & community organizing capacities necessary to address challenges and opportunities within neighborhoods, communities, government jurisdictions, and non-profit entities.

Plan II is available both under the traditional MA track offered on the Denver campus, as well as through an alternative track offered off-campus through the Center for New Directions in Politics and Public Policy. For details about this off-campus track in politics and public policy, see New Directions, MA in Political Science.

The Political Science graduate program offers three transcribed certificates, allowing students to focus their studies in a particular direction and to note that particular focus on their transcript. Students do not have to be seeking a full Master's degree to earn a certificate of completion through the certificate program.

- Public, Non-Profit and Community Leadership
- Labor Leadership

For more information on these graduate certificates, click the links above.

# Public Administration, MPA

## Introduction

The Master of Public Administration degree (MPA) provides graduate professional education for students interested in public service leadership positions and careers with public and nonprofit agencies and organizations. The program serves students new to public service as well as those already in the field who are interested in furthering their careers.

To learn more about our renowned faculty, please visit our website to view our faculty bios.

**Program Director:** Jane Hansberry, PhD

The School of Public Affairs offers three distinct ways to complete an MPA degree:

- Accelerated MPA
- Executive MPA
- Traditional MPA

Students may also choose to designate a concentration within one of the optional focus areas or complete the MPA without a specified concentration.

## Program Delivery

- Courses are offered on campus, online, and in hybrid formats. The Accelerated MPA is only offered on campus in a cohort model

## Program Requirements

- Students must successfully complete 36 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- Students must earn at least a B- in all core coursework and at least a C in all elective coursework to be accepted for graduate credit towards the degree.
- No more than 6 credit hours of Independent Study may be applied toward the degree.
- Students who have not had at least one year of professional work experience in the public or nonprofit sectors must complete an internship through an additional 3-semester-hour course, bringing their total semester-hour requirements to 39.
- This program must be completed within 7 years.

All MPA students (with the exception of those in the executive MPA option) must complete the following seven core courses or approved equivalents, for a total of 21 credit hours.

- PUAD 5001 - Introduction to Public Administration and Public Service
- PUAD 5002 - Organizational Management and Behavior
- PUAD 5003 - Research and Analytic Methods
- PUAD 5004 - Economics and Public Finance \*Students in the Local Government Concentration must take PUAD 5503
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5006 - Public Service Leadership and Ethics
- PUAD 5008 - Evidence-Based Decision-Making

Students must complete **four** elective courses from a pre-approved list and/or with approval from the program director.

Internship: Students who have limited experience (generally defined as less than one year of experience) in public, nonprofit or relevant private-sector service must enroll in PUAD 6910, Internship in Public Administration. The decision to require PUAD 6910 for a particular student is made by the faculty admissions committee or the student's faculty advisor upon the student's acceptance to the MPA program. A minimum of 300 hours of supervised work and study is required to earn the 3.00 credit hours for this course. The internship requirement raises the total credit hours needed to earn the MPA degree from 36 to 39.

- PUAD 6910 - Internship

Students must complete **one** of the following:

- PUAD 5361 - Capstone Seminar (during the final semester)

- PUAD 6950 - Master's Thesis (taken for 3 or 6 credits with approval by and in consultation with the program director prior to enrolling in the course)

## **MPA Options**

In addition to the traditional MPA program, students may consider the accelerated and executive options.

### **Accelerated MPA**

The Accelerated MPA (AMPA) is a fast-paced, full-time option that brings academically superior students together with a dedicated research and teaching faculty in the midst of the vibrant downtown Denver environment. The students in the cohort enjoy a unique experience as they go through all classes in the MPA together, fostering a community of scholar-practitioners.

The Accelerated MPA enables students to focus their energies in a concentrated program of study and earn a nationally accredited, 36-hour MPA in 12 months. All coursework is completed in-person as a cohort. The online option is not available for the AMPA program.

Students are admitted to the program in cohorts of up to 20 participants. A new cohort starts each August. The cohort format helps to increase the opportunity to become acquainted with other graduate students and increases the opportunities for interaction between program participants and faculty. It is preferred that applicants have some knowledge of economics, statistics and political science prior to starting the program, although no required.

This program is priced at a flat rate, regardless of in-state or out-of-state student status, providing out-of-state students with substantial savings.

Students interested in pursuing the Accelerated MPA program should designate this as their desired program on their Admissions application.

### **Executive MPA**

The Executive MPA program is designed for senior level professionals in the nonprofit and public sectors. The Executive MPA requires 30 credit hours to complete the degree.

### **Initial Leadership Experience (3 Hours)**

All students will enroll in the Rocky Mountain Leadership Program (RMLP) which is a six-day seminar typically held in Breckenridge. The RMLP brings together public and non-profit professionals from across the country to collaborate on current management issues while honing leadership skills. Federal employees may elect OPM's federal Management Assessment Seminar at either the Western or Eastern Management Development Centers in lieu of the

Rocky Mountain Leadership Program. For more information about the OPM program option please see [www.leadership.opm.gov](http://www.leadership.opm.gov).

## **Coursework**

### **Required courses (15 Hours)**

All students will complete PUAD 5001 and PUAD 5002 together as an Executive cohort. Both courses are held in a hybrid format, which combines a one-week intensive session on the Denver campus with additional online instruction. Students will also complete two additional core courses (6 total credits) from the regular MPA core. The remainder of the core courses may be taken in the student's preferred format as either online, weekend intensive or through the traditional campus-based classroom setting.

All Executive students will complete PUAD 5361, Capstone Seminar (3 credits) at the end of their program. The Capstone allows students to synthesize the information learned during the program and put it into practice within their professional setting.

### **Electives (12 Hours)**

In consultation with an advisor, students select four additional elective courses that best meet their professional goals. These may be taken online or in the classroom. Students may complete up to 9 credits through the federal OPM Management Development Center provided they are approved for graduate credit by the American Council on Education.

## **Optional Concentrations**

Students may select one of the concentrations below or complete the MPA without a specified concentration. Students completing a concentration take their electives in the area of their concentration, complete the advanced seminar project in the area of their concentration and are advised by faculty from the concentration.

All MPA concentrations require a total of 12 credits hours of concentrated elective coursework and may either be taken as part of the MPA program or as a stand-alone Graduate Certificate.

## **Disasters, Hazards and Emergency Management Concentration**

The concentration in Disasters, Hazards, and Emergency Management (DHEM) provides advanced education in the management of emergencies, hazards, disasters, and community resilience. DHEM is designed for students who work or will work in the field of natural and man-made hazards, community resilience, and emergency management.

### **Required Coursework**

The DHEM concentration requires a total of 12 credit hours.

Students must complete the following course:

- CRJU 5720 - Public Policies for Hazards and Disasters

Students must complete at least **one** of the courses below:

- CRJU 5650 - Public Service in Emergency Management and Homeland Security
- CRJU 5655 - Principles of Emergency Management
- URPL 6645 - Disaster/ClimateChangePlanning

Students must complete **two** pre-approved elective courses. For a list of pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## Education Policy Concentration

The concentration in Education Policy provides students with an understanding of how K-12 education is governed, financed and regulated in the United States. Students will become familiar with the interaction between federal, state and local policies and with the context in which education policy is formulated and implemented.

### Required Coursework

The Education Policy concentration requires a total of 12 credit hours.

Students must complete the following courses:

- PUAD 5200 - Education Policy
- PUAD 5210 - Education Finance

Students must complete **two** additional elective courses from the list below or select unlisted courses that have been approved in advance by the program director.

- PUAD 5180 - Social Entrepreneurship
- PUAD 5310 - Policy Formulation & Implementation
- PUAD 5320 - Public Policy Analysis
- PUAD 5350 - Program Evaluation
- PUAD 5460 - Political Advocacy
- PUAD 5628 - Social Problems and Policies
- PUAD 6600 - Special Topics: Public Administration

**Total: 12 Hours**

## Environmental Policy and Management Concentration

The concentration in Environmental Policy and Management provides an understanding of how our natural environment is governed and affected by relationships between various entities, including legislatures, administrative agencies, courts, government and more.

### Required Coursework

The EPM concentration requires a total of 12 credit hours.

Students must complete at least **two** of the courses below:

- PUAD 5631 - Seminar in Environmental Politics and Policy
- PUAD 5632 - Seminar in Environmental Management
- PUAD 5740 - Sustainable Energy Policy

Students must complete **two** pre-approved elective courses. For a list of pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## Emergency Management and Homeland Security Concentration

The concentration in Emergency Management and Homeland Security (EMHS) provides advanced education in the management of emergencies, hazards, disasters and homeland security. The EMHS program is designed to meet the needs of students who wish to work, or are currently working, in the field of emergency management and homeland security.

The EMHS program is also offered as a stand-alone Emergency Management and Homeland Security Graduate Certificate program.

### Required Coursework

The EMHS concentration requires a total of 12 credit hours.

Students must complete the following course:

- CRJU 5650 - Public Service in Emergency Management and Homeland Security

Students must complete at least **one** of the courses below:

- CRJU 5655 - Principles of Emergency Management
- CRJU 5720 - Public Policies for Hazards and Disasters
- URPL 6645 - Disaster/ClimateChangePlanning

Students must complete **two** pre-approved elective courses. For a list of pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## **Gender-Based Violence Concentration**

The concentration in Gender-Based Violence (GBV) focuses on the management and policies surrounding gender-based violence, as well as grass-roots social justice work and best practices in this emerging field. Each fall, 10 to 20 students are accepted into the GBV cohort, allowing the participants to build a strong community of advocates and learners.

This program combines online courses with four intensive campus seminars spaced throughout the two-year program. Nonresident students pursuing the MPA with a concentration in Gender-Based Violence may also qualify for reduced tuition through the Western Regional Graduate Program which covers 14 western states.

The Gender-Based Violence program is also offered as a stand-alone Gender-Based Violence Graduate Certificate program.

### **Required Coursework**

The concentration in GBV concentration requires a total of 12 credit hours. All students will complete the four required courses below. Students will complete all four of required courses below.

- CRJU 5910 - Nature and Scope of Interpersonal Violence
- CRJU 5920 - The Psychology of Interpersonal Violence
- CRJU 5930 - Interpersonal Violence Law and Public Policy
- CRJU 5940 - Interpersonal Violence Leadership, Advocacy, and Social Change

**Total: 12 Hours**

## **Local Government Concentration**

The Graduate Local Government Concentration prepares students to become well-versed in the forces that shape the agendas of the public sector, including those of municipalities, counties, regional authorities and councils of government. Additionally, students gain an understanding of government management and policy making.

### **Required Coursework**

The Local Government concentration requires a total of 12 credit hours.

Students must complete the course below:

- PUAD 5503 - Public Budgeting and Finance

Students must complete **one** core course from the list below:

- PUAD 5625 - Local Government Management
- PUAD 5626 - Local Government Politics and Policy
- PUAD 5628 - Social Problems and Policies

Students must complete **two** pre-approved elective courses. For a list of pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## **Nonprofit Management Concentration**

The concentration in Nonprofit Management prepares students to become innovative and critical thinkers in the areas of nonprofit organizational management and public policy, with a unique approach that bridges theoretical knowledge with real-world experience. As students prepare for their careers or advancement in their current positions, they gain insight into the interdependence between the nonprofit, public, and for-profit sectors. Graduates are able to span the boundaries of these three sectors to assess community needs, navigate the realm of public policy, and strategically and effectively manage organizations that ultimately benefit society.

SPA's affiliation with the Nonprofit Leadership Alliance gives students the opportunity to earn the Certified Nonprofit Professional (CNP) credential through completion of the Nonprofit Management concentration [or certificate] coursework, additional required extracurricular activities, and an examination. Contact [cnp@ucdenver.edu](mailto:cnp@ucdenver.edu) for more information about this credential.

The Nonprofit Management program is also offered as a stand-alone Nonprofit Management Graduate Certificate program.

### **Required Coursework**

The Nonprofit Management concentration requires a total of 12 credit hours.

Students must complete the course below:

- PUAD 5110 - Seminar in Nonprofit Management

Students must complete **three** pre-approved electives. For a list of pre-approved electives, please consult your Academic Advisor.

**Total: 12 Hours**

## Public Policy Analysis Concentration

The concentration in Public Policy Analysis provides training in the tools and skills needed to assess the impact of public policies and programs, including policy analysis, cost-benefit analysis, program evaluation, multivariate regression, and other analytical techniques.

### Required Coursework

The Public Policy Analysis concentration requires a total of 12 credit hours.

Students must complete the following course:

- PUAD 5320 - Public Policy Analysis

Students must complete **three** additional elective courses from the list below or select unlisted courses that have been approved in advance by the program director.

- PUAD 5200 - Education Policy
- PUAD 5310 - Policy Formulation & Implementation
- PUAD 5330 - Intermediate Statistical Analysis
- PUAD 5350 - Program Evaluation
- PUAD 5631 - Seminar in Environmental Politics and Policy
- PUAD 5720 - Public Policies for Hazards and Disasters

**Total: 12 Hours**

## Public History, MA in History

►Graduate School Policies and Procedures apply to this program.

The MA program in history offers graduate-level major and minor fields in public history. Public history is a field of study that applies historical methods to the public sphere. This graduate major requires a concentration, in either museum studies or historic preservation. Public history majors can minor in any subspecialty the department currently offers. Students majoring in U.S., European or Global history can also minor in public history.

**Admission Requirements-See History MA**

### Degree Requirements

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete all courses at the graduate (5000 or above) level.

3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete all credits with CU Denver faculty.

## Required Introductory Course

- HIST 6013 - Introduction to the Professional Study of History

**Total: 3 Hours**

## Major Courses

- HIST 5234 - Introduction to Public History

Students who choose to concentrate in museum studies or historic preservation must take either

- HIST 5231 - History in Museums (for museum studies majors)  
-OR-
- HIST 5232 - Historic Preservation (for historic preservation majors)

### **Research Seminar (3 hours)**

Research seminars focus on students' development of an original, primary research paper.

### **Major Electives (9-12 hours)**

Electives are made up of courses in public history, which focus on methodology and practice and thesis or project credits. These courses include:

- HIST 5133 - Management of Material Culture and Museum Collections
- HIST 5228 - Western Art and Architecture
- HIST 5229 - Colorado Historic Places
- HIST 5240 - National Parks History
- HIST 5242 - Oral History
- HIST 5243 - Public History Administration
- HIST 5244 - Interpretation of History in Museums: Exhibits and Education
- HIST 5245 - Heritage Tourism
- HIST 6992 - Seminar: Colorado Studies

**Total: 18 Hours**

## **Minor Electives**

Electives are made up of courses in the minor field, including readings courses, which address specific field historiographies, or research seminars.

**Total: 12 Hours**

## **Open Elective**

Students may use the open elective to explore a course outside their major or minor or to do extra course work in one of their fields.

**Total: 3 Hours**

**Total: 36 Hours**

## **Independent Studies and/or Internships**

Candidates may register for up to 6 hours of internships or independent study, only one of which may be at the 6000-level. Students will not be allowed to satisfy the research seminar requirement via independent study. *Any independent study or internship at the 6000-level needs the permission of the graduate advisor.* Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

- HIST 5840 - Independent Study: History
- HIST 6840 - Independent Study: HIST
- HIST 6939 - Internship

## **Comprehensive Examinations**

All history MA candidates must pass a comprehensive examination in the major and minor fields after the completion of course work and before embarking on a thesis, curriculum project or public history project. The comprehensive exam evaluates students' knowledge of their course work and their reading lists for their major, minor and concentration. In answering their exam questions, students are expected to construct arguments and to show mastery of the historiographies, narratives and historical content in their fields. The comprehensive exam is administered and evaluated by a committee of the major advisor, the minor advisor and an outside reader from the history faculty.

## **Master's Degree Extended Research Options**

The MA program in history offers a set of courses in which students can develop extended research interests. Students must select an advisor and develop a proposal for a specific research agenda in the semester before beginning work on a project.

### **REQUIRED PUBLIC HISTORY THESIS (HIST 6950) OR PROJECT (HIST 6952)**

Students majoring in public history must complete either a thesis (6 semester hours) or a project (3 semester hours).

### **OPTIONAL ADVANCED HISTORY CURRICULUM DEVELOPMENT (HIST 6951)**

Students who undertake their master's program when they are already teachers can choose to construct curriculum projects relevant to their teaching practice. See the separate section below on "Opportunities for Teachers and Teachers-in-Training."

- HIST 6950 - Master's Thesis
- HIST 6951 - Masters Project: Advanced History Curriculum Development
- HIST 6952 - Master's Project: Public History

## **Thesis Requirements**

Students writing theses are expected to develop an original research agenda resulting in an extended paper. Students work with their major field advisor, who will help guide them through the process of research and writing. Students enroll for six credit hours in HIST 6950 to complete their theses. Before registering for HIST 6950, students must have a thesis proposal and initial bibliography approved by their advisor.

A thesis is evaluated by a committee of three, including the major advisor and two other faculty members chosen by the student in consultation with the major advisor. Upon completion of the thesis, the student meets with the committee members, who ask questions about the research and conclusions which the student must defend. In many instances, the committee will require further revisions, sometimes major in scope, before the thesis is accepted and cleared for submission to the Graduate School in fulfillment of degree requirements.

## **Project Requirements**

In lieu of a thesis, public history majors may choose to enroll in one semester of HIST 6952 to complete a public history project. Projects, which are usually conducted in collaboration with a public history organization, can entail creating an exhibit, developing a museum master plan, education program or collection management plan/project, or organizing an archival collection, conducting a preservation survey or similar projects as worked out with their advisor. Students are required to prepare a paper describing the process and results of their project.

- HIST 6952 - Master's Project: Public History

# Opportunities for Teachers and Teachers-in-Training

## Curriculum Projects

Licensed teachers and teachers-in-training enrolled in the history graduate program may choose to complete a curriculum development project. Students arrange curriculum development projects with a sponsoring faculty member. Generally, students are expected to develop and submit a complete course curriculum plan for this 3-semester-hour project. Projects need to show evidence of familiarity with the relevant historiographies and primary sources. Students may apply the credits from HIST 6951 to either the major field or the minor field, depending on the project subjects. Curriculum plans must meet minimum criteria established by the history department in the document *Advanced History Curriculum Development Projects*.

- HIST 6951 - Masters Project: Advanced History Curriculum Development (3 semester hours in their major field or minor field)

## Secondary Teacher Licensure

Students interested in secondary teacher licensure should consult with the School of Education and Human Development. See the Urban Teacher Education Program for information.

## History MA

# Recording Arts, Master of Science (MSRA)

► Graduate School Policies and Procedures apply to this program.

Please click [here](#) to see general Music & Entertainment Industry Studies information.

## Program Overview

Recording arts is a field that deals with all aspects of recorded music and sound, including mixing, mastering, production, MIDI sequencing, live sound reinforcement, and post-production for film and video. The program refines students' skills in sound recording, aesthetics, multi-track recording, analog and digital signal processing, automated mixing, synchronization, stereo and surround imaging, mastering and post-production.

The Master of Science in Recording Arts (MSRA) has the only pedagogy track in the nation. Pedagogy is synonymous with teaching, and the MSRA includes a survey of available resources for audio education. The curriculum offers an interdisciplinary approach, which can

include physics, acoustics, engineering, music recording, psychoacoustics, multimedia, theatre and film/video. The program emphasizes design and development of new methods and materials.

This graduate degree is designed to:

- prepare students for audio careers in mass communications, education, music, multimedia and the entertainment industries.
- enhance advancement of professionals in their careers.
- prepare the music educators of the future.

In their final semester, students will create and defend a thesis or a portfolio.

- *Thesis* -- Written research
- *Portfolio* -- Research in conjunction with a recorded work. This could be a music recording, audio for video, or other media.

Graduate courses comprising the core of the program advance students' artistic, pedagogical, technical and problem-solving abilities. Elective courses allow each student to develop additional skills and knowledge in related areas, including surround sound, acoustics, studio design, digital signal processing and others.

The Department of Music & Entertainment Industry Studies encourages students from allied disciplines (music, physics, engineering, etc.) to apply. Students are not required to have their bachelor's in recording arts; the bachelor's degree can be from any discipline. Applicants can qualify for the MSRA program by having equivalent level preparation (e.g., work experience). Candidates without sufficient experience/training in recording arts may be required to take preparatory courses at the undergraduate level.

**Note: The application process and requirements for the MSRA program differ from those listed for the media forensics emphasis.**

## MSRA Application Components

Admission to the MSRA program is competitive. Applications are accepted for fall-only admission to the cohort. Admission decisions are made by committee and are based on the entirety of the applicant's submitted materials. Incomplete applications are not considered, and application requirements may vary between domestic and international students.

- Graduate Application for Admission
- In-State Tuition Classification Application (if applicable)
- Application Fee
- Entrance Examinations: (TOEFL/IELTS or other evidence of English proficiency, if applicable)
- Official Transcripts
- Three (3) Letters of Recommendation

- Application Essay
- Resume
- Portfolio

**Applications that do not include all of the requirements or that include partial components are considered incomplete and will not be reviewed.**

International applicants are encouraged to visit the Office of International Admissions website for detailed information.

Refer to the MSRA website for deadlines, detailed information and updates regarding the application process and requirements.

## **Required Courses**

- MSRA 5000 - Introduction to Graduate Studies
- MSRA 5001 - MSRA Research Seminar
- MSRA 5580 - Graduate Audio Seminar I
- MSRA 5590 - Graduate Audio Production
- MSRA 6510 - Graduate Audio Studies Pedagogy
  
- MSRA 6950 - Thesis in Professional Audio  
or
- MSRA 6951 - Professional Audio Portfolio Thesis

**Total: 19 Semester Hours**

## **Electives**

Choose **15 semester hours** from the list below. Students may take courses not listed here upon approval of the faculty or academic advisor.

- MSRA 5500 - Topics in Professional Audio
- MSRA 5505 - Introduction to Audio Post Production
- MSRA 5530 - Live Sound Reinforcement
- MSRA 5560 - Mastering & Advanced Digital Audio
- MSRA 5575 - Graduate Surround Sound
- MSRA 5605 - Audio Post Production II
- MSRA 5820 - Digital Music Techniques
- MSRA 5840 - Independent Study for MSRA

**Program Total: 34 Semester Hours**

*Students should plan to graduate in a minimum of four semesters. Students can apply for graduation in any semester (fall, spring or summer), provided they have completed the required course work. All course work must be completed with a satisfactory grade of "B" (3.0) or higher. Students should not register for thesis/portfolio unless approved by the faculty advisor.*

**Please refer to the MSRA website for additional information.**

## **Research and Evaluation Methods MA**

Students acquire skills necessary for a variety of roles that involve data-driven decisions. Students are prepared to facilitate decision-making based on evidence. Some students pursue the degree to enhance their skills as classroom teachers. Others work in environments where information and data from different sources are used to make informed decisions.

### **Required Courses (18 credit hours)**

- RSEM 5100 - Basic Statistics
- RSEM 5120 - Introduction to Research Methods or RSEM 7000 - Doctoral Seminar in Research Methods
- RSEM 5110 - Introduction to Measurement
- RSEM 7110 - Intermediate Statistics
- RSEM 7080 - Methods of Qualitative Inquiry
- RSEM 7210 - Program Evaluation

### **Choose 3 of the following: (9 credit hours)**

- RSEM 6200 - Single Case Research Design for Education
- RSEM 7050 - Methods of Survey Research
- RSEM 7100 - Advanced Methods of Qualitative Inquiry
- RSEM 7120 - Advanced Methods in Quantitative Inquiry and Measurement
- RSEM 7150 - Mixed Methods Research
- 5000+ Level RSEM course with faculty advisor approval

### **Choose 1 of the following: (3 credit hours)**

- RSEM 6950 - Master's Thesis
- RSEM 5840 - Independent Study: RSEM
- RSEM 5910 - Practicum in Research and Evaluation Methodology

### **Total Credit Hours 30**

### **Program Requirements and Courses**

To complete the REM program and earn a master's degree, students must complete the appropriate course work as outlined in the tables above. All courses require a grade of B- or

better to count to the MA and a 3.0 minimum GPA is required for graduation. Students have 7 years in which to complete the degree.

### Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# Research and Evaluation Methods MA with a concentration in Assessment

This program concentration provides opportunities for you to develop an in-depth understanding about educational psychology as it relates to learning-related assessment. You will address issues in both classroom and large-scale assessment and focus on other forms of assessment, such as portfolios and performance assessments. You also may specialize in assessment in a content area like literacy or mathematics.

There are three possible specializations in this track: P-12 Teacher Track, Educational Leadership Track, and Research and Evaluation Track. All students will take the same courses the first year. The second year, courses vary depending on the chosen track.

## Year 1: Required REM Assessment Foundation Courses (18 credit hours)

<b>Fall Semester</b>	
RSEM 5600 - Issues in Assessment Development	RSEM 5100 - Basic Statistics
<b>Spring Semester</b>	
RSEM 5610 - Formative and Summative Assessment in the Classroom	RSEM 5080 - Research In Schools
<b>Summer Semester</b>	
RSEM 5620 - Analyzing, Using, and Reporting Assessment Results	RSEM 7050 - Methods of Survey Research

## Year 2: P-12 Teacher Track choose 3 + Practicum or Thesis (12 credit hours)

Students wanting to continue teaching in P-12 classrooms, but have teacher-leader roles

- MTED 5301 - Assessment and Equity in Mathematics Instruction

- LCRT 5020 - Reading Development, Instruction and Assessment
- LCRT 5000 - Elementary Literacy Instruction and Assessment Part 1
- LCRT 5001 - Elementary Literacy Instruction and Assessment Part 2
- LCRT 5100 - Secondary Literacy Instruction and Assessment
- 5000+ Level RSEM course with faculty advisor approval

**Choose 1 of the following:** (3 credit hours)

- RSEM 6950 - Master's Thesis
- RSEM 5840 - Independent Study: RSEM
- RSEM 5910 - Practicum in Research and Evaluation Methodology

Year 2: **Educational Leadership Track** choose 3 + Practicum or Thesis (12 credit hours)

Students interested in administration or other leadership roles

- HDFR 5003 - Leadership and Organizations
- LDFS 7712 - Learning and Human Development
- EDUC 7100 - Leadership in Education
- EDUC 7230 - Organizational Performance In Educational Contexts
- 5000+ Level RSEM course with faculty advisor approval

**Choose 1 of the following:** (3 credit hours)

- RSEM 6950 - Master's Thesis
- RSEM 5840 - Independent Study: RSEM
- RSEM 5910 - Practicum in Research and Evaluation Methodology

Year 2: **Research & Evaluation Track** choose 3 + Practicum or Thesis (12 credit hours)

- RSEM 7110 - Intermediate Statistics
- RSEM 7080 - Methods of Qualitative Inquiry
- RSEM 7210 - Program Evaluation
- RSEM 5110 - Introduction to Measurement
- 5000+ Level RSEM course with faculty advisor approval

**Choose 1 of the following:** (3 credit hours)

- RSEM 6950 - Master's Thesis
- RSEM 5840 - Independent Study: RSEM
- RSEM 5910 - Practicum in Research and Evaluation Methodology

**Total Credits for MA: 30**

**Program Requirements and Courses**

To complete the REM program and earn a master's degree, students must complete the appropriate course work as outlined in the tables above. All courses require a grade of B- or better to count to the MA and a 3.0 minimum GPA is required for graduation. Students have 7 years in which to complete the degree.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four- six courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

## **Social Science MSS**

► Graduate School Rules apply to this program

### **Requirements for Admission**

General rules for admission into the Graduate School, as well as the following apply:

- evidence of a bachelor's degree
- an official copy of transcripts from all community colleges, colleges, and universities attended
- overall GPA of at least 3.2 out of 4.0
- a writing sample
- three letters of recommendation (at least two from academic sources)
- appropriate undergraduate training or professional background, or experience that provide evidence of ability to pursue the MSS degree
- a typed statement specifying the goal of advanced study in the social sciences expressed in clear, correct and effective English. Applicants should provide a statement of their background (education and experience) and its relevance to their proposed interdisciplinary graduate work, and why this graduate program is relevant to their interests.
- standardized test scores are not required, but will be considered if submitted

After meeting all other requirements for admission, applicants may be required to have an interview to discuss their interest in the program and their plans for study. For out-of-state applicants, an appropriate substitute for the interview may be determined by the directors.

### **Provisional Admission:**

Applicants may be admitted as provisional-status graduate students if their GPA is low and their complete record indicates a high probability of success.

### **Non-degree Students:**

Potential applicants may take CU Denver graduate-level courses as non-degree students (unclassified student with a bachelor's degree) if they:

1. wish to strengthen their record in order to demonstrate their potential to successfully complete courses in the program
- or-
2. wish to start coursework in the program prior to completing their application, with the understanding that taking courses does not guarantee admission.

Up to 12 semester hours of CU Denver graduate-level work taken as a non-degree student or taken from another university may be accepted by the program once a student has been admitted to the program. For further information on non-degree graduate student status, see the Information for Graduate Students section of this catalog. In the case of CU Denver graduate students transferring to the MSS program, previous coursework may be accepted as appropriate to the MSS plan of study.

### **International Students:**

International students must also meet CU Denver requirements for international admission. See the Information for International Students section of this catalog or call 303-315-2230 for further information.

## **Degree Requirements**

The Master of Social Science (MSS) is a 36 credit hour program, of which 30 hours must meet all specifications of the Graduate School . Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. A grade below *B- in any given course* will not be counted toward the degree. All graded attempts in required and elective courses are calculated in the major GPA. Courses credited toward the MSS degree must typically be taken at CU Denver (a maximum of 12 graduate semester hours may be transferred from other institutions after matriculating into the MSS program, subject to the MSS director's approval). Students wishing to pursue study abroad options must seek advisor approval in advance.

Students may pursue a general MSS degree or concentrate their studies and coursework on an approved track.

Each student's program is supervised by MHMSS faculty. All independent study, project, and thesis contracts must be approved in advance by the program director. A total of two independent study courses and one internship may count toward the degree. Only one graduate-level online course (up to 3 hours) may be taken toward the degree, with prior approval. A maximum of two 4000-level undergraduate courses may apply, with faculty approval. Remaining coursework must be 5000-level or higher and must be completed with CU

Denver faculty or approved study away programs. All students must complete and pass a final project or thesis and an oral comprehensive defense of that work, in order to graduate.

## Three Required Core Seminar Courses

Take **all** of the following courses:

- SSCI 5020 - Foundations and Theories of Interdisciplinary Social Science  
Must be taken during the first year, offered in the fall only.
- SSCI 5013 - Methods and Practices of Graduate Interdisciplinary Humanities  
Must be taken during the first year, offered in the spring only.
- SSCI 5023 - Research Perspectives in Social Science  
Students should take this course after they have completed 21-24 credit hours and are ready to write a proposal for their thesis or project. This course is always offered in the spring and occasionally in the fall, as needed.

**Total: 9 Credit Hours**

## Electives

Students must complete a total of 21-24 credit hours. Students completing a project rather than a thesis take 24 hours of electives, while thesis students complete 21 hours of electives. Students may choose to create their own curriculum from at least two disciplines addressing their specific research interest. Alternatively, students may choose to follow an approved specialized track. Prior to taking electives, students must meet with a MHMSS program faculty advisor and establish their course of study. If students decide to change their course of study or want to substitute approved coursework, they must meet with a MHMSS program advisor in advance and gain pre-approval.

**Study Abroad:** Students wishing to count credits accrued from a study abroad program while pursuing the MSS must follow the rules of the Graduate School and must have approval of the program director in advance of studying abroad.

**Total: 21-24 Credit Hours**

## Thesis or Project

In order to proceed with a project or thesis, all students must submit a proposal and gain approval from three faculty members and the program directors.

- SSCI 6950 - Master's Thesis
- SSCI 6960 - Master's Project or Report

## **Total: 3 or 6 Credit Hours**

### **Oral Exam**

An oral exam defending the project or thesis before a committee of three faculty members must be passed in order to graduate.

## **Degree Total: 33-36 Credit Hours**

### **MSS Elective Pathways:**

#### **General MSS Track**

Students pursuing the general MSS degree track create a course of study based on their individual interests and goals. In consultation with a faculty advisor, students choose two or three academic disciplines as areas of concentration. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

#### **Specialized MSS Tracks**

Students may also focus in one of the tracks in the Master of Social Science program: **Community Health, Ethnic Studies, International Studies, Social Justice, Society and the Environment, or Women and Gender Studies.** Tracks allow students to concentrate their studies in a defined field designed by faculty. Students who opt to complete a thesis will submit a thesis proposal after completing 30 hours of course work. In the case of a project, students will submit a project proposal after 33 hours.

#### **Community Health Track**

The Community Health track focuses coursework on social and communication theory, demographics and ethnic dimensions to public health, basic research methods, and statistics, in order to facilitate development of problem solving and critical thinking skills in the areas of epidemiology, public health and public health education, and health planning.

*In addition to the MSS Core requirements, students must:*

***Complete 9 credit hours of approved methods courses from the following list- some of these courses have prerequisites that must be met:***

- HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I
- ANTH 6063 - Qualitative Research Design and Methods

- HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences
- HBSC 7071 - Social and Behavioral Determinants of Health and Disease

***Complete a minimum of 6 credit hours of approved community health related elective coursework from the list below-substitutes may be approved by the student's advisor:***

- ANTH 5600 - Medical Anthropology
- ANTH 5290 - Anthropology and Public Health
- ANTH 5300 - Migrant Health
- COMM 5500 - Health Communication
- COMM 5550 - Rhetorics of Medicine & Health
- COMM 5620 - Health Risk Communication
- ECON 6210 - Public Finance
- ENVS 6230 - Environmental Epidemiology
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- GEOG 5235 - GIS Applications in the Health Sciences
- GEOG 5710 - Disasters, Climate Change, and Health
- HLTH 6010 - Health Care Systems
- HLTH 6070 - International Health Policy and Management
- PHIL 5242 - Bioethics
- PSCI 5354 - Seminar: Environmental Politics and Policy
- PUAD 5615 - Health Policy
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present

***Complete a project or thesis on an approved community health related topic.***

## **Ethnic Studies Track**

The Ethnic Studies track explores the construction of race and ethnicity by governments and communities through the intersection of popular culture and public policy in both the historical and contemporary contexts.

*In addition to the MSS Core requirements, students must:*

***Complete at least one ethnic studies methods/theory course from the list below:***

- ETST 5000 - Research Methods in Ethnic Studies
- EDFN 5001 - Problematizing Whiteness: Educating for Racial Justice

***Complete a minimum of 12 credit hours of approved ethnic studies related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 5350 - Anthropology of Globalization
- COMM 5270 - Intercultural Communication
- EDFN 5050 - Critical Issues in American Education
- ENGL 5220 - African-American Literature
- ENGL 5460 - Contemporary World Literature
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5415 - Social Revolutions in Latin America
- HIST 5455 - African Struggle for Independence
- HIST 5462 - Islam in Modern History
- HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- SSCI 5540 - Law, Diversity and Community in United States History
- PSCI 5094 - Seminar: Urban Politics
- PSCI 5145 - Indigenous Politics
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5256 - Seminar: National Question and Self-Determination
- PSCI 5446 - Advanced Indigenous Peoples' Politics
- PSCI 5545 - Immigration Politics
- PSCI 5914 - Community Organizing and Community Development
- SOCY 5050 - Health Disparities
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SOCY 5690 - Crime and Inequality Over the Life Course
- SPAN 5020 - Spanish Sociolinguistics
- SPAN 5060 - Dialects of the Spanish-Speaking World
- SPAN 5076 - Spanish in Colorado
- SPAN 5080 - Spanish in the United States
- SPAN 5521 - Mexican Literature I: pre-Columbian and Colonial
- SPAN 5522 - Mexican Literature II: 19th to 21st Centuries

*Complete a project or thesis on an approved ethnic studies related topic.*

## **International Studies Track**

Through humanistic and social science methodologies and hands-on experiences both in Denver and abroad, students learn to identify patterns and trends in the multifaceted discipline of international studies.

*In addition to the MSS Core requirements, students must:*

***Complete the methodology course listed below or one approved by the MSS program advisor:***

- PSCI 5216 - Seminar: International Relations

***Complete a minimum of 15 credit hours of approved international studies related elective coursework from the list below, substitutions may be approved by the student's advisor :***

- ANTH 5350 - Anthropology of Globalization
- COMM 5270 - Intercultural Communication
- COMM 5720 - Dynamics of Global Communication
- HIST 5032 - Globalization in World History Since 1945
- HIST 5220 - U.S. Foreign Policy Since 1912
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HUMN 5770 - Imperialism, Post-Colonial Theory & Visual Discourse
- PHIL 5220 - Aesthetics and the Philosophy of Art
- PSCI 5236 - Seminar: American Foreign Policy
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5286 - International Relations: War or Peace?
- PSCI 5326 - Advanced International Political Economy: Globalization
- PSCI 5545 - Immigration Politics
- PSCI 5555 - International Women's Resistance
- SOCY 5460 - Hate Groups and Group Violence
- SOCY 5610 - Sociology of Religion

*Complete a project or thesis on an approved international studies related topic.*

## **Social Justice Track**

The Social Justice track expands students' recognition of the many ways that they are already engaged as citizens and highlights their power to effect change through theoretical and moral education, critical thinking, and community engagement.

*In addition to the MSS Core requirements, students must:*

***Complete a minimum of 12 credit hours of approved social justice related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- BUSN 6540 - Legal and Ethical Environment of Business
- COMM 5040 - Communication, Prisons, and Social Justice
- ENGL 5190 - Advanced Topics in Writing & Digital Studies (depending on topic)
- HIST 5455 - African Struggle for Independence
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5415 - Social Revolutions in Latin America
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5225 - Urban America: Colonial Times to the Present
- HIST 5032 - Globalization in World History Since 1945
- HUMN 5650 - Reflections on Modernity
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- PSCI 5025 - Local Governance and Globalization
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5225 - Democracy and Democratization
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5286 - International Relations: War or Peace?
- PSCI 5414 - Non-Profits and Social Change
- PSCI 5545 - Immigration Politics
- PSCI 5555 - International Women's Resistance
- PSCI 5837 - Contemporary Issues in Civil Liberties
- SOCY 5440 - Poverty and Social Inequality
- SOCY 5460 - Hate Groups and Group Violence
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present

*Complete a project or thesis on an approved social justice related topic.*

It is **HIGHLY RECOMMENDED** that students in this track take at least one quantitative and/or one qualitative research methods course as part of their plan of study. There are quantitative and qualitative methods courses offered in Anthropology, Environmental Science, Political Science, Sociology, and

Research, Evaluation, and Statistical Methodology (RESM), which can be approved by the student's MHMSS faculty.

## **Society and the Environment Track**

Society and the Environment is an interdisciplinary track challenges students to apply knowledge from the social and biological sciences to environmental problems across a broad spectrum of institutional sectors and geographic locations.

*In addition to the MSS Core requirements, students must:*

***Complete all required methods courses from the list below:***

- ANTH 5053 - Quantitative Methods in Anthropology
- ANTH 6063 - Qualitative Research Design and Methods

***Complete one technical course from the list below:***

- ANTH 5450 - Development and Conservation: Contemporary Issues
- ANTH 5460 - Development and Conservation: Theory and Practice
- ENVS 6200 - Risk Assessment
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5080 - Introduction to GIS
- GEOG 5235 - GIS Applications in the Health Sciences

*Complete a minimum of 12 credit hours of approved society and environment related elective coursework from the list below, **substitutions may be approved by the student's advisor :***

- COMM 5282 - Environmental Communication
- GEOG 5090 - Environmental Modeling with Geographic Information Systems
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- GEOG 5265 - Sustainability in Resources Management
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5350 - Environment and Society in the American Past
- GEOG 5420 - The Politics of Nature
- GEOG 5440 - Science, Policy and the Environment
- GEOG 5680 - Urban Sustainability: Perspectives and Practice
- GEOG 5710 - Disasters, Climate Change, and Health
- PSCI 5135 - Seminar: Political Economy of Latin America
- PSCI 5145 - Indigenous Politics
- PSCI 5217 - Human Rights in Theory and Practice

- PSCI 5236 - Seminar: American Foreign Policy
- PSCI 5276 - Conflicts and Rights in International Law
- PSCI 5354 - Seminar: Environmental Politics and Policy
- PSCI 5555 - International Women's Resistance
- ENVS 5010 - Landscape Biogeochemistry
- ENVS 5020 - Earth Environments and Human Impacts
- ENVS 5280 - Environmental Hydrology

*Complete a project or thesis on an approved society and environment related topic.*

## **Women's and Gender Studies Track**

Women's and Gender Studies are based in feminist theory, queer theory, post-colonial and ethnic studies, and a variety of social sciences and cultural studies.

*In addition to the MSS Core requirements, students must:*

***Complete at least one WGST theory course from the list below:***

- SSCI/WGST/ HUMN 6010 - Methods and Theories of Feminism and Gender
- PHIL/ WGST 5500 - Feminist Philosophy
- HIST/WGST/ ENGL 5306 - Survey of Feminist Thought

***Complete a minimum of 12 credit hours of approved women's and gender studies related elective coursework from the list below, substitutions may be approved by the student's advisor:***

- ENGL 5000 - Studies of Major Authors (when the author is a female)
- ETST/ PSCI 4827 - Women and the Law
- ENGL/WGST/ HIST 5306 - Survey of Feminist Thought
- SSCI/WGST/ HUMN 5720 - Sexuality, Gender and Their Visual Representation
- HUMN/ SSCI 5770 - Imperialism, Post-Colonial Theory, Visual Discourse
- PSCI 4215 - Women's Rights, Human Rights: Global Perspectives
- PSCI 5245 - Gender, Globalization and Development
- PSCI 5555 - International Women's Resistance
- PSCI 4564 - Gender and Politics
- CRJU 5930 - Interpersonal Violence Law and Public Policy
- CRJU 5910 - Nature and Scope of Interpersonal Violence
- WGST/ PHIL 5500 - Feminist Philosophy
- PHIL 5308 - Contemporary Feminist Thought

- SOCY 5550 - Seminar: Sociology of the Family
- WGST 5510 - Whores and Saints: Medieval Women
- WGST 5511 - French Women Writers
- WGST 5230 - Women in the West
- WGST 5248 - Gender, Globalization and Development
- WGST 5303 - Sex and Gender in Modern Britain
- WGST 5307 - History of Sexuality
- WGST 5345 - Gender, Science and Medicine: 1600 to the Present
- WGST 5420 - Goddess Traditions

*Complete a project or thesis on an approved women's and gender studies related topic.*

## Sociology MA

► Graduate School Policies and Procedures apply to this program

### Program Requirements

The MA program in Sociology provides a coherent, progressive educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. Students choose from two options for their Comprehensive Paper that completes the master's degree: either a 6-credit thesis, or a 3-credit applied experience plus a 3-credit paper. The program also offers 3 concentration areas (Crime, Law & Deviance; Health & Society; Family, Social Services & Community) for students seeking specialization in high-demand career areas.

### Required Courses

#### Tier 1 Knowledge

This includes 5 courses required for all graduate students. SOCY 5000 must be taken in the first fall semester. SOCY 5024 must be taken before SOCY 5183 and SOCY 5193. Students must earn a *B* or better in all core courses.

- SOCY 5000 - Professional Seminar: Sociological Inquiry (3 credits)
- SOCY 5016 - Social Theory (3 credits)
- SOCY 5024 - Seminar: Research Methods I (3 credits)
- SOCY 5183 - Seminar: Quantitative Data Analysis (3 credits)
- SOCY 5193 - Seminar: Qualitative Data Analysis (3 credits)

**Tier 1 total: 15 Credits**

## **Tier 2 Knowledge Applied to Substantive Areas**

- 12 elective credits. Credit requirements are fulfilled only for those courses earning a minimum grade of B-.

**Tier 2 total: 12 Credits**

## **Tier 3 Comprehensive Paper**

- SOCY 5955 - Master's Thesis (6 credits)  
OR
- SOCY 5939 - Internship (3 credits)  
OR
- SOCY 5840 - Independent Study: SOCY  
AND
- SOCY 5964 - Master's Report (3 credits)

**Tier 3 total: 6 Credits**

## **Plans of Study**

Students must choose **one** of the following Comprehensive Paper options:

### **Thesis Option Requirements**

Core course requirements                      15 Credits

Four substantive area courses                12 Credits

Master's Thesis                                    6 Credits

- SOCY 5955 - Master's Thesis

**Thesis Option Total: 33 Credits**

### **Applied Project Requirements**

Core course requirements                      15 Credits

Four substantive area courses                12 Credits

Applied Experience (internship or independent study)    3 Credits

Master's Paper

3 Credits

- SOCY 5939 - Internship
- SOCY 5840 - Independent Study: SOCY
- SOCY 5964 - Master's Report

**Applied Project Total: 33 Credits**

## **Substantive Area Requirements (12 credits for both options)**

Students can take an unlimited number of sociology graduate (5000-level) seminars to fulfill their 12 elective credits requirement, or a combination of the following:

- Independent study: maximum 6 semester hours
- Graduate level courses in other departments: maximum 6 semester hours
- Internship: maximum 3 semester hours

For further information about the Department of Sociology or the MA program, visit the Sociology website.

# **Spanish MA**

►Graduate School Policies and Procedures apply to this program

The faculty of the CU Denver Modern Languages Department offer a Spanish Master's degree program that is an alternative to the exclusively literary studies that traditionally lead to doctoral programs. By integrating language, literature and cultural studies with ancillary work in other disciplines, the degree provides a broader expertise that will lead to or enhance careers in teaching, government, social services, business and international trade. Students will tailor the program to their specific interests and needs by developing a topical focus and including courses from outside the Department of Modern Languages, through which they may develop a secondary emphasis that can be incorporated in a thesis project.

## **Requirements for Admission**

In addition to the general admission requirements of the Graduate School, the Spanish MA program requires:

- an undergraduate GPA of at least 3.0, with a GPA of at least 3.0 in Spanish courses
- a bachelor's degree in Spanish is not required, although all candidates must demonstrate Spanish oral and written proficiency at the advanced level, as defined by the American Council on the Teaching of Foreign Languages
- two copies of all college transcripts

- three letters of recommendation
- a statement of the applicant's purpose in pursuing the degree, in Spanish; any gaps, weaknesses or special circumstances affecting an applicant's academic record should be addressed in the statement of purpose portion of the application
- a TOEFL score higher than 550 for students whose previous academic degree was completed in a non-English-speaking country

In special circumstances, the department may modify its admission standards.

## Program Requirements

1. Students must complete a minimum of 27 SPAN credit hours.
2. Students must complete a minimum of 30 graduate level (5000 or above) credit hours.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Candidates in Spanish must satisfy the general requirements of the Graduate School as outlined in this catalog and will be required to complete 33 hours of course work distributed with respect to one of the following two options:

### Thesis option (course work + thesis):

- **3 hours** SPAN 5000 - Introduction to Graduate Studies in Spanish
- **24 hours** Literature/Culture and Linguistics coursework, including at least 6 semester hours in Literature/Culture and 6 in Linguistics. Students may include up to two courses (3-6 credits) from outside the Modern Languages Department, as approved by their advisor.
- **6 hours** SPAN 5950 - Master's Thesis preparation and writing

### Thesis Option Total: 33 Hours

### Nonthesis option (course work):

- **3 hours** SPAN 5000 - Introduction to Graduate Studies in Spanish
- **30 hours** Literature/Culture and Linguistics coursework, including at least 6 hours in Literature/Culture and 6 in Linguistics. Students may include up to two courses (3-6 credits) from outside the Modern Languages Department, as approved by their advisor.

## **Nonthesis Option Total: 33 Hours**

### *Notes:*

1. No more than one undergraduate course (3 semester hours) may be applied toward the MA degree, and that course must have been taken at the 4000 level or above and in an ancillary field outside the Department of Modern Languages.
2. Students choosing the nonthesis option may elect to take three courses (9 semester hours) outside the department.

## **Financial Aid**

The department offers a limited number of teaching assistantships for graduate students on a semester-by-semester basis. Appointment is competitive and is typically based on a student's academic credentials. Contact the department for details. For information on grants, federal work-study programs, scholarships and loans, contact the Office of Financial Aid (303-556-2886).

For further information concerning the master's degree in Spanish at CU Denver, direct inquiries to the graduate advisor.

# **Statistics MS**

## **Program Requirements**

Students must present 30 hours of course work (which are broken into 4 components as detailed below) and maintain a 3.0 GPA or above for the MS degree. At least 24 of these hours must consist of graduate level (numbered 5000 or higher) courses with the MATH prefix. The remaining 6 hours must be either MATH courses numbered 5000 or above or approved courses outside the department numbered 4000 or above.

Up to 9 semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward another degree (graduate or undergraduate) cannot be used toward the MS degree in Statistics. Additionally, the following MATH courses will NOT count toward a graduate degree: MATH 5010, 5012-5015, 5017, 5198, 5250, and 5830.

All students must complete a written project and pass a final oral exam. The project is developed as a student-centered independent research component within MATH 5960 unless the student has chosen the thesis option. For students choosing the thesis option, 4 to 6 hours (of the 30 required hours) may be devoted to the writing of a thesis through MATH 5950. By graduate school rules, Master's students, whether enrolled full-time or part-time, must complete all degree requirements within 7 years of matriculation.

## Course Requirements for the MS Degree in Statistics

The MS degree in Statistics consists of 4 components: 1) core courses, 2) statistics electives, 3) other electives, and 4) MATH5960 (Master's project) or MATH5950 (Master's thesis).

**Core Courses:** The core courses include:

- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis
- MATH 6330 - Workshop in Statistical Consulting

**Statistics Electives:** Nine hours of statistics electives are required. A running list is given below. Additional courses can be substituted given prior approval by the student's advisor and the Director of the Program in Statistics.

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6101 - Uncertainty Quantification
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7386 - Monte Carlo Methods
- MATH 7393 - Bayesian Statistics
- MATH 7826 - Topics in Probability and Statistics

Additional courses may be taken but students must seek prior approval from their advisor and the Director of the Program in Statistics.

**Other Electives:** Six hours of other electives are required. Any MATH prefix course that can be used for an MS or Ph.D. degree in Applied Mathematics can be used as an Other Elective. While these courses could be additional statistics-focused courses, the added flexibility allows students to direct their coursework into other areas of mathematics and/or science. The following courses will not count toward the M.S. in Statistics: MATH 5010, MATH 5012-5015, MATH 5017, MATH 5198, MATH 5250 and MATH 5830.

# STEM Education MA with a concentration in Math and Science Education

Math-science educators are in high demand. CU Denver recognizes this shortage and prepares teachers to effectively guide today's learners. Math-science teachers need expertise in understanding STEM learning and highly effective assessment and teaching practices. CU Denver's MA in STEM Education with a concentration in math-science education prepares you to be a leading educator at the forefront of this field.

**This degree plan does not include a license or an endorsement.**

This degree has both on-campus and online options. Online options are 100% online only. Hybrid courses are available to distance students. Distance students participate via video conference in hybrid courses and local students attend face to face sessions. Therefore, the program may be completed with online courses.

**Core Courses** (12 credit hours) - will be decided by student with Faculty Advisor

- two courses from the Mathematics Education (MTED) on campus or online core (6 credit hours)
- two courses from the Science Education (SCED) core (6 credit hours)

In consultation and with approval from your faculty advisor, select five courses from the **Thematic Course Categories** to customize your learning (15 credit hours).

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

**Concentration Research Course** (3 credit hours):

- RSEM\_\_\_\_\_

To be decided by student with Faculty Advisor

**Concentration Capstone Course:**

The Capstone is completed in your final core course. The Capstone Course is not an additional 3 credit hours; rather it is a project which takes place within one of your core MTED or SCED courses.

**Total Credit Hours 30**

**Program Requirements and Courses**

To complete the STEM Education program and earn a master's degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **STEM Education MA with a concentration in Mathematics Education: On Campus**

The need for qualified and effective mathematics teachers has never been greater. University of Colorado Denver recognizes that impactful mathematics teaching requires a deep understanding of both student learning and mathematic content. Graduates of the STEM MA mathematics education concentration are positioned to work successfully in leadership roles in urban and diverse schools and understand the important role mathematics play in their student's lives.

**This degree plan does not include a license or an endorsement.**

This degree option is available for on-campus students. Core Courses are fully online. You may choose elective courses in on-campus, hybrid, or fully online formats.

### **Core Courses** (12 credit hours)

- MTED 5621 - A World of (Different) Numbers: Quantity and Operation
- MTED 5622 - Expanding Conceptions of Algebra
- MTED 5623 - Geometrical Ways Of Reasoning
- MTED 5301 - Assessment and Equity in Mathematics Instruction

### **Thematic Course** (15 credit hours)

The Thematic Course Categories is a collection of courses across all SEHD disciplines designed to allow students to expand student learning.

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

### **Concentration Research Course** (3 credit hours)

RSEM \_\_\_\_\_

To be decided by student with Faculty Advisor

### **Concentration Capstone Course**

MTED \_\_\_\_\_

The Capstone is completed in your final core course.

### **Total Credit Hours 30**

### **Program Requirements and Courses**

To complete the STEM Education program and earn a master's degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **STEM Education MA with a concentration in Mathematics Education: Online**

The need for qualified and effective mathematics teachers has never been greater. University of Colorado Denver recognizes that impactful mathematics teaching requires a deep understanding of both student learning and mathematic content. Graduates of the STEM MA mathematics education concentration are positioned to work successfully in leadership roles in urban and diverse schools and understand the important role mathematics play in their student's lives.

**This degree plan does not include a license or an endorsement.**

This degree option is available for online students. Core courses are fully online and asynchronous. Distance students may select hybrid courses when available. Distance students participate via video conference in hybrid courses and local students attend face to face sessions. Therefore, the program may be completed with online courses.

### **Core Courses** (12 credit hours)

- MTED 5621 - A World of (Different) Numbers: Quantity and Operation
- MTED 5622 - Expanding Conceptions of Algebra

- MTED 5623 - Geometrical Ways Of Reasoning
- MTED 5301 - Assessment and Equity in Mathematics Instruction

### **Thematic Courses** (15 credit hours)

The Thematic Course Categories is a collection of courses across all SEHD disciplines designed to allow students to expand student learning.

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

### **Concentration Research Course** (3 credit hours)

RSEM\_\_\_\_\_

To be decided by student with Faculty Advisor

### **Concentration Capstone Course**

MTED\_\_\_\_\_

The Capstone is completed in your final core course.

### **Total Credit Hours 30**

### **Program Requirements and Courses**

To complete the STEM Education program and earn a master's degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **STEM Education MA with a concentration in Science Education**

CU Denver's STEM Education MA with a concentration in science education prepares licensed practicing teachers to think critically about the nature of science education from a research oriented perspective. Graduates of this program are positioned to be leaders in their communities, and in diverse schools.

**This degree plan does not include a license or an endorsement.**

This degree has both on-campus and online options. Online options are 100% online only. Hybrid courses are available to distance students. Distance students participate via video conference in hybrid courses and local students attend face-to-face sessions. Therefore, the program may be completed with online courses.

### **Core Courses** (12 credit hours)

- SCED 5340 - Equity & Culture in Science Education: Local/Global
- SCED 5500 - The Nature of Science
- SCED 5350 - Issues and Trends in Science Education
- SCED 6110 - Science and Math Curriculum Studies

### **Thematic Course** (15 credit hours)

The Thematic Course Categories is a collection of courses across all SEHD disciplines designed to allow students to expand student learning.

- Course 1
- Course 2
- Course 3
- Course 4
- Course 5

### **Research Course** (3 credit hours)

RSEM \_\_\_\_\_

To be decided by student with Faculty Advisor

### **Capstone Course**

SCED \_\_\_\_\_

The Capstone is completed in your final core course.

### **Total Credit Hours 30**

### **Program Requirements and Courses**

To complete the STEM Education program and earn a master's degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Taxation MS**

**Program Director:** Eric Zinn  
**Telephone:** 303-315-8482  
**E-mail:** Eric.Zinn@ucdenver.edu

The world of tax is constantly changing. Globalization and increased competition, both domestically and internationally, have created a situation where tax law is helping to shape social, political, economic, and business policies and agendas. Because of this constant change, the demand for tax professionals potentially may grow by more than 20% in the next decade, and, with that growth, average starting salaries can be as high as \$50,000 or \$60,000.

To meet market demand for tax professionals, the CU Denver Business School has created an MS in Taxation ("MTAX") degree program to give students the skills and knowledge they need to succeed in this dynamic and intriguing career field. The MTAX degree program is a 30-semester hour program, typically comprised of ten 3-semester hour courses.

## **Tax Prerequisites: (12 semester hours)**

The MS in Taxation requires completion of the following accounting prerequisites.

Required Prerequisite Courses (advisor will evaluate transcript for possible waivers, grades must be a C or better to be considered for possible waiver):

- ACCT 6031 - Intermediate Financial Accounting I  
(Equivalent undergrad course: ACCT 3220 Intermediate Financial Accounting I)
- ACCT 6032 - Intermediate Financial Accounting II  
(Equivalent undergrad course: ACCT 3230 Intermediate Financial Accounting II)
- ACCT 6070 - Intermediate Cost Accounting  
(Equivalent undergrad course: ACCT 3320 Intermediate Cost Accounting)
- ACCT 6140 - Fundamentals of Federal Income Tax  
(Equivalent undergrad course: ACCT 4410 Fundamentals of Federal Income Tax)

## **Tax Core: (24 semester hours)**

Students may not receive graduate credit for undergraduate coursework and may not retake any course successfully completed at the undergraduate level with a grade of "C" or better. An advisor will evaluate prior coursework to determine possible substitutions.

- ACCT 6020 - Auditing Theory
- ACCT 6054 - Accounting Information Systems
- ACCT 6150 - Taxation of Business Entities
- ACCT 6280 - Accounting Ethics
- ACCT 6400 Taxation of C Corporations and Shareholders
- ACCT 6410 Advanced Tax for Individuals

- ACCT 6450 Tax Research
- ACCT 6480 Partnership Taxation

## **Tax Electives: (6 semester hours)**

Choose two from the following courses:

- ACCT 6024 - Advanced Financial Accounting
- ACCT 6080 - Accounting for Government and Nonprofit Organizations
- ACCT 6250 - Seminar: Financial Accounting
- ACCT 6260 - Seminar: Managerial Accounting
- ACCT 6285 - Accounting and Finance for Sustainability
- ACCT 6330 - Fraud Auditing
- ACCT 6340 - Financial Statement Analysis
- ACCT 6370 - International Accounting
- ACCT 6520 - Issues in Oil and Gas Accounting
- ACCT 6620 - Seminar: Auditing and Other Assurance Services
- ACCT 6939 - Internship/Cooperative Education

**Total: 30 hours**

# **Urban and Regional Planning MURP**

**Chair:** Austin Troy

**Office:** CU Denver Building 330F

**Telephone:** 303-315-1000

**Fax:** 303-315-1050

## **Faculty**

### **Professors:**

Nan Ellin, PhD, Columbia University

Austin Troy, PhD, University of California, Berkeley

### **Associate Professor:**

Jeremy Németh, PhD, Rutgers University

Andrew Rumbach, PhD, Cornell University

### **Assistant Professors:**

Carrie Makarewicz, PhD, University of California, Berkeley

Manish Shirgaokar, PhD, University of California, Berkeley

## **Assistant Professors (Clinical Teaching Track):**

Ken Schroepfel, MURP, University of Colorado Denver

Jennifer Steffel Johnson, PhD, University of Colorado Denver

Additional information about faculty in this department is available on the college website.

## **Overview**

The Department of Urban and Regional Planning at the University of Colorado Denver has evolved to become one of the strongest, most unique graduate planning programs in the United States, offering a real-world, experientially-oriented program that uses Colorado as a classroom and engages students with the community. It offers the Master in Urban and Regional Planning degree, the only accredited graduate planning degree in the state of Colorado.

We believe that successful city-building requires expertise, breadth, interdisciplinary understanding, and creativity. Our program looks beyond traditional professional silos and instead centers on issues at the forefront of planning practice. Our three Initiatives - Healthy Communities, Urban Revitalization, and Regional Sustainability - form the basis of our research, instruction, and community outreach.

We encourage all students to follow their passion and develop expertise in the areas that matter most to them. Our unique, self-directed curriculum that allows students to understand the breadth of the planning field while gaining the technical expertise demanded by the profession.

Our list of program faculty includes some of the most respected researchers and educators in the planning field, as well as top local planning practitioners, all of whom bring a wealth of experience to the classroom. All of our faculty make teaching a top priority.

Our presence in a College of Architecture and Planning ensures that our approach to planning education has a strong connection to design, and our location in the heart of downtown Denver offers students endless opportunities for experiential learning and interaction with the community.

## **Program Mission and Values**

Our vision is to be a national leader in educating skilled, engaged planners and creating vibrant, sustainable communities.

Inspired by our setting in the downtown of a thriving urban center in the dynamic Rocky Mountain region, our mission is to:

- **Teach** - Teach our students the knowledge, skills, and values they need to be confident, principled, and visionary planners, using Colorado as our classroom to engage students in real-world, experiential learning.

- Advance - Advance the field of planning through insightful, relevant research that directly informs policy and improves our built, natural, and social environments.
- Serve - Serve as a vital resource for communities and professionals, and help develop sustainable solutions to our region's complex planning challenges.

Several core values inspire all the work we do:

- Advocacy - We believe planners must be visionary in their work, politically engaged, and articulate proponents for positive change.
- Collaboration - We believe planners must understand and value the principles and perspectives of allied disciplines that participate in planning and city building.
- Engagement - we believe students should learn planning by interacting directly with professionals and the public to solve real-world planning challenges.
- Evidence-based approaches - We believe that planning research and practice should be rooted in critical thinking, appropriate methods, and rigorous analysis for developing evidence-based solutions.
- Service - We believe our program should serve as a resource for planning professionals and the public by offering ideas, solutions, research, advocacy, and inspiration.
- Sustainability - We believe planning must be based on the principles of economic viability, environmental resiliency, and social equity.
- Social Justice - We believe planning must strive to create the most just and equitable processes and outcomes for historically marginalized, underrepresented, and disenfranchised individuals and communities

## **Our Faculty**

The faculty of the Department of Urban and Regional Planning consists of a purposeful mix of full-time tenured/tenure-track faculty, full-time clinical-track faculty, and a diverse group of part-time lecturers who keep one foot in the professional practice of planning and one in the classroom. The MURP program and its students benefit from the rich contributions of the scholarly research accomplished by our tenured/tenure-track faculty, and the practice-oriented instruction provided by our lecturers and instructors. To learn more about our MURP faculty members, please visit the college website.

## **Our Students**

Our commitment to our students extends across many areas: providing them with exceptional instruction and research-backed knowledge about planning; inspiring them to achieve great things in their personal and professional lives; exposing them to planning professionals, real-world planning situations, and state-of-the-art learning resources; and helping them choose their best academic and career paths through advising and mentoring.

# Curricular Approach

## Program Hallmarks

Our passion for teaching students the knowledge, skills and values they will need to be confident, principled, and visionary planners is reflected in the five key features we've integrated across our program and curriculum:

- **Engaged and Experiential Learning**  
We give students numerous opportunities throughout our program to gain hands-on experience by participating in real-world projects and interacting with professional planners and community stakeholders. We use Denver's diverse urban setting and Colorado's rural and mountain landscapes as a real-world classroom for students to engage with the built, natural, and social environments.
- **Physical Planning Orientation**  
We emphasize physical planning and design throughout our curriculum and connect them to policy, research, and the social sciences. We work closely with the College's Architecture, Urban Design, Landscape Architecture, and Historic Preservation programs to explore and develop applied solutions to urban social, economic, and environmental issues.
- **International Learning Opportunities**  
We provide students the opportunity to study planning from an international perspective. By offering lecture courses that focus on global planning and development issues, studios that involve on-site coursework and engaged learning in other countries, and collaborations with universities and organizations abroad, we help students expand their personal and educational worldview.
- **Integrated Planning Technologies**  
We integrate into our curriculum key professional technologies in realms such as digital mapping, 3D modeling, data visualization, and spatial analysis. We capitalize on Denver's entrepreneurial spirit and tech-focused economy to provide students with state-of-the-art resources and numerous opportunities to learn a variety of technologies and applications used as critical tools in the planning process.
- **Self-Directed Elective Curriculum**  
We empower students with the opportunity to craft a planning education suited to their career goals and personal interests. Students may choose any combination of elective courses, whether oriented toward one of our three curriculum pillars, a traditional or customized planning specialization, or a generalist survey of the planning field.
- **Professional and Career Development**  
We present students with instruction, guidance, and resources for understanding the

many career paths within planning and allied fields and how to strategically position themselves to successfully achieve their professional and personal goals. We enable students to be prepared for not only their first planning job, but for a lifelong career.

- **Diverse Faculty Experience**

We embody a planning faculty comprised of a mix of clinical professors and lecturers who bring to the classroom years of professional experience and expertise in planning-related fields, and tenure-track professors who bring experience in scholarship and research. All of our faculty make teaching a top priority.

## **Dual Degrees**

As part of encouraging among planners an appreciation for and a knowledge of the perspectives and practices of the other disciplines that participate in planning and city-building, we offer several dual degree opportunities, both with programs within the College of Architecture and Planning and with other units across the University of Colorado system. In every instance, the total credit requirement of the Dual Degree is considerably less than would be needed if each degree were independently pursued. The degrees that may be combined with the Master of Urban and Regional Planning include:

- Master of Architecture (MURP+MARCH)
- Master of Landscape Architecture (MURP+MLA)
- Master of Public Health (MURP+MPH)
- Master of Public Administration (MURP+MPA)
- Master of Business Administration (MURP+MBA)
- Master of Science degree in Historic Preservation (MURP+MSHP)
- Master of Engineering - Transportation Systems (MURP+MENG)
- Juris Doctorate (Law Degree) (MURP+JD-in collaboration with the CU Boulder Law School)

Information about the dual degrees can be found on the College website.

## **Programs**

- Urban and Regional Planning MURP

# **URBAN AND REGIONAL PLANNING MURP**

The Master of Urban and Regional Planning Program at the University of Colorado Denver offers a hands-on learning experience that uses Colorado as a classroom, incorporates experiential education in the curriculum, and engages students with real-world issues and community stakeholders.

The program is built on the belief that successful city-building requires expertise, breadth, interdisciplinary understanding, and creativity. Our program looks beyond traditional professional silos and instead centers on issues at the forefront of planning practice. Our three Initiatives - Healthy Communities, Urban Revitalization, and Regional Sustainability - form the basis of our research, instruction, and community outreach.

Students in the MURP program are encouraged to follow their passion and develop expertise in the areas that matter most to them. Thus, we offer a unique, self-directed curriculum that allows students to understand the breadth of the planning field while gaining the technical expertise demanded by the profession. Our list of program faculty includes some of the most respected researchers and educators in the planning field, as well as top local planning practitioners, all of whom bring a wealth of experience to the classroom. All of our faculty make teaching a top priority.

Our presence in a College of Architecture and Planning ensures that our approach to planning education has a strong connection to design, and our location in the heart of downtown Denver offers students endless opportunities for experiential learning and interaction with the community.

## **Curriculum**

### **Program Requirements**

Completing the MURP degree requires 54 semester hours, comprised of 36 semester hours of required "core" courses and 18 semester hours of elective courses. (Six of the 36 required semester hours represent a self-directed Capstone project or thesis.) Most full-time students complete the program in two years, while other students complete the program at a slower or part-time pace.

New students begin the program of study in the fall semester. Full-time students typically take approximately 12 semester hours per semester; taking more than 15 per semester is generally ill-advised. With the exception of the studio and capstone courses, most core courses are offered only one semester per year so it is important to pay attention to the scheduling to ensure your desired graduation date.

### **Program Requirements**

The total number of semester hours required to earn the Master of Urban and Regional Planning degree is 54. To reach the 54 total semester hours needed, students must earn 36 credits by completing and passing the required core courses. Students must earn an additional 18 credits by completing elective courses of their choice. Students must also meet final course

grade minimums and cumulative GPA requirements. Please note: The 54 total semester hours needed may be reduced for students who meet the requirements for advanced standing or who have transfer credits, please refer to the MURP Student Handbook for guidelines.

## **Potential Specializations**

We encourage students to view their planning education through a fresh perspective aimed at a planning goal or agenda, rather than a "job description." However, we also recognize that some students may want their MURP degree to focus on a traditional specialization, such as Transportation Planning or Economic Development. To ensure all our students have the educational experience they are seeking, we provide exceptional coverage across many traditional specialization topics.

## **Advising**

Roxy New serves as the MURP Academic Advisor and Course Coordinator on the College staff. She is the keeper of MURP student records and the person to ask about academic policies and which forms need to be filled out for different things. Roxy can help you with registering for classes and graduation requirements. If your question or issue has to do with anything administrative relating to the MURP program, the College of Architecture and Planning, or the University of Colorado Denver, start with contacting Roxy at [roxy.new@ucdenver.edu](mailto:roxy.new@ucdenver.edu) or 303-315-0343.

In addition to Roxy, the Planning faculty are also an important advising resource for MURP students. The Planning faculty can help you with information about specific course content, career advice, and any other issues relating to the MURP curriculum, academic achievement, extracurricular activities, or urban and regional planning in general. At the start of the fall semester, you will select an initial faculty advisor from among the seven full-time Planning faculty and will be required to have an introductory meeting with that faculty member during the first two weeks of the fall semester. After that, we have an "open door" policy on advising, which means you may stick with that initial faculty advisor, choose a different faculty member to be your advisor, or have multiple faculty advisors. You may choose your faculty advisors based on their expertise in a particular area of interest (see list below) or based on whatever criteria are important to you. You are welcome to change faculty advisors at any point or seek advice from multiple faculty members. You may work with your faculty advisor as much or as little as you need.

We recommend you use a MURP Program Planning Form available on the college website to keep track of the courses you've taken and that you plan to take while you're a MURP student. Planning forms are also available to help guide dual degree students. Dual degree students should have an advisor in each relevant department or college. Electronic Degree Auditing is available for all MURP students. This online system allows you to check which degree requirements you have personally satisfied and which ones remain. Instructions for accessing the degree audit are available in the Electronic Degree Auditing Info document available on the college website.

The following list offers suggestions for which faculty members to consult with regarding different areas of interest or expertise:

- Carrie Makarewicz: Community development, sustainable economic development strategies, transport equity, regional planning, urban school reform, real estate development
- Manish Shirgaokar: Transportation planning, transportation equity, travel behavior, GIS and spatial analysis,
- Jeremy Németh: Placemaking and urban design, urban politics, land use planning, land use conflict, politics of public space, environmental justice, thesis and research
- Andrew Rumbach: Disasters and climate change, environmental risk, urban resilience, international planning, small town and rural development
- Ken Schroepel: Urban development and revitalization, urban form, planning methods, planning history of Denver, professional engagement and networking, careers in planning
- Jennifer Steffel Johnson: Affordable housing, social justice, diverse communities, mixed-income housing, community development, internships and mentorships
- Austin Troy: Land use policy, environmental planning, urban green infrastructure, GIS, spatial analysis, regional sustainability

## **Independent Study**

Independent Study is a student self-directed learning experience with faculty oversight, guidance, and evaluation. The purpose of Independent Study is to provide a mechanism for students to pursue projects that do not fit within the framework of regular course offerings. Independent study offers students an important opportunity to engage in research or creative activity in an area of inquiry not offered through regular courses, or in greater depth than offered in regular courses. An Independent Study course should not duplicate courses that are traditionally offered at the university; rather, it is intended to be a truly independent exploration of a topic or a project of a special nature. Students must secure a faculty advisor for their Independent Study course. The faculty member's expertise and availability should be appropriate for the topic of study and the student's learning objectives.

Students who undertake Independent Study are expected to be self-motivated and largely self-directed. Faculty members reserve the right to decline to be an Independent Study advisor. Only full-time Department of Urban and Regional Planning faculty members may officially serve as a MURP Independent Study advisor. Adjunct faculty members and faculty in other departments may serve as co-advisors, but the instructor of record (i.e., grader) must be a full-time MURP faculty member. Students are encouraged to consult with other faculty and/or professionals as part of their Independent Study, but the faculty Independent Study advisor is responsible for evaluating the project and providing the majority of advising. MURP students wishing to undertake an Independent Study must have a grade point average of 3.0 or greater in the MURP program. Students can apply a maximum of one three-credit Independent Study

course towards their MURP degree. (However, under special circumstances, and with departmental approval, students may be able to take two Independent Study courses.)

A MURP Independent Study project should have a focus within the field of Urban and Regional Planning, although it may be of an interdisciplinary nature. The Independent Study deliverables should be sufficient to evaluate the student's level of learning and mastery of the chosen topic. Independent Study will be graded with a letter grade and is subject to MURP, CAP, and CU Denver grading and academic policies. The project specifics are to be provided by the student in the Independent Study Proposal and approved by the student's Independent Study faculty advisor.

Students should expect to devote a minimum of nine hours per week during the fall or spring semester, and 18 hours per week during the summer semester, for a three-credit Independent Study course. Students are expected to meet periodically with their Independent Study faculty advisor throughout the semester, and the student and advisor should agree on project milestones and a meeting schedule.

A document with complete Independent study guidelines, including enrollment process, is available upon request from the Chair or Associate Chair.

### **Self-Directed Curriculum**

Students have the ability to craft a MURP degree suited to their career goals and personal interests. Students may choose any combination of elective courses, whether oriented towards one of the three Program Initiatives (Healthy Communities, Urban Revitalization or Regional Sustainability), a traditional specialization such as "Transportation Planning" or "Community Development," or a generalist survey of the planning field. A total of 18 semester hours (six three-credit courses) of electives are needed for the MURP degree.

The MURP Student Handbook on the MURP website offers suggestions for matching elective courses to potential specializations to help students decide which electives to take. Ultimately, students may choose whichever combination of elective courses they desire.

Of course, the most helpful resource for assisting students in choosing their self-directed path through the MURP program is the planning faculty. Students should not hesitate to reach out to any faculty member for advice about which electives to take or any topic relating to the MURP program or careers in planning.

### **Core Courses**

The MURP Program curriculum includes 10 required "core" courses totaling 36 semester hours. These courses provide students with a comprehensive survey of the planning field and the foundational knowledge, skills, and values important to the profession. The core courses have been carefully designed to fully comply with the Planning Accreditation Board's required educational outcomes. The list below shows the core courses and the program year in which the course is suggested to be taken.

### YEAR 1 - FALL

- URPL 5000 - Planning History and Theory
- URPL 5010 - Planning Methods
- URPL 5020 - Planning Law and Institutions (note, this course can also be taken in the second year; students should discuss what is the best time to take it with their advisor)
- URPL 5030 - The Planning Profession  
**12 semester hours**

### YEAR 1-SPRING

- URPL 5040 - Urban Sustainability
- URPL 5050 - Urban Development
- URPL 5060 - Planning Workshop  
**12 semester hours**

### YEAR 2

- URPL 6000 - Planning Project Studio (may be taken in Summer or Fall)  
Student's choice of ONE of the following 6-credit courses:
- URPL 6900 - Planning Capstone  
- OR -
- URPL 6920 - Planning Thesis A  
and
- URPL 6925 - Planning Thesis B  
**12 semester hours**

## **Elective Courses**

Beyond the core curriculum, MURP students follow a self-directed educational path. Students may choose any combination from our broad offering of elective courses, whether aligned with one of our three Initiatives, a traditional or unique specialization, or a generalist survey of the planning field. We offer MURP students a broad selection of elective courses within the program. In addition, numerous other elective courses applicable for MURP credit are available through our allied programs within the college (Architecture, Urban Design, Historic Preservation, and Landscape Architecture) and through cross-listed courses offered by other CU Denver programs, such as Public Affairs, Geography, and Business.

## **Internships**

Internships are an important way the MURP program helps students achieve hands-on, experiential learning. The difference between an internship and a part-time job is that an internship is specifically intended to be a learning experience. While getting academic credit for

an internship is not required, it is highly recommended. Students earn three elective credits for enrolling in URPL 6805 but, more importantly, the coursework will enable students to maximize the personal and professional development their internship affords. More detailed information on internships is available in the MURP Student Handbook.

## **Planning Workshop/Project Studio**

Planning Workshop (URPL 5060) and Planning Project Studio (URPL 6000) are the two studio core courses. These courses are a key part of the hands-on, real-world focus of the MURP program.

Planning Workshop is the introductory studio for MURP students. It provides students an opportunity to address actual planning problems, issues, and processes; apply previously acquired knowledge and skills; and develop new knowledge and practical skills in an applied context.

Students will develop basic competence in accessing existing information, generating new information, and performing planning analysis and synthesis. Students will also learn to enhance their graphic, written, and oral communication capabilities. Through the Planning Workshop experience, students will develop an understanding of the relationship between planning theory and practice, as well as gain the ability to formulate compelling planning arguments in applied settings.

Students will also receive introductory instruction in Geographic Information Systems (ESRI ArcGIS) and Trimble SketchUp, which complement the introductory instruction in Adobe Creative Cloud (Photoshop, Illustrator, InDesign) students receive in The Planning Profession course. The integration and use of all of these common planning technology applications is a critical component of the Planning Workshop experience.

Planning Project Studio is the MURP program's advanced studio course. This studio requires students to work together as a "planning consultant team" to complete a single planning project or study from beginning to end for a real-world client. It is expected that students enrolled in Planning Project Studio will have already gained the fundamental planning knowledge, skills, and values from their experience in Planning Workshop and other MURP courses. Consequently, the emphasis in Planning Project Studio is on putting everything together into a complete real-world planning project.

The studio will emulate the typical planning consultant/client experience, including: refining the project scope and schedule with the client; establishing guiding principles and expected outcomes; conducting case studies and existing plans background research; gathering and analyzing existing conditions data; formulating alternative plan concepts; assessing alternative concepts through specific criteria; identifying and refining the preferred alternative; and preparing and presenting the final plan deliverables to the client. Emphasis is also placed on professionalism, project management, team-building and collaboration, client management, public involvement, and other aspects of the real-world planning consultant realm.

Each Planning Project Studio course section will focus on a project generally associated with one of the MURP program's three initiatives (Healthy Communities, Urban Revitalization, and Regional Sustainability). Typically three to five sections of Planning Project Studio are offered each academic year, thereby ensuring that students will have a chance to enroll in a Planning Project Studio section that is aligned with an initiative of interest to them. However, as each studio section is limited in size, there is no guarantee students will be able to enroll in their preferred section. A balloting process will be used when necessary.

In addition to the Fall semester Studios, we generally offer Summer studios that involve travel, including overseas studios and a domestic studio in Colorado.

## **Planning Capstone/Planning Thesis**

The culminating component of the MURP curriculum is the Planning Capstone/Planning Thesis requirement, which challenges students to utilize to the fullest extent the planning knowledge, skills, and values gained during their MURP program experience. Students must choose which option to select-Planning Capstone or Planning Thesis-based on their career goals, personal interests and aptitudes, and the advice of their faculty advisor.

Planning Capstone is a six-credit, project-oriented, one-semester course that results in a substantial deliverable upon completion. The Capstone option is best suited for students who wish to pursue a career as a professional planner after graduation. Within the Planning Capstone option are two alternatives: Independent Project and Small-Group Project.

If a student chooses the Planning Capstone > Independent Project path, he or she will work individually to complete a significant planning project or study for a real-world client. If a student chooses the Planning Capstone > Small-Group Project path, he or she must team up with one or two other students-forming a project team of no more than three people to complete a significant planning project or study for a real-world client. However, each student must be individually responsible for a clearly defined component of the project as each student will be graded independently for his or her work.

During the semester before enrolling in Planning Capstone, students will be required to: (a.) determine if they will be working independently or as part of a small group, (b.) identify their Capstone client and project topic, and (c.) begin preparing a detailed project prospectus (work plan, schedule, methodology, and deliverables). Also during the semester before Capstone, students must attend a mandatory Capstone Orientation to receive instruction and guidance on project planning and management. Students must have a completed and approved project prospectus by the second week of their Capstone semester. Students may identify their own Planning Capstone client and project topic or they may select from a list of Capstone clients/projects that have been pre-arranged and approved by the MURP faculty.

During the Planning Capstone semester, students complete their project work while maintaining regular contact with their Capstone faculty advisor and client to ensure sufficient progress and work quality, as well as periodically meeting with other Capstone students to discuss common issues and challenges, share experiences, and receive continued instruction

and guidance from the Capstone faculty on project management and methodologies. The Planning Capstone semester concludes with the submission of all deliverables and a formal presentation to the client and Capstone faculty.

For more information about the Planning Capstone option, please visit the Capstone webpage on the college website.

Planning Thesis comprises a pair of three-credit courses (A and B) taken over two semesters that together constitute a six-credit effort. The thesis option is most appropriate for outstanding MURP students who are considering pursuing a Ph.D. or a research-oriented career after graduation. More information about the thesis option can be found in the MURP Student Handbook.

## Urban Design MUD

► Graduate School Rules apply to this program

**Program Director:** Ken Schroepfel

**Program Advisor:** Roxy New

**Telephone:** 303-315-1000

**Email:** ken.schroepfel@ucdenver.edu

### Program Description

The Master of Urban Design (MUD) is an intensive, calendar year, post-professional degree program for students already holding a first professional degree in architecture, landscape architecture or urban and regional planning (e.g., BArch, BLA, MArch, MLA, MCRP, MURP or equivalents). Students enrolled in other masters programs in the College of Architecture and Planning can apply and enter the MUD program concurrently to complement and complete their primary studies with the additional degree. Concurrent degree options include MLA, MURP and MArch, students completing these tracks may receive up to 12 credits of advanced standing. In order to graduate with a concurrent degree plan, students must complete the professional degree (MLA, MURP, or MArch) prior to or at the same time as MUD. This interdisciplinary urban design program takes advantage of Denver and the region as an urban laboratory but engages regional, national and global issues, educating future designers about the unique place the city holds in addressing the critical problems of our time.

The program began in 1969 and is one of the oldest in the United States. It counts several hundred alumni practicing around the world. Its student body is extremely diverse, with recent students from Bangladesh, China, Colombia, India, Iran, Japan, Libya and Saudi Arabia. These students join our domestic students to examine contemporary urbanism and design practices through an interdisciplinary, studio-based curriculum taught by a multi-disciplinary faculty. Coursework is capped by the required Advanced Travel Studio held each summer, when students experience cities and investigate specific urban issues in the context of dynamic

locations around the world, ranging from international locations such as Shanghai, Copenhagen and Barcelona, to North American cities such as Washington, D.C.

The program is organized around three central themes reinforced by core studios and seminars.

## **Sustainable Cities**

We take a holistic approach to designing the livable city. Since more than half the world's population lives in cities, with that number continuing to increase significantly, we must anticipate the social, economic and ecological impacts of our design decisions. In preparation for a post-carbon era, we address concerns related to climate change, energy usage, public health, food production and resource availability through an integrated approach to the design of urban settlements. Our students re-imagine and re-interpret urban systems - from transportation networks to hydrological systems to zoning codes to social movements - with the goal of creating cities that are at once socially just, economically diverse and ecologically resilient. These challenges are unprecedented and must be urgently addressed: we believe that urban designers are ideally positioned to meet them head-on.

## **Local to Global**

Urban designers must recognize the interrelated local and global impacts of their actions and understand the interdisciplinary nature of urban problems. We address design issues at all scales, from the individual public space to the neighborhood and city to the regional and global. Our approach acknowledges that all sites are embedded within larger systems, an ecologically grounded concept we engage in all our studios. In the Fall and Spring studios, students examine the Denver metropolitan area, a progressive, yet prototypical, urban laboratory experiencing significant growth and development and home to every urban condition imaginable, from dense downtown infill to sprawling edge cities to the New Urbanism-inspired Stapleton airport brownfield redevelopment. The Front Range is a national leader in design and planning innovation, as represented by the multi-billion dollar FasTracks transit project, Denver's groundbreaking citywide form-based code, Boulder's open space acquisition policies and energy municipalization effort, Arvada's GEOS net-zero energy neighborhood, and Fort Collins' closed-loop brewery-oriented development. Students apply the skills and knowledge gained in their local study in the summer term in an advanced travel studio. Recent projects have studied the dense urban core of Copenhagen, Denmark, in partnership with faculty affiliated with the Danish Institute for Study Abroad (2014-16), and the role and design of streets as public spaces in Barcelona (2018).

## **Innovations in Practice**

We train our students to become critical, reflective professionals with a deep understanding of urban design theory and practice to lead contemporary urban thinking. All our graduates are prepared to address the most complex social-ecological problems of our time well with

exceptional technical, verbal and graphic communication skills. Our curriculum is informed by innovations in current practice: we undertake real projects with real clients. Each year, we bring in renowned practitioners from leading design firms to teach courses, give lectures, and serve as jurors in urban design studios. We see high demand for graduates who possess multiple talents, a broad understanding of urban planning, architecture, landscape, real estate development, and urban politics and economics, and the ability to work not only with design professionals but also engineers, policy makers, environmental scientists and the public. Students are required to select two electives from a multidisciplinary array offered in the College of Architecture and Planning. Importantly, our CAP Internship Program aims to place qualified students into internships in some of the region's top design firms. Participating firms have included: AECOM, Civitas, Inc., Design Workshop, DTJ Design, Norris Design, RNL/Stantec and Tryba Architects. Based on a competitive application process, college units including the Colorado Center for Community Development (CCCD) frequently hire MUD students as research assistants (RAs), and the departments of Architecture, Landscape Architecture and Urban and Regional Planning may hire qualified teaching assistants (TAs) from our incoming MUD students.

## Prerequisites

Students are required to hold a first professional degree in architecture, landscape architecture or urban and regional planning (e.g., BArch or BLA from an accredited program, MArch, MLA, MURP/MUP) or equivalent.

## Admissions

The Master of Urban Design program accepts applications for fall semester entry. The program does not encourage entry to the program in any spring semester due to the specific sequencing of the classes, however, current CAP students may begin classes in spring term based on advising.

CAP students can enter the MUD with advanced standing through a concurrent degree program mapped with their primary professional degree program in the College of Architecture and Planning. For more information on the MArch+MUD, MLA+MUD or MURP+MUD, visit the college website or contact the program advisor.

The priority deadline for all applicants is February 15; final deadline is March 15. The requirements the admissions committee considers are:

- Evidence of a professional degree (BArch or BLA from an accredited program, MArch, MLA, MURP/MUP or equivalent)
- At least a 3.2 undergraduate or graduate cumulative GPA
- Your statement of purpose, which should include your educational and professional goals
- Résumé (which describes your educational and professional background)

- A portfolio that includes examples of student and/or professional projects
- A list of courses that you have taken that relate to design and planning (current transcript for CAP students)
- A writing sample from previous professional or academic work
- Graduate Record Exam (GRE) scores if available (not required for admission)
- English language proficiency (TOEFL) scores are required for international applicants when English is not their first language. Please see the International Admissions website for current minimum score requirements.

## Program Requirements

The requirements for the post-professional Master of Urban Design (MUD) degree depend on your current standing and educational background. The basic study plan is a 36-semester-hour plan that includes two open elective courses. Students obtaining a first professional degree in the University of Colorado Denver College of Architecture and Planning may enroll in the MUD concurrently, with the degree to be completed at the end of their primary degree program. CAP students may receive up to 12 semester hours of advanced standing.

## Courses

The basic study plan is 36 semester hours including these core courses, plus two elective courses (could include an independent study or internship).

## Core Courses

- URBN 6610 - Design Studio I (6 semester hours)
- URBN 6611 - Design Studio II (6 semester hours)
- URBN 6612 - Advanced Travel Design Studio (6 semester hours)
- URBN 6641 - Design Process (3 semester hours)
- URBN 6642 - Design Policy (3 semester hours)
- URBN 6651 - Design Practice (3 semester hours)
- URBN 6652 - Design Seminar (3 semester hours)  
(topics vary - a prerequisite for URBN 6612)

## 30 semester hours

## Electives

Two elective courses (could include an independent study or internship)

**6 semester hours**

**Total Required: 36 hours**

**Dual Degree Programs**

# **4+1 International Studies BA to Political Science MA**

► Graduate School Policies and Procedures apply to this program.

## **Introduction**

Please click [here](#) to see Political Science department information.

Students will follow the undergraduate curriculum for International Studies and work closely with their faculty advisor to begin taking Political Science graduate level coursework as they complete their undergraduate degree. They will complete no more than 15 credits as an undergraduate that will apply to both their undergraduate and graduate degrees. Students may officially declare their intent to complete this program in either their junior or senior year, and may apply to the graduate program during their senior year. Application requirements may differ from the traditional 2 year MA, which is why students need to work closely with faculty advisors and the political science graduate program director for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements.

## **Program Delivery**

- This is an on-campus program.

## **Declaring This Program**

- Click [here](#) to go to information about declaring a major.
- Application process: Interested students would submit a short application to the Department any time after the first semester of their junior year. The application will include:
  - A Letter of interest that describes the student's reasons for applying into the program.
  - Undergraduate transcripts.

- The names of at least two faculty members in the CU Denver Political Science Department who can attest to applicant's advanced levels of reading, writing and analytical skills, and to their outstanding intellectual curiosity and work ethic.
- Following review and admission by the faculty, students would begin their 4+1 curriculum during the second semester of their junior year, or in a subsequent semester.

## General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements

[Click here](#) for information about Academic Policies

## Program Requirements

1. A minimum of 48 undergraduate credit hours in the International Studies program and 33 graduate credits hours in Political Science must be completed to earn both an undergraduate and a graduate degree through this 4+1 program.
2. Up to 15 graduate level credit hours in Political Science may be taken by International Studies undergraduates accepted to the 4+1 program, and these credits will count both towards completion of the International Studies undergraduate degree, and the graduate degree in political science, if the student is later accepted into the graduate program.
3. A minimum of 21 semester hours must be taken from CU Denver faculty.
4. Complete all International Studies undergraduate major requirements. Refer to the undergraduate International Studies catalog page.
5. To secure admission to the Political Science graduate program, submit formal graduate application during the senior year.
6. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5.
7. Students must earn a minimum grade of B- (2.7) in any graduate level course for it to later be counted towards graduate degree requirements.
8. All graded attempts in required and elective courses are calculated in the major GPA. No course taken as pass/fail may be counted.

## **Program Allowances and Restrictions**

In the pathway below no more than 15 undergraduate credit hours may "double-count" for the M.A.. Elective courses must be in accordance with Graduate School Policies. Therefore, meeting with an advisor regularly is recommended. Apply into 4+1 Program any time after the first semester of junior year standing as an undergraduate.

# **4+1 International Studies to Masters in Humanities or Social Sciences**

## **Introduction**

The International Studies BA/MHMSS (Master of Humanities/Master of Social Science Program) in the College of Liberal Arts and Sciences provides an expedited interdisciplinary program of study that allows participating students to complete an interdisciplinary Bachelor degree in International Studies and an interdisciplinary Master degree in Humanities or Social Science through the MHMSS program in five years. INTS students interested in participating apply for either the MH or MSS degree no earlier than their first semester of junior-year standing as an undergraduate. Students may further choose to concentrate in one of the MH or MSS tracks. (For track information, see descriptions of the MH and MSS degree programs in this catalog.) Upon acceptance, students take five graduate-level courses beginning the second semester of their junior year (or its equivalent) and through the whole of their senior year. Because these classes "double count," they fulfill requirements for both the BA major and the Master degree in Humanities or Social Science. Students then continue graduate studies exclusively in the chosen degree plan, either MH or MSS, to complete their master degree by the end of their fifth year in CLAS at CU Denver.

## **Program Delivery**

- This is an on-campus program.

## **Declaring This Major**

### **Admissions Requirements and Process**

- Interested students should contact their INTS advisor and the MH or MSS advisor as early as possible to ensure proper planning for the five-year degree.
- To qualify, students must have a 3.0 or higher GPA in CLAS. All courses taken at the 4000- and 5000-level must be completed with at least a B or higher.

- Students may apply to the program during the semester in which they will successfully complete 90 semester hours, and should have most of their general education and major requirements completed by this time.

## **General Requirements**

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

## **Program Requirements**

Students in the 5-year INTS BA/MHMSS Program must satisfy all existing requirements for both an undergraduate degree in CLAS with a major in International Studies and a Master of Humanities or Social Science degree. These requirements can be fulfilled through multiple possible paths through the department's curriculum:

Students must maintain a 3.0 GPA in CLAS course work.

### **Program Options**

BA/MHMSS students may choose to do a general MH or MSS degree or select a track concentration within the degree plan, including Social Justice, Philosophy and Theory, Visual Studies, Women's and Gender Studies, Ethnic Studies, International Studies, Community Health, and Society and Environment.

### **Degree Confirmation**

Students are eligible to receive a bachelor's degree once they have successfully completed 120 semester hours and all CLAS requirements. The BA/MHMSS will be conferred once the student has completed all requirements of the Master of Humanities or Master of Social Science degree, including at least 36 hours of graduate level course work.

# **4+1 Philosophy to Masters of Humanities**

## **General Requirements**

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

## Program Requirements

1. A minimum of 39 undergraduate hours and 33 graduate hours of Political Science credits hours must be completed to earn both an undergraduate and a graduate degree through this 4+1 program.
2. A minimum of 21 semester hours must be taken from CU Denver faculty.
3. Up to 15 graduate level credit hours in Political Science may be taken by Political Science undergraduates accepted to the 4+1 program, and these credits will count both towards completion of the undergraduate degree, and the graduate degree in political science, if the student is later accepted into the graduate program.
4. Complete all Political Science undergraduate major requirements. Refer to the undergraduate Political Science catalog page.
5. To secure admission to the Political Science graduate program, submit formal graduate application during the senior year.
6. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0.
7. Students must earn a minimum grade of B- (2.7) in any graduate level course for it to later be counted towards graduate degree requirements.
8. All graded attempts in required and elective courses are calculated in the major GPA. No course taken as pass/fail may be counted.

## Program Allowances and Restrictions

In the pathway below no more than 15 undergraduate credit hours may "double-count" for the M.A.. Elective courses must be in accordance with Graduate School Policies. Therefore, meeting with an advisor regularly is recommended. Apply into 4+1 Program any time during or after the first semester of junior year standing as an undergraduate.

# 4+1 Sociology BA to MA

## Introduction

The Combined BA/MA (4+1) program in Sociology provides a coherent, progressive educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. The BA/MA application process is competitive, as the program is designed for highly-qualified students who are capable of an expedited program. Students choose from two options for their Comprehensive Paper that completes the master's degree: either a 6-credit thesis, or a 3-credit applied experience plus a 3-credit paper. The program also offers 3 concentration areas (Crime, Law & Deviance; Health & Society; Family, Social Services & Community) for students seeking specialization in high-demand career areas.

## Program Delivery

- This is an on-campus program.

## Declaring This Major

- Consult your advisor about declaring this major

## General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

## Program Requirements

### Tier 1 Knowledge

Take **all** of the following required undergraduate courses:

- SOCY 1001 - Understanding the Social World
- SOCY 2001 - Inequalities in Social World
- SOCY 3115 - Quantitative Methods & Analysis
- SOCY 3119 - Qualitative Methods
- SOCY 3140 - Sociological Theory

Take **all** of the following required graduate courses:

SOCY 5000 must be the first graduate course taken (may be taken concurrently with other graduate courses); SOCY 5024 must be taken before SOCY 5183 and SOCY 5193. Students must earn a *B* or better in all graduate core courses.

- SOCY 5000 - Professional Seminar: Sociological Inquiry
- SOCY 5016 - Social Theory
- SOCY 5024 - Seminar: Research Methods I
- SOCY 5183 - Seminar: Quantitative Data Analysis
- SOCY 5193 - Seminar: Qualitative Data Analysis

### **Tier 2 Knowledge Applied to Substantive Areas**

Five elective courses, one of which may be taken at the undergraduate level. Graduate credit requirements are fulfilled only for those courses earning a minimum grade of B-.

### **Tier 3 Comprehensive Paper**

Take one of the following Comprehensive Paper options:

- SOCY 5955 - Master's Thesis **or**
- SOCY 5939 - Internship **or**
- SOCY 5840 - Independent Study: SOCY **and**
- SOCY 5964 - Master's Report

### **Plans of Study**

#### **THESIS OPTION REQUIREMENTS**

Core course requirements	15 Credits
Four substantive area courses	12 Credits
Master's Thesis	6 Credits

- SOCY 5955 - Master's Thesis

BA/MA Thesis Option Total: 53 Credits

#### **APPLIED PROJECT REQUIREMENTS**

Core course requirements	15 Credits
Four substantive area courses	12 Credits

Applied Experience (internship or independent study)	3 Credits
Master's Paper	3 Credits
<ul style="list-style-type: none"> <li>○ SOCY 5939 - Internship</li> <li>○ SOCY 5840 - Independent Study: SOCY</li> <li>○ SOCY 5964 - Master's Report</li> </ul>	
BA/MA Applied Project Total: 53 Credits	

### **Substantive Area Requirements (12 credits for both options)**

Students can take an unlimited number of sociology graduate (5000-level) seminars to fulfill their 15 elective credits requirement, or a combination of the following:

- Independent study: maximum 6 semester hours
- Graduate level courses in other departments: maximum 6 semester hours
- Internship: maximum 3 semester hours

For further information about the Department of Sociology or the MA program, visit the Sociology website.

# 5 Year BA/BS and Masters in Public Health

## Introduction

Please click [here](#) to see Health and Behavioral Sciences department information.

Please click [here](#) to see the overview of the Public Health undergraduate program.

Please click [here](#) to see the overview of the Masters in Public Health graduate program.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

**PBHL Director:** Meng Li, Associate Professor

**Office:** North Classroom 3018

**Telephone:** 303-315-7150

**Fax:** 303-556-8501

**Email:** Meng.Li@ucdenver.edu

**CSPH Contact:** Chloe Bennion, Student Affairs and Academic Operations Director

**Office:** Fitzsimons Building, Room E-3301

**Telephone:** 303-724-4745

**Email:** Chloe.Bennion@cuanschutz.edu

## Program Delivery

- This is an on-campus program.

## Declaring This Major

- Click here to go to information about declaring a major.
- To be eligible, students must be declared PBHL majors (BA or BS).
- Ideal candidates will have a GPA of 3.5 or higher, and will have completed a minimum of 12 credit hours toward their undergraduate PBHL degree, including Introduction to Public Health (PBHL 2001), General Biology I with lab (BIOL 2051/2071) and General Biology II with lab (BIOL 2061/2081), each completed with grades of B+ or higher.
- Complete an application via SOPHAS EXPRESS(NOTE: GREs are not required). Students should apply by the January preferred deadline in their Sophomore or Junior year.
- Upon application, declare a provisional MPH concentration (NOTE: some concentrations may establish additional eligibility criteria).

## General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- Click here for information about Academic Policies

## Program Requirements

1. Undergraduate degree requirements follow either the BA (here) or BS (here).
2. Students in this program will be conferred both degrees (BA or BS, and MPH) simultaneously upon completion of all requirements.
3. Each class must be completed with a grade of C- or higher to count towards the major, and students must maintain a minimum 3.5 GPA in the undergraduate major and MPH courses.
4. The following are exceptions and/or substitutions that are applicable to the BA/BS requirements for students in the BA/BS - MPH program:

Take the following Core course:

- PBHL 2001 - Introduction To Public Health (in lieu of PUBH 6600 requirement for MPH program)

Take **two** graduate-level classes from the following list, which will count toward both degrees:

- PBHL 3001 - Introduction to Epidemiology can be replaced by EPID 6630
- PBHL 3020 - Introduction to Environmental Health can be replaced by EHOH 6614
- PBHL 3030 - Health Policy can be replaced by HSMP 6601
- PBHL 4040 - Social Determinants of Health can be replaced by CBHS 6610

Take the following Quantitative Methods course:

- MATH 5830 - Applied Statistics (in lieu of BIOS 6601 requirement for MPH program, counts towards both degrees)

#### **Additional Notes**

1. To facilitate timely completion of the program, students are expected to take 6 credits in each of 2 summers.
2. If students apply late to this program, (including having already completed additional PBHL core requirements), they may not be able to benefit from all of the substitution-based time savings, and therefore may not be able to complete the program in 5 years.

## **5 Year Mathematics BS/Statistics MS**

### **Introduction**

This is a unique program where a student can obtain both a B.S. in Mathematics and M.S. in Statistics in five years through a specialized course sequence. The program requires 12 fewer credits than if both degrees were earned separately.

### **Program Delivery**

- This is an on-campus program.

### **Declaring This Major**

- Work with your advisor to declare this major.

### **General Requirements**

To earn a bachelor's degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

## Program Requirements for Mathematics BS

1. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.25. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
2. Students must declare their intent to complete this program during their junior or senior year, after completing MATH 1401, 2411, 2421, 3000, 3191, and 3382.
3. The semester you graduate, you must:
  - Complete the MFAT Exam and participate in an exit interview. These requirements will be scheduled through the department Administrative Assistant
  - Complete a senior survey.
4. To graduate as a Mathematics major, must have a minimum of 30 hours of resident credit and at least 15 upper-division mathematics credits must be taken at CU Denver.
5. Students with at least a 3.5 major grade point average, at least 3.2 overall grade point average, and who have done an honors project are eligible to graduate with honors. See an advisor (or the honors advising sheet) for details.

Take **all** of the following Mathematics courses:

- MATH 1401 - Calculus I
- MATH 2411 - Calculus II
- MATH 2421 - Calculus III
- MATH 3000 - Introduction to Abstract Mathematics
- MATH 3191 - Applied Linear Algebra
- MATH 3382 - Statistical Theory
- MATH 4310 - Introduction to Real Analysis I
- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5387 - Applied Regression Analysis
- MATH 6330 - Workshop in Statistical Consulting

Take **one** of the following programming courses:

- MATH 1376 - Programming for Data Science or CSCI 1410 - Fundamentals of Computing
- CSCI 1411 - Fundamentals of Computing Laboratory

Take **two** additional MATH classes (and at least 6 credits) above 3000 excluding 3040, 3195, 3511, 3800, 4012, 4013, 4014, 4015 and 4830.

## Program Requirements for Statistics MS

1. In the semester in which the student intends to complete their BS, students must apply for admission into MS in Statistics Program. They should have declared their intent to complete this program to the Director of the Program in Statistics after completing MATH 1401, 2411, 2421, 3000, 3191, and 3382.
2. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0, for all courses that will apply to the MS. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
3. Students must present 30 hours of course work (which are broken into 4 components as detailed below) for the M.S. degree.
4. At least 24 of these hours must consist of graduate level (numbered 5000 or higher) courses with the MATH prefix.
5. The remaining 6 hours must be either MATH courses numbered 5000 or above or pre-approved courses outside the department numbered 4000 or above.
6. Students must complete a written project and pass a final oral exam.

Note that the MATH 5310, MATH 5320, MATH 5387, and MATH 6330 courses used for the B.S. portion of the degree apply to the 30 hours of course work and satisfy the core requirement discussed below.

Up to 9 semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward a prior degree (graduate or undergraduate) cannot be used toward the M.S. degree in Statistics. Additionally, the following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250, and 5830.

Following completion of course work, all students must complete a written project and pass a final oral exam. The project is developed as a student-centered independent research component within MATH 5960 unless the student has chosen the thesis option. For students choosing the thesis option, 4 to 6 hours (of the 30 required hours) may be devoted to the writing of a thesis through MATH 5950. According to Graduate School policies, Masters students, whether enrolled full-time or part-time, must complete all degree requirements

within 7 years of matriculating into the graduate program.

The MS degree in Statistics consists of 4 components: 1) core courses, 2) statistics electives, 3) other electives, and 4) MATH 5960 (Master's project) or MATH 5950 (Master's thesis).

The **4** *core courses* include:

- MATH 5310 - Probability
  - MATH 5320 - Introduction to Mathematical Statistics
  - MATH 5387 - Applied Regression Analysis
  - MATH 6330 - Workshop in Statistical Consulting
- and are satisfied during the completion of the B.S. portion of the degree.

Students must take **at least three** additional *statistics electives* courses from the list below:

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling
- MATH 6101 - Uncertainty Quantification
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7393 - Bayesian Statistics
- MATH 7384 - Mathematical Probability
- MATH 7386 - Monte Carlo Methods
- MATH 7826 - Topics in Probability and Statistics

Additional courses given prior approval by the student's advisor and the Director of the Program in Statistics

Students must take **two** *Other Electives*: Any MATH prefix course that can be used for an M.S. or Ph.D. degree in Applied Mathematics can be used as another Elective. While these courses could be additional statistics-focused courses, the added flexibility allows students to direct their coursework into other areas of mathematics and/or science. The following courses will not count toward the M.S. in Statistics: MATH 5000-5010, MATH 5012-5015, MATH 5017, MATH 5198, MATH 5250 and MATH 5830.

Students must take either MATH 5950 or MATH 5960 as part of completing their written project.

# Bioengineering Dual MS-MBA

► Graduate School Policies and Procedures apply to this program.

## Master of Science (MS) - Master of Business Administration (MBA) Dual Degree Program

We offer a dual MS-MBA in partnership with the CU Denver Business School. Please contact either program for more information and advising. Students registered in other MS programs in the University of Colorado system may be able to combine the two degrees; please contact us at [bioengineering@ucdenver.edu](mailto:bioengineering@ucdenver.edu) for more information.

# Bioengineering MD-MS

We offer an MD-MS in bioengineering in partnership with the University of Colorado School of Medicine. This dual degree option is available to current CU medical students only. Prospective students should contact the department at [bioengineering@ucdenver.edu](mailto:bioengineering@ucdenver.edu) as early in their medical school training program as possible for more information and advising.

# Bioengineering MD-PhD

► Graduate School Policies and Procedures apply to this program.

For students already enrolled or accepted into the Medical Scientist Training Program (MSTP) in the School of Medicine at the University of Colorado Anschutz Medical Campus. Degree completion in 7-8 years with highly individualized training pathway and a multidisciplinary research dissertation. Please contact us for advising.

# Business Administration/Business MBA/MS

The Business School also offers MBA/MS dual degree programs for each function of business. The program consists of a minimum of 66 semester hours of graduate work and leads to both an MBA degree and an MS degree, which must be completed within seven years and one semester. See MS program pages for a list of functional areas. Contact a graduate academic advisor for details, 303.315.8200.

# **Business Administration/Medicine MBA/MD**

The MBA/MD is for medical students at the University of Colorado School of Medicine who wish to pursue a career in administrative medicine or who seek additional training in administration or business. The program is designed to be completed in five years, at which time both the MD and MBA degrees would be awarded. Candidates for the MBA/MD complete 36 semester hours of course work in the business school and all requirements for the MD.

# **Business Administration/Urban and Regional Planning MBA/MURP**

This dual degree enables students to obtain both the Master of Urban and Regional Planning offered by the College of Architecture and Planning and the Master of Business Administration offered by the Business School upon completion of 78 semester hours. The dual degree program is composed of the core curricula in each program plus a set of electives jointly approved by the student's advisors.

# **Business/Business MS/MS**

Students may concurrently pursue dual MS degrees in any two fields of business. The program consists of a minimum of 51 semester hours of core course work, which must be completed within a period of seven years and one semester. In addition, candidates for the dual degree must satisfy all common body of knowledge (CBK) and background requirements prescribed for each degree. Waivers may be approved for some of the CBK or background upon transcript evidence of equivalent undergraduate or graduate course work. For more information contact a graduate academic advisor, 303-315-8200.

# **Chemistry BS/MS**

While students are completing a BS degree in chemistry or biochemistry, they may also complete some of the requirements for an MS degree in chemistry by participating in the BS/MS program, using the following guidelines:

- The student must apply and be accepted for participation in the BS/MS program prior to completion of the BS degree in consultation with both the undergraduate and graduate advisors.

- Up to 12 semester hours of graduate-level course work may be taken as an undergraduate and applied toward the MS degree. This course work may not be applied toward the BS degree or ACS certification requirements for the BS degree.
- In addition, up to 3 semester hours of directed research may be applied toward the graduate degree if that research is expanded and continued for a portion of the master's thesis research. This requires the approval of the student's graduate research advisor in chemistry, and the chemistry graduate program director.
- The chemistry department will waive the requirement for placement examinations in each area of chemistry for which the student has completed the undergraduate sequence of courses and laboratories at the Downtown Campus with grades of *B (3.0)* or better for each course.
- The student must apply for and be admitted to the MS program in chemistry beginning the semester immediately following completion of the BS degree in chemistry at the Downtown Campus.

The BS/MS program allows undergraduate students who have begun their research as undergraduates to complete up to 12 semester hours (with approval of the graduate dean) toward the 30 semester hours required for a Plan I MS degree in chemistry while they are still completing their BS degree. This makes it possible for students to complete an MS degree in chemistry in only one year beyond the BS degree in chemistry. Students entering the MS program through the BS/MS program option must fulfill all of the requirements of the Plan I or Plan II MS degree programs.

## CLAS, BA/MPA

### Introduction

The Pathway BA/MPA degree program offered by the College of Liberal Arts and Sciences and the School of Public Affairs provides students the opportunity to complete both bachelor's and master's degrees in five years rather than the usual six years. The program combines undergraduate general education and major studies with a specialized curriculum in public affairs and strives to develop intellectual and professional skills in a coordinated manner. The BA/MPA program decreases the time and number of semester hours required to earn both degrees by allowing students to count graduate level courses in the School of Public Affairs toward the bachelor's degree requirements. The program is designed to give students an opportunity to prepare for professional positions and advancement with federal, state or local governments, nonprofits or private sector firms concerned or involved with public affairs.

### Admissions Requirements and Recommendations

Interested students should contact their CLAS advisor and the School of Public Affairs' MPA director as early as possible to ensure proper planning for the five-year degree. To qualify, students must have a 3.5 or higher GPA in CLAS.

Students may apply to the program during the semester in which they will successfully complete 90 semester hours, and should have most of their general education and major requirements completed by this time. Students must complete all the required MPA application materials for the School of Public Affairs.

## **Program Requirements**

Students must fulfill all the requirements for graduation for CLAS:

- Total of 120 hours (includes hours in public affairs)
- 30 hours in the core curriculum
- 30-48 hours to satisfy major requirements
- Writing proficiency (1 - 7 hours)
- Mathematics proficiency (0 - 3 hours)
- Level III foreign language (0 - 13 hours)
- It is highly recommended that students complete a course in American government, statistics and economics before applying to the MPA program

Students must maintain a 3.5 GPA in CLAS coursework.

Students may complete a maximum of 18 semester hours of SPA graduate coursework while classified as an undergraduate student.

Students must fulfill all the requirements for graduation from SPA:

- Total of 36-39 semester hours in public affairs
- Six core courses (PUAD 5001 - PUAD 5006)
- Five elective courses at the graduate level (5000 and 6000 level courses)
- Nine of the 15 elective semester hours must be PUAD courses
- An internship (3 hours) is required from those who do not have significant work experience in the field
- Successful completion of the capstone course taken in a semester AFTER all core courses are completed. A thesis option is available. Interested students should contact their SPA faculty advisor.

Students must maintain a 3.0 or higher GPA in public affairs course work.

## **Program Options**

BA/MPA students may choose from any CLAS major.

BA/MPA students may choose to do a general MPA or select a MPA concentration in local government, nonprofit management, environmental policy, emergency management and homeland security or domestic violence.

### **Degree Confirmation**

Students are eligible to receive a bachelor's degree once they have successfully completed 120 semester hours and all CLAS requirements. The BA/MPA will be conferred once the student has completed all requirements of the master of public administration degree, including at least 36 hours of graduate level coursework.

# **Criminal Justice, BA/MCJ**

## **Introduction**

The pathway Bachelor of Arts/Master of Criminal Justice program is designed to allow students to work concurrently toward the bachelor's and master's programs. Graduate credit hours earned while enrolled in the pathway program can be counted toward both the Bachelor of Arts and Master of Criminal Justice. This program offers high-achieving students the opportunity to complete their undergraduate and graduate degrees within an expedited time frame. The undergraduate and graduate degrees are conferred upon completion of each of the degree's requirements.

## **Program Delivery**

- Courses are offered on campus, online and in hybrid formats.

## **Declaring This Major**

- Please contact [spa.advising@ucdenver.edu](mailto:spa.advising@ucdenver.edu)

Both current CU Denver students and new transfer students are eligible to apply to the Criminal Justice BA/MCJ after meeting the following:

- Currently enrolled in the School of Public Affairs as a criminal justice major
- Completed the University of Colorado Denver's undergraduate core curriculum
- Completed 60 semester credit hours
- Completed the following 12 semester credit hours in criminal justice:
  - CRJU 1000 - Criminology and Criminal Justice: An Overview
  - CRJU 2041 - Criminological Theory
  - CRJU 3100 - Research Methods
  - CRJU 3150 - Statistics for Criminal Justice

- Transfer criminal justice courses must have been approved and accepted toward the major.
- Minimum 3.0 cumulative GPA
- Minimum 3.5 cumulative GPA in criminal justice courses

## Program Requirements

General BA/MCJ Degree Program Requirements:

- 144 total semester credit hours successfully completed
- 37-38 semester credit hours in the general education core curriculum
- 46-48 semester credit hours in general electives
- 21 semester hours of undergraduate criminal justice coursework
- 18 upper-level (3000 or higher) semester credit hours in criminal justice
- 45 total semester hours of upper-division coursework (3000 and above)
- Minimum 3.0 CU cumulative grade point average in undergraduate criminal justice courses
- Full acceptance to the Graduate School and the Master in Criminal Justice program
- Minimum 36 semester hours of graduate-level coursework (5000 and above)
- Minimum of 30 hours of resident credit; 21 out of the last 30 hours in resident coursework
- Minimum of a B (3.0) in each required core MCJ course
- Minimum of 3.0 CU cumulative grade point average in all graduate level courses
- Successful completion of the master of criminal justice capstone or thesis
- Fulfillment of all college and major requirements

## Economics BA/MA

### Introduction

Please click [here](#) to see Economics department information.

### Program Delivery

- This is an on-campus program.

### Declaring This Major

- Students should meet with the graduate program director and undergraduate faculty advisor to learn more about admissions requirements for this program.

### General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- College of Liberal Arts & Sciences Graduation Requirements
- [Click here for information about Academic Policies](#)

## Program Requirements

### Course Requirements

Undergraduate required courses (30 or 31 credit hours):

- ECON 2012 - Principles of Economics: Macroeconomics
- ECON 2022 - Principles of Economics: Microeconomics
- ECON 4071 - Intermediate Microeconomic Theory
- ECON 4081 - Intermediate Macroeconomic Theory
- MATH 3382 - Statistical Theory

**OR**

- ECON 3811 - Statistics with Computer Applications

Undergraduate electives (9 credit hours):

- Three undergraduate economics courses and at least 2 of them must be at 4000-level

Graduate courses (18 credit hours):

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics
- ECON 6054 - Seminar In Applied Economics II
- ECON 6073 - Research Seminar

The "Seminar in Applied Economics" (ECON 6053, 6054) are 8-week 1.5 credit modules. After completing 3 credit hours of ECON 6053/6054 as part of the economics core, additional ECON 6053/6054 courses may be counted as electives

Graduate electives (9 credit hours):

Any course numbered 5000 or higher with an ECON prefix.

Total economics/mathematics credit hours = 66 or 67

Total credit hours for the combined degrees = 135

**Note:** The mathematics courses that students take also fulfill some of CU Denver (up to 8 hours) and CLAS (up to 4 hours) graduation requirements.

- MATH 2411 - Calculus II
- MATH 2421 - Calculus III
- MATH 1401 - Calculus I

## Dual Credits

Students need to take only three electives at the undergraduate level; the three electives taken at the graduate level are double counted in fulfilling both BA and MA graduation requirements. ECON 5803 (Graduate Mathematical Economics) is waived or can be counted as one graduate-level elective. The total dual credits are 12 hours.

## Additional Graduation Requirements

All other grade and GPA requirements towards the BA and MA degrees (e.g., a C- or better is needed in each undergraduate-level required course and a B- or better is needed in each graduate-level required course). Students are expected to meet all course prerequisites. Students will earn the BA degree in their fourth year upon completing all the requirements for the BA degree. Students are expected to be admitted to the Graduate School in their final two semesters prior to earning the MA degree.

## Admission Requirements

1. Meet all general admission requirements of the Graduate School
2. Be a current CU Denver Economics major with a GPA of 3.5 or better
3. The following courses must have been completed at CU Denver with a grade of B+ or better: MATH 2411, MATH 2421, ECON 4071, and ECON 4811
4. Students should apply in the semester when requirement 3 is satisfied (typically in the end of the fall semester of their junior year - as in the sample curriculum below)
5. Students who do not meet requirements 2 and 3 may apply, but must submit GRE scores and two letters of recommendation; otherwise both are waived
6. To apply, students should submit a regular application to the MA ECON program here: <https://application.admissions.ucdenver.edu/apply/>. Students who meet the admission requirements are not required to pay the application fee, submit GRE scores, letters of recommendation, or a personal statement. Students must contact the graduate advisor after their application is submitted to have this material waived (brian.duncan@ucdenver.edu)

# Economics MA/Applied Mathematics MS Dual Degree, with a focus in Applied Statistics

► Graduate School Policies and Procedures apply to this program.

**Graduate Advisors:** Brian Duncan and Hani Mansour

The fields of mathematics and economics are inextricably linked. In economics, mathematics and statistics are used extensively in theory construction, tests of existing theories and discovery of regularities to inform new theories. Economics also gives mathematicians/statisticians new challenges, new outlets and new ideas to incorporate in mathematics. These complementarities have long been recognized and economics graduate students have always been advised to take advanced courses in statistics.

A "dual" degree means that students who complete the program earn two master's degrees: MA in economics and MS in applied mathematics. Students interested in completing the dual degree in economics and applied mathematics must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the applied math program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the Math Department.

[Click here for admissions requirements for the MA program in Economics](#)

[Click here for admissions requirements for the MS program in Applied Mathematics](#)

There are an increasing number of economics MA students wishing to obtain graduate training and a degree in statistics. Having an MA degree in economics and an MS degree in Applied Mathematics will make a student highly employable in the job market and provide them an edge in applying for elite PhD programs.

## Degree Requirements

The requirements for the dual degree in economics and applied mathematics include completing 21 credit hours in ECON and 21 credit hours in MATH (42 total credit hours).

Students are expected to meet all course prerequisites. ECON 5803 – Mathematical Economics is a prerequisite for ECON 5073 - Microeconomic Theory and ECON 5813 - Econometrics I. This

prerequisite requirement is waived for students who are currently admitted to the MS Applied Mathematics program.

A grade of B- or better is required in all courses, with a cumulative grade point average of B (3.0) or above. No course may be taken more than twice.

## Core Courses

Take all of the following courses:

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics **or** ECON 6054 - Seminar In Applied Economics II
- ECON 6073 - Research Seminar
- MATH 5070 - Applied Analysis
- MATH 5310 - Probability
- MATH 5320 - Introduction to Mathematical Statistics
- MATH 5718 - Applied Linear Algebra
- MATH 6330 - Workshop in Statistical Consulting

Take one of the following courses:

- MATH 5394 - Experimental Designs
- MATH 6376 - Statistical Computing
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7826 - Topics in Probability and Statistics
- An additional course given prior approval by the student's advisor and the Director of the Program in Statistics.

**Total: 36 hours**

## Electives

One 5000 or higher course with a MATH prefix (**3 semester hours**), except MATH 5000-5010, MATH 5017, MATH 5198, and MATH 5250. Contact a graduate advisor in the Math Department for information about Math course requirements.

One 5000 or higher course with an ECON prefix (**3 semester hours**).

Contact a graduate advisor in the Economics Department for information about Econ course requirements.

**Total: 6 Hours**

**Dual Degree Total: 42 Hours**

## **Economics MA/Finance MS Dual Degree**

► Graduate School Policies and Procedures apply to this program

**Graduate Advisors:** Brian Duncan and Hani Mansour

For students interested in combining the quantitative skills of an economics degree with the specific applications of a business degree, we offer an MA economics / MS finance dual degree. This 42-semester-hour program is offered jointly with the Business School.

A "dual" degree means that students who complete the program earn two master's degrees: MA in economics and MS in finance. Students interested in completing the dual degree in economics and public administration must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the finance program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the Business School.

[Click here for admissions requirements for the MA program in Economics](#)

[Click here for admissions requirements for the MS program in Finance and Risk Management](#)

The dual degree program is intended to create highly-skilled research professionals with considerable econometric skill as well as familiarity with their chosen financial institutions. Given the similarity in course work within the two programs, there can be considerable time savings for the student. Essentially, the program allows students to complete the two programs that separately would require 60 hours of course work with 42 hours of combined course work.

### **Degree Requirements**

The requirements for the dual degree in economics and finance include completing 21 credit hours in ECON and 21 credit hours in FNCE (42 total credit hours)

Students are expected to meet all course prerequisites. A grade of B- or better is required in all courses, with a cumulative grade point average of B (3.0) or above. No course may be taken more than twice.

## Core Courses

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6073 - Research Seminar
- BUSN 6640 - Financial Management
- FNCE 6300 - Macroeconomics and Financial Markets
- FNCE 6330 - Investment Management Analysis
- FNCE 6380 - Futures and Options
- OR-
- FNCE 6382 - Survey of Financial Derivatives
- OR-
- FNCE 6410 - Real Options and Decisions Under Uncertainty

**Total: 30 Hours**

## Electives

Three 6000 or higher courses with a FNCE prefix (9 semester hours), except FNCE 6290 - Quantitative Methods. Contact a graduate advisor in the Business School for information about Finance course requirements.

One 5000 or higher course with an ECON prefix (3 semester hours). Students are strongly encouraged to take 3 elective hours of ECON 6053/6054 or to meet with an economics graduate advisor to discuss how to otherwise prepare for ECON 6073 - Research Seminar. Contact a graduate advisor in the Economics Department for information about ECON course requirements.

**Total: 12 Hours**

**Dual Degree Total: 42 Hours**

# Economics MA/Public Administration MPA Dual Degree

► Graduate School Policies and Procedures apply to this program

**Graduate Advisors:** Brian Duncan and Hani Mansour

The fields of public administration and economics are inextricably linked. Economists provide much of the theory and analytic foundation that administrators use to evaluate and implement policy. Given that the capital of the state of Colorado is in Denver, there is great need for administrators that fully understand methods of program evaluation and have the theoretical background needed to forecast how individuals and institutions will respond to new proposals. Similarly, good theory and practice must take into account how the proposals will be implemented and results interpreted. Both administrators and economists need to be engaged in constructive dialog for either to be fully effective.

A "dual" degree means that students who complete the program earn two master's degrees: MA in economics and MPA in public administration. Students interested in completing the dual degree in economics and public administration must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the public administration program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the School of Public Affairs.

[Click here](#) or admissions requirements for the MA program in Economics

[Click here](#) for admissions requirements for the MPA program in Public Administration

## **Degree Requirements**

The requirements for the dual degree in economics and public administration include completing 21 credit hours in ECON and 27 credit hours in PUAD (48 total credit hours).

Students are expected to meet all course prerequisites. A grade of B- or better is required in all courses, with a cumulative grade point average of B (3.0) or above. No course may be taken more than twice.

### **Economics Core Courses (15 Hours)**

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II

### **Public Administration Core Courses (18 credits)**

- PUAD 5006 - Public Service Leadership and Ethics

- PUAD 5008 - Evidence-Based Decision-Making
- PUAD 5001 - Introduction to Public Administration and Public Service
- PUAD 5002 - Organizational Management and Behavior
- PUAD 5003 - Research and Analytic Methods
- PUAD 5004 - Economics and Public Finance
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5503 - Public Budgeting and Finance

## **Economics Electives (3 or 6 hours)**

Any course numbered 5000 or higher with an ECON prefix. Students planning on taking ECON 6073 are strongly encouraged to take 3 elective hours of ECON 6053/6054.

## **Public Administration Electives (6 or 9 hours)**

Any course numbered 5000 or higher with a PUAD prefix. Contact a graduate SPA advisor for information about their course requirements.

## **Capstone Course**

- ECON 6073 - Research Seminar
- OR**
- PUAD 5361 - Capstone Seminar

If the student takes ECON 6073, then 3 hours of elective credits must come from Economics and 9 from SPA. If the student takes PUAD 5361, then 6 hours of elective credits must come from Economics and 6 from SPA.

## **Finance/Economics MS/MA**

Students may concurrently pursue an MA in Economics offered by the College of Liberal Arts and Sciences and the MS in Finance offered by the Business School. Students must complete 27 semester hours of a combination core, 15 semester hours of combination electives and 3 semester hours of a 5000- or 6000-level economics elective. Students apply to each program separately and admission into one of the programs does not guarantee admissions into the second program.

# Political Science MA / Master of Business Administration (MBA) Dual Degree

► Graduate School Policies and Procedures apply to this program.

In the 21<sup>st</sup> century, the fields of business administration and political science intersect, in that sustainable business development requires an understanding of the political environment, while political theory and practice must address the role of the business community in economic development. Providing students with both the business foundation and political knowledge enhances their ability to succeed in our ever-changing political world.

The CU Denver Master of Arts in Political Science (MA) degree offers an in-depth understanding of the political environment, locally, nationally and globally, emphasizing the development of academic and practical skills in key areas of the discipline, and centering on the major fields of American politics, comparative politics, international relations, political theory and public policy. The CU Denver Master of Business Administration (MBA) degree provides a strong foundation in business knowledge in such areas as organizing teams, developing marketing plans, using data analysis and technology in decision making, economics, financial management and strategic planning. The MBA develops skills required for competent and responsible administration of an enterprise viewed in its entirety, within its social, political and economic environment.

The Dual Master's Degree in Political Science (MA) and Business Administration (MBA) is designed for students whose interests overlap business and politics or business and international affairs. This program is jointly sponsored by the Department of Political Science of the College of Liberal Arts and Sciences and the Business School. This program enables students to simultaneously earn an MA in Political Science with an MBA.

The dual degree program provides a more comprehensive education to the next generation of professionals in the non-profit sector, corporate arena and governmental organizations. Dual degree students are able to complete both degree programs in less time, and with fewer total credit hours (66 for both), than if both degrees were pursued separately (48+33 = 81). The program keeps the core of each program intact, including some electives from both programs, and enables students to choose two additional electives from either business or political science to best suit their career and personal goals. Furthermore, the interactions between the students enrich the students in both programs, as well as the organizations that employ them.

## Admission Requirements

Students must apply separately to, meet the admission requirements of, and be accepted by each program. It is possible for students currently admitted to one program to learn about the dual degree and choose to apply after admission to the other program.

## **GPA Requirements**

Students must maintain a cumulative GPA of 3.0 or higher across all courses that are applied to the dual degree. Any political science course in which a student receives a final grade lower than *B-* cannot be counted toward the total credits for the dual degree. Any business course in which a student receives a final grade lower than *C* cannot be counted toward the total credits for the dual degree. All graduate courses will be included in the cumulative GPA.

## **Transfer Credits**

No more than 9 semester hours of business credits from an AACSB Business School with a grade of *B* or better and no more than 6 semester hours of political science credits may be transferred into this dual degree program. The Business School will evaluate transfer hours in business and the Political Science Department will evaluate transfer hours in political science.

## **Graduation**

Students must complete all the requirements for both programs before they apply to graduate, and must apply to graduate in the same term for both programs.

## **Degree Requirements**

### **MBA Core (30 Hours)**

- BUSN 6520 - Leading Individuals and Teams
- BUSN 6530 - Data Analytics for Managers
- BUSN 6540 - Legal and Ethical Environment of Business
- BUSN 6550 - Analyzing and Interpreting Accounting Information
- BUSN 6560 - Marketing Dynamics in the 21st Century
- BUSN 6610 - Information Systems Strategy
- BUSN 6620 - Applied Economics for Managers
- BUSN 6630 - Management of Operations
- BUSN 6640 - Financial Management
- BUSN 6710 - Strategic Management

### **International Elective (3 Hours)**

Any course numbered 6000 or higher with the INTB prefix

or ENTP 6826 - International Entrepreneurship

or any graduate-level business course that is cross-listed with an INTB prefix. Travel study offered by the Business School will also apply.

## **Political Science Core (18-21 Hours)**

- PSCI 5000 - State of the Discipline
- PSCI 5468 - Research Methods in Political Science  
Graduate Seminar in American Politics subfield  
Graduate Seminar in Comparative or International Politics subfield  
Graduate Seminar in Political Theory subfield  
PSCI 5950 - Master's Thesis (6 credits)  
OR  
PSCI 5960 - Master's Project (3 credits)

## **Political Science Electives (6-9 Hours)**

PSCI graduate seminars [must complete 6 hours if thesis, or 9 hours if project (from Political Science Core)]

## **Free Electives (6 Hours)**

Courses must be from either the Business School or Political Science department, meeting the descriptions below. A combination of both is also acceptable.

*Business Free Electives: Any course numbered 6800 or higher with a BUSN prefix or any course numbered 6000 or higher with a prefix of ACCT, DSCI, ENTP, FNCE, HLTH, INTB, ISMG, MGMT OR MKTG.*

*Political Science Electives: Any course numbered 5000 or higher with a PSCI prefix.*

# **Public Administration/Applied Geography and Geospatial Sciences, MPA/MA**

## **Introduction**

The dual Master of Public Administration/Master of Arts in Applied Geography and Geospatial Sciences degree offers students interested in working in the government or nonprofit sectors an opportunity to combine fundamental management and leadership training with highly sought-after skills in geospatial sciences, including geographic information systems, remote sensing, computer cartography, and spatial statistics. This degree may be particularly appealing for students interested in working in areas such as environmental management, disasters and hazards mitigation and emergency management, urban affairs, and public health. The structure of the degree allows students to complete both programs in less time and for less money.

## Program Requirements

- Students are required to take 19 courses, or 57 credit hours, to complete the dual degree.
- Students without pre-service experience in the government or nonprofit sectors will also be required to take a 3-credit internship course.
- Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.
- For more detailed information about course sequencing and requirements, contact your advisor.

Students must take all **nine** of the following core courses:

- GEOG 6300 - Foundations Seminar in Human-Environmental Interaction
- GEOG 5050 - Applied Spatial Statistics
- PUAD 5001 - Introduction to Public Administration and Public Service
- PUAD 5002 - Organizational Management and Behavior
- PUAD 5003 - Research and Analytic Methods
- PUAD 5004 - Economics and Public Finance **or** PUAD 5503 - Public Budgeting and Finance
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5006 - Public Service Leadership and Ethics
- PUAD 5008 - Evidence-Based Decision-Making

Students must take **four** Geospatial Science and Methods elective courses (12 hours) from the following list:

- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5070 - Remote Sensing II: Advanced Remote Sensing
- GEOG 5081 - Cartography and Computer Mapping
- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5090 - Environmental Modeling with Geographic Information Systems
- GEOG 5091 - Open Source Software for Geospatial Applications

- GEOG 5092 - GIS Programming and Automation
- GEOG 5095 - Deploying GIS Functionality on the Web
- GEOG 5235 - GIS Applications in the Health Sciences
- CSCI 5559 - Database Systems
- ENVS 6200 - Risk Assessment
- ENVS 6220 - Toxicology
- ENVS 6230 - Environmental Epidemiology
- CVEN 5382 - Geospatial Data Development
- CVEN 5383 - GIS Analysis -- Theory and Practice
- CVEN 5385 - GIS Relational Database Systems

Additionally, students must take **three** Geography elective courses (9 hours), including at least one graduate-level Human Geography elective and at least one graduate-level Physical Geography elective, and two graduate-level Public Administration electives (6 hours).

Internship: All students must take PUAD 6910 - Internship (3 hours), unless this requirement is waived by the program director because the student has more than one year of professional work experience in government or nonprofit organizations.

Capstone: All students must take either PUAD 5361 - Capstone Seminar OR GEOG 6800 - Community-Based Research Practicum (3 hours).

# Public Administration/Criminal Justice, MPA/MCJ

## Introduction

The fields of public administration and criminal justice are closely connected. While the MPA is a generalist degree designed to prepare graduates for a variety of positions in administration and policy analysis, criminal justice studies prepare graduates to research and work in public service organizations within the substantive policy area. By providing an opportunity for students to complete both a generalist master's degree as well as a specialist master's degree, graduates will be equipped with administrative skills applicable to a number of public service settings and deep knowledge of work that pertains to criminal justice settings.

## Admission

Students pursuing the joint degree program must apply and be admitted to each of the programs. If one program accepts the student for the dual degree but the other program does not, then the student will not be accepted for the dual degree. It is possible for students currently admitted to one program to learn about the dual degree and choose to apply after admission to the other.

The MPA and MCJ Program Directors serve as advisors for this program. Interested applicants should consult one of the Program Directors before applying.

### **Course Requirements**

Students enrolled in the dual degree program must complete a minimum of 24 credit hours in each of the two programs (not counting Internship or Field Study if required). Because each program requires 36 (not counting Internship or Field Study) credit hours, the student will be able to complete 48 hours and earn two degrees. This means that the student can earn two degrees by completing 66 percent of the credit hours that would be required if the student were pursuing each degree separately.

Interested students should contact the School of Public Affairs directly for specific information on course sequencing and requirements.

# **Public Administration/Economics, MPA/MA**

## **Introduction**

The fields of public administration and economics are inextricably linked. Economists provide much of the theory and analytic foundation that administrators use to evaluate and implement policy. Given that the capital of Colorado is Denver, there is a great need for administrators that fully understand methods of program evaluation and have the theoretical background needed to forecast how individuals and institutions will respond to new proposals. Similarly, good theory and practice must take into account how the proposals will be implemented and the results interpreted. Both administrators and economists need to be engaged in constructive dialog for either to be fully effective.

Therefore, the Department of Economics of the College of Liberal Arts and Sciences and the School of Public Affairs jointly sponsor a dual degree program. This program enables students to simultaneously earn an MA degree in economics with a master of public administration (MPA).

The dual degree program provides students the opportunity to take the core of both programs and choose electives that suit their career and personal goals best. Electives in one program are allowed to count as an elective in the other. The net result is that while both degrees separately

require 66 hours, the dual degree program provides a more comprehensive and effective education in 48 hours or 73 percent of the dual degree total.

## **Degree Requirements**

### **Admission into both programs**

Students must apply separately to each program, meet the admission requirements of each program and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student will not be accepted for the dual degree. It is possible for students currently admitted to one program to learn about the dual degree and choose to apply after admission to either economics or SPA.

## **Other policies**

### **Minimum Grade for Graduation**

Students must maintain a GPA of 3.0 or higher across all courses that are applied to the dual degree. Students who fail to maintain a GPA of 3.00 will be placed on probation for a semester, after which they may be dropped from the dual degree program if the GPA is not increased to 3.0 or above. Additionally, any core course in which a student receives a final grade lower than B- cannot be counted toward the total credits required for the dual degree; in such a case, the student must retake the course.

### **Capstone Advising**

All students are required to complete a capstone paper and obtain the signatures of three graduate faculty. Every dual degree student, regardless of the capstone course they choose (ECON 6073 or PUAD 5361) must select a committee composed of faculty from both programs.

### **Course Credit Transfers from Other Universities**

No more than 6 hours may be transferred, and both SPA and economics program directors must approve any transfers.

## **Sample Plan of Study for the MPA/MA Economics**

Total: 48 semester hours with 21 in economics and 27 in public administration

### **Core**

(33 semester hours)

A grade of B- or better is required in all core courses, with a B average overall. No public administration course may be taken a third time.

- ECON 5073 - Microeconomic Theory
- ECON 5083 - Macroeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- PUAD 5001 - Introduction to Public Administration and Public Service
- PUAD 5002 - Organizational Management and Behavior
- PUAD 5003 - Research and Analytic Methods  
or
- PUAD 5004 - Economics and Public Finance
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5006 - Public Service Leadership and Ethics
- ECON 6073 - Research Seminar  
or
- PUAD 5361 - Capstone Seminar (To be completed after all other core courses or with instructor and advisor consent)

## **Electives**

(15 semester hours)

If the student takes PUAD 5361, then they are required to take 6 semester hours of economics electives and 9 semester hours of electives from SPA labeled 5000 or above.

If the student takes ECON 6073, then they are required to take 3 semester hours of economics electives and 12 semester hours of electives from SPA labeled 5000 or above.

# **Public Administration/Juris Doctorate, MPA/JD**

## **Introduction**

The School of Public Affairs and the University of Colorado at Boulder School of Law jointly sponsor a dual degree program leading to the simultaneous granting of the Master of Public Administration (MPA) and Juris Doctor (JD) degrees. The program may be of particular interest to students who wish to practice law within the public sector, obtain a senior administrative post, represent public-sector clients, represent private-sector clients in transactions with government agencies and institutions and/or develop scholarly expertise in the relationship between law and public administration.

Interested persons must separately apply to and be admitted by both SPA and the School of Law. Upon admission, students may begin full-time study at either SPA or the School of Law; however, law study must be initiated no later than the beginning of the second year of enrollment in the program, and the first year of law study must be taken in its entirety and exclusive of nonlaw course work.

Through the choice of electives, students may develop a limited substantive specialization within the study of law and public administration. The dual degree program is structured to allow for 12 semester hours from the law school to be accepted as electives in the 36-semester-hour MPA program, and 12 semester hours from SPA to be accepted into the law school's 89-semester-hour JD program. Students are thus simultaneously awarded both degrees with a cumulative total of 101 semester hours; the program therefore allows students to complete all dual degree requirements in approximately four years of full-time study. Students without prior public-sector work experience will be required to complete an internship in an appropriate governmental institution or closely related nonprofit organization.

# **Public Administration/Public Health, MPA/MPH**

## **Applying for the Program**

Students need to apply to the School of Public Health with a separate application. Students must be admitted to both programs to participate in the dual degree.

## **Course Requirements**

To complete the dual degree, students take all the core courses in each program, 9 elective credits from the School of Public Affairs, 9 elective credits from the School of Public Health, and the School of Public Health's capstone course requirements. Total credits required: 60 semester credit hours. For more information, see the course map provided on the School of Public Affairs website; [spa.ucdenver.edu](http://spa.ucdenver.edu).

## **When to Enroll**

Students should indicate intention to complete the dual degree upon application to the School of Public Affairs and simultaneously complete the application for the School of Public Health. SPA does not have a limit on the number of students who can enroll. Students already enrolled in the School of Public Affairs student may begin the SPH application right away (see the SPH for application deadlines), while taking MPA classes. It is best to get started on the application process right away, so that advising matches graduation goals.

## **Advising**

Once admitted to the dual degree program, students have an advisor from each school.

# Public Administration/Urban and Regional Planning, MPA/MURP

## Background and Purpose

Public administration and urban and regional planning have many aspects in common. To provide students with an excellent education through an understanding of both professions, the School of Public Affairs and the College of Architecture and Planning have developed a dual degree program. Students can obtain both master of public administration (MPA) and master of urban and regional planning (MURP) degrees with a minimum of 63 semester hours, as compared to a total of 87 semester hours to complete both degrees independently.

To be eligible for the dual MPA/MURP degree program, students must be admitted to each of the two schools under their respective admission procedures and standards and indicate an intention to pursue the dual degree. Students will take all the core courses and the capstone required for an MPA, plus the core and concentration requirements necessary for the MURP.

Students in each school must apply to the other school before completing 18 hours in their respective programs. Upon admission to both schools, students will be assigned an advisor in each school to work out a specific degree plan.

## Core and Elective Requirements

### Core Courses (42 semester hours)

#### MURP

- URPL 5000 - Planning History and Theory
- URPL 6220 - Advanced Research Techniques
- URPL 6215 - Analyzing the Built Environment
- URPL 5020 - Planning Law and Institutions
- URPL 6000 - Planning Project Studio

**Total: 18 Hours**

#### MPA

- PUAD 5001 - Introduction to Public Administration and Public Service
- PUAD 5002 - Organizational Management and Behavior

- PUAD 5004 - Economics and Public Finance
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5006 - Public Service Leadership and Ethics

**Total: 15 Hours**

**Take one of two**

- PUAD 5003 - Research and Analytic Methods
- URPL 5040 - Urban Sustainability

**Total: 3 Hours**

## **Additional Coursework (21 semester hours)**

### **MURP**

12 hours if URPL 5510 elected, or 15 hours if PUAD 5003 elected. Courses are to be selected with MURP advisor's approval.

- URPL 5040 - Urban Sustainability
- PUAD 5003 - Research and Analytic Methods

**Total: 12-15 Hours**

### **MPA**

6 hours if PUAD 5003 elected, or 9 hours if URPL 5510 elected.

- PUAD 5003 - Research and Analytic Methods
- URPL 5040 - Urban Sustainability

**Total: 6-9 Hours**

### **Practicum**

- PUAD 5361 - Capstone Seminar (3 hours required)

**Total: 3 Hours (required)**

### **Electives**

Take one of the following or another option with MPA advisor's approval (3 hours):

- PUAD 5250 - Intergovernmental Management
- PUAD 5410 - Administrative Law
- PUAD 5440 - Negotiation and Conflict Resolution
- PUAD 5502 - Public Financial Management and Policy
- PUAD 5503 - Public Budgeting and Finance
- PUAD 5540 - Organization Development
- PUAD 5625 - Local Government Management
- PUAD 5626 - Local Government Politics and Policy
- PUAD 5631 - Seminar in Environmental Politics and Policy
- PUAD 5632 - Seminar in Environmental Management

**Total: 3 Hours**

# **Public Service/Public Administration, BA/MPA**

## **Introduction**

The Pathway Bachelor of Arts in Public Service/Master of Public Administration degree allows high-performing students to earn both degrees in an accelerated time frame, saving students both time and money. Students graduating with the Pathways BAPS/MPA degree are prepared for leadership and management roles in public service, including local, state, and federal governmental agencies and in nonprofit and nongovernmental organizations. Both the BAPS and the MPA degrees are offered fully online, providing students with the flexibility to schedule courses around the reality of family and work demands while also engaging both local and fully online students in public service opportunities in their own communities.

The BAPS/MPA degree program offered by the School of Public Affairs allows high-performing students to count 12 credit hours towards both the BAPS and the MPA degrees. Eligible students are those who have completed at least 75 credits with a minimum 3.5 GPA in the BAPS major and a 3.0 overall GPA, completed the undergraduate Core Curriculum, and who meet the other requirements listed below.

Students are eligible to receive the BA in Public Service degree once they have successfully completed 120 semester hours and all CU Denver undergraduate degree requirements. The MPA will be conferred once the student has completed all requirements of the Master of Public Administration degree.

## **Eligibility Requirements**

Both current CU Denver students and new transfer students are eligible to apply after meeting the following:

- Currently enrolled in the School of Public Affairs as a Bachelor of Arts in Public Service major
- Completed the University of Colorado Denver's undergraduate core curriculum
- Completed 75 semester credit hours
- Completed the following 15 semester credit hours in Public Service:
  - PUAD 1001 - Introduction to Public Service
  - PUAD 2001 - Management for Public Service
  - PUAD 3001 - Financial Management for Public Service
  - PUAD 3002 - Program Design, Evaluation, and Decision-Making
  - PUAD 4001 - Ethics and Public Service
  - Transfer Public Service courses must have been approved and accepted toward the major
- Minimum 3.0 cumulative GPA
- Minimum 3.5 cumulative GPA in Public Service courses

## General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements
- CU Denver Core Curriculum
- School of Public Affairs Graduation Requirements
- CU Denver's Undergraduate Academic Policies
- CU Denver's Graduate Academic Policies
- [Click here for information about Academic Policies](#)

## Program Requirements

- Students must complete
  - A total of 141 credit hours
  - 37-38 credit hours in the general education core curriculum
  - 46-48 credit hours in general electives
  - 15 credit hours of undergraduate Public Service coursework
  - 45 credit hours of upper-division coursework (3000-level and above)
  - Minimum of 30 hours of resident credit; 21 out of the last 30 hours in resident course work

- Minimum 36 semester hours of graduate-level coursework (5000-level and above)
- Students must receive a minimum 3.0 cumulative GPA in undergraduate Public Service coursework.
- Students must be fully admitted into the Master of Public Administration program.
- Students must receive a minimum of a B- grade in each required core MPA course.
- Students must maintain a 3.0 GPA overall in all graduate-level courses.
- Students must successfully complete the MPA capstone or thesis.
- Students must fulfill all college and major requirements.
- The School of Public Affairs reserves the right to rescind a BAPS/MPA student's admittance to the pathway program if at any point the student's grade point average falls below the requirements listed above.

## Doctoral Programs

# Applied Mathematics PhD

►Graduate School Policies and Procedures apply to this program.

The Department of Mathematical and Statistical Sciences offers a PhD in Applied Mathematics. The degree is designed to give candidates a contemporary, comprehensive education in applied mathematics and to provide research opportunities in the special fields of computational mathematics, discrete mathematics, mathematics of science and engineering, operations research, optimization, probability, and statistics.

## Program Requirements

There are six phases of the PhD program. A candidate must fulfill course requirements, pass the preliminary examinations, establish a PhD committee, meet the academic residency requirement, pass the comprehensive examination and write and defend a dissertation.

- Students must complete 42 semester hours of non-thesis course work at the graduate level (up to 30 hours of this course work may be transferred in, including courses taken as part of a master's degree). In addition, 30 hours of dissertation credit must be taken. The following courses are required as part of the formal course work: MATH 5779-Math Clinic and three readings courses (1 semester hour each). Students must also satisfy a **breadth requirement** by completing a total of six graduate math courses from among several areas of mathematics, with no more than three of these courses from any one area.

- Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.25. All graded attempts in required and elective courses are calculated in the major GPA. [The following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250 and 5830.]
- The preliminary examinations are designed to determine that students who intend to pursue the PhD program are qualified to do so. These four-hour written examinations are in the areas of applied analysis and applied linear algebra. Students must pass these exams by the start of their fourth semester.
- Six semesters of full-time scholarly work are required, as specified in the rules of the Graduate School. All students are strongly advised to spend at least one year doing full-time course work or research with no outside employment.
- The comprehensive examination is taken after completion of the preliminary exams, completion of at least three semesters of residency, and upon completion of essentially all non-thesis coursework. The exam is designed to determine mastery of graduate-level mathematics and the ability to embark on dissertation research. It consists of a six-hour written examination and an oral follow-up examination. Students must pass the comprehensive exam by the beginning of the 4th year. Within six months after passing the comprehensive examination, the candidate must present a dissertation proposal to their dissertation committee.
- Each student must write and defend a dissertation containing original contributions and evidence of significant scholarship. The dissertation defense is public and must be given before an examining committee approved by the Graduate School.

For more detailed information about the Applied Mathematics PhD, see [www.math.ucdenver.edu/phd](http://www.math.ucdenver.edu/phd).

## Bioengineering PhD

► Graduate School Policies and Procedures apply to this program.

### Doctor of Philosophy (PhD) Degree Program

The PhD is offered to students with an undergraduate or master's degree in engineering or the life sciences. Students complete the degree in three to five years with a highly individualized training pathway. All PhD students complete a dissertation, which may have an industry component.

Visit our website ([ucdenver.edu/bioengineering](http://ucdenver.edu/bioengineering)) or contact us at [bioengineering@ucdenver.edu](mailto:bioengineering@ucdenver.edu) for more information.

# Civil Engineering PhD

► Graduate School Policies and Procedures apply to this program

The PhD degree in civil engineering is offered through a coordinated program with the University of Colorado Boulder.

Specialty Areas for Degrees:

- Environmental and Sustainability Engineering
- Geotechnical Engineering
- Hydrologic and Hydraulic Engineering
- Structural Engineering
- Transportation Engineering
- Civil Engineering Systems
- Construction Engineering and Management (through the Engineering and Applied Science PhD program)

**Note:** The multidisciplinary engineering and applied science PhD is also offered through the Department of Civil Engineering.

## What is civil engineering systems?

The doctoral program in civil engineering systems has different rules than the five other traditional doctoral tracks in order to facilitate more interdisciplinary research. This doctoral track can be the degree that would follow a master's of engineering.

## Additional Doctoral Admissions Requirements

In addition to the admissions requirements listed for master's students, doctoral applicants need to have the support of a faculty advisor before they are admitted. Once doctoral students are approved by the graduate admissions committee, their application must be reviewed again by the Department of Civil, Environmental and Architectural Engineering at CU Boulder as the programs are jointly administered. Prospective PhD students should contact the Department of Civil Engineering at CU Denver to inquire about application requirements and to obtain the "Rules and Policies for the Coordinated PhD Program."

Requests for applications for graduate study in civil engineering should be addressed to

CU Denver Department of Civil Engineering  
Campus Box 113  
P.O. Box 173364  
Denver, CO 80217-3364

# Computer Science and Information Systems PhD

► Graduate School Rules to apply to this program

**Program co-directors:** Gita Alaghband (CSE) and Jiban Khuntia (Business School)

**Website:** [engineering.ucdenver.edu/CSISPhD](http://engineering.ucdenver.edu/CSISPhD)

The Computer Science and Information Systems PhD Computer Science track is awarded from the College of Engineering, Design and Computing. Students interested in the information systems track are referred to CU Denver Business School CSIS PhD program. The CSIS PhD degree is an interdisciplinary program designed to provide an infrastructure for a wide spectrum of research possibilities in the computer science and information systems field by emphasizing the scientific, algorithmic, system design and computing aspects of the field.

Our students work with research centers and researchers from a variety of disciplines, including the CU School of Medicine, chemistry, mathematics, biology, all engineering disciplines, economics, health, and education, in addition to industry and businesses. This distinctive infrastructure supports basic research in both computer science and information systems as well as the demand of computing and IT integration with all other scientific and business fields.

## Admission Requirements

For more information regarding the admission requirements for the CSIS PhD, visit [engineering.ucdenver.edu/CSISPhD](http://engineering.ucdenver.edu/CSISPhD).

## Advisor

Upon entering the program, each student chooses an advisor to provide mentoring and guidance throughout the program and work with the student to prepare a program of study. Requests to change advisors must be approved by the program co-directors, and this happens in very rare circumstances.

## Computer Science Doctoral Committee

The advisor and four other members form a doctoral committee. The advisor must be a full-time current graduate faculty member in the CSE department. The committee must contain at least one faculty member from the Business School. One committee member may be from outside the CSE department and the information systems faculty.

## Program Components

## **Plan of Study**

A list of course work and other requirements for the degree should be prepared with the advisor and then submitted to the director for approval. The successful completion of all work indicated on the plan of study is an important prerequisite for the conferring of the degree. A plan of study should be submitted for approval by the end of the first semester of the program; any future plan updates need to be approved.

## **CS Preliminary Exam**

Students are required to select three out of four core knowledge areas and pass a written exam. The exam must be taken within the first year of the program. Students may take one, two, or all three exams within the first year of their admission. Students may repeat an exam area once. A guide for the exam is available on the department website.

## **CS Comprehensive Exam**

Students will submit a paper to fulfill the Graduate School's comprehensive exam requirement. The paper should describe an area of research including literature review, problem definition, and possible methodologies/models to study a significant problem in computer science or information systems. The paper will be evaluated by a committee of three CS faculty members. An oral presentation of the paper will be open to the entire CSIS faculty. The committee may adopt additional guidelines to evaluate the paper and presentation. According to Graduate School rules, the comprehensive exam must be completed by the end of the third year in the program. In addition to these requirements, the comprehensive exam must meet the other graduate school requirements.

## **Dissertation Proposal**

A dissertation proposal after the student completes the comprehensive exam is required for the CSIS PhD program. The dissertation proposal will consist of a written proposal detailing the proposed work, advances in the proposed field, partial results, and future work toward completing the student's dissertation.

## **Dissertation Completion**

Once the dissertation proposal is approved, each student prepares and submits a dissertation. The dissertation is defended before the doctoral committee in a public meeting. Final approval for the dissertation is given by a vote of the dissertation committee after the public defense.

## **Graduation**

Upon completion of all degree requirements including the dissertation defense, the student receives the degree of doctor of philosophy in CSIS from the College of Engineering, Design and Computing.

# Computer Science and Information Systems PhD (Business School)

► Graduate School Rules apply to this program.

## CSIS Business Ph.D. Program

**Program co-director:** Jiban Khuntia (Ph: 303-315-8424, email: jiban.khuntia@ucdenver.edu)

The computer science and engineering (CSE) department in the College of Engineering, Design and Computing and the Business School offer a joint doctor of philosophy degree program in computer science and information systems (CSIS). Known as **the CSIS Ph.D., this program provides two tracks:**

- The Computer Science (CSIS CS Track) in the College of Engineering, Design and Computing.
- The Information Systems (CSIS Business Ph.D.) in the Business School.

The CSIS Business Ph.D. The program is located Business School of the University of Colorado Denver. Students admitted to CSIS Business Ph.D. will work with the Information Systems Department of the Business School at the University of Colorado Denver. The primary mission of the CSIS Business Ph.D. The program is to produce individuals who will contribute to the discovery and dissemination of scientific knowledge through continued careers in research, publishing, and teach at research-oriented universities and research-oriented non-academic institutions throughout the world.

A prospective student requiring admission to this program, need to choose the CSIS Business Ph.D. track and complete the admission. The admission to the program is decided based on the following criteria. Admission is competitive.

## Program Components

**Program Requirements:** Business School IS Ph.D. students should complete at least 60 credit units of coursework. This includes 30 units of Ph.D. level Information Systems (IS) theory-based, and research methods courses; and 30 dissertation topic units. Students are not holding a master's degree in IS, and demonstrating insufficient skills, may need to take additional coursework prior to the start of their Ph.D. program.

Each student will develop a detailed program plan with the consultation of advisor(s) to outline two years of required course works, take the prelims and comprehensive exams, fulfill their teaching requirement, and complete their dissertation. Students generally complete the IS theory-based and methods coursework within the first two years of their program. After

completing all required coursework, students immediately take a comprehensive exam, typically during the Maymester time-period if finishing coursework in the Spring. Besides these general requirements, students should work with faculty on various research assignments that ultimately may be published in top-ranked IS journals.

Following successful completion of the comprehensive exam, students begin to work on their dissertation research during the Summer before the start of their 3rd year. The dissertation is an independent research project conducted by the student under the supervision of a dissertation committee assembled by the student. It is strongly recommended that students do research consistent with the research interests of current faculty. These topics include Behavioral, Organizational, Economics and Social issues related to information systems. The specific sequence of courses can vary depending on the schedule of classes being offered. The following is a sample milestone for the program schedule and completion requirements.

### **Schedule and Milestones**

- **Year 1, Semester 1**
- Coursework
  - ISMG PHD1
  - ISMG 7200
  - Advanced Research Method
- Initiate research project 1 (RP1) with faculty.
  
- **Year 1, Semester 2**
- Coursework
  - ISMG 7211
  - ISMG PHM1
  - Advanced Methods Research
- Complete research project 1 (RP1) with faculty.
- Work on at least one publication for submission to a conference
  
- **Year 1, Summer**
- Prelims examinations.
- Conduct independent research with a faculty advisor; be ready with a rough draft by the end of summer.
- Continue writing and improving the paper for presentation in year-2.
  
- **Year 2, Semester 1**
- Coursework
  - CS Breadth Course

- ISMG 7220
- Initiative research project 2(RP2) with advisor
- **Year 2, Semester 2**
- Coursework
  - ISMG PHD2
  - CSCI Course
- Complete research project 2(RP2) with advisor for submission to a conference
- **Year 2, Summer**
- Comprehensive examinations.
- Develop preliminary ideas for a dissertation topic.
- **Year 3, Semester 1**
- Dissertation hours (6)
- Conduct research for dissertation proposal (at least two essays, three is better), with a focus on literature review, research questions and proposed methods
- **Year 3, Semester 2**
- Dissertation hours (6)
- Dissertation first study should be complete or near to completion
- **Year 3, Summer**
- Dissertation hours (6)
- Dissertation proposal submission to committee for review and finalization
- Finish Dissertation Essay 1 and plan for submission to journal
- **Year 4, Semester 1**
- Dissertation hours (6)
- Defend proposal
- HICSS and ICIS paper submissions.
- Research seminar presentation and Job preparation (Complete enough of the dissertation to be able to interview at the International Conference on Information Systems (ICIS) in December).
- **Year 4, Semester 2**
- Dissertation hours (6)
- Campus interviews, finalize/negotiate job offers.

- Finish and defend dissertation.
- Prepare dissertation journal articles.

### **University-Level Instructional Training**

During the program, each student will obtain training for university-level instruction. This requirement can be fulfilled by working with a faculty member as a teaching assistant, attending university-level teacher training or teaching a university-level class. Students who plan a university career will be encouraged to teach one or more courses and participate in training. When teaching or working as a teaching assistant, a student will be compensated according to standard university salaries.

### **Dissertation Completion**

Following completion of the approval of the dissertation proposal, each student prepares and then submits a dissertation. The dissertation is defended before the doctoral committee in a public meeting. Final approval for the dissertation is given by a vote of the dissertation committee after the public defense of the dissertation.

### **Graduation**

Upon completion of all degree requirements, including the dissertation defense, the student receives the degree of doctor of philosophy. Students applying through the information systems program receive the PhD from the Business School.

# **Education and Human Development PhD**

► Graduate School Rules apply to this program

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**Fax:** 303-315-6311

**E-mail:** [education@ucdenver.edu](mailto:education@ucdenver.edu)

**Website:** <https://education.ucdenver.edu/academics/doctoral>

The PhD in Education and Human Development links an intensive research-based course of study with a content area specialization in order to prepare candidates to assume faculty positions in institutions of higher education or research-based organizations. Successful applicants will be paired with a faculty mentor who will engage the student in research, development, service, and other forms of professional activity.

You will complete a plan of study that includes at least 48 semester credits of coursework (including all required core courses) and 27 semester credits of dissertation. The PhD program is designed to provide each student with an induction into the university research and teaching culture. PhD coursework is intensive and substantive, requiring significant writing, analysis, and critiquing of theory and professional literature.

## Overview of Course Work:

The PhD program consists of a minimum of 75 semester credits. Total credits may vary in order to fully prepare for career opportunities. Students complete 48 credits in three core areas outlined below. The final 27 credits are completed through the dissertation.

12 credits - Foundation courses/experiences: Equity and Diversity; Learning; Epistemology; and Teaching in Higher Education

18 credits - Research Methods

18 credits - Concentration Area (see the list options below)

27 credits - Dissertation

Doctoral students complete a series of courses/experiences in a specified concentration area. Concentration areas focus on a defined discipline or content area in preparation for professional roles as researchers and faculty members. Students also complete a research apprenticeship and higher education teaching practicum or equivalent experience.

The following concentration areas are available.

**Leadership for Educational Organizations.** Students and faculty in this concentration area focus on leadership in schools and the crucial assumption that school leadership makes a difference in how schools succeed in improving learning outcomes for all students. However, the scholarship and research on school leadership is such that we are only beginning to understand why leadership is successful, what the interactions are between effective leadership and effective teaching, and how best to impact the collective impact of leadership on organizational and student-learning outcomes at all levels.

**Early Childhood Special Education/Early Childhood Education.** The goal of this concentration area is to introduce students to issues and practices in early childhood special education/early childhood education and to prepare students to provide leadership to improve outcomes for all children including children with disabilities across early childhood settings. Students will obtain the skills and knowledge of evidence-based practices needed to meet state and national leadership needs within institutions of higher education to address issues in ECE/ECSE. Graduates will: conduct rigorous research related to culturally responsive, evidence-based practices; translate research into practice, thus expanding the use of evidence-based practice in the field; and, create, evaluate, and improve pre-service teacher education programs in ECE and ECSE.

**Family Science and Human Development.** The goal of this concentration is to prepare students to critically examine and understand family science within an ecological life span development lens. This program prepares students to work in academic careers as professors, researchers and scholars in Family Science and Human Development. Students are provided a rich curriculum that centers on theoretical and scholarly knowledge in family science, human development and research inquiry. Another objective of this program is to integrate the importance of family diversity (which includes race, ethnicity, culture, class, gender, sexual orientation, age, religion, ability and language) into the curriculum as it relates to social justice

in family science and child, adolescent and adult development. Central to the Family Science and Human Development concentration is the conceptual framework of family and human ecological systems and how that impacts research, practice and policy with diverse families in the United States and at the global level.

**Math Education.** Students and faculty in this concentration area focus on teacher learning and professional development experiences. Specifically, projects investigate the ways that particular interventions used in professional development for mathematics teachers impacts their content knowledge and pedagogical practices in their classrooms. Work in this area is framed by a situative perspective of learning and incorporates mixed methods to answer questions around the ways particular interventions support teacher and student learning. Video data is prominent in both the design of professional development interventions as well as a major data source for analyses. Analytic methods vary based on the research question and grain size.

**Research and Evaluation Methods.** The goal of this concentration area is to prepare students to design and carry out significant applied research on individual and organizational change in the field of education and human development. Through problem-based pedagogy and hands-on learning, students will be prepared to be collaborative applied researchers who work with community, university and school partners. Students will learn advanced quantitative, advanced qualitative and mixed methods research techniques. Course content includes mixed methods, advanced statistics, advanced qualitative data analysis, systems analysis, collaborative team research and practicum experiences. Graduates of the program are prepared to work as faculty members, school district and organizational researchers, data analysts and assessment coordinators.

**Science Education.** The goal of this area is to prepare students to explore, understand, and think critically about the nature of science and science education from a largely research-oriented perspective. Students may elect to focus on environmental science education as an area of specialization within this concentration area through electives and discipline-specific research agendas.

**Critical Studies in Education.** This concentration area houses faculty who approach their research and teaching in education with a transdisciplinary and critical lens, especially with respects to race, gender, class, disability, sexuality, language, and culture. Faculty members ground their approach in social justice in education and promote the ideas of educational equity, transformative education, and educational activism in nontraditional ways. Particularly, how schooling, society, and policies are dialectical sites of oppression and liberation and the role of educators is that of intellectual activists to facilitate that liberation. Because an activist approach is necessary, this concentration areas offers a monthly faculty and student research meeting where students and faculty collaboratively work on research, publications, conference presentations, and theory building. The faculty of Critical Studies in Education approach education in critical ways to ensure the futurity of a more transformational, liberatory, and humanizing educational system and society.

# Engineering and Applied Science PhD

Graduate School Policies and Procedures apply to this program

The multidisciplinary Engineering and Applied Science Doctor of Philosophy degree program is offered by the College of Engineering, Design and Computing and consists of a primary and secondary concentration. Applicants apply and enter the program through one of four departments, called the host department, which is chosen based on the applicant's intended primary concentration of study. The four departments that serve as host departments are:

- Civil Engineering
- Computer Science and Engineering
- Electrical Engineering
- Mechanical Engineering

Each host department offers several concentrations. A list of concentrations can be found on each department's website. Go to [engineering.ucdenver.edu](http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering. The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

## Requirements for Admission

Requirements for admission to the Engineering and Applied Science PhD program can be found at [engineering.ucdenver.edu/graduate-admissions](http://engineering.ucdenver.edu/graduate-admissions).

## Degree Requirements

The minimum degree requirements consist of 30 semester hours of course work in the primary and secondary areas of concentration, as well as 30 semester hours of research/dissertation credit. Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination. Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate School.

# Geography, Planning, and Design PhD

► Graduate School Rules apply to this program

**Contact:** Dr. Jeremy Németh, Director  
**Telephone:** 303-315-1000  
**Email:** jeremy.nemeth@ucdenver.edu

## Overview

The Ph.D. in Geography, Planning, and Design at the University of Colorado is a research-oriented degree offered by the College of Architecture and Planning (CAP) at the University of Colorado Denver. Initiated in 1997, the program is dedicated to the education of future intellectual leaders in the fields of the built environment who have a critical understanding of the social, political, and global conditions that influence their profession.

It is the intent of the program to prepare students to excel in research regarding the planning and design of built environments through the incorporation of intellectual, analytical, and integrative aspects of the involved professions. Within this context, students and faculty seek to creatively shape the built environment and understand it in relation to institutional, political, economic, social, and natural environments.

Admission to the program is competitive and based on merit and available funding. Excellent academic performance, references, and a commitment to critical issues in the built environment are prerequisites.

The minimum residency requirement is four semesters, not including summer semesters. In the first two years of residence, students take courses to satisfy the credits relevant to preparation for writing their dissertation and the core requirement of the program, as well as additional electives. After completing these requirements, the student takes a comprehensive exam.

After satisfying program requirements, students move on to preparing a dissertation topic and research proposal which is presented and defended in a public event. With the successful defense of the dissertation topic and research proposal, students are admitted to candidacy. Finally, the completed dissertation is defended in a public examination involving external examiners in addition to the members of the committee. Upon successful completion of the dissertation defense, the program recommends the awarding of the Ph.D. degree.

One of the strengths of the College of Architecture and Planning Ph.D. program is that students can take advantage of resources in all departments and fields in the College and elsewhere in the university. In addition to faculty from within the College of Architecture and Planning, we have a broad and exciting group of affiliated faculty from many departments across the university.

The Ph.D. degree in Geography, Planning, and Design is appropriate for those seeking careers in research and teaching or roles in government or professional consultation, all of which require a research specialization. So far, over 60 graduates of the program have gone on to faculty positions at universities in the United States and elsewhere, post-doctoral work, and into private consulting, non-profit organizations, and the federal government.

# Admission Requirements

## Prerequisites

Applicants admitted to the PhD program normally will have completed the requirements for the Master of Architecture, Master of Planning, Master of Landscape Architecture, or a related master's degree program. Students from allied fields are encouraged to apply. Field specialization and background are open.

## GPA and TOEFL Scores

Consistent with the University requirements, applications are evaluated based on Grade Point Average (GPA) scores, and the Test of English as a Foreign Language (TOEFL) scores (where applicable). All exams must have been taken within a year before applying to the program:

- Academic achievement as evidenced by an undergraduate grade point average of 3.0 (on a 4.0 scale) or better, and a graduate grade point average of 3.5 or better.
- Applicants whose native language is not English must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam, or have a graduate degree from a university in the U.S. or another English-speaking country. The minimum TOEFL score required for acceptance by the University of Colorado at Denver is 80 or higher on the TOEFL (sub-scores of 20 in Reading, Listening, and Speaking, and 24 in Writing) or 6.5 on the IELTS (sub-scores of 5.5 in each area). However, the Ph.D. program typically does not accept a student with a score lower than 85 on the TOEFL and 6.8 on the IELTS.

## Application Checklist

The following documents must be submitted before an application will be considered:

- Application Forms - Apply online!
- Application Fee
- Three Letters of Recommendation
- Examples of previous research and written works
- Official transcripts from all previously attended institutions of higher learning
- Statement of Personal and Professional Goals
- Scores of Test of English as a Foreign Language (TOEFL) for non-U.S. residents whose native language is other than English
- Financial Statement (for non-U.S. residents/citizens)

# Program Requirements

## Overview

Successful completion of the PhD program requires fulfilling course requirements, passing the comprehensive examinations, preparing and defending a dissertation proposal, and undertaking research, writing and defending a dissertation. This is a multi-year process that involves a close mentoring relationship with the student's advisor.

A student's program of study must include at least 12 semester hours of Ph.D. Program core classes and 24 semester hours of study within the area(s) of focus established with the Primary Advisor. The student may focus on one main field of interest or a major and minor field.

Students shall complete the minimum of 36 semester hours in their area(s) of focus and Ph.D. Program core requirements prior to advancement to candidacy. Credit transfers are not allowed. Credits earned from previous courses before the student is enrolled in the Ph.D. program cannot be used as credit toward the Ph.D. degree.

Students must maintain a 3.0 GPA in all their coursework. A grade of less than B in any Ph.D. Program requirement shall not be accepted as meeting those requirements. For Program Core courses, the student must retake the course. A Program Core course may be retaken only once. The student shall be terminated from the program if a grade less than B is received more than once in a Ph.D. Program Core Course.

In addition, students must also pass a comprehensive exam as well as write and defend a dissertation proposal and dissertation.

## Residency and Enrollment Requirements

The minimum enrollment requirement at CU Denver for doctoral students is six semesters of full-time scholarly work beyond the attainment of a bachelor's degree.

The doctoral program requires a minimum of two years of residency (not fewer than four semesters enrolled in a minimum of six semester hours each, excluding summer) devoted to coursework and other preparation for advancement to doctoral candidacy status. Ordinarily, research for the dissertation will also be completed while in residence. After that time, special arrangements can be made with the CAP Ph.D. Committee if substantial work needs to be performed elsewhere.

Students must complete the comprehensive examinations and dissertation proposal within four years from the beginning of their first semester in which they are enrolled as a Ph.D. student at the University of Colorado Denver. In addition, the University of Colorado Denver requires that all degree requirements be completed within eight years of matriculation.

## Active Status

To remain actively enrolled, students must register for six semester hours or more each academic semester (excluding summer) until they become a doctoral candidate. Once they become a doctoral candidate, students must register for at least one semester hour per semester. Students who are not so registered are automatically withdrawn from the University of Colorado Denver and must apply for readmission to the program. The readmission decision will depend on the student's academic record and progress toward the degree.

Doctoral students must register for a minimum of one hour of dissertation credit in the term of graduation. If all requirements for graduation, including submission of the final approved dissertation, have been completed prior to the last day of registration, and the student was registered for the preceding term, the student may apply for a waiver of the enrollment requirement.

## **Advising and Committees**

### **Overview**

Each student entering the program shall have a Primary Advisor. Students wishing to change their Primary Advisor should do so during their first year. All appointments of Primary Advisor must be approved by the Ph.D. Program Director. Students wishing to change their Primary Advisor after the first year must petition the Ph.D. Program Director for approval. The Dissertation Advisory Committee is comprised of a Primary Advisor and at least two additional members. Any of these three may serve as the Chair of the Dissertation Advisory Committee.

### **Primary Advisor**

The Primary Advisor guides the student through the completion of the course requirements, the preparation for the comprehensive examinations, the dissertation proposal, and the dissertation. The Primary Advisor must have a doctoral degree and be a tenured/tenure-track member of the College's Ph.D. Program or an invited affiliate faculty with a regular appointment to the Graduate School. The Primary Advisor may serve as the Chair of the Dissertation Committee but may not serve as the Chair of the Comprehensive Exam Committee.

### **Committee Chair**

The Committee Chair's primary responsibility is serving on the student's Advisory Committee and chairing the dissertation defense.

### **Dissertation Advisory Committee**

The Dissertation Advisory Committee provides guidance for the investigated dissertation topic, comprehensive examination, dissertation, and the final dissertation examination.

This Committee includes at least three faculty members: the Primary Advisor and at least two additional committee members. One of the committee members must be a full-time faculty member of the College, and the majority of the committee members must have a Ph.D. degree. All committee members must hold Graduate Faculty appointments. This Committee must be fully formed by the beginning of the student's third semester of study.

Membership of this Committee may change if the student's interests and needs change. Any changes should be developed in consultation with the student's advisor and must be approved by the Ph.D. Program Director. The Dissertation Advisory Committee must meet with the student at least once each year to assess progress.

## **Comprehensive Examination Committee**

This Committee consists of a minimum of three graduate faculty members, including the Primary Advisor. Although it is not a requirement, this Committee should mainly consist of the Dissertation Advisory Committee. At least one member of the Comprehensive Examination Committee must be a full-time faculty member of the College, and the majority of the committee members must have a Ph.D. degree. All committee members must hold Graduate Faculty appointments.

## **Final Dissertation Examination Committee**

The final Dissertation Examination Committee shall be formed according to the Policies and Procedures of the Graduate School. All committee members must hold Graduate Faculty appointments.

## **Special Circumstances**

If the Primary Advisor leaves the faculty of the College before the comprehensive exam and/or dissertation topic is approved, the Ph.D. Program Director will work with the student to identify a new Primary Advisor and Chair for the Committee.

If the Primary Advisor leaves the faculty of the College after the comprehensive exam and/or dissertation topic is approved, and both the Primary Advisor and the student wish to continue in the advising relationship, the original Primary Advisor can continue to be co-advisor with the appointment of a co-advisor from within the Program. The Primary Advisor may be appointed as adjunct faculty in the Graduate School and will continue to hold a regular graduate faculty appointment until the student graduates, in order to recognize his or her continuing role, with approval of the Ph.D. Program Director.

If a member of the Dissertation Committee other than the Primary Advisor is unable to continue in this role, for any reason, the Primary Advisor will work with the student to identify a new member for the Committee. Upon accepting to serve in this role, the new member of the

Committee must sign on the dissertation topic and dissertation proposal documents as they were previously approved.

## Curriculum

The minimum requirement is 36 semester hours of coursework, all of which must be at the Graduate level (5000 and above) and 30 hours of dissertation semester hours. All Ph.D. students are required to take 12 semester hours of core courses.

The curriculum is divided into three stages consisting of core courses, major and minor field courses, and the dissertation. The program requires a minimum of 66 semester hours of graduate work, 36 of which must be earned while in residence.

Each student's curriculum is tailored to his/her individual needs and is determined in close consultation with the dissertation advisor. Within their area of specialization, students will identify a major area of study and an outside field of study. All students are required to enroll in the Ph.D. Colloquium and Research Methods core courses during the first and second years of course work.

### **Core Courses (12 semester hours, minimum with B or better grade)**

- Ph.D. Colloquium 1 (1 semester hour)
- Ph.D. Colloquium 2 (1 semester hour)
- Ph.D. Colloquium 3 (1 semester hour)
- Ph.D. Colloquium 4 (1 semester hour)
- Literature Review survey with the committee chair (2 semester hours total)
- Two Research Methods courses (3 semester hours each)

### **Courses supporting the Area(s) of Interest (24 semester hours, minimum grade of B)**

Students work with their Dissertation Advisory Committee to designate their area(s) of interest. This designation is not intended to reflect the particular focus of their dissertation topic but rather the disciplinary context within which their dissertation topic resides. Students, in consultation with their advising team, may select one central area of study or a major and minor area of study. This designated course of study forms the basis for their comprehensive exam.

### **Dissertation Credits (variable): (30 semester hours, minimum of B or better grade)**

During the course of doctoral study, students may enroll for credits related to their preparation for comprehensive exams, the dissertation proposal and preparation, or advisor approved independent study as dissertation credits.

## Typical Course of Study

## **FIRST YEAR**

Students develop their degree plan, take six semester hours of the required Core Curriculum, complete additional courses in their specialty area, and any prerequisite courses.

## **SECOND YEAR**

Students take the remaining core courses, continue to take electives in their specialty areas, begin literature surveys and reviews, and prepare for their comprehensive exam.

## **THIRD YEAR**

Students complete their specialization papers, prepare a dissertation proposal, complete the literature review, and take the comprehensive exam.

## **FOURTH/FIFTH YEAR**

Fourth and fifth years are spent researching and writing the dissertation.

## **Ph.D. Degree Time Limit: Eight Year Completion Requirement**

The University of Colorado Denver requires that doctoral students, whether enrolled full time or part time, must complete all degree requirements within eight years of matriculation. Students who fail to complete the degree in this eight-year period are subject to termination from the Graduate School upon the recommendation of the program director and concurrence of the Dean. For a student to continue beyond the time limit, the program director must petition the Dean for an extension and include:

1. reasons why the program faculty believes the student should be allowed to continue in the program and
2. an anticipated timeline for completion of the degree.

Approved leaves of absence do not automatically extend the time limits for earning a degree, but they may be used as a reason to request an extension if needed.

For more information on the Ph.D. in Design and Planning, visit the College of Architecture and Planning website.

## **Health and Behavioral Sciences PhD**

► Graduate School Policies and Procedures apply to this program

## Requirements for Admission

A master's or equivalent graduate degree, or substantial research experience, is recommended for admission to the PhD program. Students applying without prerequisites may be admitted, but will be required to complete appropriate courses before being permitted to complete the core curriculum.

In addition to the general admission requirements of the Graduate School, the specific admission requirements for the PhD in health and behavioral sciences are as follows:

1. Knowledge from prior course work or vocational experience in *Epidemiology* (3 semester hours or the equivalent work experience). The applicant should have an understanding of the basic concepts and methods of epidemiology, including measures of risk, mortality, the distribution of disease, the role of bias and confounders, and study design.
2. Demonstrated academic excellence as evidenced by strong undergraduate and graduate GPAs. Admission to the program is highly competitive.

The applicability of a student's prior course work will be decided by the program executive committee after reviewing the student's transcript and additional materials. If the student does not have the requisite educational background or GPA, the student may be admitted on a conditional or provisional basis and additional course work required in accordance with Graduate School Policies and Procedures.

Prospective students should not be dissuaded from applying to the program if they do not meet all of the requirements for admission. In some cases, employment experience may be counted toward meeting a requirement. In other cases, students may be admitted conditionally upon their completion of a list of prerequisite courses that will be established at the time of admission. Students should be sure to address this issue in completing the graduate application by specifying the academic and vocational experience they possess that meets, in part or full, the admission requirements described above.

## MASTER'S LEVEL PREPARATION FOR THE DOCTORAL PROGRAM IN HEALTH AND BEHAVIORAL SCIENCES

The program does not currently offer master's-level training in HBSC.

## TO APPLY FOR ADMISSION

At the Denver campus, all graduate applications are now submitted electronically. To begin the application process, go to the online admissions website. If you have any difficulties, call the administrative assistant at 303-315-7157. The program admits students only for the fall semester, which typically begins in mid- to late August. The deadline for the receipt of all application materials is **January 1** for admission the following August.

Applicants should invest considerable thought and effort in preparing their application. For instance, in the essay, applicants should provide information on: (a) their research interests and plans for graduate study; (b) how they see their research interests fitting into our program; (c) academic or professional research experiences including publications, theses, and research in progress; (d) academic and professional experiences in their proposed or related fields, including non-course education, teaching or other relevant employment, or other scholarly activities.

Applicants should also submit a brief writing sample that showcases their current skills in writing and analytical thinking. It is more important that the writing sample reflect their best work than that the topic match their planned area of study in our PhD program. Examples could include a class paper, a selection from a thesis, a lead or sole authored paper, an op-ed style essay, a policy brief, or other sample.

Applicants should provide a current resume or CV to support their application.

In addition to the required recommendation form, letters of recommendation are required from at least three individuals in a position to judge the applicant's ability to complete the program. Recommenders may be employers, colleagues or professors; however, the applicant should be sure that the letters address the quality of, and aptitude for academic work as well as personal characteristics and qualities.

The program does not require GRE scores, but applicants may submit their scores if they believe it will strengthen their application.

## **Financial Aid**

There are five kinds of financial aid available: graduate student stipends/fellowships; tuition assistance; teaching assistantships; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office.

Newly admitted, out-of-state, and students demonstrating outstanding scholastic achievement receive priority when assigning departmental sources of funding. Students interested in research assistantships should contact the individual faculty member with whom they wish to work regarding potential assistantship positions.

All other aid should be requested through the CU Denver Financial Aid Office.

## **Program Requirements**

There are three dimensions to the required curriculum:

- a. A core curriculum that focuses on problem-oriented, interdisciplinary approaches to theory and method

- b. Elective course work intended to provide the student with a solid base from which to launch the dissertation research
- c. Dissertation research and writing

The curriculum is subject to change. What appears below is intended to give students a general idea of the extent, shape and content of the curriculum. Students should check with the program office for up-to-date information on specific course requirements and scheduling.

## **The Core Curriculum**

The core curriculum should be completed by students by the end of their second year of full-time study. It consists of the following series of courses which, together, constitute 26 semester hours:

### **I. Health and Behavioral Sciences Colloquium**

Each fall, the HBSC program will organize a series of presentations by scholars working in the health and behavioral sciences. The presentations provide students with the most current science and theory in the field. Required of all first- and second-year students, who must take at least two times.

- HBSC 7001 - Colloquium Series in the Health and Behavioral Sciences

**Total: 2 Hours**

### **II. Theoretical Perspectives in the Health and Behavioral Sciences**

This series is designed to give students a thorough background in how the principles of the social and behavioral sciences have been applied to health issues. Topics include: the interplay between structure and agency in creating and maintaining health; social epidemiology; critical theory and social determinants of health; issues affecting Western biomedicine and public health systems; diffusion of healthy behavioral change among populations; social construction of health and illness; health policy and bioethics; social networks; and stress.

- HBSC 7011 - Theoretical Perspectives
- HBSC 7071 - Social and Behavioral Determinants of Health and Disease

**Total: 6 Hours**

### **III. Human Ecology and Environmental Adaptation**

This course will emphasize the biological/physiological dimensions of human health and disease.

- HBSC 7031 - Human Ecology and Environmental Adaptation

**Total: 3 Hours**

#### **IV. Research Design and Methods in the Health and Behavioral Sciences**

Three HBSC core research design and methods courses, plus one additional advanced methods course of student's choosing. This series covers the philosophy of science and the structure of scientific inquiry, procedures for hypothesis-testing, quantitative and qualitative methodological strategies commonly employed in the field, epidemiology and program evaluation.

- HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I
- HBSC 7051 - Qualitative Research Design and Methods
- HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences
- HBSC 7161 - Quantitative Methods in Health&Behavioral Sciences II

**Total: 12 Hours**

#### **V. Applications of the Health and Behavioral Sciences**

This course offers students the opportunity to focus on individual research interests with guidance from faculty and input from peers.

- HBSC 7111 - Applications of the Health and Behavioral Sciences

**Total: 3 Hours**

**TOTAL CORE: 26 Hours**

#### **Elective Courses**

Elective course work together constitutes 6 semester hours, which can be drawn from the large number of offerings in the health and behavioral sciences at CU Denver. Students will be expected to fulfill the necessary prerequisites for taking these courses, and final authority as to whether a student may enroll in the course will rest with the department in which the course is offered.

**TOTAL ELECTIVES: 6 Hours**

#### **Doctoral Dissertation Research**

The doctoral dissertation research topic is chosen by the student. The student is expected to define a research question in health and behavioral science, identify the research strategy to be used for answering the question, conduct the research required and document the project in the form of a doctoral dissertation. The student will be guided in this process by a doctoral dissertation advisor and the additional members who comprise the student's doctoral dissertation committee (see below). A minimum of 30 semester hours of dissertation work is required. Students must register for a minimum of 5 dissertation credits each semester of their dissertation work. Students may not take more than a year's leave of absence or fail to enroll for semester hours more than three semesters before they are dropped from the program.

## **Advisors**

Upon admission to the program, each student will be assigned a first-year advisor. The student or the faculty will then choose the faculty advisor who will guide the student through the core and elective course work. This faculty advisor may or may not be the student's dissertation advisor. The student selects his or her dissertation advisor and a minimum of three additional committee members who oversee the student's comprehensive examination and dissertation research.

## **Formal Review**

A formal review of each student's progress will be undertaken at the end of each year of study. Students who are deemed not to be making satisfactory progress will be informed in writing as to the nature and final result of the review before the end of June.

## **The Dissertation Prospectus and the Comprehensive Examination**

Before a student advances to candidacy, they must complete a dissertation prospectus and defend it successfully in the context of an oral comprehensive examination. The dissertation prospectus is a complete description of the question or hypothesis that the student wishes to research for the dissertation project, the research design and study techniques and an assessment of the proposed project's contribution to the field. It will include a comprehensive review of the relevant literature. If the student chooses to undertake research in a particular ethnic or cultural community, they must also demonstrate sufficient understanding of that setting including adequate knowledge of the language. This prospectus must be approved by the student's advisor prior to scheduling the comprehensive examination.

The comprehensive examination will be an oral format based in part on, but not restricted to, the material presented in the dissertation prospectus. This exam *must* take place before the student's advancement to candidacy and will typically occur by the end of the third year of study. A committee comprising the advisor and a minimum of three faculty members will supervise the completion of the dissertation prospectus. This committee will conduct the oral

examination and will recommend to the faculty by a majority vote whether or not the student should be advanced to candidacy.

## **The Doctoral Dissertation and Final Exam**

After advancement to candidacy, the student in consultation with his or her advisor will appoint a dissertation committee comprising the chair and a minimum of three faculty members. The dissertation advisor and composition of the committee will be subject to approval by the faculty. The dissertation advisor will be responsible for overseeing the research and writing of the doctoral dissertation. The committee will review drafts of the dissertation and, when the dissertation is completed to its satisfaction, will conduct the final exam, which will be based on the doctoral dissertation and related materials. The final examination will be open to the public.

## **Dissertation Total: 30 Hours minimum**

# **Health Economics PhD**

► Graduate School Policies and Procedures apply to this program

**Program Director:** Brian Duncan, Ph.D., Department of Economics

**Program co-Director:** Richard Lindrooth, Ph.D., Health Systems, Management & Policy

**Graduate Advisor:** Daniel Rees, Ph.D., Department of Economics

The Ph.D. in Health Economics is designed to train scientists to engage in modern economic research related to questions pertinent to the health care sector and to personal and public health. Students take courses both from the Economics Department, which is housed in the College of Liberal Arts and Sciences, and from the Health Systems, Management & Policy (HSMP) Department, which is housed in the Colorado School of Public Health. The ECON coursework grounds students in rigorous economic theory and modern statistical methods, whereas the HSMP coursework connects students to institutional details of the health care sector, administrative data methods, grant writing, and the development of interdisciplinary health care research.

## **Admission Requirements**

- Meet all general admission requirements of the Graduate School (including a 3.0 undergraduate grade-point average).
- Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an additional academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).

- Submit official transcripts from all colleges attended.
- Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and econometrics (upper division courses).
- Have completed courses in calculus and statistics (preferably a year of calculus. A course in linear algebra and/or differential equations is recommended).
- Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. GRE scores are used in conjunction with other indicators of academic success at the PhD level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.
- International students must submit TOEFL, IELTS, or PTE Academic scores. The institution code for CU Denver is 4875. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), 6.5 (IELTS), or 51 (PTE). Minimum subscores also apply. More information about TOEFL, IELTS, or PTE waiver requirements can be found on the International Admission's website. Please contact the International Admissions office if you have questions about this requirement.

### **Application Deadlines: June 1**

Students are encouraged to apply by February 1 for full consideration of financial aid. The final application deadline is June 1.

## **Degree Requirements**

1. Students must complete a minimum of 46 didactic credit hours of coursework of which 37 hours are core requirements, and a minimum of 30 dissertation credit hours. Each student's plan will be worked out in conjunction with the graduate advisor. Students are expected to meet all course prerequisites.
2. Students must complete a minimum of 30 graduate (5000 and above) level credit hours.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail. No course may be taken more than twice and only one attempt will retain the credit.
4. Students must complete all credits for the degree with CU Denver/ CU Anschutz faculty.

## **Core Courses**

- ECON 5073 - Microeconomic Theory
- ECON 5803 - Mathematical Economics
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 7073 - Advanced Microeconomic Theory II
- ECON 7661 - Health Economics I
- ECON 7662 - Health Economics II
- HSMP 6602 - Health Equity (3 credits)
- HSMP 6605 - Health Policy (3 credits)
- HSMP 6609 - Cost-Benefit and Effectiveness in Health (2 credits)
- HSMP 7010 - Foundations in Health Service Research I and II (2 credits)
- HSMP 7601 - Research Design & Proposal Preparation (3 credits)
- HSMP 7609 Health Services Research Methods II (3 credits)

**Total: 37 Credits**

## Electives

Any course numbered 6000 or higher with an ECON or HSMP subject code. Courses numbered 6611 or higher with a BIOS subject code may be taken with the graduate advisor's approval.

**Total: 9 Credits**

## Preliminary Exam, Dissertation Proposal, and Dissertation

Students must successfully pass a preliminary examination covering topics in microeconomic theory, econometrics, and health economics by the start of their fourth semester coursework to ensure that they are qualified for doctoral study.

Ph.D. students must defend their dissertation proposal after completing or registering for all non-dissertation coursework and concurrent with applying for admission to candidacy. Students are advanced to candidacy for the Ph.D. once they have completed all required coursework and examinations, and have successfully presented their dissertation proposal to their dissertation committee.

After students are advanced to candidacy, they must complete a total of 30 hours of dissertation credits to complete the PhD. Each fall and spring semester, students are expected to register for a minimum of 5 semester hours of dissertation research; if unable to register for at least 5 semester hours, students must request a leave of absence from the PhD program until able to complete the minimum dissertation requirement. Students may take up to two semesters' leave of absence before they are unenrolled from the program. Students then would need to reapply to the program.

Each student must write and defend a dissertation containing original contributions and evidence of significant scholarship that the student's primary advisor and dissertation committee deem satisfactory.

**Total: 30+ doctoral dissertation credits**

# Integrative and Systems Biology, PhD

► Graduate School Rules apply to this program.

**Director for PhD Program:** Alan Vajda

**Office:** Science, 4104

**Telephone:** 303-315-7640

**E-mail:** Alan.Vajda@ucdenver.edu

**Website:** <https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs>

## Requirements for Admission

- A BA/BS or MS from an accredited institution awarded within the last 10 years (validation of current content may be required). Minimum undergraduate GPA: 3.0
- TOEFL: required for international applicants from countries in which English is not the official language
- 3 letters of recommendation
- Official transcripts from all attended institutions
- Students are required to contact faculty in advance. Prior to application, applicants must have identified and contacted an available Faculty Advisor to ensure availability of a position and appropriate research interests

### Prerequisite courses required:

- One year of General Biology is preferred. Where needed, supplementary courses or reading programs may be designed to provide background information of sufficient depth for the Program curriculum
- One course in applied or biological statistics (through regression and ANOVA)
- Additional prerequisite requirements may be set by individual faculty

Applications will be considered annually starting December 1 for both domestic US students and international students. Application to the PhD program is through CU Denver Admissions.

## Degree Requirements

The PhD degree requirements comprise six phases. First, students must complete a minimum of 60 credits, including 30 dissertation credits. Up to 30 hours of graduate level courses from other

programs may be transferred and counted toward the degree. Students must also pass the Preliminary Exam, form an Advisory Committee and an Examination Committee, meet the academic residency requirement, pass the comprehensive exam, and write and orally defend a dissertation.

### Research-based PhD degree program **requires**

1. Completing 60 credits including 30 of dissertation (BIOL 8990)
2. Meeting minimum academic residency requirements
3. Passing the Preliminary Exam
4. Forming Advisory and Examination committees
5. Writing and defending research proposal
6. Passing the Comprehensive Exam
7. Writing and defending dissertation (including >1 publishable paper)

## **Required Courses**

- BIOL 6764 - Biological Data Analysis (4 credits taken in the first year)
- BIOL 6705 - Biological Research Workshop (4 credits total, taken two different times in the student's career)
- BIOL 6655 - Seminar (2 credits total, taken two different times in the student's career)
- BIOL 7010 - Integrative and Systems Biology (3 credits taken in the first year)
- BIOL 7050 - Special Topics (a minimum of 3 credits must be completed, but students may take up to 9 credits)
- BIOL 8990 - Doctoral Dissertation (30 credits must be completed after passing the Comprehensive Exam)
- BIOL 6002 - Biology Skills Sets - Pedagogy (2 credits taken in the first year; only required for students supported by a Graduate Teaching Assistantship)

# **Leadership for Educational Equity EdD**

► Graduate School Rules apply to this program

**Office:** Lawrence Street Center, 701

**Telephone:** 303-315-6300

**Fax:** 303-315-6311

**E-mail:** [education@ucdenver.edu](mailto:education@ucdenver.edu)

**Website:** <https://education.ucdenver.edu/academics/doctoral>

## **Program Overview**

Students completing this program earn a Doctorate of Education (EdD) in the area of Leadership for Educational Equity.

The EdD program is a practice-based, doctoral-level program for professional leadership in PK-20 and community-based educational contexts. The EdD prepares leaders to address complex educational challenges, effectively translate research into practice, influence policy, use data in decision-making, and organize individuals and groups to address challenges collaboratively and successfully. The EdD program's equity focus equips educational leaders to recognize, identify, and eliminate those systems that create disparities; and improve policy, structures and practices to ensure opportunities and participation for all individuals.

The EdD program uses a cohort model. Students in the EdD program select a concentration area and work with faculty mentors with expertise in the research and traditions of practice in the concentration area.

Students follow their cohort taking the prescribed coursework and research activities in a three-year plan of study. All students complete courses that are in-person, online, and hybrid with required attendance and activities. A five-year plan of study option is available for select students who obtain permission from the EdD program manager and concentration faculty.

### **Course Work - 54 Semester Credits**

- 18 hours in EdD Core Courses (six 3-credit courses).
- Nine hours research core (three 3-credit courses).
- 12 hours in Concentration Areas (four 3-credit hour courses).
- 15 hours in completion of a culminating Doctoral Research Project. These 15 hours include five 1-credit doctoral seminars and a minimum of ten credit hours during which candidates conduct and complete their doctoral research study.

## **Concentration Areas**

*Executive Leadership* concentration is designed for professionals in leadership positions in educational, community, and non-profit organizations who wish to acquire learning and experiences related to personnel management, finance, accountability systems, evaluation, community relations, policy development, analysis, and research. This concentration supports learning activities for individuals who hold or seek to move into senior leadership positions within school districts, community colleges, education policy organizations, and community-based education organizations. Within this concentration are two options for professional licensure: (1) Administrative Leadership Program with option for Administrative Licensure from the Colorado Department of Education (CDE) or (2) Principal Licensure Program with option for Principal Licensure from CDE.

**Early Childhood Special Education/Early Childhood Education** concentration is designed for educational professionals interested in issues and practices in early childhood special education and early childhood education to improve outcomes for children with

disabilities across early childhood settings. The concentration supports administrators in districts, agencies, and programs to effectively improve outcomes of all children, including children with disabilities.

**Latin@ Schools and Communities** concentration focuses on leadership, organizational change and measurement, research and evidence-informed decision-making, and creating equity and excellence in schools, organizations, and communities. Students study restructuring for linguistic diversity, language education policy and politics, and research on issues affecting Latino/a students and their communities. Together with their faculty mentors, students review current research and apply their leadership skills to create real world solutions for change.

**Mathematics Education** concentration provides learning opportunities for education professionals focused on teacher learning and professional development experiences. Faculty and students investigate how interventions used in professional development for mathematics teachers impacts their content knowledge and pedagogical practices in their classrooms. The coursework is framed by a situated perspective of learning and incorporates mixed methods to address research questions about interventions that support teacher and student learning.

**Professional Learning and Technology (PLT)** concentration supports education professionals in PK-12, higher education, and organizational settings who design and implement professional development and learning activities. Applying principles of adult learning, instructional design, and change leadership, the faculty and students in PLT use a variety of methods to support professional growth and accountability (e.g., mentoring, coaching, site-based communities, e-learning resources, and workshops). The PLT concentration courses prepare students in leadership roles in professional learning programs at all levels to apply research and best practices.

**Science Education** concentration prepares educators to explore, understand, and think critically about the nature of science and science education from a research-oriented perspective. Students may elect to focus on environmental science education as an area of specialization within this concentration through electives and discipline-specific research agendas.

**Urban and Diverse Communities** concentration is designed for practitioners in PK-12, higher education, and community-based settings. Students develop a complex view of urban and diverse educational systems, opportunities, and challenges that are influenced by policies and practices in housing, healthcare, employment, urban development, and similar fields. Students develop the skills and dispositions to work alongside communities, while developing an understanding of the historical and cultural realities facing those communities.

## **EdD Program with Higher Education Concentration**

Students completing this program earn a Doctorate of Education (EdD) in the area of Leadership for Educational Equity in the Higher Education Concentration Area. Within this concentration, all students complete 8-week online courses with required activities and off-

campus, in-person one-week intensives with required attendance/activities. This is a three year program (there is not a five year option for the Higher Education Concentration).

Students in the EdD program in the Higher Education concentration work with faculty mentors with expertise in the research and traditions of practice in a variety of post-secondary and higher education settings. The Higher Education concentration also provides a unique executive coaching support service (for a maximum of 12 months post-graduation) that students may choose to receive after completion of the EdD program.

Topics of study in the Higher Education concentration include leadership skills to improve access, equity, and success for college and university students; power and privilege; law and ethics; organizational cultures; finance and strategic resource allocations; and predictive analytics.

### **Course Work - 54 Semester Credits**

The EdD in Higher Education concentration 54 credits include the following course work and research activities:

- Nine credit hours in EdD in Higher Education Core Courses (three 3-credit courses).
- Nine credit hours Research Methods Courses (three 3-credit courses).
- Twenty-one credit hours in Higher Education Concentration Area (seven 3-credit courses).
- Fifteen credit hours in completion of a culminating Doctoral Research Project. These 15 hours include five 1-credit doctoral seminars and a minimum of ten credit hours during which candidates conduct and complete their doctoral research study.

# **Psychology, Clinical Health Psychology PhD**

► Graduate School Policies and Procedures apply to this program

## **Objectives of the Program**

Clinical health psychology focuses on the interaction between psychological, physiological, and environmental factors as they influence health and well-being. This emphasis includes focus on: 1) the development of effective disease prevention behavioral interventions for individuals and populations at high risk for medical problems; and 2) the development of strategies to help individuals who are already ill to manage their disease and to increase their ability to collaborate with medical professionals and improve their coping skills. A clinical health psychologist combines expertise in research on health psychology with training in clinical psychology. Students in this program are trained to work within the community to use clinical

psychological skills and techniques to diagnose and treat mental health conditions, promote health and prevent illness, apply behavioral interventions in the treatment of illness, and improve the health care system. In addition to course work, students acquire expertise in research by completing both a master's thesis and doctoral dissertation. They demonstrate competence in clinical assessment and intervention through several applied practicum experiences, successful passage of the Comprehensive Clinical Competency Examination and successfully completing a pre-doctoral psychology internship. Students can complete the program in five years and have up to eight years to complete the program according to Graduate School Policies and Procedures.

## **Admissions**

The application deadline for receipt of all student information is November 15 for the following fall. You are responsible for making sure all materials are in on time. International students should be sure to submit all materials at least two weeks before this deadline (by November 1) so that they arrive at our department on time.

### **Admission Requirements:**

- BA or BS from an accredited college or university, with a minimum GPA of 3.5 based on all college course work.
- Undergraduate courses in: introductory psychology, psychological statistics, research methods and abnormal psychology. Additional courses in psychology are highly desirable; our admissions committee will also look favorably upon courses in the biological and physical sciences.
- Two official transcripts from each college and university attended.
- Graduate Record Exam (GRE): The GRE General Test (verbal, quantitative, analytical writing) is required. Most students in the program had a combined verbal and quantitative score of at least 1100 on the old GRE scoring system. The GRE should be taken at least six weeks before the November 15 deadline so that the scores arrive on time.
- Three letters of recommendation, at least two of which must be academic references. Applicants provide contact information for their references in the online application. Those individuals are automatically contacted electronically and asked to upload their recommendations directly to your application file.
- The online Graduate Application, including your resume/vita and personal statement.
- Application fee of \$50 (\$75 for international students).

## **Financial Information**

The University of Colorado Denver administers various forms of financial aid for graduate students: fellowships, scholarships and a number of awards from outside agencies. See the Office of Financial Aid for further information. Additionally, the psychology department offers teaching assistantships each year in such courses as introductory psychology, statistics, research methods and human development. Although we do not guarantee TA positions, we have been able to offer positions to our interested students.

Contingent upon the availability of grant money, faculty may also offer part-time research assistantships to qualified students. The typical RA position involves data collection and analysis, library research, etc. Some computer and statistical skills are usually required. RA positions are less available than TA positions, and they may arise on very short notice.

In-state tuition waivers and additional stipend monies may be available for doctoral students. We do guarantee to pay a full stipend, usually in the form of an assistantship, plus tuition for the first year. We will make every effort to do so for four years.

*Note:* Neither teaching nor research assistantships confer in-state tuition status.

## **Degree Requirements**

### **Course Work:**

The program requires approximately eight semesters of full-time course work and clinical practica, followed by a year-long internship. Students must maintain a 3.0 grade point average, and no grade below a *B* will count toward the requirements. Students must successfully complete their doctoral dissertation proposal prior to applying for their internship in the 5th year and are strongly encouraged to defend their dissertation prior to beginning their internship. Students can complete the program in five years and have up to eight years to complete the program, according to Graduate School Policies and Procedures.

### **Master's Thesis:**

The program has a provision for achieving a master's degree *en route* to obtaining the PhD. In addition to taking PSYC 8200, Teaching Skills Seminar, a master's degree is required for students to independently teach a course. During their time in the program, students' funding will likely require them to independently teach a course. Students must complete a master's thesis, an empirical research project that makes a significant contribution to the field. Although the thesis must address the student's own original question, the use of archival data and pilot studies is encouraged for this project.

### **Clinical Practica:**

A minimum of 500 face-to-face intervention and assessment hours and 1200 total practicum hours [face-to-face intervention and assessment hours, plus supervision, plus support hours as defined by the Association of Psychology Postdoctoral and Internship Centers (APPIC)] are expected in preparation for application to pre-doctoral internships. Approximately 50% of required practica are typically conducted in medical settings. Sites for practica training, include the department's own Psychology Clinic and external facilities such as outpatient diabetes clinics, cancer clinics, OB/GYN, HIV/AIDS, end-stage renal disease, pain, and cardiovascular

clinics, and in-patient psychiatric facilities. Students are able to select practica based on their personal and professional interests. All field placements are approved in advance by the Coordinator of Clinical Training.

### **Demonstration of Clinical Competency:**

During the first semester of their third year in the program students must demonstrate their clinical competency by completing the Comprehensive Clinical Competency Examination (CCCE). The CCCE is designed to facilitate student demonstration of clinical competence at the developmental level of readiness for application to clinical internship. This evaluation is designed to assess the developmentally appropriate broad and general clinical competencies in clinical psychology, and does not necessarily evaluate clinical health psychology competencies *per se*. The CCCE comprises three sequential components conducted in phases:

1. Applied clinical diagnosis and assessment planning for a standardized patient.
2. Case conceptualization and treatment planning for a standardized patient. .
3. Intervention therapy session with a standardized patient and oral defense with a faculty committee.

### **Dissertation:**

Students must complete a dissertation that involves original empirical work and is distinct from other research projects and publications. The dissertation proposal must be completed and defended prior to making application for the pre-doctoral internship. Students must have a dissertation committee composed of four members of the graduate faculty. When the dissertation is completed to the satisfaction of the primary advisor, the student must orally defend the dissertation to the committee.

### **Internship:**

Students must complete a 12-month, full-time pre-doctoral clinical internship, preferably at an APA-accredited site. This internship is required of all clinical psychologists and is the capstone of clinical training in the doctoral program.

## **Courses**

- PSYC 6950 - Master's Thesis
- PSYC 7144 - Advanced Cognition and Emotion
- PSYC 7205 - Advanced Developmental Psychology
- PSYC 7220 - Advanced Biological Bases of Behavior
- PSYC 7262 - Health Psychology I
- PSYC 7350 - Psychotherapy I
- PSYC 7360 - Psychotherapy II
- PSYC 7410 - Assessment I: Personality
- PSYC 7420 - Assessment I: Intellectual and Cognitive Assessment
- PSYC 7485 - Diversity in Clinical Psychology
- PSYC 7490 - Topics in Health Psychology Summer Lecture Series

- PSYC 7500 - Advanced Psychopathology
- PSYC 7511 - Historical and Philosophical Foundations of Psychology
- PSYC 7700 - Clinical Research Methods
- PSYC 7710 - Multivariate Statistics
- PSYC 7713 - Advanced Statistics
- PSYC 7730 - Ethics and Professional Issues in Psychology
- PSYC 7910 - Clinical Practicum  
Class Notes: Students should enroll in 1 credit hour during year one (spring and summer semesters only), 1 credit hour during year two (fall, spring, and summer semesters), and 3 credit hours during year three (fall, spring, and summer semesters). A total of 14 credit hours of PSYC 7910 are required.
- PSYC 7911 - Clinical Practicum II  
Class Notes: Students should enroll in 2 credit hours during year two (fall, spring, and summer semesters). A total of 6 credit hours of PSYC 7911 are required.
- PSYC 8100 - Clinical Behavioral Medicine
- PSYC 8200 - Teaching Skills Workshop
- PSYC 8262 - Health Psychology II
- PSYC 8501 - Primary Care Psychology
- PSYC 8502 - Cardiovascular Health Psychology
- PSYC 8503 - Group Interventions in Health Psychology
- PSYC 8550 - Advanced Social Psychology
- PSYC 8910 - Advanced Clinical Practicum  
Class Notes: Students should enroll in 3 credit hours during year four (fall and spring semesters only). A total of 6 credit hours of PSYC 8910 are required.
- PSYC 8938 - Pre-Doctoral Internship
- PSYC 8990 - Doctoral Dissertation

## Public Affairs, PhD

### Introduction

► Graduate School Rules apply to this program

**Program Director:** Chris Weible, PhD

The PhD in Public Affairs addresses the demand for scholarship in public administration, public policy, public management and criminal justice/criminology. The program develops the conceptual, research, and analytic skills and knowledge of its students so that they will be able to advance the study and practice of public affairs in their subsequent careers. The PhD prepares its graduates for positions in academia and consulting firms, public management and administration, public policy analysis, politics and advocacy, and nonprofits.

The program is primarily designed to serve (1) people who desire to further the field of public policy and public and nonprofit management through teaching and research; (2) scholar-practitioners working in government, private-sector organizations concerned with government and nonprofit organizations; and (3) policy analysts in government, private-sector organizations concerned with government and nonprofit organizations.

The PhD program requires an intense commitment. Most core courses are offered during the late afternoon or early evenings. Students may complete the degree full- time or part- time. On average, students take 4 to 6 years to complete all of the requirements for the PhD. Applicants are encouraged to contact the program director at [chris.weible@ucdenver.edu](mailto:chris.weible@ucdenver.edu) with any questions about the program.

## Program Requirements

- Students must complete a total of 30 credit hours of coursework and 30 credit hours of dissertation work.
- Students may transfer 3 elective credits from a prior graduate degree.

Students must complete the following courses during their first year of study:

- PUAD 8010 - Historical and Comparative Foundations of Public Administration
- PUAD 8020 - Seminar in Public Management
- PUAD 8030 - Seminar in Public Policy
- PUAD 8040 - Seminar In Economic and Institutional Foundations of Public Affairs
- PUAD 8050 - Quantitative Methods I (3 Credits)
- PUAD 8060 - Seminar On The Conduct Of Empirical Inquiry
- PUAD 8070 - Quantitative Methods II (3 Credits)
- An approved qualitative methods course (3 credits)
- Approved graduate-level electives (6 credits)

Upon completion of the coursework and the preliminary exam, students complete 30 hours of dissertation credit.

- PUAD 8990 - Doctoral Dissertation

Comprehensive Exam, Dissertation Proposal, and Dissertation: PhD students must take and pass the comprehensive exam immediately following the completion of their core courses and soon after defend a dissertation proposal. Students then advance to candidacy for the PhD. Upon completing their research, students must defend their dissertation.

## School Psychology PsyD

## **Requirements for the Doctor of Psychology Degree in School Psychology and Licensure**

Students will complete course work in affective, biological, cognitive, and developmental aspects of behavior; legal and professional issues; psychological assessment; crisis intervention; counseling and other direct interventions; and consultation. Specific course requirements include two prerequisite courses, 75 credit hours of coursework, 7 credit hours of practica (minimum of 500 hours in the field), 6 credit hours of clinical externship (minimum of 500 clock hours in the field), 8 credit hours of internship (minimum of 1500 clock hours in the field), and 4 capstone project credit hours. Successful completion of the School Psychology Praxis exam during the course of study and passing of comprehensive examinations are also required. Prerequisites include an undergraduate or graduate course in both of the following: measurement concepts and child development. Students may be admitted to the program without first completing these prerequisites; however, these courses must be completed during the first year of study.

Students will complete the following core course work:

- RSEM 5100 - Basic Statistics
- SPSY 5010 - Introduction to Counseling in School Psychology
- LDFS 6320 - Mind, Brain, and Education
- SPSY 7500 - Biological and Neuropsychological Bases of Behavior
- PSYC 7511 - Historical and Philosophical Foundations of Psychology
- PSYC 8550 - Advanced Social Psychology
- RSEM 7080 - Methods of Qualitative Inquiry
- RSEM 7050 - Methods of Survey Research
- RSEM 7110 - Intermediate Statistics
- RSEM 7210 - Program Evaluation
- SPSY 5600 - Behavior Analysis and Intervention
- SPSY 5900 - School-Based Multicultural Interventions
- SPSY 6100 - School Psychology: Professional and Legal Foundations
- SPSY 6150 - Psychoeducational Assessment I
- SPSY 6160 - Psychoeducational Assessment II
- SPSY 6170 - Applied Developmental Science and Assessment
- SPSY 6350 - School-Based Interventions: Children, Youth and Families
- SPSY 6400 - School-Based Interventions: Groups, Classrooms and Systems
- SPSY 6410 - Psychoeducational Assessment of Culturally and Linguistically Diverse Students
- SPSY 6420 - Crisis Prevention, Planning and Intervention
- SPSY 6450 - School-Based Consultation for Mental Health Professionals
- SPSY 6500 - Affective Bases of Behavior and Psychopathology
- SPSY 6550 - Academic Interventions in School Psychology

- SPSY 6700 - Advanced Seminar in School Psychology
- SPSY 7980 - Clinical Supervision & Admin of Psych Services

### **Supervised Experiences**

- SPSY 6911 - School Psychology Practicum
- SPSY 6917 - Advanced Practicum in Psychological Assessment
- SPSY 6918 - Clinical Externship
- SPSY 6930 - School Psychology Internship

### **Total: 100 Hours**

The doctor of psychology in school psychology degree also requires satisfactory completion of two comprehensive case studies a passing score ( $\geq 147$ ) on the ETS PRAXIS specialty exam in school psychology, a passing score on a written comprehensive examination, and completion of a Capstone/applied research project.

### **Professional Expectations**

All students in the SPSY program are expected to show a strong commitment to the program and to maintain a high academic, professional, ethical standards and sensitivity to diversity. Inappropriate or unprofessional conduct is cause for discipline or dismissal from the program.

### **Licensure**

# **Administrator License - Executive Leadership Program**

Designed for the professional educator who, already holding a master's degree and preferably 5 years leadership experience in education, wishes to apply for an initial administrator license through the Colorado Department of Education and prepare for a career as a superintendent or other district level leader. In addition to coursework, the Colorado Department of Education also requires an exam. Information about Colorado Department of Education exam requirements can be found here:

<https://www.cde.state.co.us/cdeprof/endorsementrequirements>

The 12-semester-hour administrator licensure program combines weekend meetings with online work and hands-on clinical practice-usually completed in participants' home districts.

EDUC 7500 - Strategic Human Capital Development

EDUC 7510 - Strategic Organizational Management

EDUC 7520 - Strategic System Improvement

EDUC 7530 - Strategic Leadership Development

# Early Childhood Special Education Specialist Licensure

## Early Childhood Special Education Program

The early childhood special education (ECSE) program leads to a Colorado teacher license in ECSE specialist. If you hold a current CO teaching license, information on adding an endorsement is available [here](#). The program prepares leaders who will enrich the life experience of young children (ages birth to 8 years) with special needs and their families through a variety of professional roles.

The ECE program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. Our program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. The ECSE program is interdisciplinary in focus, drawing on university resources and the clinical expertise of various community professionals. There is a strong emphasis on fieldwork and practicum experiences in both regular and special education concentrations. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Practicum experiences are designed to allow students to apply knowledge and practice skills in a closely supervised environment.

## Curriculum and Program Requirements

### Semester Hour Requirements

ECSE specialist license: 36 semester hours

Master's degree plus ECSE specialist license: 42 semester hours

The early childhood special education program provides specialized training in:

- language and literacy development,
- child growth and development,
- teaching and learning approaches with young children,
- learning, development and education grounded in culture, context and identity of young children,
- research methods for education,
- early childhood curriculum and program development for culturally and linguistically diverse inclusive classrooms,
- collaborative program development and supports for children with families and communities,

- leadership of programs and early childhood professional for practice, advocacy, and social change,
- screening and assessment of young children,
- individualized and systematic supports for children diagnosed with disabilities,
- social emotional competence and classroom supports for challenging behaviors,
- working as a participatory member of a transdisciplinary team,
- high and low incidence disabilities,
- education supports for children diagnosed with disabilities or chronic illness.

For more information on coursework and plans of study, please contact an advisor in the School of Education and Human Development.

## **Fieldwork and Practicum Requirements**

For the ECSE specialist initial license, a total of 650 hours of fieldwork/practica is required. Approximately 200 hours of fieldwork are associated with course assignments; 450 hours of intense, culminating practica occur toward the end of the second year of study.

### **Program Requirements and Courses**

To complete the Early Childhood Education program and earn a master's degree and/or license, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

### **Planning**

For practicing full-time teachers, we recommend taking two courses each fall and spring semester, and up to two courses each summer. If you prefer a less intensive course load, we recommend one course each fall and spring semester. Please review with your faculty advisor your preferred plan.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

## **Principal Licensure**

LEO offers coursework that leads to eligibility to apply for the initial license for K-12 principal through the Colorado Department of Education. In addition to coursework, the Colorado Department of Education also requires an exam. Information about Colorado Department of Education exam requirements can be found here <https://www.cde.state.co.us/cdeprof/endorsementrequirements>.

Admission to the LEO principal licensure program is competitive. All principal licensure applicants must hold at least a bachelor's degree and a teaching or special services license; we also recommend principal licensure applicants have a minimum of three years of post-licensure teaching or special services experience. LEO's principal licensure program is project-based, requiring students to present evidence of meeting both state and national standards through performance based assessments. A 400-hour clinical-practice experience is integrated throughout the four-semester program.

Students submit performance-based assessments (PBAs) during the principal licensure program to an online assessment system. For successful principal licensure completion, PBAs not approved by the end of the fourth semester must be completed within the two subsequent semesters (not including summer.)

**Note:** Those already holding a master's degree and 5 years of leadership in education should also see the Administrator License - Executive Leadership Program for pursuing K-12 administrator (superintendent or district-level leadership) licensure.

### **Principal Licensure Cohort Options**

Typically, cohorts are comprised of approximately 25 principal candidates who move through the four-semester principal licensure program together. We welcome applicants from all districts into our principal licensure cohorts. However, we also partner with metro-area districts to prepare leaders specifically for their schools.

### **Principal Licensure Course Requirements:**

EDUC 5751 - Principal/Administrator Licensing I. Semester Hours: 3 to 9

EDUC 5752 - Principal Administrator Licensing II. Semester Hours: 3 to 9

EDUC 5753 - Principal/Administrator Licensing III. Semester Hours: 3 to 9

EDUC 5754 - Principal or Administrator Licensing IV. Semester Hours: 3 to 9

Total: 32 semester hours for Principal Licensure.

## **Endorsement Programs**

# **Colorado Endorsement for Culturally and Linguistically Diverse Education**

# Culturally and Linguistically Diverse Bilingual Specialist Endorsement

The Bilingual Specialist Endorsement must be taken after or concurrent to the 24 credit hour CLDE K-12 Endorsement. Applicants to this endorsement should be bilingual and biliterate in Spanish and English; Bilingual Specialist Endorsement courses will be taught in Spanish.

Recommendations for endorsements are made by the CLDE program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (<http://www.cde.state.co.us>) or another state in which they wish to be endorsed for the most updated endorsement requirements.

## **Required Course** 3 credit hours

- CLDE 5824 - Theories and Methods of Bilingual Education

## **Select one:** 3 credit hours

- SPAN 5060 - Dialects of the Spanish-Speaking World
- SPAN 5020 - Spanish Sociolinguistics
- SPAN 5080 - Spanish in the United States
- SPAN 5076 - Spanish in Colorado

## **Select one:** 3 credit hours

- SPAN 5099 - Special Topics in Linguistics

## **Culminating Experience** 1 credit hour

- CLDE 5850 - Culminating Experience: Bilingual Specialist

## **Total Credit Hours 10**

## **Culminating Experience: Final Reflection**

### **Program Requirements and Courses**

To complete the Bilingual endorsement students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

### **Course Scheduling**

Because classes are scheduled through the Modern Languages Department (Spanish), students should work with their Faculty Advisor about course selection and scheduling.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Culturally and Linguistically Diverse Education Endorsement: K-12**

Recommendations for endorsements are made by the CLDE program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (<http://www.cde.state.co.us>) or another state in which they wish to be endorsed for the most updated endorsement requirements.

### **This course plan does NOT lead to MA degree.**

- CLDE 5010 - Foundations of Language & Culture in Education
- CLDE 5160 - History & Law of Bilingual & Immigrant Education
- CLDE 5070 - Linguistic Analysis of English
- CLDE 5030 - Language Development of Multilingual Learners: Advanced
- CLDE 5820 - Teaching Multilingual Learners, Advanced
- CLDE 5050 - Assessment & Advocacy for Multilingual Learners
- CLDE 5825 - Methods of Content Teaching for Bilingual Learners
- CLDE 6912 - Teacher Inquiry in Multilingual Classrooms

Culminating Experience: Final Reflection

### **Total Credit Hours 24**

### **Culminating Experience: Final Reflection**

The culminating experience project is required for the CLDE endorsement and permits you to document your development over the course of your program. Culminating Experience Projects are reviewed by CLDE faculty members. The process is reviewed in every class as each of the PBAs is completed in the classes, helping students to update their culminating experience projects throughout the program. For more culminating experience project guidelines, visit the website at <https://education.ucdenver.edu/academic-services/student-resources/graduate/culturally-linguistically-diverse-education>

### **Program Requirements and Courses**

To complete the CLDE program and earn an endorsement students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

### **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, eight-week sessions are offered, and courses may be in the morning, afternoon or evening, hybrid, or completely online.

### **Planning**

For practicing full-time teachers, we recommend taking one course each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

### **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Early Childhood Special Education Specialist Endorsement**

## **Early Childhood Special Education Program**

The early childhood special education (ECSE) program leads to an added endorsement in ECSE specialist. If you do not hold a current teaching license, information about ECSE licensure is available here. The program prepares leaders who will enrich the life experience of young children (ages birth to 8 years) with delays and disabilities and their families through a variety of professional roles.

The ECE program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. Our program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. The ECSE program is interdisciplinary in focus, drawing on university resources and the clinical expertise of various community professionals and partners. There is a strong emphasis on fieldwork and practicum experiences. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Practicum experiences are designed for students to apply knowledge and practice skills in a closely supervised environment.

# Curriculum and Program Requirements

## Semester Hour Requirements

Master's degree plus ECSE specialist added endorsement: 36 semester hours

ECSE specialist added endorsement: 24 semester hours

The early childhood special education program provides specialized preparation in:

- language and literacy development,
- child growth and development,
- teaching and learning approaches with young children,
- learning, development and education grounded in culture, context and identity of young children,
- research methods for education,
- early childhood curriculum and program development for culturally and linguistically diverse inclusive classrooms,
- collaborative program development and supports for children with families and communities,
- leadership of programs and early childhood professional for practice, advocacy, and social change,
- screening and assessment of young children,
- individualized and systematic supports for children diagnosed with disabilities,
- social emotional competence and classroom supports for challenging behaviors,
- working as a participatory member of a transdisciplinary team,
- high and low incidence disabilities,
- education supports for children diagnosed with disabilities or chronic illness.

For more information on coursework and plans of study, please contact an academic advisor in the School of Education and Human Development.

## Fieldwork and Practicum Requirements

Students seeking an added endorsement in ECSE specialist complete 450 hours of practicum experiences.

### Program Requirements and Courses

To complete the Early Childhood Education program and earn a master's degree and/or endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation.

## **Course Scheduling**

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

## **Planning**

For practicing full-time teachers, we recommend taking two courses each fall and spring semester, and up to two courses each summer. If you prefer a less intensive course load, we recommend one course each fall and spring semester. Please review with your faculty advisor your preferred plan.

## **Active Status**

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

# **Learning Design and Technology: Instructional Technology Specialist Endorsement**

Students already holding a current Colorado teacher license are able to pursue an added endorsement in Instructional Technology (IT). Added endorsements allow current teachers to add an additional area of specialization to their current teacher license in order to become qualified to teach in multiple areas. The IT added endorsement might be pursued alone or in combination with the Learning Design and Technology: Digital Media for Teaching and Learning (K-12) MA.

It is students' responsibility to ensure they are meeting the requirements for the endorsement. Students should refer to the Colorado Department of Education (CDE) website for the most current information. Approved Program Verification for added endorsements is completed by the School of Education & Human Development, but endorsements are granted by the Colorado Department of Education. Individual state requirements vary and may include teaching examinations in addition to a valid teaching license. Students should consult with the Colorado Department of Education and/or the state they will be living in for the most updated endorsement requirements.

The added endorsement in Instructional Technology-K-12 Specialist Level is for seasoned teachers with 3 or more years of licensed classroom experience who want to bring technology into their own classrooms, schools, and districts; move into teaching technology; or support

other teachers during professional development and in-service trainings. Teachers with 3 or more years of licensed experience are able to earn this added endorsement by completing the 24 semester hour IT endorsement program (or 30 semester hours for those completing the IT endorsement along with the LDT MA with concentration in K-12 Digital Media for Teaching & Learning).

**24 semester hours total for IT Specialist endorsement:**

- INTE 5340 - Learning with Digital Stories
- INTE 5250 - Teaching Strategies for Online and Blended Learning
- INTE 5665 - Learning with Social Media and Networking
- INTE 6750 - Trends and Issues in Learning Design and Technology
- INTE 5320 - Games and Learning
- INTE 6999 - Leadership for Technology Innovation
- INTE 6930 - Internship: Learning Technologies

**Plus select one course from the following:**

- INTE 5200 - Crafting eLearning Experience
- INTE 5680 - Producing Media for Learning
- INTE 5711 - Creative Designs for Instructional Materials

## Middle School Math Endorsement

CU Denver's online Middle School Math endorsement is designed for currently licensed teachers who are seeking career advancement and a deeper understanding of how to engage middle school students in math. Mathematical learning opportunities matter and not all students receive the same kinds of opportunities. This endorsement will give you the unique qualifications you need to support and challenge students with diverse abilities and backgrounds.

**Required Courses:**

- MTED 5621 - A World of (Different) Numbers: Quantity and Operation
- MTED 5622 - Expanding Conceptions of Algebra
- MTED 5623 - Geometrical Ways Of Reasoning
- MTED 5301 - Assessment and Equity in Mathematics Instruction
- RSEM 5100 - Basic Statistics
- MTED 5300 - Curriculum and Methods for Teaching Mathematics
- MTED 5070 - (Re)Humanizing the Teaching and Learning of Mathematics

**Select one:**

- MTED 5030 - Theories Of Mathematics Learning
- MTED 5040 - Mathematics Teaching - Theory and Practice

- MTED 5050 - Critique Of Mathematics Education Research
- MTED 5060 - Developmental Pathways In Students' Mathematical Thinking

Students may take one of these courses when they are offered in hybrid and/or online format.

**Total Credit Hours 24**

## Reading Teacher K-12 Endorsement

Recommendations for endorsements are made by the C&I Program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (<http://www.cde.state.co>) or another state in which they wish to be licensed for the most updated endorsement requirements. Please note that the Colorado Department of Education also requires 2 years of post-licensing teaching experience for the application for the reading teacher endorsement after completion.

### Required Courses

- LCRT 5810 - Oral & Written Language & Literacy
- LCRT 5020 - Reading Development, Instruction and Assessment
- LCRT 5055 - Literacy Assessment & Informed Instruction
- LCRT 5710 - Primary Literacy for Diverse Learners, Pre K-Grade 3 **or** LCRT 5730 - Language and Literacy Across the Curriculum
- LCRT 5720 - Writing Development, Instruction and Assessment
- LCRT 5795 - Current Children's Literature **or** LCRT 5201 - Adolescent Literature (LCRT 5780 , LCRT 5790 offered occasionally)
- LCRT 6910 - Seminar & Practicum in Literacy and Language
- LCRT 6915 - Seminar and Practicum in Literacy Professional Development

**Total Credit Hours 24**

## Special Education Generalist Endorsement Only

Added Special Education Endorsement to License

To be endorsed as a special education generalist for grades ages 5-21, a teacher must hold a bachelor's degree from a four-year accepted institution of higher education, be licensed at the elementary or secondary level, have completed the plan of study from one of the program options for the preparation of special education generalist, have passed the state special education assessment (i.e. Praxis), and have demonstrated all required state and national standards.

Recommendations for endorsements are made by the program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (<http://www.cde.state.co>) or another state in which they wish to be endorsed for the most updated endorsement requirements.

**This course plan does NOT lead to MA degree.**

### **Courses:**

Listed in recommended sequence

- SPED 5030 - Understanding (dis)Ability in Contemporary Classrooms **or** LDFS 5240 - Cognition and Instruction if SPED 5030 is already completed
- SPED 5300 - Family, Professional, and Community Collaboration
- SPED 5151 - Slashing Stigmas: Promoting Positive Behaviors
- SPED 5500 - Transition and Secondary Methods in Special Education
- SPED 5740 - Intersections of Literacy, Culture, & Exceptionality
- SPED 5780 - Literacy Intervention for Exceptional Learners
- SPED 5140 - Assessment: Inquiry, Instruction, & Intervention
- SPED 5010 - Intentional Interventions for Exceptional Learners
- Additional Courses as Necessary\*\*

### **Minimum 24 Credit Hours**

\*\* Based on a comprehensive record review (i.e. teaching experience & classroom placements), SPED 5933: Internship & Site Seminar (Approximately 192 Hours or 24 days) may be required at the discretion of SPED program faculty.

### **Active Status:**

Students must complete their programs within seven years, maintaining a GPA of 3.0 (B average). Please refer to the Student Handbook for information on Academic Probation. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

## **Teacher Librarian Endorsement**

The Teacher Librarian K-12 endorsement program within the LDT master's degree program is a revised and approved teacher librarian education program that leads to the Colorado Department of Education (CDE) endorsement for teacher librarians. The program integrates 21st Century Learning Standards as approved by the American Association of School Libraries with Common CDE content standards and leadership competencies. As a teacher librarian, you will provide collaborative instructional planning, facilitation of professional learning, utilization of information literacy and media literacy, online instructional resources, and teacher leadership through the management of your library program.

The courses in this program are fully online unless specified otherwise. Once admitted, students begin a plan of study that typically takes about 18 months to complete. Consult the program website for more information <https://education.ucdenver.edu/academics/certificates-licenses-and-endorsements>

Admission decisions are based on undergraduate and graduate grades, external letters of recommendation and fit with the program as reflected in a letter of intent. Prospective students should consult the program website for complete admission procedures and requirements.

## Program Requirements

Students have a choice between a teacher librarian endorsement-only and a full master's program with or without a teacher-librarian endorsement. The endorsement requires a minimum of 24 graduate semester hours. Students complete a plan of study consisting of courses and professional field experience. Students must be licensed as a teacher or plan to complete a teacher license prior to seeking the additional endorsement as a Teacher Librarian. This is a Colorado Department of Education requirement.

Courses are offered only in certain semesters and courses should be taken in a particular sequence based on when you start the program. Advising is required prior to enrolling in a course, even as a non-degree student, in order to ensure the most effective course sequencing and availability of courses.

### 24 Credit Endorsement Degree Plan of Study

<b>Courses</b>	<b>Term</b>	<b>Credits</b>
SCHL 5100 - School Libraries in the Digital Age	Fall	3
SCHL 5030 - Information Literacy	Fall	3
SCHL 5160 - Managing School Libraries	Spring	3
SCHL 5200 - Promoting Literature in Schools	Summer	3
SCHL 5913 - School Library Field Experience	Fall	3
INTE 5300 - Media Literacy	Summer	3
Choose two courses from INTE or from one of SEHD or LDT certificate programs with advisor approval.	Varies	3

### Graduate Certificate Programs

# Applied Econometrics and Data Analytics Graduate Certificate

## Introduction

The Graduate Certificate in Applied Econometrics & Data Analytics provides students with a strong graduate-level foundation in modern applied econometrics and quantitative analysis. The unique analytic skill set delivered in this certificate is sought out by energy companies, defense contractors, health care agencies, consulting firms, financial institutions and other companies in the Denver area that are looking for employees who know how to use real world data to answer research questions. Upon earning the certificate, students will be able to:

1. Explain the potential outcomes framework and how it informs empirical research.
2. Distinguish between causal and correlational relationships.
3. Set-up randomized experiments and understand factors that could contaminate them.
4. Identify natural experiments and how to apply them in research.
5. Understand the Difference-in-Difference estimator and its applications.
6. Apply matching techniques.
7. Use Panel data models, such as fixed effects estimators.
8. Understand the use of instrumental variables and how they are applied in research.
9. Apply the Regression Discontinuity estimator and apply it in economic research.

These certificate requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their certificate advisor and CLAS advisor to confirm the best plans of study before finalizing them.

## Program Delivery

This is an on-campus program.

## General Requirements

[Click here for information about Academic Policies.](#)

## Admission Requirements

- Degree: BA/BS
- A minimum GPA of 3.00 is recommended

## **Application Process**

Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:

- Graduate Certificate Application Form:
- Official Transcripts
- Resume
- Letter of interest

Upon approval of the student's admission by the Graduate Certificate Program, the program director will send the student's certificate admission file to the Graduate School. The Graduate School will confirm the applicant's credentials, will determine whether the student meets the general academic requirements of the Graduate School, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

## **Additional Requirements**

- Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking graduate student with a bachelor's degree.
- Students should have completed Introduction to Econometrics (ECON 4811), or equivalent coursework, or have professional experience in statistical analysis.
- International students must submit TOEFL scores or otherwise satisfy the University's English Language Proficiency requirement.

## **Certificate Requirements**

1. Students must complete a minimum of 12 ECON credit hours.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

## **Certificate Restrictions, Allowances and Recommendations**

1. Students have 7 years to complete this certificate.
2. Students should evaluate course descriptions to determine if the prerequisites or corequisites have been completed in order to move forward in the certificate.

3. No course may be taken more than twice.
4. Graduate level ECON credit counted towards the Graduate Certificate in Health Economics & Outcomes Research may be subsequently counted towards a CU Denver graduate degree in Economics. Certificate students are not guaranteed admission to the M.S. program in Health Economics. However, certificate students can apply to the M.S. program in economics at any time.
5. Students who complete the Graduate Certificate in Health Economics & Outcomes Research and later apply to the M.S. program in Health Economics at CU Denver may submit their certificate in place of GRE scores and letters of recommendation.
6. Students admitted to the M.A., M.S., or Ph.D. programs in economics at CU Denver may complete the graduate certificate concurrently with their degree program. However, courses that have already been counted towards any degree already awarded (undergraduate or graduate) may not be counted towards the certificate retroactively.

## Required Courses

Complete **all** the following ECON courses:

- ECON 5030 - Data Analysis with SAS
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ECON 6053 - Seminar In Applied Economics I
- ECON 6054 - Seminar In Applied Economics II (3 credits total across ECON 6053 and 6054)

**Total: 12 Credit Hours**

# Applied Statistics Graduate Certificate

► Graduate School Policies and Procedures apply to this program.

**Coordinator:** Joshua French Ph.D.

**Telephone:** 303-315-1709

**E-mail:** [Joshua.French@ucdenver.edu](mailto:Joshua.French@ucdenver.edu)

**Web site:** <https://clas.ucdenver.edu/mathematical-and-statistical-sciences/graduate-certificate-applied-statistics>

There is a growing need for qualified statistical analysts of the ever-increasing amounts of data collected in business, industry, and government. The Certificate in Applied Statistics program is designed to give

students a strong background in statistical methodology and data analysis in preparation for opportunities in the workforce or for graduate studies.

Students will gain competence in such topics as descriptive statistics, estimation, confidence intervals, probability and inferential techniques, simple and multiple regression, analysis of variance, and more advanced topics. Students can focus on a particular application area such as economics, psychology, sociology, geology, or environmental science through the choice of an elective course and the data analysis project.

## **Admissions Requirements**

The minimum admission requirements for students applying for the Graduate Certificate in Applied Statistics are:

- A bachelor's degree (not necessarily in mathematics or statistics) from an accredited college or university
- A grade point average (GPA) of 3.0 or above during their bachelor's degree.
- Students must have taken three semesters of calculus (through multivariate calculus), linear algebra, and a calculus-based statistics course that covers basic probability and statistical distributions.

Subject to approval by the Director of the Statistical Programs and the Graduate Committee, students with prerequisite deficiencies may be admitted with the understanding that those deficiencies must be removed after admission. Courses taken to fulfill admission deficiencies may not be counted toward the certificate.

## **Certificate Requirements**

Four courses and a 1 hour independent study are required as detailed below.

### **Two Fundamental Courses in Statistics**

- MATH 5320 - Introduction to Mathematical Statistics  
Offered: SPRING
- MATH 5387 - Applied Regression Analysis  
Offered: FALL, SPRING, SUMMER

### **One Advanced Applications Course**

Topics vary from year to year. Course must be pre-approved by certificate coordinator and cannot be MATH 5830. Representative courses include:

- MATH 5394 - Experimental Designs
- MATH 5792 - Probabilistic Modeling

- MATH 6101 - Uncertainty Quantification
- MATH 6376 - Statistical Computing
- MATH 6380 - Stochastic Processes
- MATH 6384 - Spatial and Functional Data Analysis
- MATH 6388 - Statistical and Machine Learning
- MATH 7384 - Mathematical Probability
- MATH 7386 - Monte Carlo Methods
- MATH 7393 - Bayesian Statistics
- MATH 7826 - Topics in Probability and Statistics

An additional course given prior approval by the student's advisor and the Director of Statistical Programs.

## One Elective

Any statistics course in the Department of Mathematical and Statistical Sciences at the 5000 level or higher (must be pre-approved by the Certificate Coordinator). MATH 5830 cannot apply towards the certificate.

- ECON 5150 - Economic Forecasting
- ECON 5813 - Econometrics I
- ECON 5823 - Econometrics II
- ENV5 5600 - Applied Statistics for the Natural Sciences
- SOCY 5183 - Seminar: Quantitative Data Analysis

## Project Requirement

An independent data analysis project with a report and presentation to demonstrate proficiency with data analysis techniques and a statistical computing software package. Enroll for one hour of MATH 5840, Independent Study, or in an equivalent course pre-approved by the Certificate Coordinator.

## Additional Requirements

Students must maintain a 3.0 GPA or above in these courses with no credit given for courses with grades below B-. Since a certificate is a University of Colorado Denver certification of a student's specialized knowledge in an advanced subject area, all courses in the certificate program must be taken in residency at University of Colorado Denver. Students must be enrolled in one course per year to maintain their status in the certificate program.

Certificates must be completed within 3 years from matriculation.

# **Bioinnovation and Entrepreneurship Certificate**

The Business Schools graduate certificates are primarily intended to give individuals with an undergraduate degree in any discipline access to business courses that can help them succeed in their current job or even help them launch their own company.

Students can pursue one of our graduate certificates, even if they are not CU Denver students, without taking the GMAT. Credit earned as a part of the certificate DOES count towards your graduate business degree, should you choose to pursue a degree here. One such certificate is our Bioinnovation and Entrepreneurship Certificate.

## **Bioinnovation and Entrepreneurship Certificate**

The Certificate in Bioinnovation and Entrepreneurship is one-of-a-kind, and is geared to helping bioentrepreneurs achieve commercial success. Students have opportunities to participate in a number of Jake Jobs Center programs; including the annual business plan competition, internships in area businesses, speaker programs with local entrepreneurs, and connection with new ventures. Visit the Jake Jobs Center for Entrepreneurship to learn more about our entrepreneurship programs.

Bioinnovation Certificate Information

# **Commodities Certificate**

## **Commodities Certificate -- 9 Credits**

The J.P. Morgan Center for Commodities at the AACSB accredited CU Denver Business School provides a certificate in Commodities designed to introduce recent graduates to the fundamentals of commodities, from physical to financial. The Commodities certificate consists of three courses designed for recent college graduates with a bachelor's degree (or minor) in Business, Economics, International Studies or Math. Emphasis is placed on developing the knowledge and skills that provide a practical Commodities business foundation.

The Commodities Certificate will help prepare students to work in an environment in which Commodities are a major function in business operations. Coursework will integrate industry operating procedures and standards, including regulations and compliance. Emphasis will be placed on markets, supply chain and forecasting supply/demand functions for the overall financial benefit of the company.

**Complete 3 of the following courses:**

Complete three of the following courses:

- CMDT 6802 - Foundations of Commodities
- CMDT 6582 - Commodity Supply Chain Management
- CMDT 6682 - Commodity Valuation and Investment
- CMDT 6782 - Commodity Data Analysis

Please contact the Commodities Center for more information.

# Construction Project Management Graduate Certificate

The Construction Project Management (CPM) Certificate is a four-course certificate designed to build skills and teach critical management tools and techniques that enable individuals and teams to run projects within schedule, budget and quality requirements. This certificate focuses on the challenging and growing field of construction project management and is designed for working or aspiring professionals and graduate students interested in developing a level of expertise in construction project management.

The certificate starts with two required classes on project management that teach the fundamentals of the International Project Management Institute's (PMI) Project Management Body of Knowledge and provide a solid foundation for anyone involved in project or program management. The PMI program is based on rigorous standards and ongoing research to meet the real-world needs of organizations worldwide. The electives focus on various components of the PMI knowledge areas-project integration, scope, time, cost, quality, human resource, communications, risk, procurement and stakeholder management- from a construction engineering and management perspective.

You can earn graduate-level credit for each course successfully completed and earn the CPM certificate upon completion of the four courses and can take these courses as a non-degree student or by being enrolled at the University of Colorado Denver. Students must have a bachelor's degree to take these classes. These courses can also be used to partially fulfill requirements for the Master of Engineering in Construction Engineering and Management or other eligible graduate programs.

Contact the Department of Civil Engineering for more information.

## Courses

Required:

CVEN 5236 - PROJECT MANAGEMENT SYSTEMS

CVEN 5237 - ADVANCED TOPICS IN PROJECT MANAGEMENT

A minimum of two elective courses from the following list:

CVEN 5087 - ENGINEERING CONTRACTS

CVEN 5232 - CONSTRUCTION PLANNING AND CONTROL

CVEN 5233 - CONSTRUCTION COST ESTIMATING

CVEN 5234 - SUSTAINABLE CONSTRUCTION

CVEN 5235 - ADVANCED CONSTRUCTION ENGINEERING

CVEN 5238 - CONSTRUCTION LEADERSHIP

CVEN 5800/IWKS 4930 - CONSTRUCTION, BUSINESS AND INNOVATION

# Crime Analysis, Graduate Certificate

## Introduction

Students can earn the Crime Analysis graduate certificate by successfully completing 15 credit hours of approved coursework. Anyone who has completed a bachelor's degree from an accredited university is eligible to enroll in the program.

The certificate emphasizes Criminal Justice and Criminology-related subjects, but the analytic skills learned in the certificate training can be easily transferred to non-criminal justice and criminology fields.

With the Crime Analysis certificate, students will set themselves apart from other applicants in today's competitive job market by mastering analytical skills. Courses will be taught by current and former analysts (some of whom are current UCD faculty), while also gaining important theoretical and methodological knowledge from all UCD professors.

In addition to the stand-alone graduate certificate, students may also choose to complete a concentration in Crime Analysis as part of the Criminal Justice MCJ. Students interested in the Crime Analysis concentration must apply and enroll in the MCJ program within the School of Public Affairs (SPA) and must adhere to all master degree program requirements.

## Program Delivery

- Courses are offered on campus, online and in hybrid formats.

## Program Requirements

- Students must successfully complete 15 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.

- This program must be completed within 7 years.
1. Students must complete the required courses below:
    - CRJU 5003 - Research Methods
    - CRJU 5004 - Statistics for Criminal Justice
    - CRJU 5325 - Qualitative Methods for Criminal Justice - OR - PUAD 5007 - Qualitative Research Methods
    - CRJU 5015 - Intelligence Writing and Briefing - OR - ENGL 5175 - Writing in the Sciences
    - CRJU 5331 - Crime Analysis and GIS

# Cyber Security and Defense Graduate Certificate

## Graduate Certificate in Cyber Security and Defense

The certificate program in Cyber Security and Defense will prepare Computer Science professionals to identify, analyze, and mitigate technical cybersecurity related vulnerabilities, exploits and attacks against network and critical cyber infrastructure. The coursework emphasizes practical technical skills, analysis and research focused on current cybersecurity issues.

### Certificate Objectives

With the advent of greater network, application, and infrastructure connectivity there are more advanced methods of cyber-attack. This certificate program focuses on both the technical and analytical aspects of advanced cybersecurity and defense. Graduates of this certificate program will learn how to mitigate known cyber-related attacks against multiple network and infrastructure devices. Graduates will also learn how to design secure solutions, analyze new cyber-attacks and provide solutions that balance risk, security, privacy, cost, and operations. Each course in this certificate program provides project-based opportunities to extend technical skills in programming, network, operating system, infrastructure design and analysis as well as understanding prevention of cybersecurity breaches and incidents

### Certificate Eligibility

A BS or equivalent in Computer Science is ideal. Applicants with BS degrees other than computer science will be individually evaluated for adequate knowledge in programming, algorithms, and system design and may be assigned additional courses to take as part of the certificate program to address deficiencies in their background.

Students currently in BS-CS degree or in CS Scholars (Dual BS-MS) program at CU Denver need to have completed the undergraduate Operating Systems & Computer Networks and the recommendation of their academic advisor

## **Process to Attain Certificate Objectives**

Students will need to complete a sequence of four separate graduate-level courses

- CSCI 5742 -3 credits - Cybersecurity Programming and Analysis
- CSCI 5743 -3 credits - Cyber and Infrastructure Defense

Two of the following: (depending on student background)

- CSCI 5573 -3 credits - Operating Systems
- CSCI 5765 - 3 credits - Computer Networks
- CSCI 5799 - 3 credits - Cloud Computing

Students must take and pass each course with a grade of B- or better and earn a GPA of at least 3.0 to obtain the Cyber Security and Defense Certificate.

## **Course Objectives**

### **Cybersecurity Programming and Analysis**

This course covers programming concepts related to the security of operating systems, applications, networks, and mobile devices. This course will explore:

- Principles of network, database and operating system cybersecurity
- Use of multiple cybersecurity-related programming languages
- Building and extending existing scanning software
- Analysis and reporting of XML or JSON based cyber-related data stores
- Analysis and reporting of cyber-related NIST data stores
- Log analysis through programming and scripting
- Database programming and attack mitigation
- Analysis of intrusion prevention data
- Use of existing tool vs new tool creation analysis

### **Cyber Infrastructure and Defense**

This course covers analysis and defense techniques for operational networks and critical infrastructure. This course will explore:

- Design and use of cryptographic systems
- Network security firewalls and devices

- Intrusion detection systems
- Malware detection
- Distributed Denial of Service
- Infrastructure and Application attacks
- Emerging cybersecurity defense methods

## Operating Systems

Students study the principles of computer operating systems and their essential components. Team projects expose students to a variety of system design issues as they relate to the functionality and performance of the system.

## Computer Networks

An in-depth study of active research topics in computer networks

## Cloud Computing

This course studies fundamental designs and key technologies in Cloud Computing by reading technical articles, and conducting a semester group project.

# Design Build Graduate Certificate

**Contact:** Erik (Rick) Sommerfeld

**Telephone:** 303-315-0008

**E-mail:** erik.sommerfeld@ucdenver.edu

The College of Architecture and Planning offers a graduate certificate design build as an extension of the MArch program. The certificate course work totals 18 credit hours and emphasizes design build from the designer's point of view.

## Certificate Requirements

Five courses totaling 18 semester hours can be applied to the MArch graduation requirements:

- ARCH 6370 - Introduction To Design Build
- ARCH 6471 - Managing Quality & Risks
- ARCH 6472 - Architecture in a Single Source Project Delivery
- ARCH 6373 - Construction in Design Build

- ARCH 5140 - Design Studio IV

**Total: 18 Hours**

# Digital Studies Certificate

► Graduate School Policies and Procedures apply to this program.

## Introduction

From social media and mobile phones to the algorithms in self-driving cars, digital and information technologies are everywhere. The Digital Studies Certificate provides both degree-seeking and non-degree-seeking post-baccalaureate students with the opportunity to investigate the relationships between new communication technologies and society and to develop skills creating digital media messages and products. Students who attend any CU Denver school or college, or others who have BA degrees in any discipline are welcome.

Social sciences and humanities students can use this certificate to develop and demonstrate their technical skills, while science and engineering students can use it to build expertise in understanding the social and cultural aspects of new technologies.

Degree-seeking graduate students, or non-degree seeking post-baccalaureate students

Students who earn the Digital Studies Certificate will be able to demonstrate to a wide range of potential employers or graduate schools that they have both technical skills and the ability to critically analyze new media.

Students who successfully complete the Digital Studies Certificate will be able to:

- Describe and analyze the relationships between digital media and their cultural, social, political, and ethical contexts
- Use digital media to communicate messages to a variety of audiences
- Use digital media to solve problems in a range of disciplines and situations
- Use digital media and related analytical skills as career-building tools

## Program Delivery

- This is a hybrid program, with courses on-campus and online.

## Admissions and Declaring this Certificate

- Eligibility: CU Denver graduate students in any discipline can enroll in the program at any point in their graduate studies. Non-degree-seeking students with who have a bachelor degree in any discipline are welcome to apply.

- The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program.
- CLAS's Interdisciplinary Studies program sponsors the certificate, and the CLAS Director of Digital Initiatives will provide advising and administrative management.
- Any student wishing to declare the Digital Studies Certificate should schedule a certificate advising appointment with the CLAS Director of Digital Initiatives in order to register their intent to pursue it and to develop a curriculum plan.
- Application Procedures: Students enrolled in any CU Denver graduate program are encouraged to apply for the Digital Studies Certificate at any point in their studies. To apply, students in degree programs should print and complete a Digital Studies Certificate Application and submit it to the CLAS Director of Digital Initiatives. Non-degree-seeking students should also submit an official transcript from their undergraduate programs.
- Students who are not already enrolled at CU Denver must also complete an online Application for Non-Degree Admission prior to registering for courses.
- Individuals who are not currently admitted students seeking the graduate Public, Nonprofit, and Community Leadership Certificate would use the "quick admit" feature online or the extended studies admissions form previously developed by the College of Liberal Arts and Sciences.

### **General Requirements**

- [Click here for information about Academic Policies](#)

### **Program Requirements**

1. Students must complete a minimum of 12 credit hours in approved coursework.
2. Students must complete a minimum of 9 graduate level (5000 or above) credit hours in approved coursework.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Students must complete the following: 1 course (3 credits) from each of the 3 clusters (for a total of 9 credits), plus the remaining 3 credits from any one of the three clusters.

## **Digital Studies Certificate Course Clusters**

- **Theory and Analysis:** Courses in this cluster focus on theorizing, explaining, and describing the relationships between digital, media, and communication technologies and society. They enable students to critically assess and analyze digital media and information, such as understanding the biases in seemingly neutral Google search results or examining how people use Twitter to build social movements
- **Digital Media Production:** Courses in this cluster focus on developing hands-on skills in the use of digital, media, and communication technologies. They provide opportunities for students to develop their skills with a variety of digital tools, such as digital photography, mapping, and social media management.
- **Integration:** Courses in this cluster bring together both understanding and using digital, media, and communication technologies.

**Other courses** may apply to each cluster with the approval of the Director of Digital Initiatives certificate advisor.

### **Theory and Analysis Cluster**

- BUSN 6610 - Information Systems Strategy
- ISMG 6180 - Information Systems Strategy
- COMM 4760 - New Media and Society
- ENTP 6022 - Digital Strategy for Entrepreneurs
- PHIL 4920 - Philosophy of Media and Technology
- INTE 5320 - Games and Learning
- ENGL 5165 - Literacy and Technology

### **Digital Media Production Cluster**

- GEOG 5080 - Introduction to GIS
- GEOG 5081 - Cartography and Computer Mapping
- IWKS 5170 - 3D Design, Computation and Prototyping
- IWKS 5350 - Computational Foundations of Innovation
- INTE 5340 - Learning with Digital Stories
- INTE 5680 - Producing Media for Learning

### **Integration Cluster**

- COMM 4558 - Digital Health Narratives
- ENGL 4190 - Advanced Topics in Writing & Digital Studies
- HIST 5260 - Digital Studies and Strategies

- INTE 5665 - Learning with Social Media and Networking
- INTE 5711 - Creative Designs for Instructional Materials
- IWKS 5700 - Innovation and Society
- IWKS 5180 - Inworks: Choose Your Own Adventure: Experiences in Design, Innovation and Prototyping
- IWKS 5200 - Data Science for Innovators
- PUAD 4003 - Effective Communication for Public Service

# Disasters, Hazards, and Emergency Management (DHEM), Graduate Certificate

## Introduction

The graduate concentration and certificate in Disasters, Hazards and Emergency Management (DHEM) provides advanced education in the management of emergencies, hazards, disasters, and community resilience. The DHEM program is designed to meet the needs of students who wish to work, or are currently working, in the field of natural and man-made hazards, community resilience, and emergency management.

The DHEM program applies an interdisciplinary approach to education that:

- Emphasizes high-level skills of critical thinking, learning, adaptation and policy analysis
- Focuses on the all-hazards emergency management model (encompassing natural and man-made hazards, such as wildfires, hurricanes, technological or industrial risks), and community resilience.

Students completing the DHEM concentration program will have the knowledge and skills necessary to assess and manage a broad range of hazards and disasters, and to understand the policy and managerial environment in which emergency management occurs.

Students interested in obtaining a concentration in DHEM within a Master of Public Administration (MPA) or Master of Criminal Justice (MCJ) program must apply and enroll in the MPA or MCJ program within the School of Public Affairs and must adhere to all master's degree program requirements.

In addition to the stand-alone graduate certificate, students may also choose to complete a concentration in EMHS as part of the Criminal Justice MCJ or the Public Administration MPA. Students interested in the EMHS concentration must apply and enroll in the MCJ or MPA program within the School of Public Affairs and must adhere to all master degree program requirements.

For more information, please the School of Public Affairs website.

## Program Delivery

- Courses are offered on campus, online and in hybrid formats.

## Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.
- Students must complete the following required courses:
  - CRJU/PUAD 5720 - Public Policies for Hazards and Disasters
  - One core course from the list below:
    - CRJU or PUAD 5650 - Public Service in Emergency Management and Homeland Security
    - CRJU or PUAD 5655 - Principles of Emergency Management
    - URPL 6645 - Disaster/ClimateChangePlanning
- Students must complete 2 elective courses from the list below or select unlisted courses that have been approved in advance by the concentration director:
  - PUAD 5130 - Collaboration Across Sectors
  - PUAD 5271 - Managing Conflict and Change
  - PUAD 5320 - Public Policy Analysis
  - PUAD 5350 - Program Evaluation
  - PUAD 5440 - Negotiation and Conflict Resolution
  - CRJU or PUAD 5644 - Environmental and Hazards Law
  - PUAD 5631 - Seminar in Environmental Politics and Policy
  - PUAD 5632 - Seminar in Environmental Management

## Early Literacy Certificate

This online certificate offers primary grade teachers, preschool teachers and para-educators greater background in the development, assessment and instruction of literacy for young children, native speakers of English and English language learners. Administrators and intermediate-grade teachers have also found this program to be a great way to solidify their understandings of initial literacy development to help them best meet the needs of struggling learners in the upper grades.

### Certificate Structure

This certificate totals 9 credit hours in the specialty area of early literacy. Courses may be taken in any order and the certificate may be completed in one year.

### **Courses**

- LCRT 5210 - Literacy Development Pre K-3rd Grade
- LCRT 5220 - Literacy Routines and Assessment, Pre K-3rd Grade
- LCRT 5230 - Early Literacy Instruction

# **Education Policy, Graduate Certificate**

## **Introduction**

The Education Policy graduate certificate offered by the School of Public Affairs provides students with an understanding of how K-12 education is governed, financed, and regulated in the United States. Students will become familiar with the interaction between federal, state and local policies and with the context in which education policy is formulated and implemented.

## **Program Delivery**

- Courses are offered on campus, online and in hybrid formats.

## **Program Requirements**

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.
- Students must complete the following core courses:
  - PUAD 5200 - Education Policy
  - PUAD 5210 - Education Finance
- Students must complete 2 elective courses from the list below or select unlisted courses that have been approved in advance by the concentration director:
  - PUAD 5180 - Social Entrepreneurship
  - PUAD 5310 - Policy Formulation & Implementation
  - PUAD 5320 - Public Policy Analysis
  - PUAD 5350 - Program Evaluation
  - PUAD 5460 - Political Advocacy
  - PUAD 5628 - Social Problems and Policies
  - PUAD 6600 - Special Topics: Public Administration

- Any graduate-level course offered by the School of Education and Human Development, with the approval of the concentration director.

# Emergency Management and Homeland Security (EMHS), Graduate Certificate

## Introduction

Students can earn a graduate certificate in Emergency Management and Homeland Security (EMHS) by successfully completing 12 credit hours of approved coursework.

The certificate in Emergency Management and Homeland Security (EMHS) provides advanced education in the management of emergencies, hazards, disasters, and homeland security. The EMHS program is designed to meet the needs of students who wish to work, or are currently working, in the field of emergency management and homeland security.

The EMHS program applies an interdisciplinary approach to education that:

- Emphasizes high-level skills of critical thinking, learning, adaptation and policy analysis
- Focuses on the all-hazards emergency management model (encompassing natural hazards, technological hazards, and terrorism).

Students completing the EMHS certificate program will have the knowledge and skills necessary to assess and manage a broad range of hazards and disasters, and to understand the policy environment in which emergency management occurs.

In addition to the stand-alone graduate certificate, students may also choose to complete a concentration in EMHS as part of the Criminal Justice, MCJ or the Public Administration, MPA. Students interested in the EMHS concentration must apply and enroll in the MCJ or MPA program within the School of Public Affairs (SPA) and must adhere to all master degree program requirements.

For more information, please the School of Public Affairs website.

## Program Delivery

- Courses are offered on campus, online and in hybrid formats.

## Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Students must complete the following required courses:

- CRJU 5650 - Public Service in Emergency Management and Homeland Security

One core course from the list below:

- PUAD 5655 - Principles of Emergency Management
- CRJU 5720 - Public Policies for Hazards and Disasters - OR - PUAD 5720 - Public Policies for Hazards and Disasters
- URPL 6645 - Disaster/ClimateChangePlanning

Students must complete 2 elective courses from the list below or select unlisted courses that have been approved in advance by the concentration director:

- CRJU 5510 - Contemporary Issues in Law Enforcement
- PUAD 5130 - Collaboration Across Sectors
- PUAD 5271 - Managing Conflict and Change
- PUAD 5320 - Public Policy Analysis
- PUAD 5350 - Program Evaluation
- PUAD 5440 - Negotiation and Conflict Resolution
- PUAD 5631 - Seminar in Environmental Politics and Policy
- PUAD 5632 - Seminar in Environmental Management
- PUAD /CRJU 5644 - Environmental and Hazards Law
- ENVS 6200 - Risk Assessment
- GEOG 5080 - Introduction to GIS
- GEOG 5710 - Disasters, Climate Change, and Health

## **Entrepreneurship Certificate**

The Business Schools undergraduate certificates are primarily intended for students currently pursuing a degree in any undergraduate discipline that want to expand their business knowledge to give themselves a leg up when they enter the work force. However, they can also be taken by students with only a high school diploma.

Students can pursue one of our undergraduate certificates, even if they are not CU Denver students. Credit earned as a part of the certificate DOES count towards your undergraduate degree, should you choose to pursue a degree here. One such undergraduate certificate is listed below:

### **Launchpad Entrepreneurship Certificate**

This certificate can be earned in either downtown Denver at the Jake Jobs Center for Entrepreneurship or CU South Denver.

The Jake Jobs Center for Entrepreneurship is offering an affordable program in one of the fastest growing business segments in the country-Innovation and Entrepreneurship. All courses are taught by faculty from the Jake Jobs Center for Entrepreneurship at CU Denver. You will find many opportunities including scholarships, mentoring, and networking. You will gain skills that prepare you to start a successful business or become an entrepreneurial asset to an existing company.

### **Benefits:**

- Experiential opportunities
- Condensed 8-Week courses
- Two convenient Denver locations
- Cost effective - Scholarships available
- No GPA requirements or prerequisites

For more details about Launchpad courses and registration, visit the Launchpad Certificate page.

The Business Schools also offers post-graduate certificates which are primarily intended to give individuals with an undergraduate degree in any discipline access to business courses that can help them succeed in their current job or even help them launch their own company.

Students can pursue one of our graduate certificates, even if they are not CU Denver students, without taking the GMAT. Credit earned as a part of the certificate DOES count towards your graduate business degree, should you choose to pursue a degree here. One of the post-graduate certificates is listed below:

A Certificate in Entrepreneurship gives students the ability to marshal resources to seize new business opportunities which have uncertain outcomes. The post-bachelors certificate introduces students to fundamental entrepreneurial concepts plus provides the flexibility to allow them to explore specialized areas of interest including cutting-edge social entrepreneurship, new venture design, finance structuring, legal issues, leadership, marketing and personal branding, new product development and business plan creation. Visit the Jake Jobs Center for Entrepreneurship to learn more about our entrepreneurship programs.

## **Environmental Policy And Management (EPM), Graduate Certificate**

### **Introduction**

The graduate certificate in Environmental Policy, Management and Law provides an understanding of how our natural environment is governed and affected by relationships between various entities, including:

- legislatures
- administrative agencies
- courts
- federal, state, and local governments
- government and the nonprofit and private sectors
- government and the public it has been established to serve

In addition to the stand-alone graduate certificate, students may also choose to complete a concentration in EPM as part of the Criminal Justice, MCJ or the Public Administration, MPA. Students interested in the EPM concentration must apply and enroll in the MCJ or MPA program within the School of Public Affairs (SPA) and must adhere to all master degree program requirements.

For more information, please the School of Public Affairs website.

## Program Delivery

- Courses are offered on campus, online and in hybrid formats.

## Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Students must complete the following courses:

- PUAD 5631 - Seminar in Environmental Politics and Policy
- PUAD 5632 - Seminar in Environmental Management

Students must complete 2 elective courses from the list below or select unlisted courses that have been approved in advance by the concentration director:

- PUAD 5410 - Administrative Law
- PUAD 5420 - Law and Public Policy
- PUAD 5628 - Social Problems and Policies
- PUAD 5644 - Environmental and Hazards Law
- PUAD 5650 - Public Service in Emergency Management and Homeland Security
- PUAD 5740 - Sustainable Energy Policy
- PUAD 6600 - Special Topics: Public Administration
- HIST 5228 - Western Art and Architecture
- LDAR 5530 - Form and Formation of Cities
- LDAR 6686 - Special Topics: Landscape Architecture
- COMM 5620 - Health Risk Communication

# Environmental Science Education Graduate Certificate

► Graduate School Policies and Procedures apply to this program.

**Certificate Advisor:** Bryan Wee

**E-mail:** [bryan.wee@ucdenver.edu](mailto:bryan.wee@ucdenver.edu)

## Introduction

Please click [here](#) to see Geography and Environmental Sciences Department information.

### *Certificate Objectives*

1. Students will synthesize environmental science content with relevant educational practices
2. Students will recognize, understand and apply environmental science education in either formal or informal educational settings
3. Students will utilize education research methods to support disciplinary learning
4. Students will identify a broader set of career options (see list below)

### *Sample list of career options*

- K-12 Teacher or curricular specialist
- UNICEF/UNESCO/World Heritage Foundation
- National Parks Service or U.S. Forest Service
- Non-profit organizations (e.g. Colorado Alliance for Environmental Education)
- Regulatory Agencies (e.g. U.S. Environmental Protection Agency)
- Environmental and/or Educational Consultancy Firms
- Adjunct lecturer or instructor

## Program Delivery

This is both an on-campus and field-based program.

## Declaring This Certificate

Please see the Certificate advisor.

## General Requirements

Click [here](#) for information about Academic Policies.

## Eligibility

Environmental Science Education has broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

## **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the Certificate advisor. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

## **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions:* <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PROGRAM EXPECTATIONS**

Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the Environmental Science Education Certificate may be used towards one other degree requirement. Any changes to the standard curriculum program must be approved in writing by the Certificate advisor. Please pay close attention to prerequisites for specific courses.

## **PERFORMANCE EXPECTATIONS**

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

## **Certificate Requirements**

As a graduate or non-degree student at CU Denver, the requirements for the Environmental Science Education Certificate are two core classes and two electives, totaling 12 hours. All classes must be taken at the graduate level (5000 or above) to fulfill the requirements of the Certificate.

## **Required Courses (6 credit hours)**

- ENVS 5340 - Equity & Culture in Science Education: Local/Global
- ENVS 5650 - Environmental Education

## **Electives (6 credit hours)**

Select from the following list of electives. Students should consult with the certificate advisor about other courses that may count toward this requirement.

- ANTH 5170 - Culture and the Environment
- BIOL 5154 - Conservation Biology
- COMM 5282 - Environmental Communication
- ENVS 5020 - Earth Environments and Human Impacts
- ENVS 5305 - Water Quality and Resources
- ENVS 5470 - Sustainable Urban Agriculture Field Study II
- GEOG 5265 - Sustainability in Resources Management
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5440 - Science, Policy and the Environment
- PSCI 5354 - Seminar: Environmental Politics and Policy

# **Free and Open Source Software for Geospatial Applications Graduate Certificate**

Graduate School Policies and Procedures apply to this program

Certificate Advisor: Rafael Moreno  
E-mail: rafael.moreno@ucdenver.edu

## **Certificate Objectives:**

1. Provide students and working geospatial professionals with the knowledge and skills for the effective use and development of FOSS4G solutions in diverse application contexts. This complements and enhances the knowledge and skills they have in the use of geospatial proprietary software solutions.
2. Students will be exposed to several FOSS4G alternatives to address the needs of a geospatial information infrastructure from desktop, database management systems, systems automation/customization, all the way to Web/Cloud-based applications and enterprise level solutions.
3. Students will acquire the necessary knowledge and skills to effectively use the most advanced FOSS4G alternatives to develop solutions for each of levels of a geospatial information infrastructure previously mentioned.
4. Students will have the knowledge and hands-on skills that will enable them to design and develop hybrid geospatial information infrastructures that make use of proprietary software and FOSS4G incorporating each them in a combination that maximizes efficiency of the end infrastructure.

## **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the GISci Certificate Coordinator. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

## **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions:* <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PERFORMANCE EXPECTATIONS**

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

## Credit hour requirements:

A total of 12 credits are required for the certificate. The students will have the option to take other courses above and beyond the core requirements for the certificate.

## Required Courses

- GEOG 5091 - Open Source Software for Geospatial Applications

*This course exposes students to the diversity of FOSS4G solutions that exist for each of the elements of geospatial information infrastructure. They acquire the necessary hands-on skills to effectively use one FOSS4G to address the needs of each of the levels of a geospatial information infrastructure.*

- GEOG 5092 - GIS Programming and Automation

*Students learn programming principles and techniques to automate processes and customize a geographic information system (GIS), and to integrate and coordinate the functions of diverse geospatial software (e.g. a database management system with a GIS).*

- CVEN 5385 - GIS Relational Database Systems

*Students learn the principles and techniques to design a spatial database and perform multiple analyses and functions in a FOSS4G spatial database management system.*

- GEOG 5086 - FOSS4G Systems Integration

*This course functions as the capstone for the certificate. It concentrates on applying all the knowledge and skills previously obtained and adding more in the area of integration of geospatial information infrastructures based on FOSS4G. Students work on integrating systems from desktop to Web/Cloud-based applications.*

## Optional Courses

Students can choose to take one or more of the following courses that can complement their formation in specific topics. However, these course are not required as part of the certificate program.

- BIOL 3763 - Biostatistics
- BIOL 6764 - Biological Data Analysis

*Both of these courses use the open source software R for environmental data analysis including spatial statistics and geostatistics.*

- CVEN 5389 - Open Source Desktop Mapping, Modeling & Data Processing

*This course uses different FOSS4G for the creation of Web-based mapping solutions.*

- GEOG 5050 - Applied Spatial Statistics

*This course is offered annually as part of the GES offerings. It also uses R for data analysis including spatial statistics and geostatistics.*

- GEOG 5095 - Deploying GIS Functionality on the Web

*This course uses FOSS4G for database analysis and creation of Web-based GIS systems.*

# Gender-Based Violence (GBV) Graduate Certificate

## Introduction

The Gender-Based Violence (GBV) Graduate Certificate provides an interdisciplinary perspective on crime, the formulation of laws and codes, and the criminal legal system and its intersection with gender and violence. Courses within the GBV Graduate Certificate are conducted in the hybrid format. All four of the GBV courses will meet in-person for a one-week intensive session followed by online instruction for the remainder of the semester.

In addition to the stand-alone Graduate Certificate, students may also choose to complete a concentration in Gender-Based Violence as part of the Criminal Justice, MCJ or the Public Administration, MPA. Students interested in the GBV concentration must apply and enroll in

the MCJ or MPA program within the School of Public Affairs (SPA) and must adhere to all master degree program requirements.

For more information, please the School of Public Affairs website.

## Program Delivery

- Courses are offered on campus, online, and in hybrid formats.

## Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Students must complete the following required courses:

- CRJU/PUAD 5910 - Nature and Scope of Interpersonal Violence
- CRJU/PUAD 5920 - The Psychology of Interpersonal Violence
- CRJU/PUAD 5930 - Interpersonal Violence Law and Policy
- CRJU/PUAD 5940 - Interpersonal Violence Leadership, Advocacy, and Social Change

# Geographic Information Science Graduate Certificate

► Graduate School Policies and Procedures apply to this program.

**GISci Certificate Advisor:** Matt Cross

**E-mail:** [matthew.cross@ucdenver.edu](mailto:matthew.cross@ucdenver.edu)

The Geographic Information Science (GISci) Certificate in the Department of Geography and Environmental Sciences is designed to provide CU Denver undergraduates and graduates, as well as non-degree seeking students interested in professional development, with proficiency in the application of spatial thinking, geographic information science, and geo-technologies in the social and physical sciences, spanning the natural, built and human environments and emphasizing human-environment interconnections. The GISci Certificate core establishes a broad foundation in spatial technologies and methodologies, including geographic information systems, remote sensing, cartography, spatial extensions to database management systems, and statistics. From this base, students can delve into various specialization areas depending on their interests.

Upon successful completion of the certificate, students will be able to:

- articulate and apply basic theoretical underpinnings of spatial analytical principles, methodologies, and techniques;
- effectively utilize at least three different types of software used for spatial analysis;
- apply geo-spatial thinking, geographic information science, and geo-technologies appropriately; and
- analyze diverse real-world problems that have a spatial dimension and develop alternative solutions to them.

## **Eligibility**

Geographic information science and geo-technologies have broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

You must complete the Application for GISci Certificate, which can be obtained from the GISci Certificate Coordinator. The application requires copies of former transcripts indicating that an undergraduate degree has been previously granted or an unofficial transcript from CU Denver showing that you are a current undergraduate or graduate student. This application is required to be formally registered in the GISci Certificate program, and must be completed no later than the semester prior to the scheduled completion of the certificate.

## **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the GISci Certificate Coordinator. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

## **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions:* <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PROGRAM EXPECTATIONS**

To earn the certificate, students must complete a specific set of geospatial classes. Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the GISci Certificate Program may be used towards one other degree requirement. Any changes to the standard curriculum program must be approved in writing by the GISci Certificate Coordinator. Please pay close attention to prerequisites for specific courses.

## **PERFORMANCE EXPECTATIONS**

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

## **Course Requirements**

As a graduate or graduate-non-degree student at CU Denver, the requirements for the GISci Certificate are four core classes and two electives, totaling 18 hours. All classes must be taken at the graduate level (5000 or above) to fulfill the requirements of the Graduate GISci Certificate. It is assumed that graduate students have some prior knowledge in basic mapping skills, therefore GEOG 2080 is not required. All core classes are required for completion of the GIS Certificate and are offered at least on a yearly basis. The statistics course requirement can be filled by enrolling in the GEOG 5050 Applied Spatial Statistics, or one of several graduate level (5000 or above) classes offered by CU Denver and approved by the certificate coordinator. There is a prerequisite requirement of a basic statistics class taken at the undergraduate college level prior to taking any graduate level statistics class at CU Denver. Any additional two electives can be taken from the elective list. If you are currently a graduate student at CU Denver and also attended CU Denver as an undergraduate, you may apply only one 3 credit hour undergraduate course (4000 level) to the GISci Certificate. The required classes are as follows:

## **Prerequisite Course**

Note: this course does NOT count as part of the total credits required for the certificate.

- GEOG 2080 - Introduction to Mapping and Map Analysis

## **Core Courses**

- GEOG 5050 - Applied Spatial Statistics
- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing

- (May also take as GEOL 5060)
  - GEOG 5080 - Introduction to GIS
  - GEOG 5081 - Cartography and Computer Mapping
- OR** equivalent course approved by the GISci Certificate Coordinator

**Total: 12 Hours**

**Elective (choose two from the following):**

- GEOG 4086 - FOSS4G Systems Integration
  - GEOG 5070 - Remote Sensing II: Advanced Remote Sensing  
(May also take as GEOL 5070)
  - GEOG 5085 - GIS Applications for the Urban Environment
  - GEOG 5090 - Environmental Modeling with Geographic Information Systems
  - GEOG 5091 - Open Source Software for Geospatial Applications
  - GEOG 5092 - GIS Programming and Automation
  - GEOG 5095 - Deploying GIS Functionality on the Web
  - GEOG 5235 - GIS Applications in the Health Sciences
  - CVEN 5382 - Geospatial Data Development
  - CVEN 5385 - GIS Relational Database Systems
- One of these courses may be substituted with an elective approved by the GISci Certificate Coordinator

**Total: 6 Hours**

**Certificate Total: 18 Hours**

# **Geospatial Information Science Graduate Certificate**

**Contact:** Michael Hinke (Co-coordinator)

**E-mail:** michael.hinke@ucdenver.edu

**Contact:** Austin Troy (Co-coordinator)

**Telephone:** 303-315-1006

**Email:** austin.troy@ucdenver.edu

Geospatial Information Science (GIS), known to some as "computer mapping," is used to store, manage, analyze, synthesize, and display spatial data and information. In the College of Architecture and Planning we use GIS to analyze and understand space, to answer the place-

based questions posed by our stakeholders and our clients, and to create the planning- and research-oriented maps that are critical to communicating with our stakeholders. Our work with GIS in the college is built on the many advances in Geospatial Information Science over the last 40 years.

This certificate program is intended for motivated people with a strong interest in the application of GIS to the design and planning professions. It is targeted both at students currently enrolled in a University of Colorado degree program who wish to add a credential to their degree, and working professionals who do not wish to enroll as degree-seeking students, but who wish to pursue a certificate to improve job skills.

Students who earn this Certificate through the College of Architecture and Planning at the University of Colorado Denver will exit the program with the following:

- An understanding of GIS theory and concepts
- Technical mastery of general GIS methods using ArcGIS as well as familiarity with remote sensing
- Familiarity with common public geospatial data sources, as well as metadata standards
- Knowledge of data interoperability, including how to move data and maps from one software platform to another; examples of software includes Adobe Creative Suite, 3D Studio Max, SketchUp, RhinoTerrain, ArcMap, and Quantum GIS
- Specialized skills in geospatial technologies and methods related to the design and planning professions, including rendering and visualizations, infrastructure and transportation network analysis, cadastral mapping, site selection and analysis, geodesign, and many others.

GIS is a rapidly growing field and an increasingly important job skill. GIS skills are showing up as requirements for architects, landscape architects and planners. Our GIS Certificate holders are currently working as: environmental planners, transportation planners, city planners, urban designers, landscape architects and software developers.

A minimum of a 3.0 GPA in all GIS related course work is required to earn the GIS Certificate, and for certificate credit a B- or better is required in all GIS certificate courses.

## **Course Requirements**

The GIS Certificate is designed to supplement students' course work in their field of study. Degree seeking students in the College of Architecture and Planning wishing to pursue the GIS Certificate are expected to take 12 additional semester hours of course work to complete the certificate.

Achieving the GIS certificate in your degree program requires you to follow the appropriate advising sheet.

## **Part 1: Introductory GIS class (3 semester hours)**

- URPL 6250 - GIS for Urban Planning
- LDAR 5540 - Introduction to GIS

## **Part 2: Advanced GIS methods class (3 semester hours)**

- URPL 6260 - Advanced Geo-Spatial Methods

## **Part 3: One of the following (3 semester hours)**

- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5070 - Remote Sensing II: Advanced Remote Sensing
- Boulder: GEOG 5093 - Remote Sensing of the Environment (cost and financial aid availability may vary)

## **Part 4: Specialized advanced classes (9 semester hours)**

- GEOG 5081 - Cartography and Computer Mapping
- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5090 - Environmental Modeling with Geographic Information Systems
- GEOG 5091 - Open Source Software for Geospatial Applications
- GEOG 5092 - GIS Programming and Automation
- GEOG 5095 - Deploying GIS Functionality on the Web
- GEOG 5230 - Hazard Mitigation and Vulnerability Assessment
- CVEN 5382 - Geospatial Data Development
- CVEN 5385 - GIS Relational Database Systems
- CVEN 5800 - Special Topics - Geomatics for GIS
- LDAR 6686 - Special Topics: Landscape Architecture - Advanced Topics in GIS
- Any course from the Part 3 list (either track) not already used to fulfill the Part 3 requirement
- Up to 3 semester hours from a studio course where intensive GIS is used. This must be done by submitting a petition to the coordinators describing the GIS activities undertaken.

- Up to 3 semester hours for an internship using GIS in a planning or design context, also by petition. Please see the coordinators before you start the process of looking for an internship.
- Other relevant courses by permission

## **Part 5: Portfolio**

Students pursuing the GIS Certificate are strongly encouraged to assemble a digital portfolio of GIS-related work undertaken in classes in the College of Architecture and Planning.

The Certificate Coordinators and the Academic Advisors have materials to help students prepare their portfolios. Students are encouraged to work with the GIS faculty to cater their portfolio to their intended careers.

Note: Students pursuing the GIS Certificate in the College of Architecture and Planning are expected to use GIS data and software in their design and planning related classes.

## **Graduation**

Students who have completed all of the requirements for the GIS Certificate must submit their GIS Certificate form at the start of the semester that they plan to graduate.

**Hours: 18 semester hours**

## **Eligibility, Application, and Tuition and Fee Information**

The certificate program is open to all. Applicants already enrolled in a University of Colorado degree program need only submit an internal application to the CAP GIS certificate program. Applicants who are not currently enrolled in a degree program must apply to CU Denver as non-degree seeking students and also submit an application to the CAP GIS certificate program. More details on the process are available from the coordinators.

Apply as a non-degree-seeking student in the Admissions area of the university website.

Find tuition and fee information in the Bursar's Office area of the university website.

Students interested in pursuing the GIS Certificate may start the conversation with their academic advisors, or one of the GIS coordinators. Michael Hinke serves as the director of the interdisciplinary GIS teaching lab on campus (the Facility for Advanced Spatial Technology), and he is happy to talk to students who need more information about classes taught in Geography and Civil Engineering.

## **Global History Graduate Certificate**

## Introduction

The Global History Graduate Certificate provides CU Denver graduate students and the wider community the opportunity to explore topics in Global History while simultaneously learning professional skills in historical research and historical dissemination. This Certificate is designed for students interested in pursuing a graduate-level education in Global History and for professionals seeking accreditation and/or promotion in the fields of education, museums, historic preservation, government, law, and the arts.

The certificate can stand on its own or it can serve as a stepping stone to a Master's Degree in History.

Upon successful completion of the certificate, students will:

- Be able to pursue independent historical research projects
- Be able to analyze debates among historians
- Be able to analyze historical documents and develop arguments from them

## Program Delivery

This program has one on-campus requirement and the remainder of the certificate can be completed on campus or online.

### Declaring This Certificate

Applicants must have a B.A. or B.S. degree.

Interested students must register their intent to complete the certificate with the History Department Graduate Advisor, Ryan Crewe (Ryan.Crewe@ucdenver.edu). Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

## General Requirements

[Click here](#) for information about Academic Policies.

## Program Requirements

1. Students must complete a minimum of 12 HIST credit hours.
2. Students must complete all HIST credit hours at the graduate level (5000 and above).

3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA.
4. All credits for the certificate must be completed with CU Denver faculty.

## Required Courses

Complete the following required course:

- HIST 6013 - Introduction to the Professional Study of History

Complete **one** of the following:

- HIST 6931 - Readings: Special Subjects in History
- HIST 6989 - Seminar: Special Subjects in History

Complete **two** of the following approved elective courses:

- HIST 5027 - Enlightenment and Revolution
- HIST 5028 - Nations and Classes: 19th Century Europe
- HIST 5029 - Age of Anxiety in Europe
- HIST 5030 - Europe During the World Wars
- HIST 5031 - Contemporary Europe
- HIST 5032 - Globalization in World History Since 1945
- HIST 5035 - Crisis and Transformation: Europe's 20th Century
- HIST 5046 - Victorians and Victorianism
- HIST 5051 - Britain and The Empire
- HIST 5055 - The Atlantic Slave Trade: Africa, Caribbean and U.S.
- HIST 5062 - Modern France: 1789 to the Present
- HIST 5071 - Modern Germany
- HIST 5074 - Post-War Germany
- HIST 5075 - Travel Stories and Origins of Cultural Anthropology
- HIST 5076 - History of Modern Science
- HIST 5083 - Russia Since 1917
- HIST 5260 - Digital Studies and Strategies
- HIST 5303 - Sex and Gender in Modern Britain
- HIST 5347 - History of Biology
- HIST 5348 - Mind and Malady: A History of Mental Illness
- HIST 5411 - Modern Mexico
- HIST 5412 - Mexico and the United States: People and Politics on the Border
- HIST 5414 - Nationalism and State Building in Latin America, 1750-1850
- HIST 5415 - Social Revolutions in Latin America
- HIST 5417 - Commodities and Globalization

- HIST 5420 - Traditional China: China to 1600
- HIST 5421 - Modern China
- HIST 5422 - Living through Mao's China: Life, Mat. Cult, Movies, 1949-76
- HIST 5431 - Modern Japan
- HIST 5451 - Southern Africa
- HIST 5455 - African Struggle for Independence
- HIST 5461 - The Modern Middle East
- HIST 5462 - Islam in Modern History
- HIST 5471 - The Second World War
- HIST 5472 - The 1950s: Korean War, the Cold War and Social Transformation
- HIST 5475 - The Vietnam War
- HIST 5490 - Weapons of Mass Destruction
- HIST 5621 - Explorers and Exploration
- HIST 5622 - Oceans In History

# Graduate Certificate in Mathematical Content Knowledge for Teaching

## Graduate Certificate in Mathematical Content Knowledge for Teaching

This certificate program is focused, first and foremost, on augmenting practicing teachers' mathematical content knowledge for teaching. Each course is organized to fit teachers at all K-12 school grade levels, including mathematics and special education teachers. Major themes for each course are informed by national and state standards, particularly the new Colorado Common Core Standards. Each course will engage the participating teachers in exploring and expanding their own comprehension of the topics while examining and increasing their understanding of how students develop such knowledge.

### Required Courses

Each course stands alone; you may want to take one class or all three. Courses may be taken in any order.

- MTED 5621 - A World of (Different) Numbers: Quantity and Operation
- MTED 5622 - Expanding Conceptions of Algebra
- MTED 5623 - Geometrical Ways Of Reasoning

Certificate format is online.

# Graduate Certificate: Geographic Information Systems and Geomatics

The graduate certificate in geographic information systems (GIS) is designed to supplement knowledge needed in the professional work environment or as a way to see if a graduate degree in GIS is a good fit. Students may earn this certificate without formal admission to a master's degree program in engineering if they take these classes as a non-degree student.

## Curriculum

The GIS graduate certificate requires the successful completion of four core GIS classes with a grade of B- or better; any prerequisites for those individual classes are also required.

- CVEN 5391 - Introduction to Geomatics
- CVEN 5392 - Unmanned Aerial Systems
- CVEN 5395 - GPS/GNSS
- CVEN 5381 - Introduction to Geographic Information Systems
- CVEN 5382 - Geospatial Data Development
- CVEN 5385 - GIS Relational Database Systems
- CVEN 5386 - GIS Laboratory
- CVEN 5387 - Advanced Remote Sensing
- CVEN 5390 - Interactive Web Mapping GIS

For more information contact the Department of Civil Engineering at  
civilengineering@ucdenver.edu  
303-315-7160

# Health Economics and Outcomes Research Graduate Certificate

Graduate Certificate in Health Economics & Outcomes Research is designed to train scientists to engage in modern economic research related to questions pertinent to health policy, health behaviors, and health care services. The unique analytic skill set delivered in this certificate is sought out health care agencies, state agencies, and consulting firms in the Denver area that are looking for employees who know how to use health data to answer research questions. Upon earning this certificate, students will:

1. Have sufficient knowledge of econometric theory and techniques to make them an effective consumer and producer of empirical research in health economics.

2. Understand the challenges in identifying causal relationships using health data.
3. Understand the fundamentals of the potential outcomes framework, randomized experiments, natural experiments, panel data models, matching, instrumental variables and regression discontinuity designs.
4. Understand the economic approach to studying the healthcare sector, health behaviors, and health outcomes.
5. Understand how different markets function in the health care sector, such as the market for health care, health insurance, health labor (such as physicians and nursing), and pharmaceuticals.

These certificate requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their certificate advisor and CLAS advisor to confirm the best plans of study before finalizing them.

## **Program Delivery**

This is an on-campus program.

## **General Requirements**

[Click here for information about Academic Policies.](#)

## **Admission Requirements**

- Degree: BA/BS
- A minimum GPA of 3.00 is recommended

## **Application Process**

Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:

- Graduate Certificate Application Form
- Official Transcripts
- Resume
- Letter of interest

Upon approval of the student's admission by the Graduate Certificate Program, the program director will send the student's certificate admission file to the Graduate School. The Graduate School will confirm the applicant's credentials, will determine whether the student meets the

general academic requirements of the Graduate School, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

### **Additional Requirements**

- Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking student with a bachelor's degree.
- Have completed Introduction to Econometrics (ECON 4811), or equivalent coursework, or have professional experience in statistical analysis.
- International students must submit TOEFL scores or otherwise satisfy the University's English Language Proficiency requirement.

### **Certificate Requirements**

1. Students must complete a minimum of 12 ECON credit hours.
2. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
3. All credit hours for the certificate must be earned at the University of Colorado Denver.

### **Certificate Restrictions, Allowances and Recommendations**

1. Students have 7 years to complete this certificate.
2. Students should evaluate course descriptions to determine if the prerequisites or corequisites have been completed in order to move forward in the certificate.
3. No course may be taken more than twice.
4. Graduate level ECON credit counted towards the Graduate Certificate in Health Economics & Outcomes Research may be subsequently counted towards a CU Denver graduate degree in Economics. Certificate students are not guaranteed admission to the M.S. program in Health Economics. However, certificate students can apply to the M.S. program in economics at any time.
5. Students who complete the Graduate Certificate in Health Economics & Outcomes Research and later apply to the M.S. program in Health Economics at CU Denver may submit their certificate in place of GRE scores and letters of recommendation.
6. Students admitted to the M.A., M.S., or Ph.D. programs in economics at CU Denver may complete the graduate certificate concurrently with their degree program. However, courses that have already been counted towards any degree already awarded (undergraduate or graduate) may not be counted towards the certificate retroactively.

## Required Courses

Complete **all** the following ECON courses:

- ECON 5030 - Data Analysis with SAS
- ECON 4812-Advanced Econometric Methods or ECON 5823 - Econometrics II
- ECON 7661 - Health Economics I
- ECON 7662 - Health Economics II

**Total: 12 Credit Hours**

# Historic Preservation Graduate Certificate

## Graduate Certificate in Historic Preservation

The University of Colorado Denver Graduate Certificate in Historic Preservation is an interdisciplinary collaboration between the College of Architecture and Planning and the History Department. The certificate program is open to any qualified graduate student or non-degree seeking student with a bachelor's degree.

The certificate provides CU Denver students and the wider community with foundational knowledge and skills in Historic Preservation, a field that enhances studies and professional work in areas such as architecture, heritage tourism, historic preservation, national park interpretation, planning, public history, urban studies and related fields.

The certificate can stand on its own, can complement a graduate program in Architecture, History, or Urban Planning; or can serve as a beginning to graduate studies. It can also be a stepping stone to further work in Historic Preservation with the College of Architecture and Planning's Masters of Science in Historic Preservation.

**Applicants must have a B.A. or B.S. degree.**

Interested students must register their intent to complete the certificate with the Director of the Public History & Preservation Program, CU Denver History Department. Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

Those students already admitted to a degree program in the College of Architecture and Planning should begin the process by contacting program co-director, Professor Christopher Koziol (Christopher.koziol@ucdenver.edu). All others should contact the Department of History

Director of the Public History & Preservation Program, Professors Tom Noel (tom.noel@ucdenver.edu) and Peter Kopp (peter.kopp@ucdenver.edu).

All courses in the certificate program must be taken in residency with CU Denver faculty. Students must maintain a 3.0 GPA, and no course below B- will count towards the certificate.

Graduate students in the History Department can count courses for both their major or minor fields and the requirements for the certificate. Graduate students in the College of Architecture and Planning should discuss credit distributions with their academic advisor.

## Admissions Requirements

1. Applicant must have a B.A. or B.S. Degree.
2. Applicant applies to the above designated co-director.
3. Applicants must provide a transcript, statement of purpose, and two letters of recommendation.

## Program Requirements

1. Students must complete a minimum of 18 credits from approved courses.
2. Students must complete all courses at the graduate (500 and above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.

## Required Courses

Complete **two** of the following courses:

- HIST 5232 - Historic Preservation     **OR**
- HIST 6989 - Seminar: Special Subjects in History

*One of these courses is offered once a year by the History Department.*

- HIPR 6010 - Preservation Theory and Practice

*This course is offered every fall by the College of Architecture and Planning.*

**Total 6 credits**

## **Electives**

These remaining 12 credit hours should be distributed so that at least 3 hours are from each of the two participating colleges, CLAS(HIST) and CAP(ARCH and HIPR), and hence, no more than 9 hours from the other. Be sure to consult your preservation advisor (Profs. Koziol or Noel) on your course selection.

- HIST 5228 - Western Art and Architecture
- HIST 5229 - Colorado Historic Places
- HIST 5240 - National Parks History
- HIST 5245 - Heritage Tourism
- HIST 5939 - Internship
- OR
- HIPR 6930 - Internship
- HIST 6950 - Master's Thesis
- OR
- HIST 6952 - Master's Project: Public History
- HIPR 6110 - Regionalisms & the Vernacular
- HIPR 6210 - Historic Buildings in Context
- HIPR 6220 - Adaptive Reuse: Business and Practice
- HIPR 6310 - Documentation, Analysis, Representation
- HIPR 6410 - Urban Conservation: Context for Reuse
- HIPR 6510 - Building Conservation
- HIPR 6610 - Reading the City
- ARCH 6210 - History of American Architecture
- ARCH 6212 - History of Modern Architecture

# **Integrated Construction, Management + Leadership Graduate Certificate**

## **Contact:**

**Business School:** Linda Brooker  
303.315.8200  
linda.brooker@ucdenver.edu

## **College of Engineering, Design and Computing | Civil Engineering:**

303.315.7160

civilengineering@ucdenver.edu

## **College of Architecture and Planning:** Leo Darnell

303-315-1015

leonard.darnell@ucdenver.edu

The colleges of Architecture and Planning, Engineering, Design and Computing, and the Business School at the University of Colorado Denver have formed a partnership to create an innovative and interdisciplinary leadership program. The Integrated Construction, Management and Leadership (ICML) Certificate is a four-course certificate designed to launch designers, architects, engineers, and business entrepreneurs into the world of construction or rapidly update an existing skill-set.

All classes are held in the Liniger Building at CU South Denver, located east of Interstate 25 on Lincoln Avenue in Parker, Colorado. Go to the CU South Denver website to see the class schedule.

As disciplinary identities, project boundaries, and conventional markets blur, leadership, management skills, and civic mindfulness are key aspects to successfully navigating a rapidly transforming 21st century built environment. Many new ideas are emerging involving how projects are conceived and delivered that better integrate the complex relationships among finance, marketing, design, and construction. These new interdisciplinary management and construction techniques streamline the construction of increasingly large-scale and complex projects. Leadership skills are necessary for success in the central activities of contemporary engineering, architectural design firms, business, government, and non-profits. The demands of project management in firms today involve more than specific technical expertise in a given field. Firms need creative individuals who can effectively innovate, execute, and communicate across disciplines. This new certificate program capitalizes on these changes and the new opportunities they present.

ICML is an interdisciplinary program designed for working or aspiring professionals, and upper-level students interested in expanding their knowledge base in the fields of engineering, architecture, business, and their intersections. The courses include introductions to and explorations of current trends in the construction industry, project management and building information modeling (BIM). The final course is an integrated course that brings together top executives in the architecture, engineering and construction (AEC) business to discuss current industry topics and provides students an opportunity to apply principles from the various fields to case study projects.

- Students can earn graduate-level credit for each course they successfully complete and the ICML Certificate upon completion of all four courses.
- They can take the courses as a non-degree student or while enrolled in a degree program at the University of Colorado Denver.

- The courses can be used to partially fulfill requirements for the MEng in Construction Engineering and Management or other eligible graduate programs such as the Master of Architecture degree upon acceptance into these programs.
- Approved courses in this Certificate may also count toward related Certificates offered by the Business School and Construction Engineering and Management.

## Certificate Requirements

- ARCH 6420 - Integrated Practice & BIM Technology
- BANA 6650 - Project Management
- CEMT 6235 - Advanced Construction Engineering
- ARCH 6413 - Construction Leadership

## 12 Hours

# Interpersonal Violence and Health Care, Graduate Certificate

## Introduction

The Certificate in Interpersonal Violence and Health Care (CIVHC) fulfills a nationally recognized need to educate and train individuals from a broad range of health disciplines to effectively respond to victims of interpersonal violence. CIVHC is a program of the Center on Domestic Violence in CU Denver's School of Public Affairs, developed in collaboration with local and national advisors representing schools of nursing, medicine and dentistry, as well as knowledgeable health practitioners skilled in meeting the needs of patients experiencing interpersonal violence. CIVHC is the first graduate-level program of its kind. As a distance learning program, it represents a collaboration within the University of Colorado system-the Downtown Campus, the Anschutz Medical Campus and the Colorado Springs Campus. Its goal is to provide education for health professionals, faculty and students, thereby building proficiency and confidence in interpersonal violence prevention, identification and intervention in Colorado and the nation.

### **At the completion of this certificate program, participants will have:**

- Leadership skills necessary to improve systematic responses to interpersonal violence in health care settings
- Thorough understanding of the health ramifications of interpersonal violence
- Skill and comfort with screening all patients for interpersonal violence-victims, offenders and child witnesses

- Ability to effectively assess and treat adults and children engaged in violent relationships
- Ability to build resources to meet the needs of patients including, but not limited to, collaboration with community-based providers.

Four courses are required for completion of this certificate. Please contact the Director of the Center on Domestic Violence at [barb.paradiso@ucdenver.edu](mailto:barb.paradiso@ucdenver.edu) for more information.

# Labor Leadership Certificate

## Introduction

Please click [here](#) to see Political Science department information.

The Labor Leadership certificate is meant to develop the next generation of leaders in labor unions and civic organizations focused on labor and related issues of race, class and gender equity. The certificate is particularly relevant to labor union leaders, rank and file members, and community-based organizational staff who desire to receive continuing education regarding labor leadership. The labor leadership certificate will combine academic instruction with field learning and community-based research projects. The program features active partnerships with local labor organizations, such as unions and community-based groups focused on relevant labor, class and race issues (such as immigrant rights groups, workplace gender equity groups, etc.). Certificate students will join a diverse group of graduate students pursuing their full Master's degree in the Department's community leadership program (including students focused on governmental/public leadership, and students focused on non-profit leadership) which will enhance synergetic learning in the classroom, and enlarge networking opportunities among all students.

The certificate is open to non-degree seeking as well as students formally admitted to the MA in Political Science program. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Master's Degree in Political Science.

The certificate can be earned either through our traditional on-campus graduate seminars, or entirely through classes offered in a weekend-intensive format in our New Directions graduate program. Students may take classes in either format desired.

## Admissions and Declaring this Certificate

Any current or potential student wishing to declare this certificate should schedule a certificate advising appointment with either the Director of the New Directions graduate program (Dr. Minsun Ji) or with the Director of the On-campus Graduate Program (Dr.

Michael Berry), in order to register their intent to pursue the Labor Leadership Certificate and to develop a curriculum plan.

## **Grade Requirements**

Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

## **Curriculum and Credit Requirements**

The graduate certificate requires five Labor Leadership courses (15 credits)

### **Required Labor Leadership Courses**

Take **all** of the following courses

- PSCI 5535 - Labor and Working Class Politics
- PSCI 5548 - Labor Law and Collective Bargaining
- PSCI 5550 - Labor, Trade Unions and the Global Economy

### **Elective Labor Leadership Courses**

Take **two** of the following courses

- PSCI 5326 - Advanced International Political Economy: Globalization
- PSCI 5424 - The Social Economy and Sustainable Development
- PSCI 5434 - The Cooperative Movement: Politics and Policy
- PSCI 5914 - Community Organizing and Community Development

## **Literacy and Language Development for Diverse Learners Certificate**

This online graduate certificate program offers K-12 teachers greater background in the development, assessment and instruction of literacy for diverse learners, including children and youth who speak dialects of English or are English language learners. This certificate was developed in response to public school districts' need to improve reading and writing achievement for diverse students. Teachers in K-12 grades, including content area teachers and

those teaching special reading classes, as well as administrators have also found this program to help them best meet the needs of struggling learners.

### **Certificate Structure**

The fully online certificate totals 12 credit hours and consists of four graduate courses, each 3 credits. The certificate may be completed in four semesters. Students can begin in any term.

### **Courses**

- LCRT 5810 - Oral & Written Language & Literacy
- LCRT 5770 - Effective Literacy Instruction for Diverse Learners
- LCRT 5055 - Literacy Assessment & Informed Instruction
- LCRT 5150 - Culturally Relevant & Responsive Pedagogies

# **Local Government, Graduate Certificate**

## **Introduction**

Local government is the most rapidly growing area of the public sector employment across the country, providing jobs in municipalities, counties, regional authorities, and councils of government.

The graduate certificate in Local Government allows students to become well-versed in the forces that shape the agendas of these offices and agencies and gain an understanding of government management and policy making.

In addition to the stand-alone graduate certificate, students may also choose to complete a concentration in Local Government as part of the Public Administration, MPA . Students interested in the Local Government concentration must apply and enroll in the MPA program within the School of Public Affairs (SPA) and must adhere to all master degree program requirements.

For more information, please the School of Public Affairs website.

## **Program Delivery**

- Courses are offered on campus, online, and in hybrid formats.

## **Program Requirements**

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Students must complete the following required course:

- PUAD 5503 - Public Budgeting and Finance

**One** core course from the list below:

- PUAD 5625 - Local Government Management
- PUAD 5626 - Local Government Politics and Policy
- PUAD 5628 - Social Problems and Policies

Students must complete **two** elective courses from the list below or select unlisted courses that have been approved in-advance by the concentration director:

- PUAD 5130 - Collaboration Across Sectors
- PUAD 5170 - Strategic Management for Nonprofit and Public Managers
- PUAD 5220 - Human Resource Management
- PUAD 5250 - Intergovernmental Management
- PUAD 5260 - Managing Diversity
- PUAD 5271 - Managing Conflict and Change
- PUAD 5380 - Citizen Participation: Theory and Practice
- PUAD 5410 - Administrative Law
- PUAD 5440 - Negotiation and Conflict Resolution
- PUAD 5460 - Political Advocacy
- PUAD 5502 - Public Financial Management and Policy
- PUAD 5632 - Seminar in Environmental Management
- PUAD 5650 - Public Service in Emergency Management and Homeland Security

# Nonprofit Management, Graduate Certificate

## Introduction

The graduate certificate in Nonprofit Management prepares students to become innovative and critical thinkers in the areas of nonprofit organizational management and public policy, with a unique approach that bridges theoretical knowledge with real-world experience. As students prepare for their careers or advancement in their current positions, they gain insight into the interdependence between the nonprofit, public, and for-profit sectors. Graduates are able to span the boundaries of these three sectors to assess community needs, navigate the realm of public policy, and strategically and effectively manage organizations that ultimately benefit society.

In addition to the stand-alone graduate certificate, students may also choose to complete a concentration in Nonprofit Management as part of the Criminal Justice, MCJ or the Public Administration, MPA. Students interested in the concentration must apply and enroll in the MCJ or MPA program within the School of Public Affairs (SPA) and must adhere to all master degree program requirements.

SPA's affiliation with the Nonprofit Leadership Alliance gives students the opportunity to earn the Certified Nonprofit Professional (CNP) credential through completion of the Nonprofit Management concentration [or certificate] coursework, additional required extracurricular activities, and an examination. Contact [cnp@ucdenver.edu](mailto:cnp@ucdenver.edu) for more information about this credential.

For more information, please see the School of Public Affairs website.

## Program Delivery

- Courses are offered on campus, online, and in hybrid formats.

## Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Students must complete the following required course:

- CRJU 5010 - Seminar Nonprofit Management

Students must complete **three** elective courses from the list below or select unlisted courses that have been approved in-advance by the concentration director:

- PUAD 5115 - Effective Grant Writing for Nonprofit and Public Sector Managers
- PUAD 5120 - Nonprofits and Public Policy
- PUAD 5125 - Civil Society and Nongovernmental Organizations
- PUAD 5140 - Nonprofit Financial Management
- PUAD 5150 - Fundraising & Financial Resource Development
- PUAD 5160 - Nonprofit Boards and Executive Leadership
- PUAD 5170 - Strategic Management for Nonprofit and Public Managers
- PUAD 5180 - Social Entrepreneurship

## Post-Graduate Certificates

The Business School's post-graduate certificates are primarily intended for professionals in the community with a master's degree, in any business discipline, from an AACSB accredited institution. These certificates are offered in a variety of specialized business areas from Business Analytics to Information Systems. The courses are designed to allow individuals that are already in the business community to bring their skills up to date - or to explore a new area of business that interests them.

Students are required to complete four graduate courses in order to receive a post-graduate certificate. Students can pursue one of our post-graduate certificates, even if they are not CU Denver students. Credit earned as a part of the certificate DOES count towards a second graduate business degree, should you choose to expand your knowledge further with one of our complete MS or MBA degrees.

## **We currently offer post-graduate certificates in:**

- Bioinnovation and Entrepreneurship
- Business Intelligence
- Business Strategy
- Change Management
- Commodities
- Digital Health Entrepreneurship
- Enterprise Risk Management
- Enterprise Technology Management
- Entrepreneurship
- Finance
- Health Information Technology
- Human Resources Management
- Information Systems
- International Business
- Leadership
- Managing for Sustainability
- Marketing
- Risk Management and Insurance
- Sports and Entertainment Management
- Technology Innovation and Entrepreneurship
- Web and Mobile Computing

Some of the post-graduate certificates require prior knowledge in the area being studied, Please contact an advisor for specific courses and requirements for the post-graduate certificates.

# Public Policy Analysis, Graduate Certificate

## Introduction

The graduate certificate in Public Policy Analysis offered by the School of Public Affairs provides an understanding of the context in which public policies are formulated, implemented, and evaluated. Graduates will have training in the tools and skills needed to assess the impact of public policies and programs, including policy analysis, cost-benefit analysis, program evaluation, multivariate regression, and other analytical techniques.

## Program Delivery

- Courses are offered on campus, online, and in hybrid formats.

## Program Requirements

- Students must successfully complete 15 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Students must complete the following core courses:

- PUAD 5004 - Economics and Public Finance
- PUAD 5005 - The Policy Process and Democracy
- PUAD 5320 - Public Policy Analysis

Students must complete **two** additional elective courses from the list below or select unlisted courses that have approved in advance by the program director:

- PUAD 5200 - Education Policy
- PUAD 5310 - Policy Formulation & Implementation
- PUAD 5330 - Intermediate Statistical Analysis
- PUAD 5350 - Program Evaluation
- PUAD 5631 - Seminar in Environmental Politics and Policy
- PUAD 5720 - Public Policies for Hazards and Disasters

# Public, Nonprofit and Community Leadership Graduate Certificate

## Introduction

Please click [here](#) to see Political Science department information.

The Public, Non-Profit and Community Leadership Graduate Certificate is offered in two different formats: the traditional, on-campus format, and the New Directions weekend classes format, with classes offered in CU Denver facilities south of Denver (currently at the Liniger Building in Parker). Students can choose classes in either of these two formats to complete the certificate.

The CU Denver Political Science Department's Public, Non-Profit and Community Leadership Certificate engages students in a focused curriculum in the local public leadership, and in the community organizing and development field, including field placements in internships with local community partners. The certificate is tailored to meet the needs of individuals in public and non-profit positions that require development of their leadership competencies and for individuals in informal community leadership positions who want to build their knowledge, skills, and effectiveness.

The program curriculum is anchored around the study and practice of local civic engagement, especially in traditionally marginalized communities. Students will be connected to meaningful work and networking opportunities in local government or in community settings, through community-based coursework, professional internships and service-learning opportunities. The certificate program provides critical education and effective skills-based training for students seeking careers in local government, in non-profit organizations, or in community organizing and development work. Students will be prepared to become change agents in their communities, while developing possible career paths in community-based advocacy/service organizations, public agencies, or international development work.

The certificate is open to non-degree seeking students (with or without an undergraduate degree) as well as students formally admitted to the MA in Political Science and to upper division undergraduates seeking to get a head start on their graduate studies. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Master's Degree in Political Science.

The certificate can be earned either through our traditional on-campus graduate seminars, or entirely through classes offered in a weekend-intensive format in our New Directions graduate program. Students may take classes in either format desired.

## Admissions and Declaring This Certificate

Any current or potential student wishing to declare this certificate should schedule a certificate advising appointment with either the Director of the New Directions graduate program (Dr. Minsun Ji) or with the Director of the On-campus Graduate Program (Dr.

Michael Berry), in order to register their intent to pursue the Community Leadership Certificate and to develop a curriculum plan.

## Grade Requirements

Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

## Curriculum and Credit Requirements

The graduate certificate requires four "public and community leadership" courses (12 credits), which must include PSCI 5914 - Community Development and an appropriate field study course (most usually an internship with a local government jurisdiction or community based organization).

### Required Public and Community Leadership Courses

- PSCI 5914 - Community Organizing and Community Development  
Field Placement Requirement, fulfilled by **one** of the following courses
- PSCI 5939 - Internship
- PSCI 5944 - CU in the City

### Elective Public and Community Leadership Courses (6 credits)

- PSCI 5840 - Independent Study: PSCI (when relevant and approved by Program Advisor)
- PSCI 5548 - Labor Law and Collective Bargaining
- PSCI 5555 - International Women's Resistance
- PSCI 5414 - Non-Profits and Social Change
- PSCI 5424 - The Social Economy and Sustainable Development
- PSCI 5434 - The Cooperative Movement: Politics and Policy
- PSCI 5265 - Social Justice And Globalization
- PSCI 5274 - Conflict Resolution and Public Consent Building
- PSCI 5094 - Seminar: Urban Politics
- PSCI 5206 - Social Movements, Democracy and Global Politics
- PSCI 5024 - State Politics: Focus on Colorado
- PSCI 5025 - Local Governance and Globalization

- PSCI 5075 - Gentrification and Social Equity
- PSCI 5084 - Local Government and Administration
- PSCI 5008 - Graduate Topics in Political Science (when relevant and approved by Program Advisor)

Public Leadership Course credits may also be earned through study abroad in the Semester in Berlin program or the Development in East Africa program.

## **Risk Management and Insurance Certificate**

The Business Schools undergraduate certificates are primarily intended for students currently pursuing a degree in any undergraduate discipline that want to expand their business knowledge to give themselves a leg up when they enter the workforce. However, they can also be taken by students with only a high school diploma.

Students can pursue one of our undergraduate certificates, even if they are not CU Denver students. Credit earned as a part of the certificate DOES count towards your undergraduate degree, should you choose to pursue a degree here. One such certificate is our Risk Management and Insurance Certificate. Information for that certificate is below:

Broaden your knowledge of Risk Management and Insurance (RMI) by completing a one-year Certificate in RMI Studies from the University of Colorado Denver. By completing three semester-long RMI courses, all available online, and meeting prior finance course requirements, you will be on your way to enhancing your personal knowledge and providing your employer with RMI awareness and professional skills. See the Risk Management and Insurance Certificate page for more information.

## **Scientific Foundations of Technical Innovation Certificate**

The goal of this certificate is to give students and working professionals an opportunity to broaden their technical knowledge while contributing to regional economic development. Two real-world projects—one for a client and one for the student's own pursuits—are combined with a series of six short courses to provide both context and substance for gaining the knowledge needed to create technical prototypes. The model is based on the method by which most physical science graduate students learn technical domains on a "just-in-time" basis. It is also a method by which many corporations quickly bring new project team members up to speed on project knowledge. Entry into the certificate program requires prior completion of two

semesters of calculus-based physics and two semesters of calculus **or** permission of the certificate advisor.

## Program Requirements

1. Students must complete a minimum of 12 credit hours from approved coursework.
2. Students must complete all credits for the certificate at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA.
4. Students must complete all credits for the certificate with CU Denver faculty.

Graduate versions of the courses (5000-level) require an undergraduate degree and additional work on technical analysis or connection to professional practice.

Complete **all** of the following courses:

- PHYS 5850 - Physics for Design and Innovation I
- PHYS 5400 - Scientific Instrumentation
  - Choose six 1-semester-hour short courses out of a larger list of offered topics; the specific sequence must be approved by the certificate advisor.
- PHYS 5852 - Physics for Design and Innovation II

**Total: 12 Hours**

# Software Engineering Graduate Certificate

## Graduate Certificate in Software Engineering

This certificate is designed for working professionals, or computer science students beginning careers, in the fields of software engineering and software development. This certificate requires a previous computer science or systems engineering degree. At the start of the certificate program students are expected to have a strong understanding of software development in terms of software construction, software coding and basic software design.

## Certificate Objectives

- To provide working or career-oriented students with knowledge and practice of the applied skills needed to become successful software engineers.
- To provide working or career-oriented students with knowledge and understanding of the skills needed to successfully advance their careers as software engineers.

## Process to Attain Certificate Objectives

Students will complete a sequence of three separate graduate-level courses

- Software Architecture (CSCI 5010)
- One of the following:
  - Operating Systems (CSCI 5573) or
  - Advanced Computer Architecture (CSCI 5593)
- Software Project Management Support (CSCI 5011); Prerequisites: CSCI 5010 plus either CSCI 5573 Operating Systems or CSCI 5593 Advanced Computer Architecture

Students must take and pass each course to obtain the Software Engineering Certificate.

## Course objectives

### Software Architecture

This course will focus on two major areas. The first part of the course will cover Software Requirements Analysis and Development as well as Software Architecture and the Soft Skills needed by high level Software Architects. The second part of the course will cover how Persistent Data fits into different types of Software Systems. The primary focus of the second part of the course will be on incorporating larger scale Enterprise Data Systems into Software Systems and will be an application of the first part of the course material. This course will explore:

- Chronic Software Production Problems
- Derived Functional and Non-Functional Requirements
- Problem and Solution Space mapping and complexity
- Architecture (the product) and Architecting (the practice)
- Object and Component based Software Architecture techniques
- Architectural Styles and how to apply them
- Architectural Views and their relationship to Requirements
- Application Data Systems vs. Enterprise Data Systems
- The different Quality Attribute requirements between Application and Enterprise Data Systems
- Software Architectures for Enterprise Data Systems

- Architecting Domain Models for Data Systems

## **Software Project Management Support**

This course will cover Software Planning, Estimation, Staffing and Scheduling. This course will explore:

- Software Work Breakdown Structures
- Software Project Dependencies and Effort Schedules
- Estimation Techniques
- Comparisons between different Project Models (Waterfall, Agile, Iterative, ...) and when one might be preferred over the others

## **Operating Systems**

This course provides an in-depth study of the principles of computer operating systems and their essential components. Team projects expose students to a variety of system design issues as they relate to the functionality and performance of the system. Topics include I/O devices, Disk Scheduling, File System Organizations, Directory Systems, Sequential and Concurrent process, CPU Scheduling, Memory Management, Deadlock, Process and Threading, and review of some related articles in the literature.

## **Advanced Computer Architecture**

This course covers concepts in the structural design of computer systems important to software designers. Topics include memory hierarchy, superpipelining and superscalar techniques, dynamic execution, vector computers and multiprocessors and performance impacts of software design.

# **Strategic Communication Graduate Certificate**

► Graduate School Policies and Procedures apply to this program.

Strategic Communication has been defined as the management function that entails planning, research, publicity, promotion and collaborative decision-making to help any organization's ability to listen to, appreciate and respond appropriately to those persons and groups whose mutually beneficial relationships the organization needs to foster as it strives to achieve its mission and vision. The Graduate Certificate in Strategic Communication is designed to provide

students with the principles and theories that guide the work of public relations practitioners in commercial, public and nonprofit contexts.

Non-degree students who enroll in the MA program following completion of the certificate may transfer up to 12 hours of credits earned for the certificate into credits for the MA degree. The certificate also is designed for students enrolled in a CU Denver's master's program, including the Department of Communication's MA program. For such students, the certificate can be completed as part of or in addition to the coursework required for the master's degree.

Recipients of the Undergraduate Certificate in Strategic Communication are ineligible to complete this certificate.

## **Application Procedures and Additional Information**

Students should apply for the Graduate Certificate in Strategic Communication before or after the completion of the required courses. To apply, students must complete the certificate application, attach it to an unofficial transcript, and return it to Dr. Hamilton Bean in room 3010 of the Student Commons Building, or mail to Department of Communication; P. O. Box 173364, Campus Box 176; University of Colorado Denver; Denver, CO 80217-3364. The approved certificate is posted to the transcript and mailed to the student after final grades are posted for the semester.

Students who are not already enrolled at CU Denver must also complete an online Application for Non-Degree Admission prior to registering for courses.

Additional information about the Graduate Certificate in Strategic Communication may be obtained from Dr. Hamilton Bean, Department of Communication, Student Commons Building, 1201 Larimer Street, Suite 3010, 303-315-1909, [Hamilton.Bean@ucdenver.edu](mailto:Hamilton.Bean@ucdenver.edu).

## **Certificate Requirements**

1. Students must complete a minimum of 12 credits from approved courses.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All of the credit hours for the certificate must be earned from faculty at the University of Colorado Denver.

Complete the following courses:

- COMM 5051 - Advanced Strategic Communication
- COMM 5240 - Organizational Communication

- COMM 5939 - Internship
- An elective at the graduate level from the College of Arts & Media, School of Business, the School of Public Affairs, or the Anschutz Medical Campus. The elective must be approved in consultation with the Department of Communication.  
Students may be permitted to take courses other than those listed above to fulfill the requirements for the certificate if those courses fit their professional goals better. Requests for approval for substitute courses, including an explanation for the substitution, must be made in writing to Dr. Hamilton Bean.

## Sustainability Certificate

The Business Schools graduate certificates are primarily intended to give individuals with an undergraduate degree in any discipline access to business courses that can help them succeed in their current job or even help them launch their own company.

Students can pursue one of our graduate certificates, even if they are not CU Denver students, without taking the GMAT. Credit earned as a part of the certificate DOES count towards your graduate business degree, should you choose to pursue a degree here. Listed below is information on one such certificate.

The Managing for Sustainability Certificate is designed for business professionals seeking a deeper understanding of sustainability and/or the technical knowledge to lead sustainability initiatives in their companies. To earn a Managing for Sustainability Certificate, students complete four semester-long graduate Business School courses. Two of the courses provide a foundation in sustainable business practices then, students select their remaining two certificate classes covering such specialized areas as finance, marketing, accounting, and social entrepreneurship. See the Managing for Sustainability Certificate page for more information.

## Sustainable Urban Agriculture Graduate Certificate

**Certificate Advisor:** Amanda Weaver  
**E-mail:** amanda.weaver@ucdenver.edu

### Introduction

Please click [here](#) to see Geography and Environmental Sciences Department information.

The goal of the certificate program is to provide GES students advanced training in sustainable urban agriculture through the integration of university classroom study and field-based

practicum conducted at the department's field research station. Requirements for the certificate are therefore divided between on-campus courses and field courses.

Upon successful completion of the certificate, students will:

- Have knowledge of the history of urban farming
- Understand the modern agro-food system
- Participate in sustainable urban agricultural practices

## **Program Delivery**

This is both an on-campus and field-based program.

## **Declaring This Certificate**

- Please see the Certificate advisor.

## **General Requirements**

- [Click here for information about Academic Policies.](#)

## **Eligibility**

Sustainable Urban Agriculture has broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

## **Current CU Denver Students**

A student may begin the program in any semester or during the summer by making arrangements with the Certificate advisor. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

## **Former CU Denver Students or Graduates of Other Universities**

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

*Admissions:* <http://www.ucdenver.edu/admissions/non-degree/Pages/default.aspx>.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

## **PERFORMANCE EXPECTATIONS**

For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

## **Certificate Requirements**

1. Students must complete a minimum of 12 hours taken from the approved courses below.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All 12 credit hours for the certificate must be earned at the University of Colorado Denver.

## **Program Restrictions, Allowances and Recommendations**

1. Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver.
2. Any changes to the standard curriculum program must be approved in writing by the certificate advisor.
3. Courses taken within the Sustainable Urban Agriculture Certificate Program may be used towards one other degree requirement.
4. Please pay close attention to prerequisites for specific courses.

Take **all** of the following courses (9 credit hours):

- ENVS 5450 - Urban Food and Agriculture: Perspectives and Research
- ENVS 5460 - Sustainable Urban Agriculture Field Study I
- ENVS 5470 - Sustainable Urban Agriculture Field Study II

Take **one** of the following elective courses (3 credit hours):

- GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing
- GEOG 5085 - GIS Applications for the Urban Environment
- GEOG 5335 - Contemporary Environmental Issues
- GEOG 5640 - Urban Geography: Denver and the U.S.
- GEOG 5680 - Urban Sustainability: Perspectives and Practice
- GEOG 5939 - Internship (a sustainable agriculture internship with a local food/ urban agriculture community organization)

# Teaching College-level Language and Literacy

Graduate School Policies and Procedures apply to this program.

The English Department at the University of Colorado Denver offers a Graduate Certificate in Teaching College-level Language and Literacy. It fulfills the increasing needs of educators seeking to deepen and to broaden their specialization. It allows an English Master's Candidate to specialize in an area of study in addition to the primary area of degree focus. The certificate does not grant state licensure. It ensures competency for those who already are licensed, provides documentation in expertise for those teaching in community colleges, and enables specialization for those with master's degrees in related fields (i.e. Rhetoric, Composition, Literature, Film Studies, Humanities, Education).

*This certificate can be completed fully online, fully on campus, or a combination of the two.*

## General Requirements:

1. Students must complete a minimum of 18 ENGL credit hours
2. Students must complete all 18 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.
5. All courses must be completed with ENGL subject code.
6. All candidates must possess a Bachelor's of Arts in any field.

## Additional Information

Additional Information about the Graduate Certificate in Teaching College-level Language and Literacy may be obtained from:

**Associate Professor:** Rodney Herring

**Office:** 1061 9th St. Park, Room 102

**Phone:** 303-315-7848

**E-mail:** Rodney.Herring@ucdenver.edu

## Required Courses (12 Hours)

- ENGL 5093 - Teaching of Writing
- ENGL 5155 - Genres of Writing
- **OR**
- ENGL 5135 - English Language Study
- ENGL 5165 - Literacy and Technology
- ENGL 5601 - Principles and Practices of Second Language Acquisition
- **OR**
- ENGL 5651 - Second Language Writing

## Electives

Choose 2 graduate level courses (may include 6 hours of Denver Writing Project Summer Institute)

# Teaching College-level Literature and Film Graduate Certificate

Graduate School Policies and Procedures apply to this program

The English Department at the University of Colorado Denver offers a Graduate Certificate in Teaching College-level Literature and Film. It fulfills the increasing needs of educators seeking to deepen and to broaden their content specialization. It allows an English Master's Candidate to specialize in an area of study in addition to the primary area of degree focus.

The certificate does not grant state licensure. It ensures competency for those who already are licensed, provides documentation in expertise for those teaching in community colleges, and enables specialization for those with master's degrees in related fields (i.e. Rhetoric, Composition, Literature, Film Studies, Humanities, Education).

## General Requirements:

1. Students must complete a minimum of 18 ENGL credit hours
2. Students must complete all 18 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.
5. All courses must be completed with ENGL subject code.
6. All candidates must possess a Bachelor's of Arts in any field.

## **Additional Requirements:**

Additional Information about the Graduate Certificate in Teaching College-level Literature and Film may be obtained from:

**Associate Professor:** Nancy Ciccone  
**Office:** 1061 9th St. Park, Room 100  
**E-mail:** nancy.ciccone@ucdenver.edu  
**Phone:** 303-315-7833

## **Required Courses**

- ENGL 5100 - Introduction to Graduate Studies
- ENGL 5145 - Theory (*Literary and Rhetorical Theory*)
- ENGL 5155 - Genres of Writing

## **Electives**

Choose 3 graduate level Literature or Film courses

# **Teaching English Language Learners Graduate Certificate (CTELL)**

► Graduate School Policies and Procedures apply to this program.

**Program Advisor:** Joanne Addison, Professor  
**Office:** 1059 Ninth Street Park, Room 104  
**Telephone:** 303-315-7000  
**E-mail:** Joanne.Addison@ucdenver.edu

## **Program Description**

To meet the increasing needs of individuals seeking advanced training in teaching English as a second language, the English department at CU Denver offers a graduate Certificate in Teaching English Language Learners (CTELL).

The certificate program, which can be completed through CU Online, is designed to build the necessary skills to teach adults English as a second language through focused preparation. It is primarily aimed at native speakers of English who want to teach overseas, but may serve the needs of international students wanting to teach English in their home country or other countries.

Upon successful completion of the program, CTELL participants will be able to:

- Discuss the theoretical basis of second language instruction
- Demonstrate a variety of effective ESL teaching techniques
- Explain, in pedagogically relevant ways, the linguistic structures of the English language

## **Curriculum**

1. Students must complete a minimum of 12 ENGL credit hours
2. Students must complete all 12 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits for the certificate must be completed with CU Denver faculty.
5. All courses must be completed with ENGL subject code.
6. All candidates must possess a Bachelor's of Arts in any field.

## **Required Courses**

- ENGL 5171 - Language Theory
- ENGL 5601 - Principles and Practices of Second Language Acquisition
- ENGL 5651 - Second Language Writing

**Total: 9 Hours**

## **Elective Courses (Choose one of the following)**

- ENGL 5093 - Teaching of Writing

- An alternative elective such as a special topic course (i.e., ENGL 5190 Advanced Topics in Writing & Digital Studies ) approved by the program advisor.
- An internship (ENGL 5939 Internship ) approved by the program advisor.

**Total: 3 Hours**

**Total: 12 Hours**

## **Additional Information**

### **LENGTH OF TIME**

The course of study will typically last one academic year, including the summer session.

### **WHEN YOU MAY BEGIN**

You may begin in any semester. There is no fixed deadline for application for admission.

### **PREREQUISITES**

All applicants must have a bachelor's degree or the equivalent, with a 3.0 GPA, to be accepted to the program. Graduate students at CU Denver will also be permitted to apply for the certificate while they are concurrently completing another graduate degree. Permission may not be granted to graduate students in the applied linguistics option of the Master of Arts in English program.

Non-native speakers of English are required to submit an official TOEFL (Test of English as a Foreign Language) report showing a score of at least 600. Those who score below 600 but above 500 on the TOEFL may be admitted conditionally to the program. Under these conditions, students will have their English language skills assessed by the faculty of the program immediately after they arrive on campus to determine whether further courses are needed to develop English language proficiency. After assessment, the students may be assigned to full-time language study in an intensive English program, permitted to take graduate-level classes on a conditional basis along with further designated language study or permitted to begin graduate study without further restrictions.

# **Teaching for Cultural and Linguistic Diversity (TCLD) Certificate**

The TCLD Certificate is a graduate certificate providing a foundation in teaching content to bilingual or multilingual students. The program is designed for content-area teachers (math, science, social studies, etc.) who have English language learners in their classes. This certificate is also valuable to content area coaches or administrators who provide support for teachers

with English language learners. The certificate is appropriate for public school and community college personnel.

The certificate totals nine credits. All courses are three graduate credit hours and may be applied directly toward a full master's degree in CLDE while also fulfilling the requirements toward a Colorado Culturally and Linguistically Diverse Education Endorsement. Additional courses and applications are required for the master's degree and/or endorsement. Those pursuing the TCLD certificate must complete any three of the following courses:

- CLDE 5030 - Language Development of Multilingual Learners: Advanced
- CLDE 5050 - Assessment & Advocacy for Multilingual Learners
- CLDE 5070 - Linguistic Analysis of English
- CLDE 5820 - Teaching Multilingual Learners, Advanced

# U.S. History Graduate Certificate

## Introduction

The U.S. History Graduate Certificate provides CU Denver graduate students and the wider community the opportunity to explore topics in United States History while simultaneously learning professional skills in historical research and historical dissemination. This Certificate is designed for students interested in pursuing a graduate-level education in United States History and for professionals seeking accreditation and/or promotion in the fields of education, museums, historic preservation, government, law, and the arts.

The certificate can stand on its own or it can serve as a stepping stone to a Master's Degree in History.

Upon successful completion of the certificate, students will:

- Be able to pursue independent historical research projects
- Be able to analyze debates among historians
- Be able to analyze historical documents and develop arguments from them

## Program Delivery

This program has one on-campus requirement and the remainder of the certificate can be completed on campus or online.

## Declaring This Certificate

Applicants must have a B.A. or B.S. degree.

Interested students must register their intent to complete the certificate with the History Department Graduate Advisor, Ryan Crewe (Ryan.Crewe@ucdenver.edu). Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

## General Requirements

[Click here for information about Academic Policies.](#)

## Program Requirements

1. Students must complete a minimum of 12 HIST credit hours.
2. Students must complete all HIST credits for the certificate at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA.
4. Students must complete all HIST credits for the certificate with CU Denver faculty.

## Required Courses

Complete the following required course:

- HIST 6013 - Introduction to the Professional Study of History

Complete **one** of the following 6000-level courses:

- HIST 6931 - Readings: Special Subjects in History (may be taken as an elective, if not taken in this category)
- HIST 6989 - Seminar: Special Subjects in History (may be taken as an elective, if not taken in this category)

Complete **two** of the following approved elective courses:

- HIST 5201 - Core Themes in U.S. History
- HIST 5209 - Race, Religion, and Belonging
- HIST 5210 - The American Revolution
- HIST 5212 - Civil War and Reconstruction
- HIST 5216 - History of American Popular Culture
- HIST 5217 - Consumer Culture
- HIST 5220 - U.S. Foreign Policy Since 1912
- HIST 5225 - Urban America: Colonial Times to the Present

- HIST 5226 - Capitalism in America
- HIST 5227 - American West
- HIST 5228 - Western Art and Architecture
- HIST 5229 - Colorado Historic Places
- HIST 5230 - Women in the West
- HIST 5234 - Introduction to Public History
- HIST 5236 - Colorado Mining and Railroads
- HIST 5238 - U.S. History Through Fiction
- HIST 5240 - National Parks History
- HIST 5242 - Oral History
- HIST 5243 - Public History Administration
- HIST 5244 - Interpretation of History in Museums: Exhibits and Education
- HIST 5245 - Heritage Tourism
- HIST 5260 - Digital Studies and Strategies
- HIST 5306 - Survey of Feminist Thought
- HIST 5307 - History of Sexuality
- HIST 5308 - Crime, Policing, and Justice in American History
- HIST 5343 - Women & Gender in US History
- HIST 5491 - United States History, 1865-1919
- HIST 5492 - United States History, 1919-1945
- HIST 5493 - United States History, 1945-1973
- HIST 5494 - Red and Blue America: U.S. History, 1973-Present

## Women's and Gender Studies Graduate Certificate

► Graduate School Policies and Procedures apply to this program.

The Women's and Gender Studies Graduate Certificate is administered through the Women's and Gender Studies program in the College of Liberal Arts and Sciences at the University of Colorado Denver. It is designed to provide members of the CU Denver population and public with specialized knowledge of the history, politics, literature and social practices related to women's and gender concerns. Acceptance into the certificate program is subject to CU Denver Graduate School Policies and Procedures.

The WGST certificate is available to any qualified graduate student or non-degree seeking graduate-level student at CU Denver. Students begin with a required, graduate-level methodology or foundational course before pursuing a combination of WGST-related course work. Upon completion of the certificate, students will have foundational and theoretical knowledge of the major concerns of women's and gender studies.

All prospective students must complete and submit an application to the program which can be obtained from the graduate advisor. Upon admission to the certificate program, students are eligible for the certificate.

## Program Requirements

1. Students must complete a minimum of 12 credit hours from approved coursework.
2. Students must complete a minimum of 9 credit hours for the certificate at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA.
4. Students must complete all credits for the certificate with CU Denver faculty.

## Courses

Note: Some of the following courses may have prerequisites that *must* be met. Please see course descriptions.

## Required Course

Choose one of the following:

- ENGL 5306 - Survey of Feminist Thought
- HIST 5306 - Survey of Feminist Thought
- WGST 5306 - Survey of Feminist Thought
- HUMN 6010 - Methods and Theories of Feminism and Gender
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- WGST 6010 - Methods and Theories of Feminism and Gender Studies

**Total: 3 Hours**

## Elective Courses (choose three)

These courses must be explicitly women's and/or gender and/or identity-based courses. They can be taken through any CU Denver department or program with the approval of an advisor. Only one 4000-level elective may be counted toward the certificate. All other course work must be 5000-level or above.

The following is a representative listing of WGST-related courses that may be taken toward the certificate; it is not comprehensive. Please note that some of these courses may be taught sporadically. Students should meet with their advisor to plan their course of study.

- ANTH 5200 - Gender in Cross-Cultural Perspective
- COMM 5020 - Feminist Perspectives on Communication
- COMM 5265 - Gender and Communication
- CRJU 5553 - Women, Crime, and Justice
- ENGL 4510 - Whores and Saints: Medieval Women
- -OR- ENGL 5510 - Whores and Saints: Medieval Women
- ENGL 5000 - Studies of Major Authors  
(depending on author being studied; e.g., Virginia Woolf, George Sand, etc.)
- ENGL 5306 - Survey of Feminist Thought
- HIST 5306 - Survey of Feminist Thought
- -OR- WGST 5306 - Survey of Feminist Thought
- ENGL 5308 - Contemporary Feminist Thought
- -OR- WGST 5308 - Contemporary Feminist Thought
- HIST 5303 - Sex and Gender in Modern Britain
- -OR- WGST 5303 - Sex and Gender in Modern Britain
- HIST 5307 - History of Sexuality
- -OR- WGST 5307 - History of Sexuality
- HIST 5345 - Gender, Science, and Medicine: 1600 to the Present
- -OR- WGST 5345 - Gender, Science and Medicine: 1600 to the Present
- HUMN 5720 - Sexuality, Gender and Their Visual Representation
- -OR- SSCI 5720 - Sexuality, Gender and Their Visual Representation
- PSCI 5245 - Gender, Globalization and Development
- -OR- WGST 5248 - Gender, Globalization and Development
- PSCI 5555 - International Women's Resistance
- -OR- WGST 5555 - International Women's Resistance
- PUAD 5910 - Nature and Scope of Interpersonal Violence
- PUAD 5920 - The Psychology of Interpersonal Violence
- PUAD 5930 - Interpersonal Violence Law and Policy
- SOCY 5550 - Seminar: Sociology of the Family
- SSCI 6010 - Methods and Theories of Feminism and Gender Studies
- -OR- WGST 6010 - Methods and Theories of Feminism and Gender Studies

### **Total: 9 Hours**

## Accounting

### **ACCT 2200 - Financial Accounting and Financial Statement Analysis**

The financial accounting process, the role of the profession and the analysis of financial statements. Principal focus on interpretation of financial statements, with emphasis on asset and liability valuation problems and the determination of net income. Prereq: MATH 1070 or MATH 1060 or MATH 1110 or MATH 1080 or MATH 1130 or MATH 1401 or MATH 1120 with a grade of C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 2220 - Managerial Accounting and Professional Issues**

Introduces managerial accounting. Shows managers how to use accounting information to make decisions. Principal focus on cost behavior analysis, budgeting and product costing. Prereq: MATH 1070, or MATH 1060, or MATH 1080, or MATH 1110, or MATH 1120, or MATH 1130, or MATH 1401 with a grade of C- or higher and ACCT 2200 with a C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 2550 - Introductory Accounting for Entrepreneurs and the Arts**

An integration of financial and managerial accounting processes as they relate to Entrepreneurs, Arts & Media managers and similar applications. This course will cover the analysis and interpretation of financial statements, asset and liability valuation and the determination of net income. Incorporates the use of accounting information to make decisions focusing on cost behavior analysis, budgeting and product costing in entrepreneurial and arts related businesses. Prereq: MATH 1070 or 1110. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 3220 - Intermediate Financial Accounting I**

A foundation course in financial accounting, this course provides an intensive analysis of generally accepted accounting principles, accounting theory and the construction and interrelation of financial statements for public corporations. Encourages critical thought and application of financial accounting standards to business transactions. A grade of C or higher is required in this course to proceed to the next level ACCT course or receive credit for the CPA license. Prereq: ACCT 2220 and DSCI/BANA 2010 both with a grade of 'C-' or higher. Restriction:

Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 3230 - Intermediate Financial Accounting II**

Continuing the intensive coverage of financial accounting from ACCT 3220/ACCT 6031, this course covers concepts of financial accounting theory and generally accepted accounting principles not covered in 3220/6031. This typically includes detailed coverage of liabilities and equity, especially the topics of leases, deferred taxes, pensions and stock-options. A grade of C or higher is required in this course to proceed to the next level ACCT course or receive credit for the CPA license. Prereq: ACCT 3220, completed with a grade of a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6032. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 3320 - Intermediate Cost Accounting**

Cost accounting links financial and managerial accounting and emphasizes communication between accountants and managers. Topics include managerial uses of cost data for decision making, analysis of activities and cost behavior, the role of accounting in planning and control, and computer-assisted decision modelling. A grade of C or higher is required in this course to proceed to the next level ACCT course or receive credit for the CPA license. Prereq: ACCT 2220 and DSCI/BANA 2010 both with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6070. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 3939 - Internship**

Supervised experiences involving the application of concepts and skills in an employment situation. To enroll in an internship, students must work with the Experiential Learning Center on campus and have a 2.40 GPA or higher. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **ACCT 4030 - Financial Accounting**

Analysis of financial accounting concepts, the development of accounting thought and principles and critical review of generally accepted accounting principles. (Not recommended for candidates planning to sit for the CPA examination.) Note: Students who have taken ACCT 3220 or ACCT 3230 (or equivalent) may not take this course. Prereq: ACCT 2200 and ACCT 2220 or equivalent. Must have a 'C' or better in courses. Strictly enforced. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4054 - Accounting Information Systems**

This course focuses on the analysis, design, implementation and control of accounting information systems. Emphasis is placed on primary business processes including documentation, modeling, retrieving information to support managerial decisions and controlling risks. Topics include transaction cycles, relational database modeling, data analytics and information systems risks and controls. Must earn a grade of C or better to qualify for graduation at the UG level and to receive credit for the CPA license. Prereq: ACCT 3220 with a grade of C or higher and ISMG 2050 with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6054. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4070 - Management Accounting**

Designed to provide students with a foundation in management accounting models and information, with emphasis on management decision making uses of accounting information. (Not recommended for candidates planning to sit for the CPA examination.) Prereq: ACCT 2200 and 2220 or equivalent with a grade of a 'C' or better. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Note: Students who have taken ACCT 3320 or its equivalent may not take this course. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4240 - Advanced Financial Accounting**

Advanced financial accounting concepts and practices with emphasis on accounting for partnerships, business combinations and consolidations. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6024. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4280 - Accounting Ethics**

This course examines the ethical responsibilities of accounting professionals from a personal and professional perspective, including examples of ethical dilemmas accounting professionals confront. The course utilizes various authoritative codes of conduct, professional standards and applied ethical theory as ethical guidance for auditors, accountants, tax professionals, and accounting management. A variety of case studies are employed to give students practice in developing a decision making approach in dealing with difficult ethical scenarios. Prereq ACCT 4620. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4282 - Capitalism, Accounting and Ethical Choices**

Examines the development of the U.S. economy from 1850 to today with emphasis on the ethics of accounting, capitalism, and government controls. Prereq: ACCT 3220 with a C or higher

or permission. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4330 - Managerial Accounting Problems and Cases**

Critical analysis of advanced topics in managerial accounting. Considerable use of cases and current readings. Prereq: Completion of ACCT 3320 with a grade of 'C'. Strictly enforced. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4370 - International Accounting**

Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context, international auditing practices and procedures, international tax implications and the implications of operating within the regulations of the Foreign Corrupt Practices Act, the European Union, North American Free Trade Agreement and General Agreement on Tariffs and Trade. Prereq: Completion of ACCT 3220 with a grade of 'C' or better. Strictly enforced. Cross-listed with ACCT 6370 and INTB 6370. Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4410 - Fundamentals of Federal Income Tax**

Provisions and procedures of federal income tax laws and requirements affecting individuals and business organizations, including problems of tax planning and compliance. Note: Students cannot receive credit for both ACCT 4410 and ACCT 6140. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6140. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4420 - Taxation of Business Entities**

A federal tax course stressing tax planning issues affecting corporations (both C corporations and S corporations) and partnerships. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4420 and ACCT 6150. Cross listed with ACCT 6150. Prereq: ACCT 2220 with a C- or higher. Prereq: ACCT 4410 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4442 - Accounting: Professional Research and Communications**

This course provides students with a structured approach to researching and communicating practice-oriented financial accounting, auditing, and tax-related issues. After completing this

course, students should be able to effectively: (1) Communicate (both oral and written) solutions to practice-oriented financial accounting, auditing, and tax-related issues. (2) Navigate through U.S. and international accounting, auditing, and tax authorities. (3) Conduct systematic research for all types of accounting-related problems then reach and communicate efficient conclusions using a variety of techniques. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Prereq: ACCT 4620 and ACCT 4410 both with a grade of C or higher. Cross-listed with ACCT 6442. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4490 - Experiential Learning**

Designed to provide practical knowledge on developing a professional practice in accounting or financial management. Topics: Marketing, operating a professional practice. Lectures, guest speakers student projects. Prereq: ACCT 3220 completed with a 'C' or better, or permission of instructor. Cross-listed with ACCT 6490. Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4520 - Oil and Gas Accounting**

The Oil and Gas Accounting course is designed to give students an overview of the oil and gas industry and the particular accounting issues this industry faces. The focus is on the oil and gas industry but many of the issues discussed are appropriate and applicable to all energy-related entities. This is a valuable learning experience for those interested in acquiring an understanding of the accounting issues for energy management firms in preparation for entry into public accounting. The course enjoys support from the energy industry in the form of guest speakers and project ideas. Prereq: ACCT 3220 with a grade of C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6520. Max Hours: 3 credits. **Semester Hours:** 3 to 3

### **ACCT 4620 - Auditing Theory**

Auditing Theory: Focus on the professional responsibilities of CPAs, generally accepted auditing standards, and PCAOB auditing standards, with emphasis on the theory underlying the development of standards, objectives and procedures. Students cannot receive credit for both ACCT 4620 & ACCT 6020. Note: A grade of C or higher must be earned to receive credit for the CPA license. A grade of B or higher must be earned if planning to take 6025 in the future. Prereq: ACCT 3220 and 4054 with a grade of C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6020. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4625 - Auditing Practice**

Focus on the application of generally accepted auditing standards and PCAOB auditing standards to practice. Emphasis on procedures used by CPAs to gather and document audit evidence. Prereq: ACCT 4620 with a grade of C (2.0) or higher. Note: A grade of C or higher must

be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4625 and ACCT 6025. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4780 - Accounting and Information Systems Processes and Controls**

The course is designed to develop knowledge and skills used to understand and evaluate corporate accounting processes and systems. It focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach is used to present concepts and techniques for evaluating the adequacy of system processes and controls. Cross-listed with ACCT 6510, ISMG 4780, and ISMG 6510. Prereq: Completion of ACCT 2200, ACCT 2220 and ACCT 3054 with a grade of 'C' or better (strictly enforced). Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4800 - Accounting for Government and Nonprofit Organizations**

Planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting and fund accounting. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6080. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4840 - Independent Study**

Restricted to undergraduate Business majors with junior standing or higher. Max hours: 8 Credits. **Semester Hours:** 1 to 8

### **ACCT 4900 - Professional Certification in Accounting**

This course will prepare students for the Uniform Certified Public Accountant Examination, including the Auditing and Attestation (AUD), Business Environment and Concepts (BEC), Financial Accounting and Reporting (FAR), and Regulation (REG) sections. Topical coverage will include a balance of most-tested topics, difficult topics, and exposure to topics not addressed in required accounting degree courses. Note: there will be a materials fee of \$1,100 for this course. All materials will continue to be available until successful passage of the CPA Exam. Note: Undergraduate Accounting students typically perform better in this class when taking it during the final semester prior to graduation. Restriction: Restricted to Undergraduate and MS Accounting students. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4915 - Accounting for the Public Interest**

Applies accounting knowledge and concepts in a not-for-profit organization. Student volunteers help with functions or special projects and are supervised by both faculty members and

personnel from the agency to which they are assigned. Prereq: Permission of instructor. Cross-listed with ACCT 6015. Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 4950 - Special Topics**

Research methods and results, special topics and professional developments in accounting. Consult the current 'Schedule Planner' for semester offerings. Prereq: Varies according to topic and instructor requirements. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **ACCT 5939 - Internship**

Max hours: 3 Credits. **Semester Hours:** 1 to 3

### **ACCT 6015 - Accounting for the Public Interest**

Applies accounting knowledge and concepts in a not-for-profit organization. Student volunteers help with functions or special projects and are supervised by both faculty members and personnel from the agency to which they are assigned Note: This class is rarely offered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with ACCT 4915. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6020 - Auditing Theory**

Focus on the professional responsibilities of CPAs, generally accepted auditing standards, and PCAOB auditing standards, with emphasis on the theory underlying the development of standards, objectives and procedures. Students cannot receive credit for both ACCT 4620 & ACCT 6020. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6030 or ACCT 6031 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4620. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6024 - Advanced Financial Accounting**

Advanced financial accounting concepts and practice with emphasis on accounting for partnerships, business combinations and consolidations. Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4240. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6025 - Auditing Practice**

Focus on the application of generally accepted auditing standards and PCAOB auditing standards to practice. Emphasis on procedures used by CPAs to gather and document audit evidence. Prereq: ACCT 6020 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Students cannot receive credit for both ACCT 4625 and ACCT 6025. Note: A grade of C or higher must be earned to receive credit for the CPA license. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6031 - Intermediate Financial Accounting I**

This course is designed to provide students with a comprehensive review and understanding of financial accounting principles, procedures, and financial statements as well as the measurement of income and assets. Skills related to problem solving, analytical thinking, and writing will also be developed. NOTE: Students who have taken ACCT 3220 (or equivalent) may not receive credit for ACCT 6031. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6032 - Intermediate Financial Accounting II**

Continuing the intensive coverage of financial accounting from ACCT 3220/ACCT 6031, this course covers concepts of financial accounting theory and generally accepted accounting principles not covered in 3220/6031. This typically includes detailed coverage of liabilities and equity, especially the topics of leases, deferred taxes, pensions and stock-options. Note: A grade of C or higher must be earned to receive credit for the CPA license. NOTE: Students who have taken ACCT 3230 (or equivalent) may not receive credit for ACCT 6032. Prereq: ACCT 6031 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 3230. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6033 - Advanced Managerial Accounting**

Critical analysis of advanced topics in managerial accounting. Note: This class is rarely offered. Prereq: ACCT 3320. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6054 - Accounting Information Systems**

This course focuses on the analysis, design, implementation and control of accounting information systems. Emphasis is placed on primary business processes including documentation, modeling, retrieving information to support managerial decisions and controlling risks. Topics include transaction cycles, relational database modeling, data analytics and information systems risks and controls. Must earn a grade of C or better to qualify for graduation at the UG level and to receive credit for the CPA license. Prereq: ACCT 6031 or BUSN 6550 or department consent. Restriction: Restricted to graduate majors and NDGR majors with

a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4054 (previously ACCT 3054). Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6070 - Intermediate Cost Accounting**

Cost accounting links financial and managerial accounting and emphasizes communication between accountants and managers. Topics include managerial uses of cost data for decision making, analysis of activities and cost behavior, the role of accounting in planning and control, and computer-assisted decision modelling. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: STUDENTS WHO HAVE TAKEN ACCT 3320 (or equivalent) MAY NOT TAKE THIS COURSE. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 3320. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6080 - Accounting for Government and Nonprofit Organizations**

Nonprofit Organizations. Planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting and fund accounting. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 or BUSN 6550 or ACCT 6031 each with a C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4800. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6140 - Fundamentals of Federal Income Tax**

Provisions and procedures of federal income tax laws and requirements affecting individuals and business organizations, including problems of tax planning and compliance. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4410 and 6140. Cross-listed with ACCT 4410. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6150 - Taxation of Business Entities**

A federal tax course stressing tax planning issues affecting corporations (both C corporations and S corporations) and partnerships. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4420 and ACCT 6150. Cross-listed with ACCT 4420. Prereq: ACCT 6140 or ACCT 4410 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6220 - Seminar: Corporate Financial Strategy and Controls**

This course is designed to provide a comprehensive understanding of the wide ranging responsibilities of the Controller, including the timely and accurate preparation of the periodic financial statements, maintenance of an adequate records system, a comprehensive set of internal controls and budgets in order to manage and mitigate risk, how to enhance the accuracy of the company's reported financial results and ensure compliance with GAAP or IFRS. Topics also include techniques for cash forecasting, controlling and administering budgets, and developing effective long-range plans. Prereq: ACCT 6030 or ACCT 6032 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6225 - Controllership: Managerial Strategy and Benefits Analy**

This course is designed to provide a comprehensive understanding of the wide ranging responsibilities of the Controller from a managerial and tax accounting perspective. Topics include establishing a cost accounting system, planning and control of manufacturing costs, business and strategic planning, mergers and acquisitions and a variety of tax related issues such as employment tax, employee vs. contractor, and choice of entity. The course will also include a discussion of benefits analysis, stock based compensation, ISO, NQSO and 83b elections. Prereq: ACCT 6220 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6230 - Advanced Topics in Mergers and Acquisitions**

Mergers and acquisitions are often a key component of organizational strategy for growth and competitive advantage; yet empirical studies indicate many of these transactions fail to meet their intended objectives. This course prepares accounting students as financial leaders to positively influence the achievement of planned synergies and acculturation for more successful M&A transactions. Integrating perspectives from accounting and organizational development, course topics include transaction valuation, contingent consideration, and asset impairment testing to organizational systems theory and post-transaction integration. Prereq: Grade of C (2.0) or higher in ACCT 6020 or ACCT 4620 and ACCT 6070. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6250 - Seminar: Financial Accounting**

Nature and origin of accounting theory and the development of postulates, principles and practices. Methodology appropriate to development and evaluation of accounting theory, with special emphasis on accepted research standards and procedures. Note: A grade of C or higher must be earned to receive credit for the CPA license. Co-req: ACCT 6032 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6260 - Seminar: Managerial Accounting**

Focuses on the conceptual foundations of managerial accounting. Behavioral and quantitative approaches regarding information for decision making, planning, control, performance evaluation and other issues are investigated. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6070 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6280 - Accounting Ethics**

This course examines the ethical responsibilities of accounting professionals from a personal and professional perspective, including examples of ethical dilemmas accounting professionals confront. The course utilizes various authoritative codes of conduct, professional standards and applied ethical theory as ethical guidance for auditors, accountants, tax professionals, and accounting management. A variety of case studies are employed to give students practice in developing a decision making approach in dealing with difficult ethical scenarios. Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6282 - Capitalism, Accounting and Ethical Choices**

Examines the development of the U.S. economy from 1850 to today with emphasis on the ethics of accounting, capitalism, and government controls. Prereq: ACCT 2220 or BUSN 6550 (not strictly enforced). Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6285 - Accounting and Finance for Sustainability**

Topics in accounting and finance related to business sustainability include the merits and challenges of a triple-bottom-line perspective, mandatory and voluntary reporting, environmental liability measurement and disclosure, emissions trading, green investments, shareholder activism, microfinance, and socially responsible investing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6290 - Management Control Systems**

Focuses on the design and use of control systems which ensure that people in organizations behave consistently with the organizational goals. Controls for communication, motivation and performance evaluation (along with informational requirements) are stressed through analysis of cases and classroom discussion. Note: This class is rarely offered. Prereq: BUSN 6550 or equivalent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ACCT 6320 - White Collar and Financial Crimes**

Course provides an opportunity to examine criminal activity perpetrated by individuals and/or organizations in a position of trust. White collar and financial crimes are qualitatively different from street crimes or violent crimes, yet they are highly destructive. Cover: types of crime, social impact, prevention, detection, regulating etc. Prereq: BUSN 6550 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ACCT 6330 - Fraud Auditing**

This course provides an introduction to and guidance for creation of an effective fraud audit program in core business systems. The fraud audit is designed specifically to detect potential fraud and is vastly different than the traditional audit. Fraud auditing focuses on proven fraud methodology that allows auditors to discover fraud versus investigating it. The course: • Explains how to create a fraud audit program • Shows auditors how to locate fraud through the use of data mining • Focuses on proven methodology for detecting fraudulent transactions • Explores fraud discovery within specific corporate F&A functions, such as disbursement, procurement, payroll, revenue misstatement, inventory, journal entries, and management override. Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ACCT 6340 - Financial Statement Analysis**

Financial statements are used as an information source on which to base investment, lending potential or even employment. Designed to develop skills in using, understanding, analyzing, and interpreting financial statements and to make students aware of the value and limitations of financial statement information. Note: Should take in the third semester of the graduate program. Prereq: BUSN 6550 or ACCT 6031 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ACCT 6350 - Current Issues in Professional Accounting**

An in-depth analysis of current issues in the accounting profession, including ethics development, and validity of standards and regulations. Prereq: ACCT 3230, ACCT 4620, ACCT 6020 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ACCT 6360 - Fraud Examination**

This course examines the theories and methods of the full spectrum of fraud examination including prevention, detection, investigation, and adjudication. In this course, students will

explore the significant differences between fraud examination and auditing, going beyond detection into the investigative and adjudication process. Prereq: ACCT 6020 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6370 - International Accounting**

Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context, international auditing practices and procedures, international tax implications and the implications of operating within the regulations of the Foreign Corrupt Practices Act, the European Union, North American Free Trade Agreement and General Agreement on Tariffs and Trade. Prereq: BUSN 6550 or equivalent. Note: Students cannot receive credit for both ACCT 6370 and INTB 6370. IFRS's are reviewed and compared with the requirements of US GAAP. Cross-listed with INTB 6370 and ACCT 4370. Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6380 - Forensic Accounting**

An examination of investigative auditing, fraud auditing, litigation support, and economic quantification of damages. Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6400 - Taxation of C Corporations and Shareholders**

This course is a study of federal income tax problems facing corporations and corporate shareholders. The course addresses introductory corporate tax issues found in Subchapter C of the Internal Revenue Code, including defining a "corporation" for federal income tax purposes; tax consequences associated with the formation of a corporation; taxation of corporate operations (including an analysis of the differences that exist between earnings and profits, dividend distributions and taxable income); corporate redemption transactions; partial liquidations; complete liquidations; and the acquisition, sale and disposition of corporate entities in transactions governed by Sections 336(e) and 338 of the Internal Revenue Code. Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6410 - Advanced Tax for Individuals**

This course is an advanced federal income tax course stressing the use of the Internal Revenue Code, Treasury regulations, case law, and administrative guidance to resolve federal income tax

issues affecting individuals. Topics include items of gross income inclusion, exclusions, deductions, items of non-recognition, characterization of income, and tax rates. Prereq: Grade of C or higher in ACCT 6140 or ACCT 4410. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6442 - Accounting: Professional Research and Communications**

This course provides students with a structured approach to researching and communicating practice-oriented financial accounting, auditing, and tax-related issues. After completing this course, students should be able to effectively: (1) Communicate (both oral and written) solutions to practice-oriented financial accounting, auditing, and tax-related issues. (2) Navigate through U.S. and international accounting, auditing, and tax authorities. (3) Conduct systematic research for all types of accounting-related problems then reach and communicate efficient conclusions using a variety of techniques. Prereq: ACCT 6030 or ACCT 6032 or ACCT 3230 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4442. Max hours: **Semester Hours:** 3 to 3

### **ACCT 6450 - Tax Research**

This course provides a study of various methodologies used in tax research and tax planning and requires students to present their results through various forms of business communication. In particular, this course explores techniques (with an emphasis on electronic/on-line techniques) for locating and researching judicial cases, statutory materials and legislative histories, and administrative materials promulgated by the Internal Revenue Service applicable to tax-related issues and problems. Students must present their tax research results for various client-based hypothetical factual patterns in written formats, including memoranda and client letters, and through individual oral and group presentations. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6470 - Internal Auditing**

Intro course for business students and CIA candidates. Topics include: IA fundamentals; IA standards; internal controls; managing the IA department; IA working papers, procedures and evidences; fraud detection and prevention; ethics; evaluation of the IA function, and Sarbanes-Oxley Act of 2002. Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6480 - Partnership Taxation**

This course focuses on fundamental tax issues relating to partnerships and partners arising from the formation, operation, and liquidation of partnerships. Course work includes an examination of pertinent federal income tax returns of a partnership. Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6490 - Experiential Learning**

Designed to provide practical knowledge on developing a professional practice in accounting or financial management. Topics: Marketing, operating a professional practice. Lectures, guest speakers (if you are interested in being a guest lecturer for the class contact the instructor), and student projects. Prereq: ACCT 3220 or permission of instructor. Cross-listed with ACCT 4490. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6510 - Advanced Accounting Information Systems**

The course is designed to develop knowledge and skills used to understand and evaluate incorporating accounting processes and systems. Focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach is used to present concepts and techniques for evaluating the adequacy of system processes and controls. Prereq: ACCT 6054 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6520 - Issues in Oil and Gas Accounting**

The Oil and Gas Accounting course is a course designed to give students an overview of the oil and gas industry and the particular accounting issues this industry faces. The focus is on the oil and gas industry but many of the issues discussed are appropriate and applicable to all energy-related entities. This is a valuable learning experience for those interested in acquiring an understanding of the accounting issues for energy management firms in preparation for entry into public accounting. The course enjoys support from the energy industry in the form of guest speakers and project ideas. Prereq: BUSN 6550 or ACCT 3220 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with ACCT 4520. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6620 - Seminar: Auditing and Other Assurance Services**

A graduate seminar course providing in-depth exposure to specialized topics in auditing and other assurance services, with an emphasis on recent developments in the profession. Includes coverage of generally accepted auditing standards and PCAOB standards. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6020. Restriction:

Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6800 - Special Topics**

Research methods and results, special topics and professional developments in accounting. Consult the current 'Schedule Planner' for semester offerings as new special topics courses are frequently added. Prereq: Varies according to topics and instructor requirements. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **ACCT 6840 - Independent Study**

Permission of instructor required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Repeatable. Max Hours: 8 Credits. **Semester Hours:** 1 to 8

### **ACCT 6900 - Professional Certification in Accounting**

This course will prepare students for the Uniform Certified Public Accountant Examination, including the Auditing and Attestation (AUD), Business Environment and Concepts (BEC), Financial Accounting and Reporting (FAR), and Regulation (REG) sections. Topical coverage will include a balance of most-tested topics, difficult topics, and exposure to topics not addressed in required accounting degree courses. Note: there will be a materials fee of \$1,100 for this course. All materials will continue to be available until successful passage of the CPA Exam. Note: Undergraduate Accounting students typically perform better in this class when taking it during the final semester prior to graduation. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ACCT 6939 - Internship/Cooperative Education**

Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 15 semester hours for MS students and 21 hours for MBA students and a cumulative 3.2 GPA. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **ACCT 6950 - Master's Thesis**

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 8 Credits. **Semester Hours:** 1 to 8

## **Anthropology**

### **ANTH 1111 - Freshman Seminar**

Restriction: Restricted to Freshman level students. Repeatable. Max hours: 9 Credits.  
**Semester Hours:** 1 to 3

### **ANTH 1302 - Introduction to Archaeology**

Introduces the study of past cultures and their environments. Emphasis is on the scientific method, aspects of research design and analytical techniques used by archaeologists to determine chronology, taphonomy, source production areas, exchange networks, and human-environment interactions. Note: Three hours of lecture and a two-hour lab each week. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3 **Semester Hours:** 4 to 4

### **ANTH 1303 - Introduction to Biological Anthropology**

Introduces the study of human biological evolution, both processes and outcomes, from primate ancestors to fossil hominids to contemporary human populations. Methods of obtaining and interpreting data concerning the genetic, biological and evolutionary basis of physical variation in living and skeletal populations. Note: 3 hours of lecture and a 2 hour lab each week. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1 **Semester Hours:** 4 to 4

### **ANTH 2102 - Culture and the Human Experience**

An application of the concept of culture to several aspects of the human experience, including gender relations, emotion and personality, cognition, language, health and healing and economic behavior. In exploring these dimensions of the human experience, the course focuses on selected cultures from each of the world's major geographic areas. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3 **Semester Hours:** 3 to 3

### **ANTH 2400 - Exploring Culture through Social Media**

Introduction to social media and analysis applied to cultural change. Focus on theories and practices of non-fiction image-making and "doing digital ethnography" to examine a range of experience and knowledge among different societies, communities, technologies, policy discourses and ourselves. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 2840 - Independent Study**

Term offered: fall, spring, summer. Repeatable. Max Hours: 3 Credits. **Semester Hours:** 1 to 3

### **ANTH 3000 - Globalization, Migration and Transnationalism**

Examines the cultural dynamics of globalization, including: the development of special economic zones in the global south, rural to urban migration, transnational migration, the maintenance of transnational ties, and cross-border social formations. Reviews the dynamics of globalization through case studies and film. Term offered: spring. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ANTH 3042 - Lost Worlds and Crystal Skulls**

This class explores the differences between science and pseudoscience specifically within the realm of anthropology. Scientific method and critical thought are employed in a way that trains students to question and recognize the difference between fact and fiction in data. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3045 - Cannabis Culture**

Familiarizes students with anthropological approaches to the culture of cannabis, including medicinal and recreational. Topics: history, cultural uses, legalization, cannabis capitalism, health effects, race and inequality, regulatory policies, retailing and consumption. Ethnographic research for data collection emphasized. Term offered: summer. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ANTH 3101 - Foundations of Cultural Anthropology**

Covers current theories in cultural anthropology and discusses the nature of field work. Major schools of thought and actual field studies are explored with an emphasis on anthropological data gathering, analysis and writing. Prereq: ANTH 2102 with a C- or higher. Term offered: fall. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3121 - Language, Culture, and Communication**

Definitions of language and communication and their relationship to human behavior, thought and culture. The classification of languages, linguistic universals, language acquisition, multilingualism, and nonhuman communication, with consideration of the evolutionary implications of such studies. Prereq: ANTH 2102 with a C- or higher. Max Hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ANTH 3142 - Cultural Diversity in the Modern World**

An in-depth analysis of the phenomena of culture and application of the culture concept to understanding cultural diversity in the modern world. Applies the concept of culture to several basic aspects of human social life, for example: social class and gender relations, ethnicity, racism and sexism, education, health and economic behavior. Students explore these issues in the context of case studies of particular groups and/or communities, focusing primarily on the diversity of cultural expression in contemporary U.S. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3150 - Special Topics in Medical Anthropology**

Seminar series on current issues in medical anthropology. Faculty offer a range of different courses, including the political economy of drugs, health and human rights, and reproductive health. Prereq: ANTH 2102 with a C- or higher. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3301 - World Prehistory**

Explores of 3.5 million years of human cultural development that examines the prehistory of Africa, Asia, Europe and the Americas. Patterns and processes that underlie the earliest hominid expansion out of Africa, tool use, origins of fire, the peopling of the Americas, the development of metallurgy, the domestication of plants and animals and the rise of cities and the state are examined. Emphasis is on both regional developments and landmark projects that have helped clarify prehistory. Note: Introductory course in Archaeology (ANTH 1302) recommended. Term offered: fall, spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3315 - North American Archaeology**

Course provides a survey of the prehistoric and historic archaeology of the United States, Canada and Northern Mexico. Current knowledge of the subject and current debates are discussed. Prereq: ANTH 1302 with a C- or higher. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3316 - History of Human Environmental Impacts**

Humans exist as active members of an ecosystem. There is increasing awareness that human actions have changed the environment and continue to do so. While ecologists, climatologists, and engineers work to address current and future environmental problems, the discipline of archaeology can provide a time depth and crosscultural breadth of perspective on how such issues have impacted human societies. This course will investigate and critically assess the claim that environmental and ecological factors have played a key role in the dissolution of once thriving civilizations. Examples will be drawn from across time and space, specifically emphasizing the archaeological record and the perspective it provides on a problem that is of critical relevance today. In this course students will: 1) Learn how humans have engaged with their environments over the course of our species' evolutionary history; 2) Critically assess

contemporary discussions of collapse and ecocide by contextualizing humanenvironment interactions within the frameworks of resilience, niche construction, and ecosystem engineering; 3) Use 'lessons from the past' to inform contemporary ecological debates; 4) Objectively evaluate the factual basis of various claims made about how humans affect, have affected, and likely will affect their environments; 5) Actively engage with the community to build sustainable gardens. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3320 - Southwestern Archaeology**

Considers the origins, characteristics, and interrelationships of the major culture areas in the American southwest, including the Anasazi, Hohokam, Mogollon, Sinagua and Northern Mexico. Note: ANTH 1302 recommended but not required. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3410 - Anthropology of Work**

Explores the culture of workforces and workplaces. Ethnographic methods and collaborative research practices comprise the framework of the course to examine people, occupations and work cultures engaged in production and consumption of commodities at local and global levels. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3500 - Human Osteology**

Provides in-depth knowledge of human osteology, including the following topics: skeletal anatomy; age, sex and stature determination; skeletal trauma/pathology; and taphonomy. Recitation component provides hands-on experience with skeletal material. Prereq: ANTH 1303 with a C- or higher. Max Hours: 4 Credits. **Semester Hours:** 4 to 4

### **ANTH 3512 - Human Evolution**

Provides an overview of the fossil and archaeological evidence for human origins. Theory and method in paleoanthropology is emphasized. The goal is to outline current knowledge of human biological evolution and the lifeways of our evolutionary relatives. Prereq: ANTH 1303 with a C- or higher. Term offered: fall, spring. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3560 - Human Variation and Adaptation**

This course explores the nature of modern human biological variation and adaptation. We address the evolutionary and biological theory that informs our study of contemporary human anatomy and physiology. Topics covered include, the nature vs. nurture debate, variation in skin pigmentation and the concept of "race", skeletal adaptations, adaptations to extreme environments and sexbased variation. Term offered: every other year. Prereq: ANTH 1303 with a C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3590 - Primate Behavior Research at the Zoo**

Students will review information on primates, learn about data collection models, design a behavior observation project on captive primates, collect and analyze behavior data, write and present a formal scientific paper. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3666 - Anthropology of Death**

The primary goal of the course is to identify and understand the range of human expression through the treatment of human remains in anthropological literature with focus on burials, mortuary practices, and associated rituals. Along with more theoretical papers, specific case studies will be used to address a variety of topics and issues, such as historic and prehistoric social organization, bio-archaeology, cannibalism, human sacrifice, mummification, the ethics of studying human remains, and the treatment of pets in prehistory. The time range that we will cover in the course will span from the Neolithic to the early 20th century, and numerous cultures from all parts of the globe will be our subject matter. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 3939 - Internship**

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **ANTH 4040 - Anthropology of Food and Nutrition**

Examines the myriad relationships between food as a biological necessity and eating as a socially and culturally conditioned activity. Takes a biocultural perspective that considers not only the tremendous variety of foods we eat, but also the complex meanings and importance attached to food and eating. Prereq: Junior standing or higher. Cross-listed with ANTH 5040. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4050 - Quantitative Methods in Anthropology**

Surveys the ways of deriving meaning from anthropological data by numerical means, including, but not confined to basic statistical procedures. Prereq: Junior standing or higher. Cross-listed with ANTH 5053. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4121 - Zooarchaeology**

Introduction to the theory and methods of zooarchaeology through lectures, readings, and hands-on lab work identifying and analyzing mammalian skeletal material. Students will learn what mammalian remains indicate about biological and cultural evolution of humans. Cross-

listed with ANTH 5121. Prereq: ANTH 1303 with a C- or higher. Max Hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ANTH 4230 - Anthropology and Community Based Participatory Research**

The seminar explores anthropological critiques, knowledge production and multi-media approaches to community based participatory research (CBPR) such as photovoice and digital storytelling to understand the history of CBPR and analyze partnerships between university researchers and community representatives. Cross-listed with ANTH 5230. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4290 - Anthropology and Public Health**

"This course critically explores anthropological approaches to public health problems. Through a number of key issues and case studies, we examine how public health practice can be enhanced through anthropological research, theory and methodology. Prereq: Junior standing or higher. Cross-listed with ANTH 5290. Max hours: 3 Credits." **Semester Hours:** 3 to 3

### **ANTH 4300 - Migrant Health**

This course examines health issues associated with transnational migration from an anthropological point of view. Drawing upon case studies, we examine the health of migrant communities in both host and sending nations. Prereq: Junior standing or higher. Cross-listed with ANTH 5300. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4320 - Archaeology of Mexico and Central America**

Surveys the major prehistoric and protohistoric cultures and societies of that area of Mexico and Central America identified with the evolution of Meso-American civilization. Major topics include early human colonization of the Americas, the domestication of plants and animals, the emergence of regionally-based cultures and societies, trade and exchange and the evolution of urbanism and the state. Primary emphasis on such ancient cultures and societies as those of the Olmec, Zapotec, Maya, Teotihuacan, Toltec and Aztec. Prereq: Junior standing or higher. Cross-listed with ANTH 5320. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4330 - Lithic Analysis**

Examines the theoretical basis and methodological tools used by archaeologists in the analysis of prehistoric stone tools. Topics of discussion include the mechanics of stone fracture, typologies, use wear analysis and core reduction techniques. Prereq: Junior standing or higher. Cross-listed with ANTH 5330. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4350 - Anthropology of Globalization**

This course provides an overview of anthropological contributions to the study of globalization. Particular attention is devoted to: transformations in global capitalism, state and immigration policy, transnational families, health and transnationalism. Prereq: Junior standing or higher. Cross-listing ANTH 5350. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4380 - Archaeology of Hunters-Gatherers**

Explores the theory and methods used by archaeologists to investigate prehistoric hunter gatherers. Topics of concern include mobility, subsistence, procurement, and socio-political organization. Prereq: Junior standing or higher. Cross-listed with ANTH 5380. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4440 - Museums in the 21st Century**

This is an advanced course on natural history/anthropology museums. It will examine practical issues facing museums, and consider the complex questions that museums raise. The class includes lectures, discussions, and hands-on collection work, and exhibit/ outreach development. Cross-listed with ANTH 5440. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4500 - Advanced Issues in Human Evolution**

This flexible course offers an advanced treatment of issues in human biological evolution. Topics may emphasize morphological evolution, behavioral evolution, the environment of human evolution, non-human primate comparative information. Prereq: Junior standing or higher. Cross-listed with ANTH 5500. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4570 - Landscape Archaeology**

Introduces spatial archaeology through intrasite analysis and regional studies. Methods treated include site location and quantitative spatial organization. Theoretical topics include definitions of community, ancient urbanism and the impact of subsistence and politics on relations to the landscape. Prereq: Junior standing or higher. Cross-listed with ANTH 5570. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4580 - Neanderthals and the Origin of Modern Humans**

Focuses on the human fossil record for the taxon *Homo sapiens*, including the earliest members of this group ("early" or "archaic" *Homo sapiens*), the Neanderthals and so-called "anatomically modern" *Homo sapiens*. The goal of the course is to survey the major issues within the area of modern human origins, and to learn about the evolutionary relationships, lifeways and behaviors of these groups. Prereq: Junior standing or higher. Cross-listed with ANTH 5580. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4810 - Integrating Anthropology**

Designed to build on specialized course work in the subdisciplines of anthropology, this course emphasizes the basic concepts that integrate and unite the discipline and give it unique perspective. These are the concepts of culture, adaptation and human evolution. In the last several weeks of the course, students consider the applicability of the anthropological perspective to specific human issues. Note: Centers on the critical examination and discussion of presentations made by department faculty and graduate students. Note: this course assumes that students have completed course work equivalent to a minor in anthropology. Prereq: Junior standing or higher. Cross-listed with ANTH 5810. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 4840 - Independent Study**

Directed study based on a specific subfield of anthropology. Note: Permission of instructor required. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 3

### **ANTH 4995 - Global Study Topics**

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 3 to 9

### **ANTH 5000 - Special Topics in Anthropology**

Designed to give students a chance to evaluate critically some practical or theoretical problem under faculty supervision and to present results of their thinking to fellow students and instructors for critical evaluation. Prereq: Permission of instructor. Restriction: Restricted to Anthropology graduate students. Cross-listed with ANTH 4000. Repeatable. Max hours: 9 Credits. **Semester Hours:** 1 to 6

### **ANTH 5014 - Medical Anthropology: Global Health**

This course is concerned with the underlying biological and cultural determinants of health throughout the human life cycle in global and cross-cultural perspective. Note: The first of a two-course sequence in medical anthropology and global health studies; the second is ANTH 5024. Prereq: Graduate standing. Cross-listed with ANTH 4010. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5030 - Ethnobiology**

Considers the relationship between human society and plants and animals in the natural world. Primary focus on the perception and cognitive organization of the environment and how that

affects the definition and use of plants and animals as resources. Note: this course assumes that students have completed introductory coursework in anthropology and/or biology. Prereq: Graduate standing. Cross-listed with ANTH 4030. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5040 - Anthropology of Food and Nutrition**

Examines the myriad relationships between food as a biological necessity and eating as a socially and culturally conditioned activity. Takes a biocultural perspective that considers not only the tremendous variety of foods we eat, but also the complex meanings and importance attached to food and eating. Note: this course assumes that students have completed an introductory course in anthropology. Prereq: Graduate standing. Cross-listed with ANTH 4040. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5053 - Quantitative Methods in Anthropology**

Surveys the ways of deriving meaning from anthropological data by numerical means, including, but not confined to basic statistical procedure. Note: this course assumes that students have completed a college-level algebra course. Prereq: Graduate standing. Cross-listed with ANTH 4050. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5060 - Evolutionary Medicine**

Evolutionary medicine is a relatively new approach for understanding patterns of human health and disease. In this course, students will learn how human evolutionary history has shaped our susceptibility and resistance to both chronic and infectious diseases. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4060 and PBHL 4060. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5070 - Culture of Development and Globalization**

Anthropological critiques of development and globalization point out that they have occurred without regard for the diversity of human culture and human need. Beginning with this analysis, this course goes one step further by examining culture and values of development and how they affect the way development gets done. Note: students should consult with the instructor prior to enrolling in this course. Prereq: Graduate standing. Cross-listed with ANTH 4070. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5080 - Global Health Practice**

A travel-study course that provides students the opportunity to work on global health issues in the context of a supervised internship experience. In addition to a formal internship placement or directed research opportunity, students attend formal lectures and participate in seminars devoted to addressing those health issues most relevant to the country in which the course is

being taught. Note: this course assumes that students have completed HBSC/ANTH 4010/5014, HBSC/ANTH 4020/5024, HLTH 6070 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4080 and PBHL 4080. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5090 - Drug Syndemic**

Psychotropic drugs, both legal and illicit, are a predominant part of our everyday lives. This course examines their use and meaning within cultures, and the social, political and economic issues that surround their production, use and misuse. Note: this course assumes that students have completed an introductory course in cultural anthropology. Prereq: Graduate standing. Cross-listed with ANTH 4090 and PBHL 4090. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5121 - Zooarchaeology**

Introduction to the theory and methods of zooarchaeology through lectures, readings, and hands-on lab work identifying and analyzing mammalian skeletal material. Students will learn what mammalian remains indicate about biological and cultural evolution of humans. Cross-listed with ANTH 4121. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5150 - Human Biocultural Adaptability**

The chief concern of this course is the relationship between ourselves and our surroundings and the very immediate ways the environments in which we live affect us. The view is of ourselves as a part of, not apart from, these environments. Note: this course assumes that students have a background in cultural anthropology. Prereq: Graduate standing. Cross-listed with ANTH 4150. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5170 - Culture and the Environment**

Examines the historical origins of Western and non-Western ideas of the environment and the place of people within it. The imposition of Western ideas on non-Western groups regarding environmental policy is also examined, with special attention given to practices of conservation, development and transnational monetary policy. Note: this course assumes that students have completed ANTH 2102 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4170. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5180 - The Nature of Power**

Introduces the major theories of power used in contemporary anthropology, with an emphasis on cross-cultural perspectives. Explores how power is defined, determined and exercised globally and locally and how different systems of power articulate with one another. Note: this course assumes that students have completed ANTH 2102 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4180. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5200 - Gender in Cross-Cultural Perspective**

A comparative analysis of gender-based status and social roles of women and men, with women's status and roles emphasized due to their near-universal construction as the "other" sex. Examines, in cross- and sub-cultural context, the relations among women's status and their subsistence and reproductive activities; and the division of labor by sex, ideology and political economy. Prereq: Graduate standing. Cross-listed with ANTH 4200. Max Hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ANTH 5230 - Anthropology and Community Based Participatory Research**

The seminar explores anthropological critiques, knowledge production and multi-media approaches to community based participatory research (CBPR) such as photovoice and digital storytelling to understand the history of CBPR and analyze partnerships between university researchers and community representatives. Prereq: Graduate standing. Cross-listed with ANTH 4230. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5260 - Human Reproductive Ecology**

Considers the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, marriage patterns, birth seasonality, duration of birth intervals and reproductive senescence. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4260. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5270 - Anthropology of the Body**

Explores how society, through culture, creates collective and individual bodies; embodied experience across the life course; and the body as an expression of social power, bodily modification and adornment. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ANTH 4270. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5290 - Anthropology and Public Health**

This course critically explores anthropological approaches to public health problems. Through a number of key issues and case studies, we examine how public health practice can be enhanced through anthropological research, theory and methodology. Prereq: Graduate standing. Cross-listed with ANTH 4290. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5300 - Migrant Health**

This course examines health issues associated with transnational migration from an anthropological point of view. Drawing upon case studies, we examine the health of migrant

communities in both host and sending nations. Prereq: graduate standing. Cross-listed with ANTH 4300. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5320 - Archaeology of Mexico and Central America**

Surveys the major prehistoric and protohistoric cultures and societies of that area of Mexico and Central America identified with the evolution of Meso-American civilization. Major topics include early human colonization of the Americas, the domestication of plants and animals, the emergence of regionally-based cultures and societies, trade and exchange and the evolution of urbanism and the state. Primary emphasis on such ancient cultures and societies as those of the Olmec, Zapotec, Maya, Teotihuacan, Toltec and Aztec. Note: this course assumes that students have completed an introductory archaeology course. Prereq: Graduate standing. Cross-listed with ANTH 4320. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5330 - Lithic Analysis**

Examines the theoretical basis and methodological tools used by archaeologists in the analysis of prehistoric stone tools. Topics of discussion include the mechanics of stone fracture, typologies, use wear analysis and core reduction techniques. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4330. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5350 - Anthropology of Globalization**

This course provides an overview of anthropological contributions to the study of globalization. Particular attention is devoted to: transformations in global capitalism, state and immigration policy, transnational families, health and transnationalism. Note: previous coursework in anthropology is strongly recommended for success in this course. Prereq: Graduate standing. Cross-listing ANTH 4350. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5380 - Archaeology of Hunters-Gatherers**

Explores the theory and methods used by archaeologists to investigate prehistoric hunter gatherers. Topics of concern include mobility, subsistence, procurement, and socio-political organization. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4380. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5400 - Archaeology of Power and Inequality**

Addresses inequality and power through a long-term archaeological and theoretical perspective. Discusses explanations for the origins of power and inequality and their role in early small-scale societies and emerging complex politics. Note: this course assumes that

students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4400. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5440 - Museums in the 21st Century**

This is an advanced course on natural history/anthropology museums. It will examine practical issues facing museums, and consider the complex questions that museums raise. The class includes lectures, discussions, and hands-on collection work, and exhibit/ outreach development. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ANTH 4440. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5450 - Development and Conservation: Contemporary Issues**

Applies the theoretical paradigms of political ecology to contemporary issues of sustainable development. Case studies are chosen illustrating topics based on faculty expertise and student interaction. The first part of the course presents theoretical perspectives relevant to the chosen topic. In the second half, students participate in directed problem solving activities. Note: this course assumes that students have completed ANTH 4070 and 4170 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4450. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5460 - Development and Conservation: Theory and Practice**

Examines the praxis of anthropological knowledge of human ecosystem interaction and development of economic opportunities. Issues of biodiversity, resource conservation, sustainable development and globalization are studied. Note: this course assumes that students have completed ANTH 5450. Prereq: Graduate standing. Cross-listed with ANTH 4460. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5500 - Advanced Issues in Human Evolution**

This flexible course offers an advanced treatment of issues in human biological evolution. Topics may emphasize morphological evolution, behavioral evolution, the environment of human evolution, non-human primate comparative information. Prereq: Graduate standing. Cross-listed with ANTH 4500. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5530 - Anthropological Genetics**

An advanced survey of molecular and population genetics and their applications in anthropology. Topics vary, including but not limited to: genetic epidemiology, genetic distance studies, behavioral genetics, developmental genetics, sociobiology, and use of mitochondrial DNA to reconstruct population histories. Emphasis is on applications of new technology and methodology, as well as new genetic paradigms replacing classical models of genetic causation. Note: this course assumes that students have completed undergraduate coursework in

biological anthropology or genetics. Prereq: Graduate standing. Max Hours: 3 Credits.  
**Semester Hours:** 3 to 3

### **ANTH 5550 - Primate Comparative Anatomy**

Examines human and non-human primate anatomical diversity. Students learn primate anatomy and the morphological differences among species. Explanations for the evolutionary origins of differences are reviewed, focusing on evolutionary theory, comparative methods and biomechanics. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4550. Max Hours: 3 Credits.  
**Semester Hours:** 3 to 3

### **ANTH 5560 - Human Ecology**

Studies demographic and ecological variables as they relate to human populations. Aspects of natural selection, overpopulation and environmental deterioration are considered. Note: this course assumes that students have a background in biological or physical anthropology. Prereq: Graduate standing. Cross-listed with ANTH 4560. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5570 - Landscape Archaeology**

Introduces spatial archaeology through intrasite analysis and regional studies. Methods treated include site location and quantitative spatial organization. Theoretical topics include definitions of community, ancient urbanism and the impact of subsistence and politics on relations to the landscape. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4570. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5580 - Neanderthals and the Origin of Modern Humans**

Focuses on the human fossil record for the taxon *Homo sapiens*, including the earliest members of this group ("early" or "Archaic" *Homo sapiens*), the Neanderthals and so-called "Anatomically modern" *Homo sapiens*. The goal of the course is to survey the major issues within the area of modern human origins, and to learn about the evolutionary relationships, lifeways and behaviors of these groups. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4580. Max hours: 3 Credits.  
**Semester Hours:** 3 to 3

### **ANTH 5590 - Primate Behavior**

Studies nonhuman primate behavior with emphasis on understanding social behavior, ecology and issues related to human evolution. Note: this course assumes that students have

completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4590. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5600 - Medical Anthropology**

Introduces students to the theories and concepts of medical anthropology, the study of human health and illness. Explores conceptions of the body, modalities of healing, the clinical encounter, and new medical technologies. Prereq: Graduate standing. Cross-listed with ANTH 4600. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5640 - Darwinian Approach to Human Behavior**

The evolution of human behaviors from a Darwinian perspective, focusing on the natural selection of behaviors that maximize reproductive success. Includes topics such as male and female reproductive strategies, female mate choice, male violence and resource acquisition and control. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4640. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5800 - Special Topics in Medical Anthropology**

Seminar series on current issues in medical anthropology. Faculty offer a range of different courses, including the political economy of drugs, health and human rights, and reproductive health. Prereq: graduate standing. Repeatable. Cross-listed with ANTH 4800. Max hours: 9 Credits. **Semester Hours:** 3 to 9

### **ANTH 5810 - Integrating Anthropology**

Designed to build on specialized course work in the subdisciplines of anthropology, this course emphasizes the basic concepts that integrate and unite the discipline and give it unique perspective. These are the concepts of culture, adaptation and human evolution. In the last several weeks of the course, students consider the applicability of the anthropological perspective to specific human issues. Note: Centers on the critical examination and discussion of presentations made by department faculty and graduate students. Restriction: Restricted to Anthropology graduate students. Cross-listed with ANTH 4810. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 5840 - Independent Study**

Directed study based on a specific subfield of anthropology. Prereq: Permission of instructor required. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 6

### **ANTH 5880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **ANTH 5910 - Field Experience in Archaeology**

Students participate in archaeological field research and data recovery and conduct laboratory analysis of materials recovered in the field. Emphasis is placed on excavation technique and accuracy of record keeping. Note: this course assumes that students have a background in archaeology. Prereq: Graduate standing. Cross-listed with ANTH 4910. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 6

### **ANTH 5939 - Internship**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **ANTH 5995 - Global Study Topics**

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Max hours: 9 Credits. **Semester Hours:** 3 to 9

### **ANTH 6000 - Seminar in Current Research Topics**

An inquiry into current research of critical and general interest to anthropologists. Variable format. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 3

### **ANTH 6040 - Advanced Topics in Medical Anthropology**

A flexible seminar format for dealing with topics of special interest in medical anthropology on an advanced graduate level. Topics to be considered vary from semester to semester. Examples include high altitude adaptation, anthropological perspectives on substance abuse, epidemiology, environmental and occupational health, the health consequences of cultural change and cross-cultural psychiatry. Note: Topics vary from semester to semester. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 4

### **ANTH 6041 - Human Genetics: Legal, Ethical and Social Issues**

Examines legal, ethical and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice and property rights. Prereq: Graduate standing. Cross-listed with HBSC 6320 and 7320. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6063 - Qualitative Research Design and Methods**

Much of the data collected in the social sciences is interview and text-based. This course explores methods for collecting and analyzing these data and theoretical paradigms that underlie these methods. Restriction: Restricted to Anthropology graduate students. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6103 - Current Theory in Ethnography**

An in-depth inquiry into important theories in cultural anthropology through extensive primary source reading. Practice in formulating theory, critical thinking and theoretical writing are emphasized. Note: First course in a two-course required graduate sequence. Note: this course assumes that students have completed undergraduate coursework in cultural anthropology. Prereq: Graduate standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6133 - Anthropological Perspectives on Language**

An intensive introduction to linguistic anthropology. Following a brief survey of technical linguistics, focus is on: the roles of language in society; multilingualism; language and identity; language and worldview; language, gender, class and power; language as social action; and other topics. Students carry out investigations based on models from their reading, as well as responding to the theoretical approaches of the field. Note: this course assumes that students have completed undergraduate coursework in cultural anthropology. Prereq: Graduate standing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6307 - Contemporary Perspectives in Archaeology**

Explores contemporary theoretical methodological perspectives in archaeology. Structured to proceed from a survey of the history of archaeological thought based on recent retrospectives, to an analysis of works reflecting current perspectives and directions. Topics include: archaeological interpretation, classical versus scientific archaeology, versus culture-history, functionalist and materialist paradigms, ethno-archaeological and text-based studies, neo-evolutionism, interactionist models, Marxist perspectives, processual theory. Note: this course assumes that students have completed undergraduate coursework in archaeology. Prereq: Graduate standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6317 - Archaeological Research Design and Analysis**

Examines the methods and techniques used in archaeology, including theory-building, hypothesis testing and middle range theory. Core materials emphasize the learning and critique of basic archaeological assumptions and the methods and theories used to scrutinize the collection and interpretation of data. Topics include chronometric applications and paleo-environmental reconstruction. Note: this course assumes that students have completed ANTH 6307 or equivalent. Prereq: Graduate standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6503 - Biological Anthropology Core: The Fossil Record**

Examines the historical development and modern practice of biological anthropology, including the theoretical and methodological foundations of this field. Emphasis is placed on the evidence for human and non-human primate evolution and the processes that influenced this evolution. Prereq: Graduate standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6513 - Biological Anthropology Core: Modern Human Variation**

Considers the theory and methods used in investigations of biological variation in contemporary human populations. This includes the biological and cultural sources responsible for creating and maintaining contemporary variation as well as their functional consequences. Methods of research design and how to write a grant and scientific articles are considered. Prereq: Graduate standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ANTH 6520 - Seminar: Selected Topics in Physical Anthropology**

A flexible seminar format for dealing with topics of special interest in physical anthropology on an advanced graduate level. Topics vary from semester to semester. Examples include: anthropology of nutrition, paleoecology, primate evolution, field experience in paleontology, advanced osteology and advanced human ecology. Note: This course assumes that students have completed undergraduate work in biological/physical anthropology. Prereq: Restricted to Graduate and Graduate Non-Degree students. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 3 to 3

### **ANTH 6840 - Independent Study: ANTH**

Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 3

### **ANTH 6950 - Master's Thesis**

Term offered: fall, spring, summer. Max hours: 6 Credits. **Semester Hours:** 1 to 6

## **Arabic**

### **ARAB 1000 - Introduction to Cultures of the Arabic-Speaking World**

Introduces students to the Arabicspeaking cultures of North Africa, some Asian countries, and the Gulf States, with a focus on politics, culture, economics, literature and the arts. Taught in English. Term offered: spring, fall. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARAB 1010 - Beginning Arabic I**

Beginning course in Modern Standard Arabic (MSA) designed for students who have not had any experience with the language. Term offered: spring, fall. Max Hours: 5 Credits. **Semester Hours:** 5 to 5

### **ARAB 1020 - Beginning Arabic II**

Beginning course in Modern Standard Arabic (MSA) designed for students who have not had any experience with the language. Note: This course assumes that students have passed ARAB 1010 or equivalent, or have taken one year of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 5 Credits. **Semester Hours:** 5 to 5

### **ARAB 2110 - Intermediate Arabic I**

Third-semester course in Modern Standard Arabic (MSA) designed for students who have had two semesters or comparable proficiency in the language. Note: This course assumes that students have passed ARAB 1020 or equivalent, or have taken two years of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 1020 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARAB 2120 - Intermediate Arabic II**

Fourth-semester course in Modern Standard Arabic (MSA) designed for students who have had three semesters or comparable proficiency in the language. Note: This course assumes that students have passed ARAB 2110 or equivalent, or have taken three years of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 2110 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARAB 2840 - Independent Study**

Independent study for students wishing to pursue nonoffered studies in Arabic language and culture. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 3

### **ARAB 4880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **ARAB 5880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

## **Architecture**

### **ARCH 1110 - Introduction to Architecture**

Introduces students to the essential ways of looking at and thinking about buildings, sites and cities, exposing students to the various perspectives, positions and practices that they will encounter in both an architecture curriculum and in architectural practice. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 1710 - Architectural Drawing: Analysis and Representation**

This course explores the development of graphic skills emphasizing drawing as a means to analyze and represent architectural ideas throughout the design process. Using freehand and mechanical drawing methods students will learn the conventions and opportunities of the three architectural projections. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 2110 - Design Studio I**

Introduces students to the principles of design and composition through studies of architecture's formal, spatial, and geometric systems. Students explore these using a variety of drawing techniques including diagramming and drawings that are exploratory, analytical and developmental. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 2230 - Architectural History I**

Introduces architecture and urbanism from prehistory to the mid-seventeenth century by exploring the social, cultural, technical, philosophical and aesthetic ideas that shaped buildings and other architectural and urban settings in different parts of the world. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3110 - Design Studio II**

Introduces students to the expressive potential of architecture's elements and systems. Students explore techniques for translating and expressing ideas in buildings through the static, dynamic and sequential manipulation of architectural form and space. Prereq: ARCH 2110. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 3120 - Design Studio III**

Focuses on the design of buildings in their relationship to physical, natural and cultural contexts. Students explore non-formal concepts and translate them into architectural experiences that integrate program, site and climate. Prereq: ARCH 3110. Restriction: Must be an undergraduate Architecture student. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 3130 - Construction Practices: Material and Structural Systems**

Provides an overview of the materials, systems, assemblies and processes that inform the design and construction of buildings, reviewing the building technologies and developing student understandings of the interrelationship between the interconnected elements and systems that define buildings and spaces. Prereq: PHYS 2010/2030 and MATH 1130 are recommended. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3230 - Architectural History II**

Introduces architecture and urbanism from the mid-seventeenth century to the present, exploring the forces that shaped buildings and other architectural and urban settings in different parts of the world. Prereq: ARCH 2230. Restriction: Open to all undergraduate majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3330 - Building Systems I**

Introduces the concepts of thermal behavior of buildings, climate as a determinant of building design, energy use in buildings, natural and mechanical means of environmental control, plumbing, electrical, communication systems, water supply and sanitation systems. Recommended Prereq: MATH 1130 OR MATH 1110 & 1120; PHYS 2010/2030 OR PHYS 2311/2321. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3340 - Theory of Structures I**

Introduction to the analysis and design of structural elements and focuses on the principles of statics and the strength of materials. Topics include stress determination, deflection and the behaviors of tension, compression and shear in various structural elements. Recommended Prereq: MATH 1130 OR MATH 1110 & 1120; PHYS 2010/2030 OR PHYS 2311/2321. Restriction:

Restricted to undergraduate ARCH students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3430 - Construction Practices: Building Envelope**

Discusses the principles and processes of building construction and introduces the major systems and assemblies that inform construction practices. Stresses the relationship between architectural concepts and emerging building technologies, teaching students how to select appropriate materials, systems and assemblies. Prereq: ARCH 3130. Restricted to sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3600 - Special Topics Cultural**

Special topics in architecture studies related to cultural inquiries including theory, cultural diversity, and/or cross cultural thinking. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **ARCH 3601 - History of American Architecture**

This course investigates the history of architecture in the United States as a chronological survey of buildings, architects, landscapes, and urban forms and as an exploration of the social, political, economic, technological, and similar issues that inform this built environment. Prereq: ARCH 2230 and 3230. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3602 - Architecture Photography**

Architecture elective in photography of space, interior, and exterior with an emphasis on design composition of architecture. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3603 - Modern Architecture**

Examination of that period in architecture called the Modern Movement, its proponents and its influence on the design of buildings today. Extensive readings and writings required. Prereq: ARCH 2230. Restriction: Restricted to Sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3690 - Cultural Research Abroad**

Topics in architecture studies related to cultural inquiries including theory, cultural diversity, and/or cross cultural thinking in other cultures. Work shall include preparation in culture, history and language skills in other countries. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 3 to 3

### **ARCH 3691 - Cultural Design Abroad**

Design topics in architecture studies related to cultural inquiries including design, cultural implications of design, and/or cross cultural application of design. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 3 to 3

### **ARCH 3692 - International: Project Delivery**

This course is the delivery of the design solution developed in ARCH 3703. Critical thinking skills will be honed as students respond to construction material and technology limitations during the 10 day build in a South American cultural setting. Prereq ARCH 3703. Restriction: Restricted to undergraduates with a Junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3693 - Rome: Architecture & Urbanism**

The objective of this course is to provide a broad overview of the city's major architectural sites, topography, infrastructure and systems of urban design and organization through the study of the rich palimpsest of buildings, piazzas and landscapes from antiquity to the present day. Coreq. ARCH 3694 Restricted to undergraduate BS-ARCH students with Junior standing or higher. Cross-listed with ARCH 6755. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3694 - Rome: Documentation, Analysis and Design**

With graphic representation as the primary mode of inquiry, this course is an intensive study of a single building, piazza or landscape within the rich urban fabric of Rome. The graphical inquiry will be supported by pre-departure research and onsite observation and presentations. Coreq: ARCH 3693. Restricted to undergraduate BS-ARCH students with Junior standing or higher. Cross-listed with ARCH 6760. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3700 - Special Topics Design**

Special topics in architecture studies related to design inquiries including theory, design skills, and/or analytical thinking. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **ARCH 3701 - Survival Sketching**

The focus of this course will be the sketchbook and the keeping of a sketchbook. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning with sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3702 - Design Thinking**

Students will be introduced to tools that will enable them to reframe design dilemmas in favor of productive resolutions. Course content will include examples and specific techniques of design thinking, including empathy, abductive reasoning, testing, plussing and diagramming. Prereq: sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3703 - International: Design in Context**

The course is a project-based design seminar. In collaboration with a small community in Central America, students have the opportunity to engage in the context of another culture, environment, construction limitations and economic constraints. The course integrates architecture, engineering, and business. Restriction: Restricted to ARCH-BS majors with Junior standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3704 - The Poetic Detail-Studies in Tectonics—Wood**

This research seminar focuses on tectonics through traditional timber frame and wood construction case studies. The relationship between function, aesthetics, detail, and tectonics are explored in relation to contemporary concerns. Learning by making. Cross-listed with ARCH 6357. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3705 - Human Centered Design, Innovation and Prototyping**

Introduces techniques for collaborative design by interdisciplinary teams: design thinking, problem solving, and rapid prototyping. Teams of students design and implement increasingly complex projects while acquiring essential innovation and problem-solving skills. The course will culminate in a final project chosen by each team. Cross-listed with IWKS 2100. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3706 - 3D Design, Computation, and Prototyping**

Introduces the design and computer-controlled fabrication of three-dimensional objects using both additive (3D printing) and subtractive (laser cutter, CNC router/mill) processes. Various commercial and open-source software tools for 3D design (CAD), manufacturing (CAM) and visualization will be explored. Increasingly complex projects throughout the semester will be used to illustrate fabrication techniques. The course will culminate in a final project. Restriction: Restricted to ARCH-BS majors with sophomore standing. Cross-listed with IWKS 3100 and 5170. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3707 - Color Theory + Application**

This course will explore Color perception and theory; media/medium technique/application and landscape/built-environment drawing preparation, composition and presentation. The

objective is to develop your understanding of color interaction and interrelationship especially, as it pertains to the use of color in the design and implementation of the built environment. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max Hours: 3 Credits

**Semester Hours:** 3 to 3

### **ARCH 3708 - Introduction to the Essentials of Biomimicry**

Biomimicry is the conscious emulation of nature's genius that can be applied to the fields of design, engineering, medicine, transportation, and social interaction. This class will be geared towards designers and will give an overview of the discipline, the (3) Essential Elements, the human-nature connection, The Biomimicry Thinking Methodology, and Life's Principles.

Restriction: Restricted to ARCH-BS majors with sophomore standing. Max Hours: 3 Credits

**Semester Hours:** 3 to 3

### **ARCH 3709 - Furniture Design**

Students learn how to design and build furniture in the College's woodshop. Topics include ergonomics, properties of materials, principles and techniques of joinery and techniques of hand and machine tools. Cross-listed with ARCH 6180. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3800 - Special Topics - Technical**

Special topics elective will include coursework in either Digital Media In Design courses, Design-Build site Construction, or the Science and Art of Engineering Buildings. Additional topics will be develop in conjunction with the required undergraduate technical electives. Restriction: Must be an undergraduate Architecture student with sophomore standing or higher. Repeatable.

Max Hours: 12 Credits. **Semester Hours:** 3 to 3

### **ARCH 3801 - Introduction to Digital Media**

Introduces Building Information Modeling (BIM) systems as a means to integrate and optimize design processes and building systems in the professional practice of architecture. Topics include creation of simulated, complex, three-dimensional environments in support of the architectural design studio sequence. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3802 - Arch Project Presentation**

Architecture elective in digital and analog methods of presentation and composition for various audiences and formats. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3804 - Green Tech Eco-Furniture Fabrication I**

Green Tech I is the first of two courses that are a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Restriction: Restricted to ARCH-BS majors with sophomore standing or higher. Coreq: ARCH 3806. Cross-listed with ARCH 6375. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3805 - Beginning Revit**

Introduction to Building Information Modeling through Autodesk's Revit Architecture software. The course explores fundamental architectural concepts as they are developed and expressed in Revit. Appropriate program use and team learning experiences are emphasized. Prereq: ARCH 3110 and 3130. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3806 - Green Tech Eco-Furniture Fabrication II**

Green Tech II is the second of two courses that are a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Restriction: Restricted to ARCH-BS majors with sophomore standing or higher. Coreq: ARCH 3804. Cross-listed with ARCH 6376. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3807 - Small Eco Home Design & Fabrication**

This unique, quick-paced seminar focuses on small-scale residential design, from tiny-homes, to prefab, and movable residences. Students learn Small Home design, methods, and technologies, then using green materials, they design and fabricate architectural elements and furniture for enhancing small-scale living. Restriction: Restricted to ARCH-BS majors with sophomore standing. Cross-listed with ARCH 6377. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3808 - Architectural Design and Fabrication**

This course explores architectural production using advanced 3D-modeling, fabrication, and construction documentation techniques. The course connects contemporary design practice with material experimentation and architectural production. Prereq: ARCH 3801. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3809 - Architectural Design and Graphics**

This course explores the varied mediums of graphic representation in architecture. Using advanced tutorials in 3D-modeling, computer-generated rendering, and workflows through multiple software platforms, students will create work that is reflective of contemporary

architecture culture. Prereq: ARCH 3801. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 3949 - Internship I**

Experiential learning student internships sponsored by faculty in a field related to architecture. Minimum of 45 work hours per credit. Prereq: Permission of instructor, advisor and acceptance in BS Architecture program. Must also have sophomore standing. Minimum 15 credit hours with 2.75 GPA. Repeatable. Max Hours: 3 Credits. **Semester Hours:** 1 to 3

### **ARCH 4110 - Design Studio IV**

Design Studio IV. Introduces students to analysis and design as complementary processes. Students learn how to form design intentions based on analytical research and close study of the relationship between architecture, precedent and culture, and to consider buildings as settings that address issues of culture, society, economy and ecol. Prereq: ARCH 3120. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 4120 - Design Studio V**

Explores the place and role of architecture as an instrument of critical social engagement and cultural change, the role of history and precedent in the design process, and the role of detail through projects that demonstrate student's proficiency as designers. Prereq: ARCH 4110. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 4340 - Theory of Structures II**

Focuses on the relationship between architectural concepts and the selection of structural systems. Addresses the qualitative and quantitative analysis of reinforced concrete, steel, and wood structural systems and members. Prereq: ARCH 3340. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 4440 - Building Systems II**

Focuses on the environmental systems in commercial and other nonresidential buildings. Discusses natural and artificial lighting, HVAC systems, acoustics, vertical transportation and fire protection. Recommended Prereq: MATH 1130 OR MATH 1110 & 1120; PHYS 2010/2030 OR PHYS 2311/2321. Restriction: Restricted to undergrad ARCH students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 4840 - Independent Study**

Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to architecture. Prereq: Restricted to undergraduate ARCH

students within the College of Architecture and Planning with sophomore standing or higher. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 3

### **ARCH 4949 - Internship II**

Experiential learning student internships sponsored by faculty in a field related to architecture. Minimum of 45 work hours per credit. Permission of instructor, advisor and acceptance in BS Architecture program. Must also have sophomore standing. Minimum 15 credit hours with 2.75 GPA. Repeatable. Max Hours: 3 Credits. **Semester Hours:** 1 to 3

### **ARCH 5000 - Math and Physics for Architects**

Provides the review of mathematics and physics. This is a prerequisite for the graduate technology courses. Does not count toward the required credits for the MARCH degree. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5110 - Design Studio I**

The first of two elemental design studios focused on on the language of design, organizational and spatial systems and principles as well as on analog and digital methods of visualizing architectural ideas and forms. Restriction: Restricted to Graduate Architecture students within the College of Architecture and Planning. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 5120 - Design Studio II**

The second of two elemental design studios focused on translating organizational and spatial systems, principles and concepts into architectural systems. Through a number of small scaled design exercises students learn how organizational and spatial systems can be leveraged in the design of their buildings. Prereq: ARCH 5110 and ARCH 5510. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 5130 - Design Studio III**

The first of the two analytical design studios addresses how design ideas are formed through the analysis of the program in terms of action and perception and how to transform those ideas into formal strategies and specific architectural experiences. Prereq: ARCH 5120. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 5140 - Design Studio IV**

The second of the two analytical studios will build upon ideas developed in the previous studio concerning how the analysis of the program in terms of action and perception inform the

formal strategies and the design of specific architectural experiences. Prereq: ARCH 5130. Max hours: 6 Credits. **Semester Hours:** 6 to 6

### **ARCH 5210 - Introduction to Architecture**

Introduces important ways of looking at architecture and acquaints students with the various perspectives that they will later find in the rest of the curriculum. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5220 - History and Theory Architecture I**

Introduces world architecture and urbanism from prehistory to the Italian Renaissance. The course helps students understand the various cultural, technological, philosophical, and aesthetic ideas that helped shape buildings through history. Buildings and settlements on all continents and in all of the major world cultures are discussed. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5230 - History and Theory Architecture II**

Examines world architecture and urbanism from the Italian Renaissance to the present. Helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape buildings through history. Buildings and settlements on all continents and in all of the major world cultures are discussed. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5310 - Building Construction I**

The first of a two-course sequence that provides an overview of the structure, systems, assemblies and processes that make a building. Provides a broad view of building technology and an understanding of the interrelationship of all the parts. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5320 - Building Construction II**

This course focuses on principles and processes of building construction, and introduces major constructional systems. It stresses the relationship between architectural concepts and building technology and assemblies. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5330 - Sustainable Systems I**

The first course in the sustainable systems sequence introduces concepts and design methods of energy-efficient environmental control in buildings including thermal and moisture loads, heating, ventilation and air conditioning equipment and systems, and active and passive thermal strategies. Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5340 - Sustainable Systems II**

The second course in the sustainable systems sequence introduces concepts and design methods of plumbing, power distribution, renewable electricity, artificial illumination, daylighting, acoustics, vertical transportation, fire protection, and telecommunication systems in buildings with a focus on energy and resource efficiency. Prereq: ARCH 5330. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5350 - Structures I**

The first course in the structures sequence introduces the analysis and design of structural elements and focuses on the principles of statics and the strength of materials. Topics include stress determination, deflection and the behaviors of tension, compression and shear in various structural elements. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5360 - Structures II**

Focuses on the relationship between architectural concepts and the selection of structural systems. Addresses the qualitative and quantitative analysis of reinforced concrete, steel and wood structural systems and members. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5410 - Professional Practice**

Introduces the essential elements of professional practice through topics such as internship, licensing, services, modes of practice, fees, marketing, documents, specification and production procedures. Examines traditional and emerging forms of practice. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 5420 - BIM: Principles & Practices**

Introduces basic aspects of building information modeling (BIM) concepts, software, development, management and delivery for architectural projects. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 5430 - Social Context of Design**

Focuses on the ethical, social, cultural and psychological principles, which people bring to the perception and design of the built environment. Its major topics include: ethical values; cultural patterns and values; social, cultural and personal ritual; and pre-design and programming.

Prereq: Graduate ARCH students only. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 5450 - Sustainable Design Practices**

This course explores sustainable principles and practices as it relates to the design, construction of both the building and its site. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 5510 - Architectural Graphics**

This course explores the development of graphic skills emphasizing drawing as a means to design. It includes investigation of drawing types and methods; diagramming of ideas and systems; informative, exploratory and developmental sketching. Restriction: Restricted to Graduate Architecture students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6150 - Design Studio V**

The first of two reflective studios will assume reflective/critical stance towards programmatic issues or rather cultural presuppositions and critically explore the ways in which architecture can play a critical as well as an affirmative role within the broader cultural context. Prereq: ARCH 5140. Coreq: ARCH 6151. Max hours: 6 Credits. **Semester Hours:** 6 to 6

## **ARCH 6170 - Design Studio VI**

This is the second of two reflective studios, which focuses on the comprehensive design of an architectural project including considerations of structural systems, environmental systems, life safety concerns, regulatory considerations, wall sections, building assemblies and significant detail. Prereq: ARCH 6150. Coreq: ARCH 6171. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 6 to 6

## **ARCH 6171 - Integration Seminar**

In this seminar students will develop and document the technical aspects of their Design Studio VI design projects including, life safety, mechanical, electrical, plumbing, conveyance, accessibility systems and material assemblies. Prereq: ARCH 6150, ARCH 6151. Coreq: ARCH 6170. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 3 to 3

## **ARCH 6180 - Furniture Design**

Students learn how to design and build furniture in the College's woodshop. Topics include ergonomics, properties of materials, principles and techniques of joinery and techniques of hand and machine tools. Cross-listed with ARCH 3709. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ARCH 6185 - Digital Design & Fabrication**

An introductory class to Computer Aided Design (CAD) and Computer aided manufacturing (CAM). Students explore how these technologies apply to the field of architecture with a focus is on parametric/algorithmic design approaches and mass customization manufacturing techniques. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6190 - Special Topics in Design Studies**

Various topics in design, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **ARCH 6195 - Aspen Summer Workshop**

Three weeks with three world class architecture firms in Roaring Fork Valley. The firms lead students through a unique design project that develops and challenges their observational, conceptual, and visualization abilities. Drawing as a means of seeing, understanding and creating dominates the process/ethic of the course. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ARCH 6205 - Urban Housing**

This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Cross-listed with LDAR 6755 and URPL 6405. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6210 - History of American Architecture**

Examines the history of American architecture from prehistoric times to the present, mainly within the geographical borders of the present-day United States. Helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape American buildings. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6212 - History of Modern Architecture**

Examines the various theories, accomplishments and ideals of modern architecture in the 20th century. Issues include the relationship between theory and practice, architecture and ideology, technology, abstraction and representation, functionalism and formalism, utopianism and social responsibility. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6220 - History of Architectural Theory**

Investigates the history of architectural theories in the West from antiquity to the present. Explores the various ideas that have been proposed to explain or to direct architectural design and examines the relationship between the theories and the buildings themselves. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6222 - Contested Terrains**

Explores the different processes, factors and forces and determines and influences occupation, land use and built form through the phenomena of conflict and contestation. Design is inherently located within the disputes and discourses involving landscape as location and resource. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6230 - Preservation Theory and Practice**

The practice of historic preservation has evolved in a specific policy context. This introductory course introduces basic American institutions and laws associated with preservation as well as standards, definitions, and practices associated with these. Cross-listed with HIPR 6010. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6231 - Regionalisms & the Vernacular**

This class explores the history of the built environment from the perspective of evolutionary change; peoples attempting to meet utilitarian needs, respond to environmental forces, societal expectations, and aesthetic aspirations through design. The course looks closely at vernacular structures in a global context. Cross-listed with HIPR 6110. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6232 - Reading the City**

Design and planning professionals, including preservationists, must learn to work in environments with which they have had little previous knowledge. This course emphasizes gaining understanding of a novel environment and translating that knowledge into a well researched and media savvy professional presentation. Prereq: HIPR 6410 is recommended. Cross-listed with HIPR 6610. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6233 - Historic Buildings in Context**

This course covers the concept of "historic significance" and develops skills in understanding and professionally utilizing this concept. Procedures and skills are introduced. Prereq: HIPR 6010 or permission of instructor. Cross-listed with HIPR 6210. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6240 - History Of The City**

Introduces students to the history of global cities through selected typologies. Explores similarities and differences among cities considered against the larger cultural, political and socio-economic envelope of which they are part. Provides awareness of origins, growth and evolution of urban form. Cross-listed with URBN 6640. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6241 - Studies in Tectonics**

This research seminar focuses on tectonics - the logic of structure & material combinations (wood, metal, stone, masonry etc.). Through case studies, the relationship between function, aesthetics, detail, and tectonics are explored in relation to contemporary architectural concerns. Prereq: HIST I & II. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6254 - Architecture, In Theory**

Explores theories and texts that have influenced the analysis and the production of architectural form. The focus is on the expressive potential of architectural forms and the modalities of the realization of this potential. Cross-listed with DSPL 7016. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6255 - Cultural Institutions**

Selected types of cultural institutions including art museums, libraries, cultural centers, theaters, etc. are studied in this research seminar. Through case studies and readings, their ongoing cultural, architectural and corporate values are examined. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6256 - Community Development**

This course introduces community development, examining planners' and other stakeholders' roles in the field; key theories and practices; community dynamics; community-based organizations; asset-based development; social equity; and the influence of local physical and economic factors on community development. Cross-listed with URPL 6400. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6257 - Community Engaged Design Practice**

Obtain real-world pre-design and conceptual design experience in complex urban environments focusing on evolving trends in sustainability. Using digital trans-disciplinary learning students will develop comprehensive sustainable strategies that draw from their own sustainable philosophy developed during this class. Cross-listed with LDAR 6635 and LDAR 4435. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6258 - Social Justice in Planning**

This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with URPL 6410 and LDAR 6637. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6259 - The Art of Traditional Design**

Introduction to Philosophy, History and Design Methods of Traditional Design derived from Greek precedents developed through the Renaissance and later the Beaux Arts. The course will emphasize this influence on the Architecture of the United States. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6260 - Architectural Precedents**

Explores a number of traditional answers to recurring design issues, such as how to approach and enter a building or how to design a facade. In a seminar setting, students examine traditional ideas for their underlying principles and design new architectural compositions based on those principles. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6270 - Form and Formation of Cities**

This course investigates the origins and types of human settlements; the history of cities and urbanization; urban morphology and the evolution of the built environment; urban form principles and theory; and types of urbanism. Cross-listed with URPL 6350, URBN 6633, and LDAR 5530. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6275 - History Native Amer Arch**

Introduces Native American architecture from the 12th century to the present. The course helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape these buildings throughout history. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6290 - Special Topics in Cultural Studies**

Various topics in cultural studies, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max hours: 21 Credits. **Semester Hours:** 3 to 3

### **ARCH 6310 - Greenbuilding Tech**

This seminar will advance the student's knowledge of environmental building and construction methods through studies in material resources, innovative green systems, alternate green technology, energy efficiency, and affordability in "green architectural design." Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6313 - LEED Certification, Greenbuilding Seminar**

This RIGOROUS course will use the LEED Certification process to provide a framework for assessing building performance and meeting sustainability goals, following the 1st step in a two stage Professional Accreditation process, focusing on LEED GA, Green Associate Accreditation. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6314 - LEED AP Advanced Greenbuilding Seminar**

This advanced LEED Certification and Accreditation course builds on the first LEED GA course, providing a framework for assessing green building performance and sustainability goals, exploring advanced green building concepts and preparing the student for the LEED AP BD+C exam. Prereq: ARCH 6313 or instructor approval. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6351 - Building Conservation**

This course emphasizes the relationship between knowledge acquisition, professional judgement, and design modification. Topics include: 1) Historic Building Types & Methods, 2) Field and Lab Methods of Building Assessment, and 3) Management of Building Rehabilitation. The course takes an integrative approach to the scientific, aesthetic, managerial and legal dimensions of preservation. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6352 - Documentation, Analysis, Representation**

This methods course focuses on skills development in in-situ documentation of the historic environment. The course includes modules on: a) historic records, b) archaeological evidence, c) building and site measurement, d) photographic & Photometric methods, e) geo-spatial data, f) graphic representation, and g) reporting formats. Cross-listed with HIPR 6310. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6353 - Daylighting Design**

Daylighting is the use of light from the sky to illuminate building interiors. The objective of this course is to introduce students to the fundamentals of daylighting design including how it is perceived and how it impacts building energy flows. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6355 - Urban Conservation: Context for Reuse**

Human habitats (especially cities) are dynamic. The preservationist cannot freeze cities in a static representation of the past. The course deals with philosophical and political contexts, but emphasizes the role of strategic design intervention in the shaping of evolving cities. Cross-listed with HIPR 6410. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6356 - Adaptive Reuse: Business and Practice**

Existing buildings and infrastructure afford challenges and opportunities for reuse. This course explores the business, and financial aspects of adapting the built environment for contemporary uses. The course is suitable for designers, planners, historians and social scientists. Restriction: Restricted to majors within the College of Architecture and Planning. Cross-listed with HIPR 6220. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6357 - The Poetic Detail-Studies in Tectonics—Wood**

This research seminar focuses on tectonics through traditional timber frame and wood construction case studies. The relationship between function, aesthetics, detail, and tectonics

are explored in relation to contemporary concerns. Learning by making. Cross-listed with ARCH 3704. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6370 - Introduction To Design Build**

Introduction to Design Build project delivery methods important to architects. Lecture, research on the industry and an individual student project are the methods used to introduce ethical questions, role of the architect, owner, consultant and subcontractors. Work leads to studio project or case study. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6373 - Construction in Design Build**

Using a single project, students fully explore the design phase, estimating, scheduling and project management skills in traditional construction. Course is concurrent with an advanced studio and builds a project on a site. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6375 - Green Tech Eco-Furniture Fabrication I**

Green Tech I is the first of two courses that are a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Coreq: ARCH 6376. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Cross-listed with ARCH 3804. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6376 - Green Tech Eco-Furniture Fabrication II**

Green Tech II is the second of two courses that is a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Students must be enrolled in both Green Tech I and Green Tech II in the same semester. Coreq: ARCH 6375. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Cross-listed with ARCH 3806. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6377 - EcoFAB: Furniture Design and Fabrication for Small-Scale Residential Architecture**

This unique, quick-paced seminar focuses on small-scale residential design, from tiny-homes, to prefab, and movable residences. Students learn Small Home design, methods, and techno-systems, then using green materials, they design and fabricate architectural elements and

furniture for enhancing small-scale living. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3807. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6390 - Special Topics in Technology**

Various topics in technology, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max hours: 18 Credits. **Semester Hours:** 3 to 3

### **ARCH 6412 - Construction Documents**

Introduces the concepts and techniques of construction documents. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6413 - Construction Leadership**

The final course is an integrated architecture, engineering, and construction business course bringing together executives, principals, and managers to current industry topics and provide students opportunities to apply management and leadership principles from the various fields to case study projects. Crosslisted with CVEN 5238. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6420 - Integrated Practice & BIM Technology**

This class will be a general overview of integrated practices and technologies used in today's industry. Understanding the nature of how information is created and managed using BIM technologies will help us define a road map for how information passes downstream and bring value to a project. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6450 - Pre-Design**

Course lectures, readings, and case studies cover pre-design methodologies, research, documentation, facilitation and consensus building. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6463 - BIM: Emerging Prof. Practices**

The 21st century architect's emerging role is designing the design process. BIM (Revit) attempts to optimize the entire process, including all participants, from conceptual design, through post-

building occupancy. These capabilities are explored and developed. Prereq: ARCH 5430. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6464 - BIM: Advanced Design Concepts**

BIM's complexity (Revit) challenges all designers. The emerging tool is very sophisticated, but its benefit are not realized from modeling alone. We address architectural design as a multifaceted optimization process: concept, form, and function. Prereq: ARCH 5430. Cross-listed with ARCH 6390. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6470 - ACE Mentoring**

Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with LDAR 6470 and URPL 6850. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ARCH 6471 - Managing Quality & Risks**

A lecture and seminar on approaches to risk management including contracts, insurance, financial analysis, dispute resolution and client relationships. Utilizing case study approach, quality assurance will be defined and studied in the design and building phase of workings. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6472 - Architecture in a Single Source Project Delivery**

Directed to the practice of architecture with design build and other single source delivery systems. This course examines requirements of codes, zoning, building systems and legal questions for the architect. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6473 - Research Tools & Methods**

Introduces the thesis in architecture and establishes the scholarly basis for the research and construction of a Master's Thesis project. This course will provide the student with the research practices and methodologies to develop the scholarship and products required to produce a Thesis Project Proposal. Completion of this course is a prerequisite for the student to submit the Thesis Proposal for departmental approval to continue with the remaining 9 credits of thesis work. Cross-listed with LDAR 6949. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6475 - BIM/Flow of Information**

The course is geared toward CAP students, non-degree seeking working professionals and other students interested in the Integrated Construction, Management and Leadership (ICML) Certificate. This class will be a general overview of Virtual Design and Construction (VDC) in today's AEC industry. Restriction: Graduate students. Junior standing and above undergraduate students are eligible to take course with approval by instructor. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ARCH 6490 - Special Topics in Professional Studies**

Various topics in professional studies according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max Hours: 18 Credits. **Semester Hours:** 3 to 3

### **ARCH 6510 - Digital Applications in Design**

This course introduces first year design students to the Graphic Design Concepts and Digital Applications necessary to create digital, printed and physical presentations of their work. Students learn computer skills including: raster and vector based programs and digital modeling. Prereq: ARCH 5110 and ARCH 5510. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6515 - Adv. Digital Representation**

In this course students will learn advanced techniques of architectural representation using digital modeling, rendering engines, and post processing in the Adobe Creative Suite. Prereq: ARCH 5510 and 6510 or equivalent. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6530 - The Art of Proportion**

This course covers the use of proportional systems in the Classical tradition. Students complete a series of graphic exercises culminating in the construction of a Beaux-Art style ink-wash of a classical column. Cross-listed with ARCH 6290 and HIPR 6090. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6550 - Digital Portfolio Design**

This course introduces students to the Graphic Design Concepts and the Digital Applications used to create both Printed and Web-based Portfolios. Students must have completed ARCH 5110 and have a working knowledge of Photoshop. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

## **ARCH 6560 - Architecture Photography**

Emphasizes and understanding of light, composition, color and problem solving, with a particular goal of applying these skills to the photography of architectural exteriors and interiors. For students who have access to adjustable 35 mm digital cameras. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6570 - Sketching As Seeing**

Sketching promotes seeing, and seeing promotes thinking. This course is designed to help you think & see by the regular practice of sketching & the discipline of keeping a sketchbook. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6575 - 2D-3D & 4D Design Space**

The graphics language of words and art bridge intention and design. Passing ideas and mental imagery through digital technology's 2D, 3D and 4D filters is the challenge. Students develop concepts in AutoCAD, visualize in 3DStudio Max, and narrate the process in Adobe Premiere. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **ARCH 6580 - High-Performance Façade Design**

It is the intent of the course to provide graduate students with a comprehensive understanding of the technical concepts and specific skills necessary to undertake in actual practice the design, detailing, specification, and construction administration of high-performance building facades. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max Hours: 3 Credits **Semester Hours:** 3 to 3

## **ARCH 6590 - Special Topics in Representational Studies**

Various topics in representational studies, according to current faculty and student interests. Prereq: ARCH 5510. Repeatable. Max Hours: 15 Credits. **Semester Hours:** 3 to 3

## **ARCH 6710 - Architecture in Other Cultures**

Various studies of architecture and urbanism in foreign countries. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 12 Credits. **Semester Hours:** 1 to 9

## **ARCH 6715 - The Built Environment in Other Cultures I: Research Design**

The intent is to broaden students' perspectives by asking them to examine design within another culture. Each student prepares a proposal of study including a statement of the problem to be addressed, the type of field research to be undertaken and the nature of the report to be produced. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6755 - Rome: Architecture & Urbanism**

The objective of this course is to provide a broad overview of the city's major architectural sites, topography, infrastructure and systems of urban design and organization through the study of the rich palimpsest of buildings, piazzas and landscapes from antiquity to the present day. Coreq: ARCH 6760. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3693. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6760 - Rome: Documentation, Analysis and Design**

With graphic representation as the primary mode of inquiry, this course is an intensive study of a single building, piazza or landscape within the rich urban fabric of Rome. The graphical inquiry will be supported by pre-departure research and onsite observation and presentations. Coreq. ARCH 6755. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3694. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6775 - Bluff General Elective**

Provides students the opportunity to focus their attention on one of three areas: technical studies, professional studies, or cultural studies. Students will complete coursework as it relates to Design Build Bluff. Counts as a general elective. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **ARCH 6840 - Independent Study**

Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to architecture. Prereq: Permission of instructor. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **ARCH 6910 - Teaching Assistantship**

Work with a faculty member in a course to help with class preparation and delivery. This is intended for students who may be considering a career in teaching architecture. Prereq: Permission of instructor. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 3 to 3

### **ARCH 6930 - Architecture Internship**

Designed to provide professional practice experience. The internship is composed of eight hours per week working in a practicing professional's office during the regular semester. Students must complete the second-year level before taking this course. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ARCH 6931 - Architecture Internship**

Designed to provide professional practice experience. The internship is composed of eight hours per week working in a practicing professional's office during the regular semester. Students must complete the second-year level before taking this course. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **ARCH 7840 - Independent Study**

Max hours: 3 Credits. **Semester Hours:** 1 to 3

## **Bioengineering**

### **BIOE 3070 - Bioengineering Lab I**

Core bioengineering lab required of all major students. This lab introduces students to experimental techniques in the areas of Biomaterials, Biomedical Instrumentation, and Biomechanics. Prereq: BIOE 1020, 2020; PHYS 2331/2341; CHEM 3411/3418, MATH 2421, 3195, and BIOL 2061/2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 3939 - Undergraduate Internship**

Department of Bioengineering Internship. Credit may be applied toward technical electives in the BS in Bioengineering degree. Department consent required. Restriction: Restricted to BIOE-BS majors. Repeatable. Max Hours: 3 Credits. Semester Hours: 1 to 3 **Semester Hours:** 1 to 6

### **BIOE 4035 - Undergraduate BioDesign II**

This represents the second semester of the core undergraduate Biodesign sequence. Students gain experience around Design and Prototyping, Verification and Validation, and evaluation of key components around biomedical technology development. Prereq: BIOE 3090. Restriction: Restricted to full Bioengineering majors. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4045 - BioDesign III**

This course represents the capstone culmination of the core undergraduate Biodesign experience. Students finalize all design, prototyping, testing and validation components, and

present the project per professional standards to professionals and peers. Prereq: BIOE 4035 with a C- or higher. Restriction: Restricted to BIOE-BS majors. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4053 - Optics and Microscopy in Biomedical Research**

Undergraduate overview of optical imaging, ranging from classical microscopy to advanced, non-linear techniques and includes theory, technology and applications in biomedical sciences. This will prepare students for developing and applying state-of-the-art optical imaging in their research. Cross-listed with BIOE 5053. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4054 - Regulatory Affairs**

This course covers standards of quality assurance and regulatory pathways that guide biomedical engineering industry. Cross-listed with BIOE 5054. Restriction: Restricted to BIOE majors or with instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4057 - Rehabilitation and Assistive Technology**

This course provides students with an overview of technologies and their use by and for persons with disabilities. Cross-listed with BIOE 5057. Restriction: Restricted to students with BIOE designation, or with instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4058 - Intro to Design, Disability, and Aging**

This course provides an introduction to the topic of disability and aging and the application of bioengineering principles for persons living with functional impairment(s) across the lifespan. Cross-listed with BIOE 5058. Restriction: Restricted to BIOE majors or with instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4064 - Advanced MatLab For Bioengineers And Life Scientists**

MatLab programming for undergraduate bioengineers and life scientists. Topics include MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting. modeling, automation and classification will be covered. Cross-listed with BIOE 5064. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4065 - Introduction to iOS Apps**

This course will introduce students to best practices in developing Health centered iOS Apps. Topics will focus on Xcode, Object Oriented Design, Objective-C, Cocoa, Core Data and the iOS emulator. Cross-listed with BIOE 5065. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4066 - Advanced Topics in iOS Apps**

This course will introduce undergraduates to advanced topics focused on creating health centered iOS Apps. Topics will cover best practices for developing Apps across the iOS product lineup including Apple Watch and developing for Apple Health kit. Deployment and validation will also be covered. Cross-listed with BIOE 5066. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4067 - Human Factors and Usability Testing for Bioengineers**

This course provides an introduction to human factors testing and evaluation in the context of medical devices and assistive technology (AT). Particular focus will be given towards designing and applying usability testing to inform product design decisions or improvements. Topics include human factor considerations for aging and disabled populations (and their care providers), usability techniques, user experience data collection and interpretation, etc. Students will engage in hands-on human factors assessments such as contextual inquiry of surgery patients, cognitive walkthroughs with simulating disability, and product usability testing and iteration. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4068 - Introduction to Medical Imaging**

This course will introduce undergraduates to the basic physics, technologies, and clinical methodologies underlying Ultrasound, MRI, CT, PET and SPECT imaging systems. The course will include lectures, and visits to campus hospital and research imaging systems as well as hands on ultrasound labs. Cross-listed with BIOE 5068. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4069 - Advanced Biomechanics for Undergraduates**

This course covers advanced topics such as blood flow dynamics, introduction to non-linear finite deformation techniques, blood rheology, and computational techniques. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Cross-listed with BIOE 5069. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4073 - Neural Interfaces and Bionic Limbs**

This course will introduce undergraduates to topics in neural interfaces (Brain machine interfaces, peripheral nerve interfaces etc), the issues involved in the design of mechatronic limb systems and the decoding algorithms used to map the neural interface to the mechatronic limb. Cross-listed with BIOE 5073. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4083 - Polymers in Biomedical Applications**

This course will introduce undergraduate students to fundamental synthetic method and basic characteristics of various polymeric biomaterials and their crucial roles in different biomedical applications. It will also cover how the polymers can be modified to enhance biomedical applications. Cross-listed with BIOE 5083. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4085 - Tissue Engineering**

This course covers tools, techniques, characterization and applications in modern tissue engineering. Cross-listed with BIOE 5085. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 4929 - Undergraduate Research Project**

Department of Bioengineering Research Project. Credit may not be applied toward the BS in Bioengineering degree. Department consent required. Restriction: Restricted to BIOE-BS majors. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOE 5010 - Cell and Molecular Biology for Bioengineers**

Introduction to cellular and molecular biology, with a focus on using engineering methods and literature to analyze structure and function of cells throughout lifecycle and multiple scales. Design experiments to test hypotheses. Prereq: Graduate standing in Bioengineering or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5011 - Systems Physiology for Bioengineers**

Use engineering principles to study key physiological systems. Topics: cardiovascular, neuroscience, urological, or renal medicine. Related engineering principles: pressure-flow relationships, stress-strain, electromechanical coupling and signal transduction. Prereq: Graduate standing in Bioengineering or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5020 - Analytic Methods for Engineering Analysis**

This course provides mathematical tools essential for graduate level bioengineering work. Studies selected topics from probability, linear algebra, and vector calculus, with emphasis on bioengineering applications. Prereq: Graduate standing in Bioengineering or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5021 - Numerical Methods for Engineering Analysis**

Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5030 - Technology for Bioengineers**

This course will prepare students fundamental bioengineering principles common to areas of active research. This includes fundamental principles behind systems and instrumentation in mechanics, electronics, fluid flow and clinical imaging modalities, as well as an introduction to polymeric biomaterials. Prereq: Graduate standing in Bioengineering. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5031 - Technology for Bioengineers II**

This course continues the introduction to imaging from BIOE 5030 (Technology for Bioengineers I) but with a much stronger emphasis on quantitative methods of medical image analysis and description of medical imaging physics. Prereq: Graduate standing in Bioengineering. Grade of B or better in BIOE 5030, or consent of instructor. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5039 - Mechatronics and Embedded Systems**

The course focuses on the design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics (Ohm's law, RLC circuits, DC and AC signals, diode and transistor circuits, operational amplifiers, and digital signals), introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic and embedded systems design. Students must design and build an embedded systems device related to assistive technology. Note: Project expenses may be incurred (\$50 maximum). Restriction: Restricted to graduate students in the Department of Bioengineering. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5040 - Research Methods for Bioengineers**

This course provides an introduction to research methods for bioengineers in order to prepare for basic research, clinical applications and commercialization of medical technologies. Topics include literature review, regulatory policy. Prerequisite: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **BIOE 5041 - Clinical Experiences for Bioengineers**

This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PHD). Repeatable. Max Hours: 2 Credits. **Semester Hours:** 1 to 1

### **BIOE 5053 - Optics & Microscopy in Biomedical Research**

Graduate overview of optical imaging, ranging from classical microscopy to advanced non-linear techniques and includes theory, technology and applications in biomedical sciences. This will prepare students for developing and applying state-of-the-art optical imaging in their research. Cross-listed with BIOE 4053. Prereq: Grad standing or permission from the instructor. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5054 - Regulatory Affairs**

This course covers standards of quality assurance and regulatory pathways that guide biomedical engineering industry. Cross-listed with BIOE 4054. Restriction: Restricted to BIOE majors or with instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5057 - Rehabilitation and Assistive Technology**

This course provides students with an overview of technologies and their use by and for persons with disabilities. Cross-listed with BIOE 4057. Restriction: Restricted to students with BIOE designation, or with instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5058 - Intro to Design, Disability, and Aging**

This course provides an introduction to the topic of disability and aging and the application of bioengineering principles for persons living with functional impairment(s) across the lifespan. Cross-listed with BIOE 4058. Restriction: Restricted to BIOE majors or with instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5063 - 3D Modeling for Bioengineers**

Course instills 3D modeling skills specific to biomedical industry. Topics include computer aided design, medical imaging, image processing, patient specific image to three-dimensional model reconstruction, non-uniform rational b-spline surfaces, finite element, computational fluid dynamics analyses, physical modeling using rapid prototyping. Restrictions: Matriculated CEDC students. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5064 - Advanced MatLab For Bioengineers And Life Scientists**

MatLab programming for graduate bioengineers and life scientists. Topics include MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting. modeling, automation and classification will be covered. Cross-listed with BIOE 4064. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5065 - Introduction to iOS Apps**

This course will introduce graduate students to best practices in developing Health centered iOS Apps. Topics will focus on Xcode, Object Oriented Design, Objective-C, Cocoa, Core Data and the iOS emulator. Cross-listed with BIOE 4065. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5066 - Advanced Topics in iOS Apps**

This course will cover advanced topics focused on creating health centered iOS Apps. Topics will cover best practices for developing Apps across the iOS product lineup including Apple Watch and developing for Apple Health kit. Deployment and validation will also be covered. Cross-listed with BIOE 4066. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5067 - Human Factors and Usability Testing for Bioengineers**

This course provides an introduction to human factors testing and evaluation in the context of medical devices and assistive technology (AT). Particular focus will be given towards designing and applying usability testing to inform product design decisions or improvements. Topics include human factor considerations for aging and disabled populations (and their care providers), usability techniques, user experience data collection and interpretation, etc. Students will engage in hands-on human factors assessments such as contextual inquiry of surgery patients, cognitive walkthroughs with simulating disability, and product usability testing and iteration. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5068 - Introduction to Medical Imaging**

This course will introduce graduate students to the basic physics, technologies, and clinical methodologies underlying Ultrasound, MRI, CT, PET and SPECT imaging systems. The course will include lectures, and visits to campus hospital and research imaging systems as well as hands

on ultrasound labs. Cross-listed with BIOE 4068. Restriction: Restricted to Bioengineering students with graduate student status. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5069 - Advanced Biomechanics for Graduates**

This course covers advanced topics such as blood flow dynamics, introduction to non-linear finite deformation techniques, blood rheology, and computational techniques. Restriction: Restricted to Bioengineering students with graduate student status, or by Permission of Instructor. Crosslisted with BIOE 4069. Max hours: 3 credits. **Semester Hours:** 3 to 3

### **BIOE 5073 - Neural Interfaces and Bionic Limbs**

This course will introduce graduate students to topics in neural interfaces (Brain machine interfaces, peripheral nerve interfaces etc), the issues involved in the design of mechatronic limb systems and the decoding algorithms used to map the neural interface to the mechatronic limb. Cross-listed with BIOE 4073. Restrictions: Matriculated CEDC students. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5074 - Introduction to Laboratory Animal Research**

This course provides basic theoretical and practical knowledge on the use of the most common laboratory animal species, animal models and welfare, general concepts on animal biology and husbandry, and essential principles of anesthesia, analgesia, surgery and peri operative care. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5083 - Polymers in Biomedical Applications**

This course will introduce graduate students to fundamental synthetic method and basic characteristics of various polymeric biomaterials and their crucial roles in different biomedical applications. It will also cover how the polymers can be modified to enhance biomedical applications. Cross-listed with BIOE 4083. Prereq: Graduate standing at CU Denver or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5085 - Tissue Engineering**

This course covers tools, techniques, characterization and applications in modern tissue engineering. Cross-listed with BIOE 4085. Restriction: Restricted to Bioengineering students with graduate student status. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOE 5420 - Special Topics in Bioengineering**

Special topics of particular interest to graduate students in Bioengineering. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max hours: 12 Credits. **Semester Hours:** 1 to 6

### **BIOE 5840 - Independent Study in Bioengineering**

Graduate level independent study in Bioengineering with a faculty mentor. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOE 5939 - Graduate Internship**

Department of Bioengineering Internship. Credit may not be applied toward the MS in Bioengineering degree. Enrollment by department permission only. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOE 6655 - Foundations of Doctoring MS Years**

This course is for CU MD-MS students who are on leave of absence from SOM and wish to maintain clinical exposure and training during the leave. Prereq: Phase I & II SOM classes and graduate standing in BIOE. Repeatable. Max Hours: 20 Credits. **Semester Hours:** 1 to 5

### **BIOE 6950 - Masters Thesis**

Research for Master Thesis under supervision of faculty thesis advisor. Prerequisites: Consent of thesis advisor. Restrictions: Satisfactory progress toward MS-Bioengineering degree. Repeatable. Max hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOE 6960 - Master's Project**

Training for Master's Project under the supervision of faculty project advisor. Prereq: Department Consent. Repeatable. Max hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOE 8990 - Doctoral Dissertation**

Research for doctoral dissertation under supervision of faculty advisor. Prerequisites: Consent of dissertation advisor. Restrictions: Satisfactory progress toward PhD-Bioengineering Degree. Repeatable. Max hours: 10 Credits. **Semester Hours:** 1 to 10

## **Biology**

### **BIOL 1111 - First Year Seminar**

Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 1 to 3

### **BIOL 1550 - Basic Biology: Ecology and the Diversity of Life**

Introduces the process of science, gene expression, biological diversity, evolution, and ecology. Highlights applications to contemporary issues. Lecture and lab course. Note: For students who are not majoring in biology. Biology and health career majors should not take this course. Students may not receive credit for this course if they have already received credit for BIOL 2051 and BIOL 2061. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1  
**Semester Hours:** 4 to 4

### **BIOL 1560 - Basic Biology: From Cells to Organisms**

Introduces the process of science, cell structure and function, survey of representative human and plant systems, and genetics. Highlights applications to contemporary issues. Lecture and lab course. Note: For students who are not majoring in biology. Biology and health career majors should not take this course. Students may not receive credit for this course if they have already received credit for BIOL 2051 and BIOL 2061. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1. **Semester Hours:** 4 to 4

### **BIOL 2010 - Organisms to Ecosystems (Gen Bio)**

This course is a continuation of BIOL 2051. Introduces four major areas of study: (1) evolution,(2) animal structure and function, (3) plant structure and function and (4) ecology. Note: This class is intended for students planning to take upper division biology courses and for biology majors. Biology majors and pre-health career students must also take the accompanying laboratory - BIOL 2081. No co-credit with BIOL 2097. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2. **Semester Hours:** 3 to 3

### **BIOL 2011 - Organisms to Ecosystems Lab (Gen Bio)**

Investigations, observations, and experiments in evolution, bioinformatics, ecology, and animal behavior, anatomy, and physiology; requires off-campus field work. Note: This class is intended for students planning to take upper division biology courses and for biology majors. Students are strongly encouraged to take BIOL 2061 concurrently or before they take this course. No co-credit with BIOL 2098. Term offered: fall, spring, summer. Max hours: 1 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1. **Semester Hours:** 1 to 1

### **BIOL 2020 - Molecules to Cells (Gen Bio)**

Introduces four major areas of study: (1) the chemistry of biological systems; (2) the structure and function of the cell; (3) cellular energy transformations (photosynthesis and respiration); and (4) genetics (mitosis, meiosis, patterns of inheritance, molecular genetics). Note: This class is intended for students planning to take upper division biology courses and for biology majors.

Biology majors and pre-health career students must also take the accompanying laboratory - BIOL 2071. It is recommended that students have completed CHEM 1000 or high school chemistry prior to taking this course. Prerequisite: BIOL 2010 or BIOL 2030 with a C- or higher. No co-credit with BIOL 2095. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2. **Semester Hours:** 3 to 3

### **BIOL 2021 - Molecules to Cells Lab (Gen Bio)**

Introduces the basic scientific approach through investigations, observations, and experiments in cell biology, basic biochemical techniques, genetics, molecular genetics and applications of biotechnology. Note: This class is intended for students planning to take upper division biology courses and for biology majors. Prerequisite: BIOL 2011 or BIOL 2031 with a C- or higher. No co-credit with BIOL 2096. Term offered: fall, spring, summer. Max hours: 1 Credit. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1. **Semester Hours:** 1 to 1

### **BIOL 2030 - Honors Organisms to Ecosystems (Gen Bio)**

Honors level course limited to students in the BA/BS/MD, Denver Bound and UNHL programs. This course is a continuation of BIOL 2095. Introduces four major areas of study: evolution, animal structure/function, plant structure/function, and ecology. Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences Instructor permission required. No co-credit with BIOL 2061. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 2031 - Honors Organisms to Ecosystems Lab (Gen Bio)**

Honors level course limited to students in the BA/BS/MD, Denver Bound and UHL programs. Advanced study of evolution, plant and animal anatomy, developmental biology and includes two off-campus ecology field trips. Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences. No co-credit with BIOL 2081. Term offered: spring. Max hours: 1 Credit. **Semester Hours:** 1 to 1

### **BIOL 2040 - Honors Molecules to Cells (Gen Bio)**

Honors level course limited to students in the BA/BS/MD, Denver Bound and UNHL programs. Four major topics covered: the chemistry of biological systems, the structure/function of the cell, cellular energy transformations and genetics. Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences(student group BH01). Instructor permission required. No co-credit with BIOL 2051. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 2041 - Honors Molecules to Cells Lab (Gen Bio)**

Honors level course limited to students in the BA/BS/MD, Denver Bound and UNHL programs. Introduces the basic scientific approach and report preparation through exercises and experiments in cell biology, basic biomedical techniques, genetics, molecular genetics and applications of biotechnology. Instructor permission required. Prerequisite: BIOL 2011 or BIOL 2031 with a grade of C- or higher. Restriction: restricted to Biology honors students within the College of Liberal Arts and Sciences(student group BH01). No co-credit with BIOL 2071. Term offered: fall. Max hours: 1 Credit. **Semester Hours:** 1 to 1

### **BIOL 2840 - Independent Study**

Student will contribute to ongoing faculty or graduate student's lab or field-based investigation that makes an original intellectual or creative contribution to the discipline. Associated coursework includes scientific reading/writing/presentation(s). Note: registration by special processing form only. Prereq: Students must have completed one year of general biology with a grade of "C-" or higher and must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **BIOL 2939 - Internship**

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have completed 15 hours of BIOL courses with a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **BIOL 3020 - Practical Laboratory Skills**

Designed for Students who are interested in working in a professional biology laboratory. Covers improvement of manual dexterity skills, understanding common laboratory apparatus and handling biological macromolecules and living cells. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031(or 2081), CHEM 2038(or 2088), CHEM 2061(or 2091) and 2068(or 2098) with a C- or higher. Max Hours: 1 Credit. **Semester Hours:** 1 to 1

### **BIOL 3104 - Behavioral Genetics**

Interdisciplinary course on relationships between behavior and heredity, with emphasis on human behavioral genetics. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Cross-listed with PSYC 3104. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3124 - Introduction to Molecular Biology**

Provides an understanding of the structure and function of genetic material, with respect to the regulation of gene expression and protein synthesis. Emphasizes eukaryotic systems and understanding the significance of contemporary laboratory-based research. Prereq: BIOL 3832 with a grade of C- or higher. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3134 - Advanced Topics**

Periodic examination of current topics in the field of biology. (See Schedule Planner for current topics). Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 8

### **BIOL 3225 - Human Physiology**

The basic orientation of the course is toward understanding the functioning of the body as a set of homeostatic mechanisms. Particular emphasis is placed on membrane potentials, muscle, circulation, respiration, digestion, the kidney, the control of metabolism and acid-based balance. Note: This is a combined lecture and lab course. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, 2081/2098 and CHEM 2031/2081, 2038/2088, 2061/2091 and 2068/2098 with a C- or higher. Term offered: fall, spring. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 3244 - Human Anatomy**

This course introduces structural aspects of the human body from a systems-based approach, in both lecture and laboratory. The systems addressed include the integument, skeletal, muscular, nervous, digestive, respiratory, circulatory, immune, renal, reproductive and endocrine systems. Anatomical models, microscope slides and human cadavers are used in lab. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096 and 2081/2098 with a C- or higher. Term offered: fall, spring. Max hours: 5 Credits. **Semester Hours:** 5 to 5

### **BIOL 3330 - Plant Diversity**

Surveys all major plant groups using evolutionary and ecological principles to interpret patterns of diversity in form and function. Topics include reproduction and life cycles, adaptations and ecological interactions, paleobotany and biogeography, classification and taxonomy and evolution. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096 and 2081/2098 with a C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3411 - Principles of Ecology**

A lecture course that examines the interrelationships between organisms and their environments. Subject matter includes organism, population and ecosystem levels of study and application to current environmental issues. The emphasis is on the underlying principles of ecology that involve all types of organisms. Note: Satisfies core ecology requirement for biology major. May not be used as upper division biology elective. No co-credit with BIOL 3412. Prereq:

BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3445 - Introduction to Evolution**

Introduction to the processes and patterns of evolution. Topics include: history of evolutionary thought, origin of life, evidence for evolution, phylogenetics, evolutionary genetics, natural selection and other evolutionary forces, speciation and biodiversity, evolution of sexual reproduction and social organization. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096 and 2081/2098. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3521 - Vertebrate Biology**

The Subphylum Vertebrata consists of fish, amphibians, reptiles, birds and mammals--some of the most fascinating and most threatened species on earth. This course covers the evolution, taxonomy, anatomy, physiology, ecology and conservation of these organisms. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3525 - Parasitology**

This course is designed to provide a foundation in parasitology and to improve skills in scientific writing to students interested in biodiversity, veterinarian medicine, public health, & health care. Prokaryotes are addressed briefly; the focus of this course is the natural history of 'traditional' eukaryotic parasites. Topics include evolutionary associations of parasites with plants and animals (including humans), modes of transmission, and general life cycles. Subject matter includes basic anatomy, epidemiology, and physiology, with a brief introduction to immunology. Note: may be used as an upper-division biology elective. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3611 - General Cell Biology**

Covers the structure and function of the cell including bioenergetics, membranes, secretion, respiration and the cell cycle. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, 2081/2098 and CHEM 2031/2081, 2038/2088, 2061/2091 and 2068/2098 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3621 - Introduction to Immunology**

Provides an introduction to the basic concepts of immunology, including development of the immune system, innate immunity, aspects of the adaptive immune system, and the role of the immune system in disease, as well as allergies and autoimmunity. Prereq: BIOL 3611 and 3832 with a C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3654 - General Microbiology**

Covers all aspects of the biology of microorganisms: their cellular structures and function, growth and metabolism, general and molecular genetics, diversity and interactions with other organisms and the environment (ecology). The objective is to provide students with a thorough introduction to microbiology including basic micro-biological laboratory techniques. Note: This is a combined lecture and lab course. Prereq: Grade of C- (1.7) or higher in BIOL 2051/2095, 2061/2097, 2071/2096, 2081/2098 & CHEM 2031/2081, 2038/2088, 2061/2091 and 2068/2098. Term offered: fall, spring. Max hours: 5 Credits. **Semester Hours:** 5 to 5

### **BIOL 3674 - Endocrinology**

This systematic survey of the endocrine system looks at the cellular basis and biochemical characteristics of individual endocrine tissues. Their function in the regulation of other endocrinological, physiological, and behavioral events is analyzed. The course emphasizes the human system and complements studies in physiology, behavior and neurobiology. Prereq: BIOL 3611 with a grade of C- or higher. Students will not earn credit for this course if they have already earned credit for BIOL 4674. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3763 - Biostatistics**

Introduces statistical thinking in biology. Emphasizes data exploration and probability-based inference methods including estimation, testing, and confronting models with data. Concepts and examples for general and applied biology, including ecology and the health sciences. Includes exposure to statistical software. Prereq: BIOL 2051/2095, BIOL 2061/2097, BIOL 2071/2096, BIOL 2081/2098 with a grade of C- or higher, and MATH 1110, or MATH 1120, or 1130, or 1401, or 2411, or 2421 or 2830 with a C- or higher. Term offered: fall, spring. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 3804 - Developmental Biology**

Covers gamete development, fertilization, and embryo development including establishing body axes, tissue differentiation and organ formation. Note: Students will not earn credit for BIOL 3804 if they have earned credit for BIOL 4054 and will not earn credit for BIOL 4054 if they have earned credit for BIOL 3804. Prereq: General cell biology with a grade of "C-" or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3832 - General Genetics**

Introduces molecular, classical, developmental and population genetics. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 3840 - Independent Study**

Student will contribute to ongoing faculty or graduate student's lab or field-based investigation that makes an original intellectual or creative contribution to the discipline. Associated coursework includes scientific reading/writing/presentation(s). Prereq: Students must have completed one semester of general biology with a grade of "C-" or higher and must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 3

### **BIOL 3939 - Internship**

Approved internships will provide opportunities to apply classroom knowledge in a professional environment and expand the student's knowledge of biology. Associated coursework includes scientific reading/writing and presentation(s). Prereq: BIOL 2051 or 2095 and BIOL 2061 or 2097 with a C or higher AND have junior level standing with a 2.75 GPA. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **BIOL 4024 - Introduction to Biotechnology**

Introduces aspects of biotechnology within a historical context, including medical, forensic, agricultural and microbial biotechnology. Addresses principles behind state-of-the-field techniques in recombinant DNA technology, bioinformatics, proteomics and genomics. Biotechnology regulations and ethics will also be discussed. Prereq: BIOL 3832 with a C- or higher. Cross-listed with BIOL 5024. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4050 - Advanced Biology Topics**

Examines current topics in the field of biology. Topics vary from term to term. See Schedule Planner for current topics. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Cross-listed with BIOL 5050. Repeatable. Max Hours: 8 Credits. **Semester Hours:** 1 to 8

### **BIOL 4052 - Advanced Ecology**

This combination seminar and lecture course focuses on state-of-field knowledge, current theories and recent models in selected areas of ecology, such as theoretical ecology, evolutionary ecology, population biology and ecosystems ecology. Prereq: Students must have completed BIOL 3411(Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5052. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4053 - Disease Ecology**

The study of the underlying principles that influence the spatio-temporal patterns of infectious disease in environments. Students will apply ecological theories about concepts such as

biodiversity, trophic interactions, landscape structure, and nutrient cycling to the study of disease. Prereq: Students must have completed BIOL 3411(Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5053. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **BIOL 4055 - Virology**

This is an upper level undergraduate/graduate class providing an in-depth study of the history of virology, different types of viruses, viral disease, research to combat viral infections, and different uses of viruses in biotechnology. Note: Students will not earn credit for this course if they have already earned credit for BIOL 4051 or BIOL 5051. Prereq: BIOL 3611 with a grade of C- or higher. Cross-listed with BIOL 5055. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4064 - Cell Biology of Disease**

Builds on the foundations laid in the prerequisite courses. How alterations in membrane transport, autophagy, mitochondria, lysosomes, cilia, unfolded protein response and autophagy lead to major human diseases. A major emphasis is the control and integration of cellular activities. Prereq: General cell biology with a C- or higher. One semester of Biochemistry is strongly recommended for optimal student success. Cross listed with BIOL 5064. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4074 - Human Reproductive Biology**

Comprehensive study of anatomy and physiology of human reproduction. Embryogenesis of male and female reproductive systems and detailed analysis of contraception, world population growth, population control and implications of population growth are also covered. Prereq: BIOL 3611 with a C- or higher. Cross-listed with BIOL 5074. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4125 - Molecular Biology Laboratory**

Provides hands-on experiences in molecular biology and an appreciation for using the tools of molecular biology to study biological systems. Emphasis is placed on DNA cloning, PCR, mRNA and protein detection in the context of gene editing. Experimental design and the theories underlying the techniques are also discussed. Prereq: BIOL 3124 with a C- or higher or Coreq: BIOL 3124. Cross-listed with BIOL 5125. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4126 - Molecular Genetics**

Examines molecular techniques and their application to experimental genetics, specifically organization and mapping of genomes, application and model systems in defining hereditary components of disease, and mechanisms of identifying mutations and their implications for

disease. Also addresses application of recombinant DNA technology. Prereq: Completion of Introduction to Molecular Biology with a C- or higher is required in order for students to enroll in this course. Cross-listed with BIOL 5126. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4134 - Human Genetics**

Advanced survey of the current status of the field. Emphasis on understanding, diagnosis and treatment of genetic disease and on the impact of molecular biology on human genetics.

Prereq: General genetics with a grade of "C-" or higher. Cross-listed with 5134. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4144 - Medical Microbiology**

Provides an understanding of the relationship between pathogenic organisms and their host. Emphasis is placed on the area of medical bacteriology, with attention given to mechanisms of pathogenesis, genetics of disease, serology and treatment. Prereq: general microbiology with a grade of "C-" or higher. Cross-listed with BIOL 5144. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4154 - Conservation Biology**

Basic concepts and theories in ecology, population biology and genetics as they apply to issues relating to the preservation of biodiversity, such as the genetics of small populations, captive propagation, restoration ecology and the design of nature reserves. Prereq: Students must have completed BIOL 3411(Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5154. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4165 - Neurobiology**

Overview of neuroscience, covering the cellular basis of neuronal activity, muscle, sensory structures and the structure and function of the human brain. Prereq: BIOL 3611 and PSYC 2220 with a C- or higher OR BIOL 3225 with a C- or higher. Cross-listed with BIOL 5165. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4225 - Genomics and Bioinformatics**

Explores how genome-wide data are collected and analyzed. Example applications include human disease, microbial evolution, ecological genomics, and parasite drug resistance. Students implement projects based on real DNA sequencing data. Prereq: BIOL 3832 with a C- or higher. Cross-listed with BIOL 5225. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4250 - Mechanisms of Animal Behavior**

The proximate and ultimate mechanisms of animal behavior are analyzed using comparative animal examples from the scientific literature. Proximate mechanisms include genetic and physiological processes. Ultimate mechanisms include the role of natural and sexual selection in the evolution of behavior. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Genetics and human physiology are recommended. Cross-listed with BIOL 5250. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4335 - Plant Science**

Lecture, lab and field trips. An in-depth study of flowering plants, including embryology, structure, function, reproduction, ecology and evolution of the group. Emphasis is placed upon morphology and anatomy at all stages of plant development. Prereq: One year of General Cell Biology (BIOL 3611) with a grade of "C-" or higher. Cross-listed with BIOL 5335. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 4345 - Flora of Colorado**

Lecture, lab and field trips. Introduces the vascular plant flora of Colorado, including ferns, gymnosperms and flowering plants. Emphasis on field identification of species representing a range of natural communities from grassland to alpine tundra, as well as non-natives. Field and herbarium techniques covered. Prereq: Students must have completed BIOL 3411(Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5345. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 4415 - Microbial Ecology**

An in-depth study of ecology as it relates to microorganisms; abiotic and biotic interactions within microbial populations in macro- and microhabitats; and the role of microorganisms in maintaining steady state conditions in natural ecosystems. Emphasis is placed on how the ecology of microorganisms affects the human condition. Prereq: General microbiology with a grade of "C-" or higher. Cross-listed with BIOL 5415. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4416 - Aquatic Ecology**

This advanced ecology course examines the inter-relations of biological (including humans), physical and chemical components of wetlands, streams, rivers, lakes, reservoirs and groundwater. Learning is facilitated through lectures, discussions, student presentations, laboratory and field exercises. Prereq: Students must have completed BIOL 3411(Principles of

Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5416. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4425 - Biogeography**

An in-depth study of biological populations through analysis of geographic distribution patterns in space and time. Emphasis on how biogeography informs studies of evolution and ecology and on applied studies in conservation, sustainability, epidemiology, and disease dynamics. Prereq: Students must have completed BIOL 3411(Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5425. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4430 - Introduction to Spatial Ecology**

Focuses on patterns of life and ecological interactions in space. Emphasis on drivers of patterns, practical application of spatial ecology software, programming, and introductory spatial statistics on the quantification of patterns. Main topics: Scale and scaling, pattern development, detecting and characterizing patterns, temporal dynamics, and implications of spatial structure to conservation biology, resilience, and ecosystem functioning. Cross-listed with BIOL 5430. Prereq: BIOL 3411 with C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4450 - Marine Biology**

Looks at the fascinating organisms that inhabit the oceans, which represent 99% of the living space of earth. While the focus is on the ecology of marine organisms, taxonomy, physiology and anatomy are also covered. Prereq: BIOL 2051/2095, 2061/2097, 2071/2096, and 2081/2098 with a C- or higher. Cross-listed with BIOL 5450. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4460 - Environmental Toxicology**

Text and literature-based course provides students with background knowledge concerning environmental toxins, the nature and extent of environmental contamination, and toxicant effects on individual organisms and populations. Prereq: BIOL 3611 with a grade of C- or higher. Cross-listed with BIOL 5460. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4464 - Exercise Physiology**

This course addresses the dynamic physiological changes associated with exercise. Where human physiology addresses physiological processes at rest, this course explores how the cardiovascular, respiratory, nervous and endocrine systems support increased energy transfer as skeletal muscle becomes more active. Prereq: Human Physiology (BIOL 3225 or equivalent) with a grade of C- or higher. Cross-listed with BIOL 5464. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4474 - Ecological Methods**

Deals with the empirical aspects of an ecological study. Students learn sampling techniques that are used in plant and animal ecology. Emphasis is placed on hypothesis testing, data analysis and experimental field designs. Prereq: Students must have completed BIOL 3411(Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5474. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 4494 - Population and Evolutionary Genetics**

Introduces the genetic processes underlying evolutionary change in microbial, plant and animal populations. Topics include: sources of variation, Hardy-Weinberg equilibrium, population genetic structure, natural selection and other evolutionary forces, quantitative genetics and molecular phylogenetics. Emphasis on experimental data. Prereq: Completion of General Genetics and Introduction to Evolution with a C- or higher is required in order for students to enroll in this course. Cross-listed with BIOL 5494. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4550 - Cell Signaling**

Lecture by faculty and student presentations cover mechanism of hormones and regulation of various cellular processes through second messenger systems. Prereq: General cell biology with a grade of "C-" or higher; one semester of biochemistry recommended. Cross-listed with BIOL 5550. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4634 - Biology of Cancer**

Cancer is the second leading cause of death in the United States. This course offers an overview of recent research into the causes, treatments and possible prevention of cancer. Includes a detailed look at the mechanisms of action of various oncogenes. Prereq: BIOL 3611 and BIOL 3832 with a C- or higher. Cross-listed with BIOL 5634. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4640 - Mammalogy**

Lecture, laboratory, and required field trips. This course provides a general overview of the biology of mammals, including their diversity, distribution, economic importance, and other characteristics that make them of special interest to humans. Coverage will be worldwide, with special emphasis placed on the mammals of Colorado. Prereq: BIOL 3411 with a grade of C- or higher. Cross-listed with BIOL 5640. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 4644 - Advanced Human Anatomy Laboratory**

Advanced laboratory course in human anatomy. In-depth look at the structural aspects of the human body, emphasizing function. Models, microscope slides, and visual media will supplement cadaver-based dissections. Prereq: One year of general biology and human anatomy with a grade of "C-" (2.0) or higher. Cross-listed with BIOL 5644. Term offered: fall, spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **BIOL 4815 - Structural Biology of Neurodegenerative Diseases**

Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Prereq: 1) BIOL 2051 & BIOL 2071 or BIOL 2095 & BIOL 2096, and 2) CHEM 3810 or CHEM 4810 or CHEM 5810. Coreq: PHYS 2020 or PHYS 2331. Cross-listed with CHEM 4815, CHEM 5815, and BIOL 5815. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4825 - Biochemistry of Metabolic Disease**

Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders. Prereq: 1) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher, and 2) BIOL 2051 & BIOL 2071 or BIOL 2095 and BIOL 2096 with a C- or higher. Cross-listed with CHEM 4825, CHEM 5825, and BIOL 5825. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4835 - Biochemistry of Gene Regulation and Cancer**

Explores the biochemical and molecular aspects of cancer biology. Topics include DNA mutations and repair, gene regulation, oncogenes and tumor suppressors, stem cells and differentiation, and cancer drug development. Prereq: 1) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher, and 2) BIOL 2051 & 2071 or BIOL 2095 & BIOL 2096 with a C- or higher. Cross-listed with CHEM 4835, CHEM 5835, and BIOL 5835. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 4840 - Independent Study**

Student will contribute to ongoing faculty or graduate student's lab or field-based investigation that makes an original intellectual or creative contribution to the discipline. Associated coursework includes scientific reading/writing/presentation(s). Note: Registration by special processing form only. Prereq: Students must have completed one year of general biology with a grade of "C-" or higher and must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 6

### **BIOL 4880 - Directed Research**

A student designed lab or field-based investigation that involves data collection, and that makes an original intellectual or creative contribution to the discipline. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOL 4974 - Advanced Evolution**

A capstone course that draws upon concepts from all fields of biology. Topics include the fossil record, mass extinctions, the historical development of the modern synthesis, principles and mechanisms of evolution, current viewpoints and controversies. Prereq: BIOL 3445 and 3832 with a C- or higher. Cross-listed with BIOL 5974. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5024 - Introduction to Biotechnology**

Introduces aspects of biotechnology within a historical context, including medical, forensic, agricultural and microbial biotechnology. Addresses principles behind state-of-the-field techniques in recombinant DNA technology, bioinformatics, proteomics and genomics. Biotechnology regulations and ethics will also be discussed. Restriction: Restricted to degree granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4024. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5050 - Advanced Biology Topics**

Examines current topics in the field of biology. Topics vary from term to term. See Schedule Planner for current topics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4050. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 8

### **BIOL 5052 - Advanced Ecology**

This combination seminar and lecture course focuses on state-of-field knowledge, current theories and recent models in selected areas of ecology, such as theoretical ecology, evolutionary ecology, population biology and ecosystems ecology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4052. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5053 - Disease Ecology**

The study of the underlying principles that influence the spatio-temporal patterns of infectious disease in environments. Students will apply ecological theories about concepts such as biodiversity, trophic interactions, landscape structure, and nutrient cycling to the study of

disease. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4053. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5055 - Virology**

This is an upper level undergraduate/graduate class providing an in-depth study of the history of virology, different types of viruses, viral disease, research to combat viral infections, and different uses of viruses in biotechnology. Note: Students will not earn credit for this course if they have already earned credit for BIOL 4051 or BIOL 5051. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4055. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5064 - Cell Biology of Disease**

Builds on the foundations laid in the prerequisite courses. How alterations in membrane transport, autophagy, mitochondria, lysosomes, cilia, unfolded protein response and autophagy lead to major human diseases. A major emphasis is the control and integration of cellular activities. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4064. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5068 - The Cell Cycle**

Provides an in-depth study of the molecular regulation of the eukaryotic cell cycle. Includes mitosis, meiosis, developmental cell cycles, cell cycle checkpoints and cell cycle defects in cancer. Restriction: Restricted to degree-granting graduate programs. Cross-listed w/BIOL 4068. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5074 - Human Reproductive Biology**

Comprehensive study of anatomy and physiology of human reproduction. Embryogenesis of male and female reproductive systems and detailed analysis of contraception, world population growth, population control and implications of population growth are also covered. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4074. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5125 - Molecular Biology Lab**

Provides hands-on experiences in molecular biology and an appreciation for using the tools of molecular biology to study biological systems. Emphasis is placed on DNA cloning, PCR, mRNA and protein detection in the context of gene editing. Experimental design and the theories underlying the techniques are also discussed. Restriction: Restricted to degree granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4125. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5126 - Molecular Genetics**

Examines molecular techniques and their application to experimental genetics, specifically organization and mapping of genomes, application and model systems in defining hereditary components of disease, and mechanisms of identifying mutations and their implications for disease. Also addresses application of recombinant DNA technology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4126. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **BIOL 5128 - Topics in Molecular Biology**

Literature-based course examining the regulation of gene expression in eukaryotic systems, as well as contemporary recombinant DNA technology and applications of molecular cloning techniques. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4128. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5134 - Human Genetics**

Advanced survey of the current status of the field. Emphasis on understanding, diagnosis and treatment of genetic disease and on the impact of molecular biology on human genetics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4134. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5144 - Medical Microbiology**

Provides an understanding of the relationship between pathogenic organisms and their host. Emphasis is placed on the area of medical bacteriology, with attention given to mechanisms of pathogenesis, genetics of disease, serology and treatment. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4144. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5154 - Conservation Biology**

Basic concepts and theories in population biology and genetics as they apply to issues relating to the preservation of biodiversity, such as the genetics of small populations, captive propagation, restoration ecology and the design of nature reserves. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4154. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **BIOL 5165 - Neurobiology**

Overview of neuroscience, covering the cellular basis of neuronal activity, muscle, sensory structures and the structure and function of the human brain. Restriction: Restricted to degree-

granting graduate programs. Cross-listed with BIOL 4165. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5225 - Genomics and Bioinformatics**

Explores how genome-wide data are collected and analyzed. Example applications include human disease, microbial evolution, ecological genomics, and parasite drug resistance. Students implement projects based on real DNA sequencing data. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4225. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5250 - Mechanisms of Animal Behavior**

The proximate and ultimate mechanisms of animal behavior are analyzed using comparative animal examples from the scientific literature. Proximate mechanisms include genetic and physiological processes. Ultimate mechanisms include the role of natural and sexual selection in the evolution of behavior. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4250. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5315 - Plant Systematics**

Lecture, lab and field trips. Extensive introduction to the basic principles and concepts of vascular plant systematics. Topics include principles of taxonomy, nomenclature, methods, systems of classification and field and herbarium procedures. Emphasis on plant structure and identification using fresh, frozen and pressed plant specimens. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4315. Max Hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 5330 - Evolution and Diversification of Plants**

Surveys the diverse assemblage of green algae and land plants. Ecological and evolutionary principles are used to interpret patterns of form and function within the context of their phylogeny as revealed from molecular systematics. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5335 - Plant Science**

Lecture, lab and field trips. An in-depth study of flowering plants, including embryology, structure, function, reproduction, ecology and evolution of the group. Emphasis is placed upon morphology and anatomy at all stages of plant development. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4335. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 5345 - Flora of Colorado**

Lecture, lab and field trips. Introduces the vascular plant flora of Colorado, including ferns, gymnosperms and flowering plants. Emphasis on field identification of species representing a range of natural communities from grassland to alpine tundra, as well as non-natives. Field and herbarium techniques covered. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4345. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 5415 - Microbial Ecology**

An in-depth study of ecology as it relates to microorganisms; abiotic and biotic interactions within microbial populations in macro- and microhabitats; and the role of microorganisms in maintaining steady state conditions in natural ecosystems. Emphasis is placed on how the ecology of microorganisms affects the human condition. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4415. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5416 - Aquatic Ecology**

This advanced ecology course examines the inter-relations of biological (including humans), physical and chemical components of wetlands, streams, rivers, lakes, reservoirs and groundwater. Learning is facilitated through lectures, discussions, student presentations, laboratory and field exercises. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4416. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5425 - Biogeography**

An in-depth study of biological populations through analysis of geographic distribution patterns in space and time. Emphasis on how biogeography informs studies of evolution and ecology and on applied studies in conservation, sustainability, epidemiology, and disease dynamics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4425. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5430 - Introduction to Spatial Ecology**

Focuses on patterns of life and ecological interactions in space. Emphasis on drivers of patterns, practical application of spatial ecology software, programming, and introductory spatial statistics on the quantification of patterns. Main topics: Scale and scaling, pattern development, detecting and characterizing patterns, temporal dynamics, and implications of spatial structure to conservation biology, resilience, and ecosystem functioning. Cross-listed with BIOL 4430. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5445 - Applied Environmental Biology**

Examines the reciprocal relationships of organisms and the environment at scales from microbes to ecosystems. Explores the impact of human-caused perturbations on organisms as well as the impact of living systems on the flow of energy and materials (natural and man-made) through the environment. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5450 - Marine Biology**

Looks at the fascinating organisms that inhabit the oceans, which represent 99% of the living space of earth. While the focus is on the ecology of marine organisms, taxonomy, physiology and anatomy are also covered. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4450. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5455 - Comparative Environmental Physiology**

This advanced physiology course explores the physiological evolutionary adaptations of different animals in the context of their environment. Content includes exploration of maintenance of homeostasis via feedback regulation, structure-function relationships, cellular physiology, and the study of organ systems including the nervous, endocrine, respiratory, reproductive and cardiovascular systems. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4455. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5460 - Environmental Toxicology**

Text and literature-based course provides students with background knowledge concerning environmental toxins, the nature and extent of environmental contamination, and toxicant effects on individual organisms and populations. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4460. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5464 - Exercise Physiology**

This course addresses the dynamic physiological changes associated with exercise. Where human physiology addresses physiological processes at rest, this course explores how the cardiovascular, respiratory, nervous and endocrine systems support increased energy transfer as skeletal muscle becomes more active. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4464. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5474 - Ecological Methods**

Lecture, laboratory. Deals with the empirical aspects of an ecological study. Students learn sampling techniques that are used in plant and animal ecology. Emphasis is placed on hypothesis testing, data analysis and experimental field designs. Restriction: Restricted to

degree-granting graduate programs. Cross-listed with BIOL 4474. Max hours: 4 Credits.

**Semester Hours:** 4 to 4

### **BIOL 5475 - Mechanisms of Human Pathology**

Studies physiological, cellular and biochemical processes in human diseases. Mechanisms of inflammatory diseases, infectious diseases, neoplastic diseases, and others will be examined.

Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4475. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5494 - Population and Evolutionary Genetics**

Introduces the genetic processes underlying evolutionary change in microbial, plant and animal populations. Topics include: sources of variation, Hardy-Weinberg equilibrium, population genetic structure, natural selection and other evolutionary forces, quantitative genetics and molecular phylogenetics. Emphasis on experimental data. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4494. Max hours: 3 Credits. **Semester**

**Hours:** 3 to 3

### **BIOL 5550 - Cell Signaling**

Lecture by faculty and student presentations cover mechanism of hormones and regulation of various cellular processes through second messenger systems. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4550. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **BIOL 5621 - Immunology**

Studies antibody-antigen interactions, the immune system, inflammation, hypersensitivity, autoimmunity, and recovery from infection. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4621. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5622 - Topics in Immunology**

An in-depth study of immunological concepts. Topics will vary from semester to semester and may range from specifics of immune cell responses to tolerance and autoimmunity. Delivery will include lecture, student presentations, and discussion. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4622. Max hours: 3 Credits. **Semester**

**Hours:** 3 to 3

### **BIOL 5634 - Biology of Cancer**

Cancer is the second leading cause of death in the United States. This course offers an overview of recent research into the causes, treatments and possible prevention of cancer. Includes a

detailed look at the mechanisms of action of various oncogenes. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4634. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **BIOL 5640 - Mammalogy**

Lecture, laboratory, and required field trips. This course provides a general overview of the biology of mammals, including their diversity, distribution, economic importance, and other characteristics that make them of special interest to humans. Coverage will be worldwide, with special emphasis placed on the mammals of Colorado. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4640. Max hours: 4 Credits. **Semester**

**Hours:** 4 to 4

### **BIOL 5644 - Advanced Human Anatomy Laboratory**

Advanced laboratory course in human anatomy. In-depth look at the structural aspects of the human body, emphasizing function. Models, microscope slides, and visual media will supplement cadaver-based dissections. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4644. Term offered: fall, spring. Max hours: 2 Credits.

**Semester Hours:** 2 to 2

### **BIOL 5705 - Biological Research Workshop**

For graduate and advanced undergraduate students who are directly engaged in original research. Provides introduction to the discovery dissemination and peer review process associated with writing research proposals, manuscripts, and grants, as well as poster and oral presentations. Students will workshop each other's original research. Graduate students enroll in 6705; research-active undergraduates enroll in 5705. Cross-listed with BIOL 6705. Prereq: Students involved in original research. Restriction: Restricted to degree-granting graduate programs. Repeatable. Max Hours: 2 Credits. **Semester Hours:** 2 to 2

### **BIOL 5815 - Structural Biology of Neurodegenerative Diseases**

Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4815, BIOL 4815, and BIOL 4815. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5825 - Biochemistry of Metabolic Disease**

Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders.

Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4825, CHEM 5825, and BIOL 4825. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5835 - Biochemistry of Gene Regulation and Cancer**

Explores the biochemical and molecular aspects of cancer biology. Topics include DNA mutations and repair, gene regulation, oncogenes and tumor suppressors, stem cells and differentiation, and cancer drug development. Restriction: Restricted to degree-granting graduate programs Cross-listed with CHEM 4835, CHEM 5835, and BIOL 4835. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5840 - Independent Study: BIOL**

Note: Registration by special processing form only. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 3

### **BIOL 5910 - Field Studies**

Field studies of individuals, populations and communities comprising a specified ecosystem. Emphasis on field identification of vascular plants and vertebrate animals. Topics include the physical environment, biotic and abiotic interactions, life history, ecological adaptations and biogeography. Note: Lectures and a week-long field trip. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4910. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 5939 - Internship**

Designed experience involving application of specific, relevant concepts and skills in supervised employment situations. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **BIOL 5974 - Advanced Evolution**

A capstone course that draws upon concepts from all fields of biology. Topics include the fossil record mass extinctions, the historical development of the modern synthesis, principles and mechanisms of evolution, current viewpoints and controversies. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4974. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BIOL 6002 - Biology Skills Sets - Pedagogy**

The purpose is to introduce sound practice in teaching and innovation in pedagogy. Topics covered will include assessment techniques, creation of learning goals, and research methods in biological education. Restriction: Restricted to degree-granting graduate programs. Term offered: fall. Max hours: 1 Credit. **Semester Hours:** 2 to 2

### **BIOL 6655 - Seminar**

Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4990. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits. **Semester Hours:** 1 to 1

### **BIOL 6705 - Biological Research Workshop**

For graduate and advanced undergraduate students who are directly engaged in original research. Provides introduction to the discovery dissemination and peer review process associated with writing research proposals, manuscripts, and grants, as well as poster and oral presentations. Students will workshop each other's original research. Graduate students enroll in 6705; research-active undergraduates enroll in 5705. Cross-listed with BIOL 5705. Prereq: Students involved in original research and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring. Repeatable. Max Hours: 8 Credits. **Semester Hours:** 2 to 2

### **BIOL 6764 - Biological Data Analysis**

Addresses quantitative aspects of research design, data collection and analysis in the biological sciences. Emphasizes relationships among probability theory, estimation, testing, inference, and interpretation. Includes intensive computer lab using the statistical programming software R to demonstrate both traditional analytical and contemporary simulation based (permutation, bootstrap, and Bayesian) approaches for inference in biology. Restriction: Restricted to degree-granting graduate programs. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **BIOL 6880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **BIOL 6950 - Master's Thesis**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes,

to the Graduate School for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits. **Semester Hours: 1 to 8**

### **BIOL 7010 - Integrative and Systems Biology**

Addresses current research problems in integrative biology and system biology by surveying the peer-reviewed literature. Particular attention will be paid to research topics that integrate multiple levels of biological organization and that investigate how properties of systems emerge from interactions of sub-units. Note: New students in the Integrative and Systems Biology PhD program will enroll in this course during their first year. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits. **Semester Hours: 3 to 3**

### **BIOL 7050 - Special Topics**

Readings in current biology topics. Specific topics vary and may be proposed by groups of graduate students who identify a suitable faculty instructor or by a faculty member who identifies a need for advanced study in a specialized topic of biology. Restriction: Restricted to degree-granting graduate programs. Repeatable. Max Hours: 9 Credits. **Semester Hours: 1 to 3**

### **BIOL 7650 - Research in Integrative and Systems Biology**

Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Prereq: Ph.D. student and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max Hours: 10 Credits. **Semester Hours: 1 to 10**

### **BIOL 7920 - Directed Reading/Grant Writing**

Allows students to examine current literature related to their specialty area of biological research and to work in collaboration with a research mentor to develop a grant-based dissertation proposal in preparation for the comprehensive review examination. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Prereq: Students must be in the Integrative and Systems Biology PhD program and have permission from the instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours: 3 to 3**

### **BIOL 8990 - Doctoral Dissertation**

Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Prereq: Students must be in the Integrative and Systems Biology PhD program and have permission from the instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 60 Credits. **Semester Hours:** 1 to 10

### **BIOL 9000 - INTC: Special Topics**

Restriction: Restricted to degree-granting graduate programs. Repeatable. Max Hours: 10 Credits. **Semester Hours:** 1 to 10

### **Bus Minor for non-bus majors**

#### **BMIN 1000 - Introduction to Business**

The business and economic landscape is introduced illustrating the challenges and opportunities in today's business environment. A foundation in traditional business disciplines is introduced including the principles and terminology employed in Marketing, Management, Finance, Accounting, Operations, and Economics. This course is cross-listed with MGMT 1000. Restriction: Students enrolled in the Business School are not eligible for this course. Note: Students seeking a Minor in Business Fundamentals are encouraged to enroll in BMIN 1000 as their first course. However, BMIN 1000 may be taken as a co-requisite with BMIN 3001, 3002 or 3003 or ENTP 3000. Max hours: 3 Credits. **Semester Hours:** 3 to 3

#### **BMIN 1010 - Introduction to Business -- Career Planning**

Students will explore their best career choices based on assessments and their personality type. They will learn what strengths they bring to a team and to their individual management style utilizing the Myers Briggs Type Indicator and Strong Interest Inventory assessments. Topics covered include: career exploration, career and internship planning, personality styles and strengths, working with executives, corporate culture overview, business trends and news, and analysis of Fortune 100 companies. Supplemental topics include: resume writing, effective interviewing, time management, business writing and hiring trends. Restriction: Students enrolled in the Business School are not eligible for this course. Max hours: 3 Credits. **Semester Hours:** 3 to 3

#### **BMIN 3001 - Fundamentals of Management and Marketing**

Comprised of two modules focusing on essential concepts of Management and Marketing: 1) Management: Including organizational behavior concepts, leadership, management skills and methods and team dynamics 2) Marketing: Students will develop a new product marketing plan including, industry and market research, market segmentation, marketing mix planning and

implementation strategies. Restriction: Students enrolled in the Business School are not eligible for this course. Co-req: BMIN 1000 or MGMT 1000. Max hours: 3 Credits. **Semester Hours: 3 to 3**

### **BMIN 3002 - Fundamentals of Accounting and Finance**

Comprised of two modules focusing on essential concepts of 1) Accounting: including the use of information in financial reports and in making business decisions, and 2) Finance: including financial markets, capital structure, time-value of money, valuation and capital budgeting. Restriction: Students enrolled in the Business School are not eligible for this course. Co-req: BMIN 1000 or MGMT 1000. Max hours: 3 Credits. **Semester Hours: 3 to 3**

### **BMIN 3004 - Principles of Strategic Management**

Students will examine the critical issues related to running sustainable businesses. Using the strategic management model as a framework, the course focuses primarily on developing and implementing corporate strategy. Topics covered include mission, vision and values; corporate social responsibility; competitive analysis; leveraging core competencies; developing a business model, and creating value. Supplemental topics include how to create competitive advantage through innovation, choosing an appropriate legal business entity, and managing risk. This is a capstone course and synthesizes key concepts from other Cohort Business Minor courses including entrepreneurship, accounting & finance, management, and marketing. Restriction: Students enrolled in the Business School are not eligible for this course. Prereq: BMIN 3001, BMIN 3002, Junior-Level Standing. Max hours: 3 Credits. **Semester Hours: 3 to 3**

## **Business**

### **BUSN 1110 - Intro to Investment Services Careers**

Open to all majors! Provides a comprehensive overview of careers in the Investment Services industry. Emphasis will be on interactions with industry professionals to provide hands-on knowledge and opportunities for in-depth discussion. Students are required to participate in a site visit to an investment services company during the course. Max hours: 1 Credit. **Semester Hours: 1 to 1**

### **BUSN 1200 - Career and Professional Development**

This first year course develops a student's professional skills, providing knowledge on key factors for early and long-term career success. Through applied learning and career-oriented experiences, the course covers: career and major exploration, student resources, resume writing, interview skills, business communications, professional etiquette, emotional intelligence, time management, ethical behavior, and workplace expectations. Students will have opportunities to develop their own professional network with business leaders as new

members of the Business School. Restriction: Restricted to freshman level Business School majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 5939 - Internship**

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **BUSN 6520 - Leading Individuals and Teams**

Students learn the strengths and weaknesses of their management style and how to work effectively with individual differences. Students also learn how to form teams around purpose/task, diagnose problems and identify and implement solutions by utilizing leadership skills such as setting goals, processes and measures, interpersonal communication, motivation and conflict management. Students develop an understanding of the effect of the organizational and social context on the behavior of individuals and teams. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6521 - Leading Individuals and Teams**

Students learn the strengths and weaknesses of their management style and how to work effectively with individual differences. Students also learn how to form teams around purpose/task, diagnose problems and identify and implement solutions by utilizing leadership skills such as setting goals, processes and measures, interpersonal communication, motivation and conflict management. Students develop an understanding of the effect of the organizational and social context on the behavior of individuals and teams. The emphasis is on health care issues and is intended for health care students. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6530 - Data Analytics for Managers**

Provides an overview of techniques for data analysis, including multiple regression, sampling theory and applications of probabilistic inference from sample data. The emphasis is upon the applications of these techniques to management problems. Students are required to analyze data sets, present their analyses in written or oral form and defend their conclusions.

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6540 - Legal and Ethical Environment of Business**

Students develop a working knowledge of legal and ethical parameters for business decision making. The course addresses the legal system and mechanisms for resolving disputes. Topics include constitutional law, torts, product liability, contracts, property law, consumer protection,

intellectual property, business entities and employment law. It stresses the influence of legal issues on organizational decision making. Note: Students can substitute ENTP 6822 but credit cannot be received for both. Health Administration students must take BUSN 6541. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6541 - Legal and Ethical Environment of Business (Health Section)**

Students develop a working knowledge of legal and ethical parameters for business decision making. Addresses the legal system and mechanisms for resolving disputes. Topics include business entities, torts, contracts, employment relationships, litigation and alternative dispute resolution. It stresses the influence of legal issues on organization and decision making. The emphasis is on health care issues and is intended for health care students. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6550 - Analyzing and Interpreting Accounting Information**

Emphasizes the use of accounting statements and data in making business decisions. External financial accounting information and concepts are used for investment and credit decisions. Internal managerial accounting information and concepts are used for product costing, cost analysis and management control. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6560 - Marketing Dynamics in the 21st Century**

This course focuses on the art, science, and practice of managing dynamic market environments and making decisions about alternative marketing strategies. Students use analytical frameworks to inform decision-making about the many specific aspects of marketing: e.g., value proposition, target markets, positioning, products, channels of distribution, pricing, communication, and service. Participants learn how to integrate these elements into a Marketing Plan. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6561 - Marketing Management (Health Section)**

Focuses on the formulation and implementation of a marketing plan in the context of the firm's strengths, overall strategy and competitive environment. Emphasis is on understanding the marketing environment and on decision making skills regarding market selection, pricing, promotion, product configuration and management of distribution channels. Restrictions: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6610 - Information Systems Strategy**

Digital strategy is the application of digital technologies to business models to form new differentiating business capabilities. The course starts with the highlights of genesis and importance of IT in organizations, including the relationship between digital technology and competitiveness. Then, the development and management of an effective digital infrastructure are discussed. Realizing that the effective use of digital technology requires the alignment of competitive strategies, business processes, and applications, the course takes a top management perspective on the development of policies and plans that maximize the contribution of digital technologies to organizational goals. A broad overview of how systems support the operational, administrative, and strategic needs of organizations is covered. Note: Students cannot receive credit if they have taken BUSN 6810 or ISMG 6180. Cross-listed with ISMG 6180. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6620 - Applied Economics for Managers**

After taking this course, students should be able to apply economic principles to make optimal decisions given firm cost, demand and market circumstances. Also, they should be able to analyze the firms interactions with its competitive market environment. Students will learn basic aspects of federal macroeconomic policy designed to achieve stable prices and economic growth. Also, they will learn to understand the measurement of output (GDP), employment and prices; the conduct of monetary and fiscal policy; and the balance of trade. Co-req: BUSN 6550 or ACCT 6030 or ACCT 6031 and BUSN 6530 or FNCE 6290 or BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6621 - Applied Economics for Managers (Health Section)**

After taking this course, students should be able to apply economic principles to make optimal decisions given firm cost, demand and market circumstances. Also, they should be able to analyze the firm's interactions with its competitive market environment. Students should understand basic aspects of federal macroeconomics policy designed to achieve stable prices and economic growth. Also, they should understand basic aspects of government regulation of business. The emphasis is on healthcare issues and is intended for healthcare students. Co-req: BUSN 6550 or ACCT 6030 or ACCT 6031 and BUSN 6530 or FNCE 6290 or BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6630 - Management of Operations**

This course is concerned with the production and delivery of goods and services. It provides an overview of a variety of contemporary Operation Management topics using current techniques and modeling to solve and understand key issues. Basic Excel skills are required. The use of model-assisted decision making is emphasized. Restriction: Restricted to graduate majors and

NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.  
**Semester Hours:** 3 to 3

### **BUSN 6640 - Financial Management**

This course is concerned with the business firm's decisions to make investments and to finance its operations. Students learn to use the tools and theories underlying business valuation, cost of capital, capital budgeting and capital structure. Students will learn to evaluate a firm's financial position through the examination of its financial statements and to prepare pro forma statements for the firm. Prereq: BUSN 6550 with a grade of C or better. Coreq: BUSN 6530 or FNCE 6290 or BANA 6610 and BUSN 6620 or BUSN 6621. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6710 - Strategic Management**

Concerned with the development of a general management perspective in establishing the strategic direction for an enterprise. Students gain an understanding of strategy formulation and implementation within the context of the global environment. Emphasis is on the integration of knowledge acquired in the previous functional area courses. Note: This course is intended as a final semester Capstone course. Coreq: BUSN 6560 or 6561, BUSN 6630 or BUSN 6631; and BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6711 - Strategic Management (Health Section)**

Concerned with the development of a general management perspective in establishing the strategic direction for a health delivery organization. Students gain an understanding of strategy formulation and implementation within the context of the managed care environment. Emphasis is on the integration of knowledge acquired in the previous functional area courses. Note: This course is intended as a final semester course. Required of Health Administration majors. Coreq: BUSN 6560 or BUSN 6561, and BUSN 6640. Restrictions: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6800 - Topics In Business**

Current topics in business are occasionally offered. Prerequisites vary depending on the material covered. Consult the current 'schedule planner' for specific offerings and prerequisites. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 3 to 3

### **BUSN 6807 - Analyzing Emerging Opps & Planning During Uncertain Time**

To develop strategic thinking and practical planning skills. Prepare students for the dynamic and uncertain business environ bus prof face today. More specifically, we explore how to think

innovatively and spot trends, develop formal business plans around emerging opportunities, address uncertain and volatile situations using scenarios. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6811 - IT and New Business Paradigms**

Introduces graduate students to the relationship between information technology and the other functional areas of the business. During the course, students have an opportunity to listen and learn from guest speakers who have been involved with either guiding or interpreting the impact of information technology among functional areas of existing or new business. Through the use of current readings, guest lectures and case analysis, students examine various models of IT and new business paradigms to determine the decisions and success criteria for integrating It in ongoing business. a unique feature of the class will be the opportunity for students to present proposals and projects to be critiqued by individuals with It or business experience. Those individuals provide feedback and perspectives regarding potential It or new business paradigm activities. Prereq: Permission of instructor. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6812 - Business Intelligence and Analytics**

This course covers the collection of computer technologies that support decision making. These technologies have had a profound impact on corporate strategy, performance, and competitiveness. These techniques broadly encompass analytics, business intelligence, and decision support systems. The discussion is organized around key enablers of the three types of analytics (1) descriptive analytics including data warehousing, business reporting, decision dashboard/ scorecards, visual analytics, (2) predictive analytics including Web Analytics, Web Mining and Social media Analytics, and (3) prescriptive analytics including decision analytics and big data analytics. The course concludes with emerging trends and topics in business analytics, including geospatial in analytics, location-based and consumer-oriented analytical applications, mobile platforms, and cloud-based analytics. The recommended prerequisite for this course is ISMG 6080. If you are familiar with database management systems and have worked with such systems (e.g., ACCESS) in the past, you satisfy the prerequisite requirements for this course. Cross-listed with ISMG 6220. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BUSN 6840 - Independent Study**

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 8 Credits. **Semester Hours:** 1 to 3

### **BUSN 6860 - Finance in the Sports Entertainment Industries**

This course explores the problems and solutions of financing in sports and entertainment business. It focuses on stadium/venue financing, sports team valuation, entertainment event guarantee estimation, player/artist salary issues and managing disparate revenue streams. The course utilizes speakers, articles, problem sets and cases. Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **Business Analytics**

### **BANA 2010 - Business Statistics**

Basic principles of probability and statistics with applications in business. Includes descriptive statistics, probability and probability distributions, data collection, sampling distributions, statistical inference, simple regression and the use of a computer to perform statistical analysis. Students are required to present their analyses in written and/or oral form and defend their conclusions. This is a business core course. Therefore a grade of a 'C-' or better must be earned to satisfy Business graduation requirements and prerequisites for other business courses. Prereq: MATH 1070, or MATH 1060, or MATH 1080, or MATH 1110, or MATH 1120, or MATH 1130, or MATH 1401 with a grade of C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 3000 - Operations Management**

Introduces the concepts and methods commonly used in manufacturing and service operations. Topics include aggregate planning, inventory control, scheduling, quality control, and linear programming. This is a business core course. Therefore a grade of a 'C' or better must be earned to satisfy Business graduation requirements. Prereq: BANA 2010 and ACCT 2200 both with a grade of 'C-' or higher. Restriction: Restricted to undergraduate students at a junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 4840 - Independent Study**

Restriction: Restricted to undergraduate Business majors with junior standing or higher. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **BANA 4950 - Special Topics in Business Analytics**

Course offered on an irregular basis for the purpose of presenting new subject matter in Business Analytics. Prereq: Will vary depending upon the particular topic and instructor. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 5939 - Internship**

Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **BANA 6610 - Statistics for Business Analytics**

Provides a conceptual overview of statistical thinking and its applications to business problems. Topics include descriptive statistics, data exploration, probability, inferential methods, regression analysis, classification, regression with high dimensional data, etc. Students gain hands-on experience with data analytic problems via projects using real business settings and data. Restriction: Restricted to MS BANA majors within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6620 - Computing for Business Analytics**

Introduces database and modeling software used by business analytics professionals. Includes querying relational databases, state-of-the-art statistical freeware, and modeling software. Students learn to obtain, organize, and store data needed for analytics projects, undertake data cleansing for big data tasks, and conduct statistical data visualization. Restriction: Restricted to BANA-MS students within the Business School. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6630 - Time-Series Forecasting**

Time series analysis is critical to industries such as finance, marketing, retail, and accounting. This course introduces time-series models with emphasis on their practical applications in business. The goal is to show how dynamic financial and economic data can be modeled and analyzed using proper statistical techniques. The topics include methods for trend and seasonal analysis and adjustment, modeling and forecasting with autoregressive moving average (ARMA) processes, and model identification and diagnostics for time series. Other subjects include volatility and state space models. This course provides hands-on experience by pairing lectures on methodology with lab sessions using R to perform real-world data analyses. If you do not meet the prerequisites you may contact the instructor for permission to register. Prereq: BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Note: Can only receive credit for either BANA 6630/DSCI 6230. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6640 - Decision Analysis**

Introduces a quantitative approach to business decision making under conditions of risk and uncertainty. Emphasis will include introductions to decision analysis theory, risk analysis, utility theory, multi-criteria decision making, Bayesian decision analysis and hierarchical structured models. Psychological issues and qualitative approaches in the decision-making process will be discussed. Student computer-assisted projects are included. Prereq: BANA 6610 or permission from instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **BANA 6650 - Project Management**

Introduces the topic of Project Management (PM) in a business environment. Emphases will include the knowledge, skills, tools, and techniques as presented in the Project Management Body of Knowledge (PMBOK), a variety of managerial aspects commonly encountered in PM, and current extensions of PM. Projects in diverse contexts are examined. Cross-listed with URPL 6249. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **BANA 6660 - Predictive Analytics**

Addresses statistical and machine-learning approaches to prediction using the very large data sets increasingly common in business applications such as internet-based business, fraud detection, credit scoring and market segmentation. Methods covered in the course include data partitioning, logistic regression, clustering, decision trees, dimension reduction, and neural networks, among others. Emphasis is placed on proper choice of method and understanding of the strengths and limitations of competing methods. Students are expected to analyze and report on a variety of data sets drawn from business application areas. If you do not meet the prerequisites listed, you may contact the instructor for permission. Prereq: BANA 6610  
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **BANA 6670 - Prescriptive Analytics with Optimization**

Optimization is a key part of Business Analytics dealing with decision problems that lend themselves to modelling and analysis designed to determine optimal decisions. In this course, we'll study methodologies for determining the best course of action in situations with a large number of alternatives, each with their own financial or other characteristics, including restrictions on our actions that must be satisfied as we search for best solutions. While the focus of the course is on modeling and solving a wide variety of optimization problems, we'll also cover the basic mathematical underpinnings of linear programming, the most widely used form of optimization in industry and government and the foundation of many extensions into other classes of optimization. State of the art Software for solving optimization problems will be used throughout the course. Students will work in teams on a project involving optimization and some important problem. Restriction: Restricted to BANA-MS students within the Business School. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

## **BANA 6680 - Optimization for Machine Learning**

This course will give an introduction on numerical optimization algorithms in the context of machine learning applications. We shall discuss how optimization problems arise in machine learning and what makes them challenging. Topics include traditional nonlinear optimization, linear optimization and discrete optimization with an emphasis on effective computational techniques. We shall also talk about next generation large-scale machine learning algorithms

such as stochastic gradient (SG) method. Applications to a variety of areas such as text mining and neural networks are also stressed through class projects. Problems will be solved using appropriate software tools. Prereq: BANA 6620 and BANA 6670. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6690 - Network Modeling**

This course introduces network modeling. Utilizing data and metadata, programming, algorithms, statistical analysis, and visualization; networks are studied. The focus is on Business Applications to provide managerial insights and recommendations and will include transportation, social, transactional, electrical and communication networks. Prereq: BANA 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6720 - Simulation Modeling**

Students learn to model and analyze complex dynamic systems using state-of-the art software. Illustrative application areas include production systems, service systems, distribution systems and health care systems. Topics include creating reliable simulation models, analyzing the input and output from the model, and managing simulation projects. A substantial part of the course will be devoted to student projects where students define, model and analyze a significant system of their choosing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6730 - Supply Chain Analytics**

Introduces the design, analysis, management, and control of supply chains. Because of continuing advances in globalization, sustainability, and information technology, course emphasis will include integration of processes and systems, relationship management of upstream and downstream players, and strategies that incorporate current and future trends. Cross-listed with INTB 6730. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6740 - VBA for Business Analytics**

This course teaches the essentials of Visual Basic for Applications (VBA), the programming language for Microsoft Office. Focus in using VBA as a tool to automate common tasks and to create business analytic applications. Goal is to hide the details of the analytical and modeling techniques by creating user interfaces for inputs and then presenting managerially relevant results. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6750 - Large-Scale Optimization Methods for Big Data**

Optimization methodologies comprise one of the major components of modern business analytics. In the era of big data where problem scale is enormous, the ability to model and solve large-scale problems is increasingly important. In the first part of this course we will learn how to model and solve large scale applications by using the AMPL modeling language and solvers such as CPLEX and Gurobi. The second half of the course will be devoted to working on projects. Prereq: BUSN 6630 with a grade of "C" or better. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **BANA 6760 - Data Visualization**

The course equips the Business Analyst with foundational concepts and techniques required for telling a compelling story with large complex data sets. The importance of visualizing information for many analysts is often overlooked or downgraded as a natural product of the analytics or model but if the visualization is ineffective the decision making processes and knowledge discovery will be compromised. This is a project-based course that begins with reviewing concepts of human perception and cognition and perceptual accuracy and preferences. In the weeks we have together we will explore the basics of graphic design and making a "good" graph, explore why some data visualizations present information effectively and others do not, and we will also consider visualization as a component of systems for the Data Scientist and Business Analyst and presents examples of EDA (exploratory data analysis), visualizing time, networks, and maps. We end by reviewing methods and tools for static and interactive graphics. Tableau or other cutting-edge software will be utilized. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BANA 6800 - Special Topics**

A number of different current topics in business analytics are discussed in this course. Consult the current schedule for semester offerings. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 3 to 12

### **BANA 6840 - Independent Study**

Instructor approval is required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **BANA 6910 - Business Analytics Practicum**

Students apply business analytics methodologies to a real-life business problem in cooperation with a local organization. Under the supervision of faculty, students engage in problem

definition, analysis and solution. Results are presented in oral and written form to the sponsoring organization. Because the practicum is a capstone course, it is not appropriate for students just beginning the program. Prereq: Will vary depending upon the particular topic (consult the schedule of classes). Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **Business Law**

### **BLAW 3050 - Business Law and Ethics**

Students are taught to identify & resolve legal and ethical issues. Topics include contracts, torts, criminal law, constitutional law, business organizations, employment law, intellectual property and real property law. This is a business core course therefore a grade of "C" or better must be earned to satisfy Business graduation requirements. Restriction: Restricted to undergraduate students at a junior standing or higher. Cross-listed with BLAW 3000, ENTP 3120, and BLAW 4120. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BLAW 3100 - Legal and Ethical Implications of Risk**

Topics include contracts, torts, constitutional law, intellectual property, agency, business organizations, employment law, and real property law. Special focus is placed on the relationship between insurance and risk and the topics covered. May be taken in lieu of BLAW 3050. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BLAW 4121 - Legal and Ethical Implications of Risk**

Skills in legal and factual analysis and the application of ethical theories are advanced and refined through cases. Topics: insurance law, personal property and intellectual property law, agency, business entities, securities, employment law, and consumer law. Focus is placed on the relationship between insurance, risk and the covered topics. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **BLAW 4140 - Negotiation Skills/Property: Effective Strategies**

Course covers real and personal property law, including ownership, title, landlord/tenant, easements, environmental law, and zoning. Emerging issues in intellectual property are also reviewed, including U. S. law and international treaties and agreements. Negotiation techniques through role-playing are emphasized. NOTE: This course is an elective course and may not be used to fulfill the CORE BLAW 3050 course. Meets concurrently with MGMT 4140. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **BLAW 6500 - Legal Issues for CPA's**

Examines advanced legal issues affecting accounting financial reporting. Designed for graduate students who want to understand and improve the links between accounting disclosures and legal requirements. Note: This class is rarely offered. Prereq: BLAW 3000 or BUSN 6540 (or equivalent). Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **Chemistry**

### **CHEM 1000 - Foundations for General Chemistry**

This is a lecture- only course intended for students pursuing a degree in science or a health-related field. The course is designed for students who have never had a chemistry course or who have not taken general chemistry in 5+ years. Topics include the classification of matter, the Metric system, dimensional analysis, atomic theory and the structure of atoms, periodic relationships, energy and temperature, gas laws and the kinetic molecular theory, compounds and nomenclature of inorganic compounds, the mole, stoichiometry, types of chemical reactions, balancing equations, electron configurations, and chemical bonding. Enrollment in this course is strongly encouraged prior to enrollment in Chem 2031 if the student does not have a strong and recent background in general chemistry. Note: College Algebra or the equivalent is strongly recommended for optimal student success. Students may not receive credit for this course if they have already received credit for CHEM 2031 and CHEM 2061. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 1474 - Core Chemistry: Chemistry for Everyday**

Focuses on the common household chemicals that affect us on a daily basis. Students explore current topics in chemistry and the underlying chemistry of nuclear power, plastics, sunscreens, food, acid rain, etc. Home-based laboratory experiments with safe, common substances. No co-credit: Students may not receive credit for this course if they have already received credit for CHEM 2031 and CHEM 2061. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1. **Semester Hours:** 4 to 4

### **CHEM 1494 - Forensic Chemistry**

This one semester chemistry lecture and laboratory course is designed to engage a non-science major through the high-interest topic: criminal investigations. In this course, using the theme of forensic science students will be introduced to a basic understanding of chemistry, the physical and chemical properties of matter, simple types of chemical reactions and equations, and molecular structure of drugs and biomolecules. Note: Two years of high school science and one year of high school algebra are strongly recommended for optimal success. Students will not

receive credit for this course if they have already received credit for CHEM 2031 and CHEM 2061. Term offered: spring, summer. Max Hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 1575 - Chemistry: History and Policies**

A study of the building blocks of all matter: chemicals. A focus on how the study of chemistry began and how it has changed over the course of history. The course explores how chemistry has impacted man from the earliest times: from the Bronze Age to the present and beyond. Students learn about the first use of manufactured chemical substances in history and the progression of chemical knowledge throughout history. Students also study how certain substances introduced into the environment throughout history have affected the environment and what policies have been put in place to control or remediate the release of these substances. Eight home-based laboratory experiments will be performed during the semester. High school algebra is strongly recommended preparation for this course. Math concepts critical for this course include basic operations—addition, subtraction, multiplication and division, order of operations, exponents, square roots and the ability to rearrange and solve algebraic equations. Term offered: fall. Max Hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 2031 - General Chemistry I**

This is the first of a two semester sequence designed for students pursuing a degree in science or a health related field. Chem 2031 is designed for students who have recently completed high school chemistry or Chem 1000 with a C- or better. Note: Non-science majors should review the course description for Chem 1474 as an alternative, non-majors science CU Denver Undergraduate Core course, with lab credit. Topics covered include the classification of matter, the Metric system, dimensional analysis, atomic theory and the structure of atoms, periodic relationships, empirical formulas, thermochemistry, gas laws and the kinetic molecular theory, compounds and nomenclature of inorganic compounds, the mole, balancing equations, stoichiometry, types of chemical reactions, solution stoichiometry and dilutions, electron configurations, chemical bonding, Lewis Dot Theory, Valence Shell Electron Pair repulsion Theory, and other topics as time allows. This course is a prerequisite or co-requisite for General Chemistry 1 Lab, Chem 2038. No co-credit with CHEM 2081. Note: a beginning course for science majors, medical technologists, pre-medical and pre-dental students. It is strongly recommended that students have taken CHEM 1000 and MATH 1110 or their high school equivalents to be adequately prepared to succeed in this course. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2. **Semester Hours:** 3 to 3

### **CHEM 2038 - General Chemistry Laboratory I**

Laboratory course designed to accompany Chem 2031. Topics include gravimetric analysis, statistical analysis, stoichiometry, Avogadro's number, thermochemistry, atomic spectroscopy, paper chromatography, and gas laws. No co-credit with CHEM 2088. Coreq: CHEM 2031 or CHEM 2081. Term offered: fall, spring, summer. Max hours: 1 Credit. GT: Course is approved by

the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1. **Semester Hours:** 1 to 1

### **CHEM 2061 - General Chemistry II**

This is a continuation of Chem 2031 and is the second course of a two semester sequence designed for students pursuing a degree in science or a health related field. CHEM 2061 builds upon the understanding of chemistry rooted in the molecular nature of matter and change from General Chemistry I and expands to include topics such as intermolecular forces, solution chemistry, kinetics, chemical equilibrium, acid-base chemistry, buffer chemistry, solubility, thermodynamics and time permitting, electrochemistry. Specific topics include: the use of bonding theories to explain the relationships between atomic structure, molecular shape, and macroscopic properties of matter including boiling point, vapor pressure, surface tension, viscosity, and capillarity; the understanding of molecular structure to explain the energetics of solution formation as well as vapor pressures of pure liquids and solutions; the application of rates of reactions to define the state of equilibrium; the application of problem solving techniques for systems at equilibrium to acid/base and solubility chemistry; and the thermodynamic underpinnings of chemical reaction rates and the spontaneous conversion of chemical species to attain a state of dynamic equilibrium. This course is a prerequisite or co-requisite for General Chemistry II Lab, Chem 2068. Prereq: CHEM 2031 or 2081 with a C- or higher. No co-credit with CHEM 2091. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2. **Semester Hours:** 3 to 3

### **CHEM 2068 - General Chemistry Laboratory II**

Laboratory course designed to accompany Chem 2061. Topics include colligative properties, spectroscopic analysis, kinetics, equilibrium, acid-base chemistry, titrations, and qualitative analysis of metal cations. No co-credit with CHEM 2098. Prereq: CHEM 2038 or 2088 with a C- or higher. Coreq: CHEM 2061 or 2091. Term offered: fall, spring, summer. Max hours: 2 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1. **Semester Hours:** 2 to 2

### **CHEM 2081 - Honors General Chemistry I**

Topics include gas laws, thermochemistry, the quantum mechanical model of the atom, periodic properties, bonding and molecular geometry and intermolecular forces. Prepares students to take upper division chemistry courses. Honors section: Course assumes knowledge of stoichiometry and basic atomic structure. Note: Students may not receive credit for this course if they have already received credit for CHEM 2031. Prereq: Admission into specific CU Denver program or consent of instructor is required to enroll. Working knowledge of high school algebra and advanced high school chemistry are required. Restriction: Restricted to Chemistry Honors students (CH01). Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CHEM 2088 - Honors General Chemistry I Laboratory**

Laboratory experiments on topics covered in CHEM 2031 or CHEM 2081, gaining experience in observing, recording, and interpreting physical and chemical phenomena. Offers smaller sections and greater access to specialized techniques, open ended experiments, and instrumentation, requiring a faster pace and more sophisticated work. Note: Students may not receive credit for this course if they have already received credit for CHEM 2038. Prereq: Admission into specific CU Denver program or consent of instructor is required to enroll. Coreq: CHEM 2031 or CHEM 2081. No co-credit with CHEM 2038. Term offered: fall. Max hours: 2 Credits. **Semester Hours:** 2 to 2

## **CHEM 2091 - Honors General Chemistry II Lecture**

Continuation of CHEM 2081. Additional topics may include kinetics, equilibria and thermodynamics. Note: Students may not receive credit for this course if they have already received credit for CHEM 2061. Note: Admission into specific CU Denver program or consent of the instructor is required. Prereq: CHEM 2081 or 2031 with a C- or higher. Restriction: Restricted to Chemistry Honors students (CH01). No co-credit with CHEM 2061. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CHEM 2098 - Honors General Chemistry II Laboratory**

Students perform laboratory experiments on topics covered in General Chemistry II (CHEM 2061) or the companion Honors General Chemistry II course. Students gain experience in observing, recording, and interpreting physical and chemical phenomena. Honors General Chemistry II Laboratory is distinguished from the regular General Chemistry Laboratory by smaller sections, and greater access to specialized techniques, open ended experiments, and instrumentation. Students use the laboratory skills they developed in Honors General Chemistry I Laboratory to work independently with a special emphasis on recording, interpreting, and expressing data, chemical safety, the scientific literature, innovation in the laboratory, and presentation of scientific information in oral and poster formats. Prereq: Admission into specific CU Denver program or consent of instructor is required to enroll. Prereq: CHEM 2038 or CHEM 2088. Coreq: CHEM 2091 or CHEM 2061. Restriction: Restricted to Chemistry Honors Students. No co-credit with CHEM 2068. Term offered: spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

## **CHEM 2300 - Nutritional Chemistry**

Introduces nutrition intended primarily for majors in nursing, physical therapy, physical education. Topics include structure and metabolism of carbohydrates, lipids and proteins, functions of vitamins and minerals and food constituents. Prereq: CHEM 1000 or CHEM 1474 or CHEM 2031 with a C- or better. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CHEM 2600 - Introductory Topics in Chemistry**

This course is designed primarily for non-chemistry majors. Students will explore a special topic related to chemistry or biochemistry. A description of topics to be covered in the current semester is maintained on the Chemistry department website. Max hours: 6 Credits.

**Semester Hours:** 1 to 3

## **CHEM 2840 - Independent Study: CHEM**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer.

Repeatable. Max Hours: 3 Credits. **Semester Hours:** 1 to 3

## **CHEM 3011 - Inorganic Chemistry**

The fundamentals of inorganic chemistry, including: atomic, molecular and crystal structures; the energetics of reactions, acid-base interactions; and the chemistry of main group and transition metal elements, including coordination and organometallic chemistry. Prereq or Coreq: CHEM 3421 or 3491 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

## **CHEM 3018 - Inorganic Chemistry Laboratory**

Combines theoretical concepts with hands-on laboratory experience and introduces students to modern inorganic chemistry. Experiments cover both main group and transition metal chemistry with an emphasis on synthesis, characterization, and application of inorganic compounds. Prereq or Coreq: CHEM 3011 with a C- or higher. Term offered: spring. Max hours:

2 Credits. **Semester Hours:** 2 to 2

## **CHEM 3111 - Analytical Chemistry**

Topics include sampling, volumetric analyses, instrumental analyses and statistical treatment of data. Note: Lecture course for chemistry, biology, medical technology and environmental students. Prereq: CHEM 2061 or CHEM 2091 with a C- or higher. Term offered: fall. Max hours:

3 Credits. **Semester Hours:** 3 to 3

## **CHEM 3118 - Analytical Chemistry Laboratory**

CHEM 3118 provides a strong background in those chemical principles that are particularly important to analytical chemistry, such as the ability to obtain high-quality analytical data. Students gain experience with techniques of sampling and analysis, including an introduction to instrumental methods. Additionally, students develop the skills needed to solve analytical problems in a quantitative manner, with the aid of spreadsheet tools. The post laboratory

assignments demonstrate a writing process that follows the guidelines of the American Chemical Society. Note: Laboratory course to be taken concurrently with CHEM 3111. Prereq: CHEM 2068 or CHEM 2098 with a C- or higher. Coreq: CHEM 3111 or CHEM 3481. Term offered: fall. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 3411 - Organic Chemistry I**

Lecture course for science majors. Topics covered include Structure and Bonding, Stereochemistry, Alkanes, reactions of alkenes, alkyl halides, alcohols and other functional groups, reaction mechanism and spectroscopy. Prereq: CHEM 2061 or 2091 with a C- or higher. No co-credit with CHEM 3481. Term offered: fall, spring, summer. Max hours: 4 Credits.

**Semester Hours:** 4 to 4

### **CHEM 3418 - Organic Chemistry Lab I**

Laboratory course for science majors. Topics include methods of purification, separation and analysis of organic compounds; organic reactions and workups and spectroscopy. Emphasis on scientific writing. Prereq: CHEM 2068 or 2098 with a C- or higher. Coreq: CHEM 3411 or CHEM 3481. No co-credit with CHEM 3488. Term offered: fall, spring, summer. Max hours: 1 Credit.

**Semester Hours:** 1 to 1

### **CHEM 3421 - Organic Chemistry II**

Lecture course for science majors. A continuation of Chem 3411. Topics covered include spectroscopy, aromaticity, reactions of alkynes, conjugated dienes, benzene, benzene derivatives, aldehydes, ketone, carboxylic acids, carboxylic acid derivatives, enols, enolates and amines, reaction mechanisms and syntheses. Prereq: CHEM 3411 or 3481 with a C- or higher. No co-credit with CHEM 3491. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 3428 - Organic Chemistry Lab II**

Laboratory course for science majors. A continuation of CHEM 3418. Topics include analysis of organic unknowns, organic reactions and workups and spectroscopy. Emphasis on scientific writing. Prereq: CHEM 3418 or 3488 with a C- or higher; Coreq: CHEM 3421 or CHEM 3491. Note: Students will not receive credit for CHEM 3428 if they take it after successfully completing CHEM 3498. Term offered: fall, spring, summer. Max hours: 1 Credit. **Semester Hours:** 1 to 1

### **CHEM 3481 - Honors Organic Chemistry I**

Lecture course for science majors. An accelerated and in-depth approach to organic chemistry. Intended for chemistry majors and advanced premedical, pre-dental, pre-pharmacy and other health related careers requiring a full year of organic chemistry. Instructor permission required. Topics covered include Structure and Bonding, Stereochemistry, Alkanes, reactions of alkenes,

alkyl halides, alcohols and other functional groups, reaction mechanism and spectroscopy. Prereq: CHEM 2061 or CHEM 2091, and CHEM 2068 or CHEM 2098 with a C- or higher. Coreq: CHEM 3418 or CHEM 3488. Instructor permission required to enroll. No co-credit with CHEM 3411. Term offered: fall. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 3488 - Honors Organic Chemistry Laboratory I**

Laboratory course for science majors. Honors laboratory class to accompany CHEM 3411 or CHEM 3481. Topics include methods of purification, separation and analysis of organic compounds through extended experiments; organic reactions and workups and spectroscopy. Emphasis on scientific writing. Prereq: CHEM 2068 or CHEM 2098 with a C- or higher. Coreq: CHEM 3411 or CHEM 3481. Instructor permission required to enroll. Note: No co-credit with CHEM 3418. Term offered: fall. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 3491 - Honors Organic Chemistry II**

Lecture course for science majors. A continuation of Chem 3481. An accelerated and in-depth approach to organic chemistry. Intended for chemistry majors and advanced pre-medical, pre-dental, pre-pharmacy and other health related careers requiring a full year of organic chemistry. Instructor permission required. Topics covered include spectroscopy, aromaticity, reactions of alkynes, conjugated dienes, benzene, benzene derivatives, aldehydes, ketone, carboxylic acids, carboxylic acid derivatives, enols, enolates and amines, reaction mechanisms and syntheses. Prereq: CHEM 3411 or CHEM 3481 and CHEM 3418 or CHEM 3488 with a C- or higher and instructor consent are required in order to enroll in this course. No co-credit with CHEM 3421. Term offered: spring. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 3498 - Honors Organic Chemistry Laboratory II**

Laboratory course for science majors. A continuation of CHEM 3418 or CHEM 3488. Topics include multi-step organic reactions, workups and spectroscopy and an independent research project. Emphasis on use of the chemical literature, scientific writing and scientific presentation. Prereq: Students must be a Chemistry or Biochemistry major (CHEM-BS, CHEM-ADL, CHEM-BS2, BICM-BS or BICM-ADL). Students must have completed CHEM 3411 or CHEM 3481 and CHEM 3418 or CHEM 3488 with a C- or higher. Students must have completed CHEM 3421 or CHEM 3491 with a C- or higher or be co-enrolled. Others may be permitted by the instructor. Term offered: fall, spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 3810 - Biochemistry**

Introduces the principles of biochemistry for science and health science-oriented majors. This survey course covers the important aspects of modern biochemistry including macromolecular structure, enzymology, and metabolism in one semester. Prereq: BIOL 2061 or 2097 and CHEM 3411 or 3481 with a C- or higher. Term offered: fall, spring, summer. Max hours: 4 Credits.

**Semester Hours:** 4 to 4

### **CHEM 3840 - Independent Study**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 3

### **CHEM 3939 - Internship**

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have a junior standing and at least a 2.75 GPA and must work with the Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **CHEM 4110 - Advanced Analytical Chemistry**

Explores the fundamental principles of analytical chemistry. Topics will focus on meteorology (the science of making measurements), measurements based on energy transfer (e.g. spectroscopic analysis), and measurements based on mass transfer (e.g. chemical separations and electrochemistry). Requisite knowledge in Undergraduate Instrumental Analysis is assumed. Cross-listed with CHEM 5110. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4121 - Instrumental Analysis**

Surveys instrumental methods of analysis, emphasizing atomic and molecular spectroscopy, mass spectrometry, surface characterization, and chromatography techniques. Students are introduced to a wide array of powerful and elegant tools for obtaining qualitative and quantitative information about the composition and structure of matter. Prereq: CHEM 3111 or CHEM 3481, CHEM 3421 or CHEM 3491, PHYS 2331 or PHYS 2020 and CHEM 4521 with a C- or higher. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4128 - Instrumental Analysis Laboratory**

CHEM 4128 demonstrates a wide array of powerful and elegant tools for obtaining qualitative and quantitative information about the composition and structure of matter. The post laboratory assignments demonstrate a writing process that follows the guidelines of the American Chemical Society. Note: Required of chemistry majors and open to other students in CHEM 4121. Prereq: CHEM 3118 and 4538 with a C- or higher. Coreq: CHEM 4121. Term offered: spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 4310 - Advanced Organic Chemistry**

An exploration of structure, bonding and reactivity in organic modules that includes extensive analysis of the chemical literature, culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Organic Chemistry and Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 5310. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4421 - Cannabis Chemistry**

An exploration of the terpene to cannabinoid compounds including biosynthesis pathways; human receptor structures and mechanism; current analytical methods for Quality Assurance and Quality Control and current research in medical applications. Prerequisite: Organic Chemistry I with a C- or higher (Chem 3411 or Chem 3481), and corequisite/prerequisite: Organic Chemistry II (CHEM 3421 or CHEM 3491). Cross-listed with CHEM 5421. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4500 - Foundations of Physical Chemistry**

This course prepares students for CHEM 4511 and/or 4521. The goal is to bridge the gap between algebra- and calculus-based physics courses and to introduce essential math concepts and skills in Calculus III that are relevant to the Physical Chemistry course sequence 4511/4521. Pre: PHYS 2020 or (prereq or coreq) PHYS 2331, CHEM 3421 or CHEM 3491 and MATH 2411 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4510 - Computational Chemistry**

Classical and ab initio molecular dynamics are covered from theory to application. Students have access to high-performance computational resources and cover current topics in the field. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Cross-listed with CHEM 5510. Term offered: fall. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4511 - Physical Chemistry: Thermodynamics and Kinetics**

Includes study of the laws of thermodynamics, thermochemistry, chemical equilibria, solutions and statistical mechanics. Prereq: PHYS 2020 or PHYS 2331 with C- or higher and either (pre-requisite MATH 2421 Calculus III -OR- CHEM 4500 Foundations for Physical Chemistry with a C- or higher ) OR co-requisite/ pre-requisite MATH 3511 Mathematics of Chemistry with a C- or higher if completed before CHEM 4511. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4518 - Physical Chemistry Laboratory: Reaction Analysis**

Instruction in the experimental techniques of physical chemistry with emphasis on the properties of gases, thermodynamics and chemical equilibrium. Pre- or Co-Requisite CHEM

4511 with a C- or higher if completed before CHEM 4518. Term offered: spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 4521 - Physical Chemistry: Quantum and Spectroscopy**

Continuation of CHEM 4511, with emphasis on chemical kinetics, quantum mechanics, molecular structure and spectroscopy. Prereq: PHYS 2020 or PHYS 2331 with C- or higher and either (pre-requisite MATH 2421 Calculus III -OR- CHEM 4500 Foundations for Physical Chemistry with a C- or higher ) OR co-requisite/ pre-requisite MATH 3511 Mathematics of Chemistry with a C- or higher if completed before CHEM 4521. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4538 - Physical Chemistry Laboratory: Molecular Structure**

CHEM 4538 explores the central principles of physical chemistry, with emphasis on quantum chemistry, spectroscopy, and computational methods. The post laboratory assignments demonstrate a writing process that follows the guidelines of the American Chemical Society. Pre or Co-requisite CHEM 4511 or CHEM 4521 with a C- or higher if completed before CHEM 4538 Term offered: fall. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 4548 - Physical Biochemistry Laboratory**

Experimental techniques of physical chemistry emphasizing thermodynamics, kinetics, and spectroscopy of biological molecules. Fulfills the Physical Chemistry Lab requirement for Biochemistry Emphasis majors. Pre or Co-requisite CHEM 4511 or CHEM 4521 with a C- or higher if completed before CHEM 4548 Recommended Preparation: CHEM 4810. Term offered: spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 4600 - Advanced Topics in Chemistry**

Upper-level majors in chemistry or a related discipline explore a special topic in chemistry or biochemistry. A description of topics to be covered in the current semester is maintained on the Chemistry department website. Max hours: 6 Credits. **Semester Hours:** 1 to 3

### **CHEM 4610 - Understanding & Presenting Chemical Research**

This course will improve your ability to systematically search for chemical information, help you interpret the information you find, & improve your ability to summarize and present that information. Prereq: CHEM 2061 or CHEM 2091 with a C- or higher. Cross-listed with CHEM 5610. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits. **Semester Hours:** 1 to 2

### **CHEM 4655 - Teaching Assistant Bootcamp**

This course is 4-5 8-hour days of intensive training in suitable pedagogy for general chemistry and organic chemistry laboratory classes, procedures for teaching laboratory sections, and laboratory techniques. Students must have a teaching assistant contract with the Chemistry Department in order to take this course. Cross-listed with CHEM 5655. Term offered: fall. Repeatable. Max Hours: 1 Credit. **Semester Hours:** 1 to 1

### **CHEM 4700 - Environmental Chemistry**

A discussion of the sources, reactions, transport, effects, and fates of chemical species in the water, soil, and air environments. Prereq: CHEM 3111 or CHEM 3411 or CHEM 3481 with a C- or higher. Cross-listed with CHEM 5700. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4810 - General Biochemistry I**

In-depth introductory course for chemistry, science and health science majors. Topics include structure and energetics of proteins; mechanisms and kinetics of enzymes; structure and function of carbohydrates, lipids and nucleic acids. Prereq or Coreq: CHEM 3421 or CHEM 3491 with a grade of C- or higher. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4815 - Structural Biology of Neurodegenerative Diseases**

Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Prereq: 1) BIOL 2051 & BIOL 2071 or BIOL 2095 & BIOL 2096, and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Prereq or Coreq: PHYS 2020 or PHYS 2331 with a C- or higher. Cross-listed with CHEM 5815, BIOL 4815, and BIOL 5815. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4820 - General Biochemistry II**

Advanced course for chemistry, science and health science majors. Topics include energetics and pathways for metabolism of carbohydrates, lipids, and amino acids. Prereq: CHEM 3810 or 4810 or 5810 with a C- or higher. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4825 - Biochemistry of Metabolic Disease**

Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders. Prereq: 1) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher and 2) BIOL 2051 & BIOL 2071 or BIOL 2095 and BIOL 2096 with a C- or higher. Cross-listed with CHEM 5825, BIOL 4825 and BIOL 5825. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4828 - Biochemistry Lab**

Focuses on modern laboratory techniques for biochemical research, with an emphasis on methods for protein isolation, purification and characterization. Students perform experiments including chromatography, electrophoresis, molecular cloning, spectrophotometry, and enzyme activity assays. Prereq: CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Term offered: spring. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CHEM 4840 - Independent Study: Chem**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: Permission of instructor required. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits. **Semester Hours:** 1 to 6

### **CHEM 4845 - Molecular Modeling and Drug Design**

Advanced course in biochemistry. An introductory course on modern molecular modeling techniques and their applications to computer-aided rational drug design. Prereq: CHEM 3411 with a C- or higher and either PHYS 2020 or PHYS 2331 with a C- or higher. Cross-listed with CHEM 5845. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 4880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **CHEM 5010 - Advanced Inorganic Chemistry**

Covers the fundamental principles of inorganic chemistry. Topics include atomic structure and periodicity, molecular symmetry, bonding, structural chemistry, main-group chemistry, coordination chemistry, and organometallic chemistry. Requisite knowledge in Undergraduate Inorganic and Physical Chemistry assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4010. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5071 - RM-MSMSP: Atoms and Properties of Matter**

Systematic study of the structure of the atom, how atoms interact to form bonds, how matter behaves at the molecular level, the periodic table, and the macroscopic properties of matter. Concepts are linked to other scientific, mathematical, societal, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: Permission of project director. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 5072 - RM-MSMSP: Interactions of Elements and Compounds**

Systematic study of solubility (physical and chemical properties of solutions and the chemistry of acids, bases, pH, and buffer solutions), oxidation or reduction reactions, reaction energetics (thermodynamics and kinetics), and applications of chemistry to environmental, biochemical, and nutritional problems. Concepts are linked to other scientific, mathematical, societal, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: CHEM 5071 with a B- or higher. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 5073 - RM-MSMSP Research Experience for Teachers - Chemistry Cohort**

The Research Experience for Teachers (RET) program will be a five-week research exploration in which twelve RM-MSMSP teachers will raise their level of relevant scientific understanding by engaging in a "hands on" workshop, transforming what they have learned into new curricular materials that will improve the scientific abilities of their students and hopefully stimulate them to consider a STEM career. Note: Credit may not apply toward any CLAS degree. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **CHEM 5110 - Advanced Analytical Chemistry**

Explores the fundamental principles of analytical chemistry. Topics will focus on meteorology (the science of making measurements), measurements based on energy transfer (e.g. spectroscopic analysis), and measurements based on mass transfer (e.g. chemical separations and electrochemistry). Requisite knowledge in Undergraduate Instrumental Analysis is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4110. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5130 - Surface Analytical Techniques**

Surveys widely used techniques for surface analysis, including thermal desorption, mass spectrometry, X-ray photoelectron spectroscopy, and surface electrochemistry. Applications to catalyst and organic or biological surfaces are included. Requisite knowledge in Undergraduate Instrumental Analysis is assumed. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5221 - Practical Applications of Spectroscopy**

This course surveys spectroscopic methods in order to deduce the structure of organic compounds from an examination of spectra, with an emphasis on infrared spectroscopy, mass spectrometry, nuclear magnetic resonance spectroscopy, and ultraviolet spectroscopy. Students will be introduced to a wide array of powerful and elegant tools for obtaining qualitative information about the structure of matter. This course will require a good amount of thought, yet all of the concepts and associated mathematical manipulations are within the reach of a student who has met the prerequisites. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4221. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5250 - Chemometrics: Data Analysis**

Provides chemists and environmental scientists with the basic statistical skills for effective data analysis and experimental design. Minimal theoretical detail is provided; practical applications and graphical techniques are emphasized. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5310 - Advanced Organic Chemistry**

An exploration of structure, bonding and reactivity in organic modules that includes extensive analysis of the chemical literature, culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Organic Chemistry and Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4310. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5421 - Cannabis Chemistry**

An exploration of the terpene to cannabinoid compounds including biosynthesis pathways; human receptor structures and mechanism; current analytical methods for Quality Assurance and Quality Control and current research in medical applications. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4421. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5510 - Computational Chemistry**

Classical and ab initio molecular dynamics are covered from theory to application. Students have access to high-performance computational resources and cover current topics in the field. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4510. Term offered: fall. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5520 - Molecular Structure and Spectra**

Applies quantum mechanics to the understanding of molecular structure and spectroscopy. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5530 - Advanced Physical Chemistry**

Explores fundamental properties of molecules (bond length and strength, the potential energy surface, reaction rates, etc.) and examines how these properties are measured, using original literature as the primary source, and culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4530. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5550 - Applications of Group Theory in Chemistry**

Introduces the basic principles of the group theoretical method as well as its applications in organic, inorganic, and physical chemistry. Covers Mo's for main-group and transition metal compounds, ligand field theory, molecular vibrations, and electron absorption spectroscopy. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5600 - Graduate Topics in Chemistry**

Graduate students in chemistry or a related discipline explore a special topic in chemistry or biochemistry. A description of topics to be covered in the current semester is maintained on the Chemistry department website. Restriction: Restricted to degree-granting Graduate programs. Term offered: spring. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 3

### **CHEM 5610 - Understanding & Presenting Chemical Research**

This course will improve your ability to systematically search for chemical information, help you interpret the information you find, & improve your ability to summarize and present that information. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4610. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits. **Semester Hours:** 1 to 2

### **CHEM 5655 - Teaching Assistant Bootcamp**

This course is 4-5 8-hour days of intensive training in suitable pedagogy for general chemistry and organic chemistry laboratory classes, procedures for teaching laboratory sections, and laboratory techniques. Students must have a teaching assistant contract with the Chemistry Department in order to take this course. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4655. Term offered: fall. Repeatable. Repeatable. Max Hours: 1 Credit. **Semester Hours:** 1 to 1

### **CHEM 5700 - Environmental Chemistry**

A discussion of the sources, reactions, transport, effects, and fates of chemical species in the water, soil and air environments. Requisite knowledge in Undergraduate Organic and Analytical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4700. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5710 - Air Pollution Chemistry**

Chemical processes occurring in the atmosphere are discussed. Includes application to air pollution problems, including urban air pollution, air quality standards, non-urban air pollution, acid deposition, and stratospheric pollution. Requisite knowledge in Undergraduate Physical or Environmental Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5720 - Atmospheric Sampling and Analysis**

Fundamentals of environmental sampling specifically applied to the atmosphere are discussed. Includes a variety of techniques for the measurement of monitoring gaseous, semi-volatile and particulate air pollutants, techniques for the measurement of criteria pollutants, chemical and physical measurements of particulate and air toxins. Prereq: CHEM 5710 with a B- or higher. Restriction: Restricted to degree-granting Graduate programs or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5810 - Graduate Biochemistry I**

Topics include proteins, mechanisms and kinetics of enzymes, carbohydrates, lipids and membranes, nucleic acids, genetic engineering, signaling pathways, and energetics, which are integrated with critical analysis of recent journal papers, culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Organic Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Term offered: fall. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 5815 - Structural Biology of Neurodegenerative Diseases**

Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4815, BIOL 4815, and BIOL 5815. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5825 - Biochemistry of Metabolic Disease**

Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4825, BIOL 4825, and BIOL 5825. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5830 - Graduate Biochemistry II**

Topics include biosynthesis & metabolism of carbohydrates, lipids & amino acids, & genetic information flow of DNA replication, transcription, translation & regulation of transcription, which are integrated with critical analysis of recent literature, culminating in written & seminar presentations of individual projects. Continuation of 5810. Prereq: CHEM 5810 with a B- or higher. Restriction: Restricted to degree-granting Graduate programs or permission of instructor. Term offered: spring. Max hours: 4 Credits. **Semester Hours:** 4 to 4

### **CHEM 5835 - Biochemistry of Gene Regulation and Cancer**

Explores the biochemical and molecular aspects of cancer biology. Topics include DNA mutations and repair, gene regulation, oncogenes and tumor suppressors, stem cells and differentiation, and cancer drug development. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4835, BIOL 4835, and BIOL 5835. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5840 - Independent Study**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 3

### **CHEM 5845 - Molecular Modeling and Drug Design**

Advanced course in biochemistry. An introductory course on modern molecular modeling techniques and their applications to computer-aided rational drug design. Restriction: Graduate standing. Cross-listed with CHEM 4845. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHEM 5880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **CHEM 5939 - Internship**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **CHEM 5950 - Master's Thesis**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Max hours: 8 Credits. **Semester Hours:** 1 to 8

### **CHEM 6000 - Chemistry Seminar**

Faculty and student presentations of CU-Denver research projects and other current chemistry topics. Note: All chemistry students are encouraged to attend, but credit is given only to those who present seminars. Requisite knowledge in Undergraduate Physical or Environmental Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Term offered: fall, spring, summer. Max hours: 3 Credits. **Semester Hours:** 1 to 3

### **CHEM 6001 - Master's Research Seminar**

Students present a formal seminar to the department describing their master's research work. Note: Required for all students completing a thesis-based master's degree; optional for those completing master's projects. Prereq: CHEM 6000 with a B- or higher. Term offered: fall, spring, summer. Max hours: 1 Credit. **Semester Hours:** 1 to 1

### **CHEM 6002 - Chemistry Seminar I**

The art of listening to and giving a chemistry seminar. Introduces the chemical literature, the pedagogical techniques of seminar giving, and the critical thinking skills required to understand a technical presentation. Note: Seminar presentations by faculty, outside speakers, and advanced graduate students are analyzed by the students participating in the course. Restriction: Restricted to degree-granting Graduate programs. Max Hours: 1 Credit. **Semester Hours:** 1 to 1

### **CHEM 6003 - Chemistry Seminar II**

Students prepare and give a chemical seminar based on a literature paper. Note: Seminar presentations by students and outside speakers are analyzed by students in the course. Restriction: Restricted to degree-granting Graduate programs. Max Hours: 1 Credit. **Semester Hours:** 1 to 1

## **CHEM 6840 - Independent Study: CHEM**

Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

## **CHEM 6950 - Master's Thesis**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Max hours: 6 Credits.

**Semester Hours:** 1 to 6

## **CHEM 6960 - Master's Report**

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. **Semester Hours:** 1 to 6

## **Chinese**

### **CHIN 1000 - China and the Chinese**

A multidisciplinary introduction to Chinese society both past and present. Prehistory, birth of imperial China, literature, philosophy, religion, nationalism, revolution, modernization, contemporary life, social structure, gender, food, family life, population policy, ethnicity, popular culture, economics and politics. Note: This course is taught in English. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH1. **Semester Hours:** 3 to 3

### **CHIN 1010 - Beginning Chinese I**

A basic introduction to Chinese language and culture. Students study pronunciation, vocabulary, grammar and simple writing techniques. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. No previous study of Chinese is required. Term offered: fall. Max hours: 5 Credits. **Semester Hours:** 5 to 5

### **CHIN 1020 - Beginning Chinese II**

(Continuation of CHIN 1010.) Further practice of pronunciation, study of vocabulary, grammar, and simple writing techniques. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students

placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed CHIN 1010 or equivalent, or have taken one year of high school Chinese, or possess equivalent proficiency. A grade of C- or higher in CHIN 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 5 Credits. **Semester Hours:** 5 to 5

### **CHIN 1071 - Mandarin Chinese for the Professions**

Provides students with language skills and cultural knowledge in the context of conducting business with Chinese. Students develop elementary language skills for communication, cultural awareness and business etiquette via structured thematic units with business scenarios and simulations. Note: Chinese 1071 cannot be taken to fulfill language requirements; nor can it be used to substitute for Chinese 1010. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 2110 - Second Year Chinese I**

Continuing development of listening, speaking, reading, and writing skills in practical Chinese, with grammar review and introduction of the Chinese dictionary. In addition to contemporary Chinese, there is some emphasis on Chinese classical materials, such as proverbs. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed CHIN 1020 or equivalent, or have taken two years of high school Chinese, or possess equivalent proficiency. A grade of C- or higher in CHIN 1020 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 2120 - Second Year Chinese II**

(Continuation of CHIN 2110.) Satisfies the fourth semester language requirement at most graduate schools. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed CHIN 2110 or equivalent, or have taken three years of high school Chinese, or possess equivalent proficiency. A grade of C- or higher in CHIN 2110 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 2840 - Independent Study**

Term offered: fall, spring. Repeatable. Max Hours: 3 Credits. **Semester Hours:** 1 to 3

### **CHIN 2970 - Contemporary Chinese Cinema**

Introduces students to Chinese cinema, one of the most powerful and often controversial modes of representing society, culture, history and politics in China. Note: Taught in English. All films have English subtitles. No previous study of Chinese language or culture is required. Term offered: spring. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 3010 - Advanced Intermediate Chinese**

This course capitalizes on students' already acquired knowledge to further develop language skills in Mandarin Chinese. Students learn to make a transition from reading pedagogically prepared materials to more authentic ones. Note: this course assumes that students have passed CHIN 2120 or equivalent, or possess equivalent proficiency. A grade of C- or higher in CHIN 2120 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 3130 - Special Topics in Chinese**

Varying topics in Chinese language, literature and culture appropriate to the 3000 level, not otherwise covered by regular courses. Note: This course assumes that students have passed CHIN 2120 or equivalent, or possess equivalent language proficiency. Note: May be taken more than once, provided that the topic is different each time. Term offered: spring, fall. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 3 to 3

### **CHIN 3840 - Independent Study: CHIN**

Term offered: fall, spring. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 3

### **CHIN 4880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **CHIN 5100 - Methods of Teaching Chinese Immersion**

Provides students with an overview of teaching in an immersion environment in Mandarin Chinese. Topics include: immersion models, language/contents and culture, first and second language acquisition, curriculum design, national and state curriculum standards, program management and program assessment. Note: Taught in English. This course is not applicable

toward any degree in the College of Liberal Arts and Sciences. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 5690 - Methods of Teaching Modern Languages**

Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 4690. Term offered: fall. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 5691 - Methods of Teaching Modern Languages II**

A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CHIN 5880 - Directed Research**

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

## **Civil Engineering**

### **CVEN 1025 - Civil Engineering Graphics and Computer Aided Design**

Introduces microcomputer-based, menu-driven, 2-D and 3-D computer-aided design systems; standard Civil Engineering industry details and some three-dimensional modeling of solid objects; principles on engineering drawing and descriptive geometry with applications specifically geared for civil engineers. Prereq: High School Geometry and Algebra. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 1067 - Introduction to Civil Engineering**

Introduces civil engineering and the many career choices in this broad field. Covers the history of the profession, current civil engineering projects, societal and global implications, technologies used, professional ethics, sustainability, and licensure. Max hours: 1 Credit.

**Semester Hours:** 1 to 1

### **CVEN 1800 - Special Topics**

Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **CVEN 1840 - Independent Study**

This category is intended for topics which students may wish to pursue on their own initiative, with guidance from a professor who agrees to limited consultation on the work and to award credit when the project is completed. Departmental approval is required. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **CVEN 2121 - Analytical Mechanics I**

A vector treatment of force systems and their resultants; equilibrium of trusses, beams, frames, and machines, including internal forces and three-dimensional configurations, static friction, properties of areas, distributed loads and hydrostatics. Prereq: PHYS 2311 and MATH 2411. Cross-listed with MECH 2023. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 2200 - Computing Methods in Civil Engineering**

Introduces MATLAB computer programming for engineering applications. Students will learn programming concepts such as relational and logical operations, branching statements and loops. They will apply these concepts in the MATLAB platform to write programs to solve several engineering problems. Prereq: CVEN 1025 and MATH 2411. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 2212 - Engineering Surveying**

Survey observations used by engineers and surveyors using levels and total stations; adjustment of measured loops, traverses, areas and volumes; analysis of error sources; and presentation of results. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CVEN 2214 - Surveying for Engineering**

Survey observations used by engineers and surveyors using levels and total stations to make sure things are put in the right place and leveled; analysis and adjustment of measured loops, traverses; areas and volumes; methods used in construction; analysis of error sources; and presentation of results. This course does not include a lab. Max hours: 1 Credit. **Semester Hours:** 1 to 1

### **CVEN 2800 - Special Topics**

Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **CVEN 2840 - Independent Study**

This category is intended for topics which students may wish to pursue on their own initiative, with guidance from a professor who agrees to limited consultation on the work and to award credit when the project is completed. Departmental approval is required. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 6

### **CVEN 3111 - Analytical Mechanics II**

A vector treatment of dynamics of particles and rigid bodies, including rectilinear translation, central-force, general motion of particles, kinematics of rigid bodies, the inertia tensor, plane motion of rigid bodies; energy and momentum methods for particles, systems of particles and rigid bodies. Prereq: CVEN 2121. Cross-listed with MECH 2033. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3121 - Mechanics of Materials**

Mechanical properties of materials, stresses and strains in members subjected to tension, compression and shear, combined stresses, flexural and shearing stresses in beams, deflections of beams, column analysis, principal stresses. Prereq: CVEN 2121. Cross-listed with MECH 3043. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3141 - Introduction to Structural Materials**

To learn the fundamental characteristics of structural materials, including steel, concrete, masonry, timber, and composites; to learn how to test structural materials in the laboratory; and to learn how to interpret test data for engineering applications. After completing this course, students are expected to understand the behavior of structural materials and establish necessary background for structural design courses. Coreq: CVEN 3121. Max hours: 2 Credits. **Semester Hours:** 2 to 2

### **CVEN 3200 - Computational Methods for Civil Engineers**

This course introduces advanced programming and data analysis skills pertinent to the range of Civil Engineering disciplines. Topics will include numerical methods, statistical analysis, and programming techniques for measurements and data collection. Languages and tools will include Excel, Matlab, Python, and Arduino. Prereq: IWKS 2300 and MATH 3800 or CVEN 3611 with a C- or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3212 - Plane Surveying For GIS Majors**

This course will present the concepts and practical materials for surveying instruments, survey data collection methods and data processing with applications in GIS. It will cover the shape of the Earth theory, Map projections, Datum, 2D and 3D coordinate transformation methods and

coordinate geometry problems. Prereq: MATH 1401 and 2411. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **CVEN 3313 - Fluid Mechanics**

Fundamentals of fluid mechanics. Topics include fluid properties, hydrostatics, the continuity principle, the energy principle, the momentum principle, similitude and dimensional analysis, drag, and friction for laminar and turbulent flow in closed conduits. Prereq: CVEN 2121. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3323 - Hydrosystems Engineering**

This course covers hydrologic cycle, rain gage and stream gage, basics of rainfall and runoff data analysis, Rational method for peak flow predictions, culvert hydraulics with consideration of inlet and outlet control, sanitary sewer sizing, basics of open channel hydraulics. This course also includes a session of hydraulic experiment to measure the turbulent flow distribution in a steel pipe. Prereq: CVEN 3313. Coreq: CVEN 2200. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3401 - Introduction to Environmental Engineering**

An introductory course that provides a unique systems approach to environmental engineering, examining the source-to-receptor feedback loop for pollution control. Physical, chemical and biological processes are integrated across atmospheric, wastewater and subsurface systems. Laboratory exercises provide direct experiential learning of key concepts. Prereq: CHEM 1130 or CHEM 2031 or ENGR 1130. Cross-listed with CVEN 5401. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3414 - Water Supply and Distribution Systems**

Planning and design for potable water supply and distribution. Topics include the civil engineering design process, pressurized pipe networks, pump selection, water demand estimation, surface- and groundwater resources, and reservoir operation. Design project and field trip required. Prereq: CVEN 3313 with a C- or higher. Coreq: CVEN 2200. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3505 - Structural Analysis**

Principles of structural analysis applied to statically determinate and indeterminate structures. Prereq: CVEN 3121. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3602 - Transportation Engineering**

This course will introduce you to the concepts and methods of transportation engineering, planning and management. This course will emphasize traffic engineering. Topics will include vehicle dynamics, traffic flow fundamentals, accident analysis, signal timing, highway capacity analysis, level of service analysis, freeway operations, and evaluation procedures for alternative transportation projects. Prereq: C- or better in MATH 1401 or Junior Standing or instructor permission. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3611 - Engineering Statistics**

Covers statistical methods for engineering studies. Topics include common probability distributions, sample design, descriptive statistics, hypothesis testing of one or two populations, tests of discrete versus continuous random variables, analysis of variance, linear and non-linear multiple regression models, non-parametric tests of fit. Prereq: Math 1401 Calculus I and Math 2411 Calculus II. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3718 - Geotechnical Engineering I**

Soil formation, phase diagram, soil constituents and behavior, description of soils, classification, clay minerals, compaction, soil improvement, capillarity, shrinkage, swell, collapsible soil, frost action, flow through porous media, and consolidation. Lab experiments, including specific gravity, grain size analysis, liquid and plastic limits, and consolidation, are to be conducted in concert with the lectures. Prereq: CVEN 3121. Coreq: CVEN 3313. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 3800 - Special Topics: 3800**

Repeatable. Max Hours: 6 Credits. **Semester Hours:** 1 to 6

### **CVEN 3840 - Independent Study**

This category is intended for topics which students may wish to pursue on their own initiative, with guidance from a professor who agrees to limited consultation on the work and to award credit when the project is completed. Departmental approval is required. Repeatable. Max Hours: 9 Credits. **Semester Hours:** 1 to 8

### **CVEN 4025 - Autocad Civil 3d & Advanced Civil Engineering Graphics**

Lectures target civil engineering industry specific site information modeling software and geospatial industry specific geographical information systems software to elevate students' knowledge of each software to an in-depth understanding. Laboratory exercises will focus on civil drafting and design, producing documentation, and general project workflows. Additional laboratory exercises will focus on geospatial data creation, data management, and cartographic display. Prereq: CVEN 1025. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

## **CVEN 4067 - Senior Design Projects**

Senior civil engineering students, working in teams, are assigned significant open-ended design problems requiring the synthesis of material learned in previous engineering courses for solution. Design teams work independently under the supervision of a civil engineering faculty member. Prereq: Graduation Agreement and one design course. Co-req: A second design course. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CVEN 4077 - Engineering Economy**

Applies economic and financial principles to evaluation of engineering alternatives. Calculation of annual costs, present worth and prospective rates of return on investment. Review of systems analysis techniques, including simulation, linear programming, and project scheduling. Prereq: Junior standing. Cross-listed with MECH 4147. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CVEN 4087 - Engineering Contracts**

Laws met by the practicing engineer, types of contracts, specification writing, laws on contracts, agency, partnership, sales and property, with primary emphasis on rights and duties of the engineer. Prereq: Senior standing. Cross-listed with CVEN 5087. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CVEN 4230 - Construction Engineering Systems**

Course provides an introduction to construction engineering management including building mechanical and electrical systems. Restrictions: Restricted to Junior standing or higher. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CVEN 4388 - Site Engineering**

Course introduces the fundamentals of site engineering which require understanding and interpreting landforms, slopes, contour lines, grading, drainage, and earthwork to storm water management, hydrology reports, designing roadways, and street networks. Other topics include designing for ADA and concepts of sustainability in site design. Note: CAD experience is recommended. Cross-listed with CVEN 5388. Max hours: 3 Credits. **Semester Hours:** 3 to 3

## **CVEN 4424 - Field Methods for Sustainable Development: Colombia**

Course will introduce students to international sustainable development in both lab and field work in Colombia, partnering with communities on sustainable development projects across cultures and disciplines both within and outside of engineering, and emphasizing community interaction. Travel fees are required. Note: Personal essay, letter of recommendation, and

interview with instructor required. Cross-listed with CVEN 5424. Max hours: 3 Credits.

**Semester Hours:** 3 to 3

### **CVEN 4427 - Storm Water System Design**

This course covers urban watershed analysis, design rainfall and hydrologic losses, flood frequency and design event, rational method for peak runoff prediction, street hydraulic capacity and safety, culvert hydraulics, street inlet collection system, and storm sewer system design and flow analysis. Prereq: CVEN 3323 and senior standing. Restriction: Restricted to Civil Engineering majors. Cross-listed with CVEN 5427. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 4537 - Numerical Methods for Engineers**

Introduces numerical analysis. Solution of linear and non-linear equation systems. Numerical methods for ordinary and partial differential equations. Engineering applications. Prereq: CSCI 1410, MATH 3191 and 3200. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 4565 - Timber Structure Design**

Design of wood roof, wall, and floor systems including beams, columns, trusses, diaphragms and shear walls for vertical and lateral loads. Connection design, glued-laminated members, plywood, and engineered lumber are incorporated. Prereq: CVEN 3505 and CVEN 3141. Cross-listed with CVEN 5565. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 4575 - Structural Steel Design**

Design of structural steel members and their connections. Prereq: CVEN 3505 and CVEN 3141. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 4585 - Reinforced Concrete Design**

Ultimate strength methods for design of reinforced concrete structures. Prereq: CVEN 3505 and CVEN 3141. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 4590 - Design of Prestressed Concrete**

To learn the basic concepts of analysis and design of prestressed concrete, which is reinforced concrete in which steel is tensioned against the concrete, thereby introducing compression in concrete and hence overcoming the tensile weakness of concrete relative to its compressive

strength. Cross-listed with CVEN 5590. Prereq: CVEN 4585 or graduate standing. Max Hours: 3 Credits. **Semester Hours:** 3 to 3

### **CVEN 4602 - Highway Engineering**

Evaluates alternate highway routes. Discusses highway drainage, finance, maintenance, pavement design, traffic operations and principles of economic analysis. Analyses of the impact of the highway on the environment. Cross-listed with CVEN 5602. Prereq: CVEN 3602 with a C- or better. Restriction: Restricted to Civil Engineering majors. Max hours: 3 Credits. **Semester Hours:** 3 to 3
